As to definition of terms, it is unnecessary in such a gathering as this to define the business of life insurance; suffice it to say that, founded as it is on well-ascertained natural laws and on principles of finance, which, in their broad aspect, are of the simplest description, it has proved of untold blessing since its inception in providing funds in those times of need, which, sooner or later, come to most of the children of men.

It is difficult to express a similar appreciation of succession duty, or, in fact, of any kind of taxation. Succession duty may be defined as a tax on the succession to the estate of a deceased person by his beneficiaries or next of kin, the term "estate" including real and personal property of every description and every interest therein capable of being devised or bequeathed by will on the death of the owner to his heirs or personal representatives.

Originated in England

The imposition of this tax on the estate of a deceased person in the British Dominions dates back to 1780, when a duty was charged in England by the government of the day upon property devolving by will or intestacy (that is, in the absence of a will) to legatees or next of kin of a deceased person. The principal act dealing with this measure was the Legacy Duty Act of 1796 by which duty was charged on personal estate, that is on all the estate left by a deceased person except real estate, and it was charged only in cases where the deceased was domiciled in the United Kingdom. By the succession Duty Act of 1853 a tax was placed on the gratuitous acquisition of property which passed on the death of any person by means of a transfer from one person (called the predecessor) to another person (called the successor). Then came the well-known Finance Act of 1894 under the chancellorship of Sir William Harcourt [illegible] for payment of death duties and effecting large changes in the duties which had been hitherto imposed. Further amendments to this act were made in 1908. This is briefly the history of the succession duties in Great Britain.

In Canada succession duty is [illegible] and first made its appearance in Ontario [illegible] when it was introduced by the government to meet the growing expenditures of the province for the support and maintenance of such provincial institutions as the insane asylums, institutions for the blind and deaf mutes, and for other charitable and educational institutions. The large revenues which the act yielded in Ontario led the other provinces to follow her example, until every province in the Dominion has now a Succession Duty Act on its statute book. The highest rate of duty levied by any Canadian province is 35 per cent., this being the rate of duty charged by the province of Ontario on a legacy passing to a remote relative or stranger in blood of the deceased when the estate exceeds $800,000 in value; the lowest rate is ½ of 1 per cent., charged by the provinces of Saskatchewan and Alberta on an estate passing to the immediate relatives of a deceased person which exceeds $10,000 and does not exceed $17,000 in value. The aggregate revenue raised during the last three years by the nine provinces of the Dominion averaged a little over 6½ million dollars, almost one-half of this amount being raised in Ontario alone.

Exemptions of Life Insurance

When the Succession Duty Acts in some of the provinces were being framed special provisions were made with regard to payment of duty on life insurance funds.

Let us dip into these acts of the various provinces and see what they have to say in this regard, for in those provinces where exemption from payment of this tax on insurance moneys has been granted a talking point may be found for the alert agent.

Starting with Prince Edward Island, we find that this province has made no exemption for life insurance, the proceeds of all policies no matter how payable being subject to succession duty.

In Nova Scotia insurance moneys payable to certain beneficiaries are taken into account for the purpose of determining whether or not an estate is liable for succession duty. Where any moneys are received or are payable under a contract of insurance effected by any person on his life, have been made payable to or for the benefit of the grandfather, grandmother, father, mother, husband, wife, child, grandchild, daughter-in-law or son-in-law of the deceased, and the total amount of such insurance moneys does not exceed five thousand dollars, the money received [illegible] is not dutiable, although the rest of the estate is dutiable. When, however, such insurance moneys exceed five thousand dollars they are subject to duty. For example, an estate has assets of one thousand dollars and there is five thousand dollars of insurance, payable to a certain beneficiary, such as nephew, [illegible] or any other collateral relative or stranger in blood to the deceased, the thousand dollars is dutiable and the insurance moneys are not. Or take another case. An estate has assets of twenty-four thousand dollars and insurance amounting to six thousand dollars, payable to one or more beneficiaries, the assets and the whole amount of the insurance funds are both subject to duty. If the insurance had amounted to only five thousand dollars, the twenty-four thousand dollars would have been dutiable, but the five thousand dollars would have been exempt.

---

*An address before the Life [illegible] convention, Ottawa, August 18th [illegible].

New Brunswick and Quebec, like Prince Edward Island, have not yet given special treatment to life insurance in their Succession Duty Acts, all insurance moneys, when forming part of a dutiable estate being subject to payment of the duty, whether payable under the policy, will or any other document.

Taxable in Ontario

Under the Ontario Insurance Act insurance moneys, made payable to a preferred beneficiary, either by declaration of the assured or designated by him in his insurance policy, are not so long as the object of the trust remains, subject to the control of the assured or of his creditors and do not form any part of the deceased's estate. One would assume, therefore, that such insurance monys not forming any part of the estate would be exempt from payment of succession duty. This is not the case, however, for the Ontario government charges succession duties on all insurance moneys when they form part of a dutiable estate, no matter how they are made payable, on the ground that succession duty is not a debt of the deceased and the provincial treasurer, who collects the duty, is not a creditor within the meaning of this section of the Insurance Act. Until a few years ago Ontario exempted insurance up to five thousand dollars, but this exemption for some reason or other has been wiped out.

In Manitoba the question as to whether or not insurance moneys are liable to succession duty is determined by the manner in which these are made payable. Without any limitation as to the amount, when they are payable by the policy to the beneficiaries therein named, they are exempt from payment of duty, but when they are referred to in and distributed by the will of the deceased, or when they are made payable to him or to his estate, such insurance is subject to succession duty.

In the province of Saskatchewan no exemption is made from payment of succession duty on insurance moneys. Property passing on the death of the deceased for the purpose of charging duty includes money received or receivable under a policy of assurance effected by any person on his life where the policy is wholly kept up by him for the benefit of any existing or future donee, where nominee or assignee or for any person who may become a donee or a part of such money in proportion to the premium paid by him where the policy is partially kept up by him for such benefit.

Sunny Alberta is one of the provinces which has recognized the benefits of life insurance by exempting it from payment of succession duty in certain cases. Alberta exempts from payment of duty any life insurance moneys when these are made payable to or for the benefit of a husband, wife, child, grandchild or mother of the assured, or a part of such moneys in proportion to the premiums paid by the assured where the policy was partially kept up by him for such benefit. In a recent case which came before the Supreme Court of Alberta the question was raised as to whether the money payable on two policies of insurance on the life of a deceased person was or was not to be taken into account in deciding the question of the liability of his estate for succession duty collected on insurance moneys. The court held in the case in question that an insurance policy in favor of a wife who dies before the maturity of a contract becomes, under the Life Insurance Beneficiaries Act, one for the benefit of the children of the assured, and forms no part of the estate of the assured, but if the policy is payable to the insured's executors, administrators or assigns, if the wife be not living, such insurance goes to the executors of the will of the assured, forms part of his estate, and is, therefore, subject to payments of succession duty.

In British Columbia insurance moneys are liable for payment of succession duty when forming part of a dutiable estate. All property situate within this province liable for duty according to the act includes all policies of assurance wherever entered into or wherever payable.

Nova Scotia, Manitoba, Alberta—these, then, are the only three provinces of the Dominion in which life insurance receives special treatment in the matter of succession duty.

Practice in the United States

In many states of the United States of America the governments exempt the first $10,000, $15,000 or $20,000 of an estate before estimating its value for payment of the inheritance tax or succession duty. Such exemptions have not yet been recognized by our Canadian provinces. It may be that our provincial treasurers have not yet fully appreciated the extent of the increase of the cost of living in the past few years; they certainly have not in six of our provinces fully appreciated the part that life insurance plays in a man's estate. Some recognition is surely due to the peculiar position of life insurance funds. Intended primarily for the protection and support of one's dependents, it is often the only opportunity available for a man to create any estate at all, and some real service could surely be rendered by such an organization as the Life Underwriters' Association of Canada making representations on this subject to those provinces which do not exempt life insurance from payment of duty.

Exemption Limits and Rates

Before leaving this part of my subject it may be useful to incorporate in this paper a statement showing the amount in each province at which an estate becomes liable for succession duty when it passes to such near relatives of the deceased as husband, wife, child, the rate of duty and the period from the date of death in which the duty is payable.

Prince Edward Island	$10,000	2%	18 months
Nova Scotia	25,000	2½%	18 months
New Brunswick	25,000	1¼%	6 months
Quebec	20,000	1¼%	

Within thirty days of a statement of the duty payable being furnished to the executors by the collector, this statement being based on an inventory of the estate assets to be filed within three months from date of death.

Ontario	$25,000	1%	18 months
Manitoba	25,000	1%	6 months
Saskatchewan	10,000	½%	18 months
Alberta	10,000	½%	6 months
British Columbia	25,000	1½%	2 years

Having now learned what the various Succession Duty Acts have to say with regard to life insurance, let us turn to the practical side of our subject and see what part life insurance plays in the administration of an estate.

Policies are Always Good Assets

When a person has died and his estate falls to be administered, one of the first duties of the executor who takes the estate in charge, after reading the will, is to go carefully over the assets left by the deceased, noting, among other things, any insurance policies which may be found among the deceased's papers, and ascertaining if these are in force, and notifying the insurance companies interested of the death of the assured and of their appointment as the executor and trustee of the estate. The experienced executor knows that these insurance policies are among the most valuable documents left by the deceased. Proof of death and the right of the executors or beneficiaries to collect the proceeds of these policies is all that is required to turn them into cash. The question as to the ability of the insurance company to make immediate payment does not arise, nor does the necessity of having to sell the security on a low market in order to obtain funds, as may sometimes be the case with listed stocks. These features make life insurance policies of special value among the assets of an estate.

When a testator by his will has provided that his widow shall be entitled to the income only from his estate and the capital divided among his children or others on her death.

and has not specifically provided for payment of succession duty out of his general estate, then the duty is payable by the widow out of the income to which she is entitled within the time mentioned in the statute, namely, from six to eighteen months (with the exception of one province) from the death of her husband. The duty becomes a first charge against the income to which she is entitled and, therefore, no income can be paid to her until this charge has been first met. In such cases this is the only charge for succession duty against the estate until the death of the widow, when the estate is revalued, duty then charged on the balance of the estate and deducted from the shares of the remaining beneficiaries before payment to them of the same. Needless to say, payment of the duty by the widow out of her income causes considerable hardship and inconvenience. To maintain a family of, say, seven in number, a widow and six children, to provide food, clothing and education on the income from a $30,000 estate leaves little, if any, of a surplus, especially when no provision has been made for payment of succession duty out of the general estate. Many wills left by testators make no such provision, and the consequent hardship caused to the widow and family is very great. By the exercise of foresight in drawing a will and by the deceased providing sufficient insurance funds to meet such claims, this hardship and inconvenience could be avoided.

Insurance Useful in Many Ways

Then again, it is often of material benefit to an estate when insurance moneys are made payable to the executors of the deceased and not to beneficiaries named in the policy, especially in cases where the estate comprises assets which cannot readily be realized, such as unimproved real estate or unlisted stocks. In some instances executors of estates, and of fairly large estates at that, when they take over the administration of an estate find that there are no funds available for payment of taxes or for payment of claims, succession duty, etc., and in order to pay these it has been necessary for them either to advance the moneys out of their own pockets or to mortgage the real estate under their care. If the right to mortgage the real estate has not been conferred upon them by the will, it is necessary for them to make application to the court for an order giving them this right, with all the trouble and expense involved. These are cases in which the use of insurance moneys greatly facilitates the administration of an estate for the executors.

In one case the assets of an estate consisted of improved real estate right in the heart of Toronto. The circumstances were such that in order to pay succession duty the property had to be mortgaged in order to raise the funds necessary, whilst in another estate the assets consisted of a valuable subdivision on the outskirts of the city, which, for the same purpose, was required to be sold when there was a depression in the real estate market, the sale resulting in considerable loss to the estate.

Example of Hardship

Similar circumstances frequently present themselves in the estate of a business man, especially in cases where his whole assets are tied up in a business. Let us take the case of a man leaving an estate valued at, say, $160,000 in such shape. Under his will he has given his widow an annuity of $5,000, to a brother who has been associated with him in the business he has given a legacy of $15,000, and the remainder of his estate is bequeathed to his only son. The will directs that the business is to be continued until his son reaches the age of twenty-five years, when he is to become entitled to his father's share and take his place in the management. If the son does not wish to enter the business it is to be sold, the first option to purchase to be given to the testator's brother. Meanwhile the executors have some bills to meet. There are the personal obligations of the deceased, testamentary expenses, the $15,000 legacy to the brother, and in addition to these succession duties amounting to between $12,000 and $13,000. It is found that the executors have not the funds on hand to meet these obligations, and are placed in a very awkward position. To withdraw the funds from the business at a time when it has lost its executive head may involve a serious curtailment of its operations or serious financial embarrassment. But the executors are anxious to continue the business and carry out the wishes of the testator as expressed in his will, and so are obliged either to advance the funds themselves or to arrange a line of credit with the bank, neither of which propositions are very likely to be satisfactorily arranged.

Prevents Sacrifice of Business

Another instance arises when insurance moneys would have proved of real assistance to an estate is that of the case of a structural engineer. At the time of his death he had on hand several large contracts which he was carrying out with the assistance of the bank. In order to realize as much as possible for the estate and for the benefit of his widow and children the executors decided to complete these contracts. Arrangements with the bank entailed payment to them of all moneys received for the work as it progressed, and this left no funds available to the executors wherewith to pay succession duty or for the support of the dependents of the deceased, and it was only with great difficulty and after careful negotiation that arrangements were made with the bank whereby the executors were enabled to complete the contracts and finally wind up the estate with advantage to those interested. But in the meantime, what of the family? They had to wait pending the satisfactory outcome of these contracts, and naturally suffered much inconvenience. How much more satisfactory it would have been for the executors in both of these estates and for the estates generally if the testators had each carried insurance policies sufficient to meet such contingencies.

It is needless for me, in a gathering of the life underwriters of Canada, to elaborate on the benefit of life insurance. The gentlemen comprising this audience know a great deal more of the benefits of life insurance than does the speaker. I would not close this paper, however, without emphasizing the fact that the field for this class of life insurance is ever widening. As the result of the development of our young country, with its consequent increase in wealth, and the result of the increasing expenditures of our provincial governments, our Succession Duty Acts are being constantly revised and amended. With business conditions ever assuming a more complex character, there are innumerable opportunities for the agent who knows his ground and makes a close survey of his prospects to secure business in a lucrative field. More power, then, to your elbow "to advance the best interests of true life insurance!"

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station for the week ended August 20th.—

Dominion Reduction Co., 66,000; O'Brien Mine, 64,020; Northern Customs Con., 64,600; Nipissing Mine, 238,375; Coniagas Mine, 132,198. Total, 565,193. The total since January 1st is 15,605,390 pounds, or 7,802.6 tons.

NEW AUTOMOBILE FINANCING COMPANY

The Sterling Securities Corporation, Ltd., is the name of a company formed last week in Regina. Three hundred thousand dollars of stock will be issued at once, over half of this amount having been subscribed by directors and their friends. The main business of the company will be the discounting of conditional sale agreements created by the sale of automobiles, although the charter also calls for other forms of business. Premier Martin, of Saskatchewan, is president, the other directors being: Ald. W. E. Mason, discount company manager; Col. J. A. Cross, K.C.; H. W. Givens, mortgage company manager; Lorne Johnson, trust company manager; A. H. Tasker, farming and financial director; W. D. Craig, telephone contractor.

GOVERNMENT PUBLICATIONS ON THE DECREASE

Would-be Authors of Official Reports are Suppressed by Editorial Board—Important Saving in Expense

(Special to *The Monetary Times.*)

Ottawa, August 26th, 1920.

ONE of the greatest faults of the old Union government was its inability to keep in touch with public sentiment or to keep the public informed of what it did. Union government, as a matter of fact, instituted many reforms of which no one outside of Ottawa, or few in Ottawa, ever heard. One example is a reform in the publishing of government blue book bulletins, etc., which has saved the country probably a full quarter million dollars a year.

Anyone who knows anything about governments is aware of the colossal waste and extravagance in the issue of official documents. Every department turns out blue books by the thousands, and officials love to issue reports under their own signatures—it is only human. With the pressure for economy during the war and the shortage of paper, the Cabinet appointed a committee to consider ways and means of effecting savings. This committee brought in a drastic report, and as a result it was given, by order-in-council, full authority to handle all government blue books and publications. Under the order all blue books had to be approved and authorized by the committee, which was known as the editorial committee, with Fred Cook, assistant King's Printer, and an experienced newspaper man, in charge. The committee has made such savings and has brought about such economies that it has been made a permanent institution, with Mr. Cook as the head.

The following comparative tables give some idea of the achievements which the committee has been able to bring about in the reduction, both in the text of manuscript reports and the number of copies printed:—

Departmental Reports

	1915-16.	1917-18.	1918-19.
Number of copies	325,365	195,624	151,425
Number of pages	39,356	26,482	19,808
Total number of printed pages	210,007,404	105,261,128	55,742,120
Distribution to parliament	112,600	72,735	51,685
Distribution to departments	162,060	91,354	83,065
Stock	6,905	5,685	3,480
Sessional papers ..	43,600	25,850	13,225
Cost	$255,813	$196,285	$150,509

Supplementary Reports

The comparative figures of supplementary reports to parliament for the same years are:—

	1915-16.	1917-18.	1918-19.
Number of copies	222,085	123,075	56,080
Number of pages ...	19,508	13,168	5,776
Total number of printed pages	60,799,190	23,313,800	11,067,120
Distribution to parliament	67,950	49,050	17,950
Distribution to departments	136,575	60,675	32,700
Stock	1,840	1,750	580
Sessional papers	15,720	11,600	4,850
Cost	$87,488	$61,612	$38,157

When a blue book or official publication of any kind is desired it must be approved first by the editorial committee. This committee decides on the size, quality and number to be issued. Many a budding official author has been cruelly nipped by the editorial committee. Many departments also ran riot with expensive cuts and maps. These have been treated even more drastically.

The comparative figures of the past four years of the reductions in the use of illustrations in annual and supplementary reports are evidence of what the committee has been able to accomplish:—

Plates inserted,	1916	....	9,397,865
" "	1917	....	6,622,005
" "	1918	....	2,326,840
" "	1919	....	137,100

The committee has also insisted on a more careful revision of the lists of government publications. The committee in its last report makes this comment on this subject: "The committee is of the opinion that since confederation thousands of tons of printing paper, worth hundreds of thousands of dollars, have been thrown away in the manner indicated. The importance of frequent revisions of departmental mailing lists cannot be emphasized too strongly. Your committee has tested them in a few cases. Those examined were found to contain a great amount of "dead wood," and representations were promptly made to get rid of it. One batch of fifty names on the list to receive the report of the railway board turned out to be pupils of one of the Hebrew schools in Montreal. The attention of parliament is drawn to the 'notification card' system in use in one or two branches at Ottawa, and respectfully commends its more general adoption. Where an individual whose name is on the mailing list fails to forward the return portion of the card to the distribution office or branch making the inquiry the name should be dropped."

MONTREAL STOCK EXCHANGE ELECTION

The Montreal Stock Exchange on August 24th announced the election of William Daney Chambers to membership. Mr. Chambers was until recently manager of the Ottawa office of the stock brokerage firm of Greenshields and Co., and is leaving that institution to go into partnership with Col. Stanley Watson, who resigned from the managership of the Montreal branch of Sutro Brothers and Co., New York financial house.

BUSINESS CONDITIONS FAIRLY GOOD

In its August review of general business conditions, the National City Bank of New York says:—

"The general business situation has undergone little change in the last month. Retail trade has been good for the season and confidence in the future is strengthened by the fine progress of the crops. Nearly everybody seems to understand that an abundant production on the farms is good for the country, although the doctrine of greater production everywhere is not so well appreciated. The settlement of the railroad wage controversy and improved prospects for peace in Europe were also factors on the constructive side.

Outside of the lines of production in which disturbance began several months ago, notably wearing apparel, the industries are more embarrassed by transportation troubles than by lack of demand for their products. The iron and steel people and other manufacturers of material entering into construction see plenty of business ahead, although house-building has suffered a check. Construction for business purposes holds up, but investors are hesitating to put money into dwellings or apartments at present costs and with the existing anti-landlord agitation. The scarcity of capital of course is an important factor, and with conditions as they are it goes more readily into investments for the service of business than into buildings for family use. In general it may be said that there is little evidence that the buying power of the public has been impaired, although there has been an accumulation of goods in some lines and prices are unsettled. The agricultural districts are looking for a continuance of good trade."

THE LIFE UNDERWRITERS' CONVENTIONS

EDUCATION of the public as well as of the agent is the purpose of a movement, which is now on foot among life insurance agents, to hold district conferences in various parts of the country. Three such educational conferences were held during the past year at London, Ont., Peterboro, Ont., and Winnipeg. Such local meetings give the agents an opportunity to attend, and bring the value of life insurance more directly to the attention of the average man than does the annual Dominion-wide convention. The same would also be true if these meetings were extended to provincial scope, as most full-time agents would take advantage of this opportunity to make one trip per year to whatever place within the province at which the meeting was held. Such an extension was suggested at the Dominion convention just held at Ottawa, and one provincial organization has already been formed in Saskatchewan.

The main difficulty with the Dominion convention now held is that the distance to be travelled becomes too great a sacrifice to the average field man. Canada is a country of great area but of sparse population, and this factor is an important one in determining the [illegible] of such organizations. Matters which require the attention of life underwriters throughout the Dominion [illegible] be dealt with by a small gathering, representing [illegible], or local associations and acting on [illegible]. This would leave the provincial [illegible] free for the discussion of provincial questions such as [illegible], taxation and insurance law, for educational [illegible] and for useful intercourse. The insurance business in Canada has now extended to such a scope that there is in each province sufficient numbers and talent for the holding of successful meetings of this kind. A parallel [illegible] of municipalities, where the provincial [illegible] by an energetic executive have been able to [illegible] successful meetings, while the Union of Canadian Municipalities has received little support because of the [illegible] of attending and because of the [illegible] interest from coast to coast. This would not prevent the agents in any district within a province from organizing smaller meetings if they saw fit to do so, but the local meetings in each city would probably be found sufficient to complete the program.

GREAT BRITAIN'S EXAMPLE IN PUBLIC FINANCE

WHILE the national debt of Canada grows by leaps and bounds, Great Britain is making a successful effort to bring expenditure within revenue and thereby reduce her capital obligations. During the month of June the net debt of Canada increased by $24,814,159 to a total of $2,300,119,030, which is $13[illegible],000,000 greater than it was a year ago. Our provincial and municipal borrowings continue to be exceptionally heavy, and far too large a proportion of these new obligations are being incurred in the United States. This borrowing across the line has the immediate effect of holding down the premium on New York exchange, but the fact that the capital and interest must some day be repaid means that a growing influence is being thrown on the side of a high New York exchange rate.

Britain's achievements have been accomplished in the face of greater political and industrial difficulties than have arisen in Canada since the armistice. The British [illegible] demands [illegible] prevailing when wages were lower and working hours longer, and [illegible] which can be met only from the national purse. [illegible] the chancellor of the exchequer [illegible] stress on the importance of [illegible]. Although [illegible] the foreign field, a [illegible] effort is being made to reduce the national debt abroad. A "white paper" issued early in July by the British government shows that at the end of March, 1920, the nation was liable to outside countries for the amount of £1,278,714,000, as compared with £1,364,850,000 on March 31, 1919, making a net reduction of £86,136,000 during the fiscal year. Since the beginning of the current fiscal year a further net reduction of over £4,500,000 has been effected.

A detailed statement of the obligations to the various countries is of special interest here because of the important place held by Canada among Great Britain's creditors. It shows, however, that the total owed to Canada on March 31, 1919, was almost cut in half during the year which followed. The figures are as follows:—

County in which payable	Sterling equivalent of amount outstanding on March 31, 1920 £	Net increase (+) or decrease (−) during 1919-20 £
U.S.A.	1,046,774,000	+ 9,441,000
Canada	73,419,000	− 62,069,000
Argentina	19,200,000	....
Straits Settlements	7,656,000	— 624,000
Japan	7,170,000	— 11,860,000
Loans from certain Allied Governments	113,500,000	....
All other countries	10,995,000	— 21,024,000
Total	1,278,714,000	— 86,136,000

---

*Converted at par.

Of the total amount outstanding £865,652,000 is payable on demand to the United States government, and £37,297,000 to Canada, which, in the opinion of the London *Statist*, constitutes a considerable menace to the money market there. The sum payable on demand to the Canadian government was reduced last year by over 54½ millions, but, doubtless on account of the large maturities which had to be met in America, demand indebtedness to the United States government was increased by £24,830,000. The item "loans from certain allied governments" will be used merely as a set-off against the large debts owed by the allies to the United Kingdom.

Revised estimates for the current fiscal year, ending March 31st, 1921, show revenue of £1,418,300,000 and expenditure of £1,184,102,000. This leaves a balance of £234,198,000 for debt redemption. This will be the first year since war expenditures, and if Great Britain can reduce its national debt by over £200,000,000 a great financial feat will have been accomplished.

TWO LEADERS ON THE TARIFF

MAINTENANCE of the protective tariff is one of the central planks in the platform of the new National Liberal and Conservative administration in Canada. The tariff will scarcely be increased in the face of the low tariff agitation which has become so strong of late. But that no substantial reduction need be expected is indicated in the statement made by Premier Meighen, in connection with the work of the tariff commission, that "wherever there is a tax or schedule that is not absolutely necessary it will be wiped out." The workings of the tariff are so intricate that very few cases can be found where a reduction is possible without adapting the principle of a general reduction. In a speech at Belleville, Ont., on August 11, the premier also took pains to show that the average duty now was the lowest in forty years, or since the adoption of the national policy. The average rate on dutiable goods now is 22.58 per cent., compared with 29.98 in 1898 and 26.76 in 1910. "The tariff policy of this country," he said in a distinctively protective utterance, "is to keep Canadian workingmen in Canada. The policy of the government is to enlarge the employment market and add to the size of Canada. The policy of the government is to make goods here and keep people here with plenty of work for every class of man. The policy of the government is to give Canadian industries of every kind just enough advantage in the Canadian market to make it pay them better to stay here and expand than to diminish their plants or to leave."

Hon. W. L. Mackenzie King, leader of the Liberal party, is also on record in support of protection. His position is not so clear, however. In political debate there may be such a thing as the "tariff for consumers and producers" to which he pledges the Liberal support, but it cannot work out that way in economic life; for a tariff helps the producer by raising prices, something which can scarcely be a benefit to the consumer. In his statements in Toronto on August 14 the Liberal leader seemed to waver between a tariff to take care "of the position and needs of all the industries in our country," a tariff to provide the large sums of money which of necessity will have to be raised by indirect taxation," and a tariff providing "substantial reductions of the duties on the necessaries of life." Indeed, he seemed to be attempting the impossible task of combining the three in one, and even went so far as to say that "such a tariff is not only in the interests of the people of the rural parts, but also in the interests of city dwellers." There seems to be no doubt, however, but that it is a downward revision of the tariff which is intended, for he expressed himself to this effect in one part of his speech, and the platform of the Liberal party as laid down last year at Ottawa contains a clause to this effect.

Between the two viewpoints the choice seems to lie with the latter. The Liberal leader may be too ambitious in his political appeal, and too optimistic as to the damage which would be done to the city industries, but it is by a lower tariff that the position of the country, both economically and politically, can be strengthened. The rural communities are to-day the soundest elements in Canada. The farmer has for forty years been handicapped by the tariff, while both manufacturer and employee in the cities have taken advantage of the protection to bring about such favorable living conditions as to produce a serious depopulation in the rural districts. Canada is topheavy with industry, while the basis of the structure has been neglected. A very gradual reduction in import duties will remedy this unsatisfactory condition.

The mayor of Toronto has inaugurated a campaign against high prices, but the citizens are not optimistic as to the results.

Writers of letters to the daily press are now instructing the Canadian National Railways where to build lines and how to operate them. Between an apathetic public and an exacting public the National Railways management has little to choose.

The amount of sugar on hand in the United States for the year ended June 30, 1920, was 9,734,000,000 pounds. The average for the three preceding years was 8,428,000,000 pounds. The public was rather suspicious about the reported sugar shortage during the past year.

When the Bell Telephone Company was giving efficient service, higher rates were on this account considered unnecessary. Now that the service has fallen down under the increased high operating costs, the argument is presented that nothing more should be paid for inefficiency. What the public demands, apparently, is more than it is willing to pay for.

"Clothiers and garment manufacturers are frantic in their efforts to circulate high price propaganda to deceive retailers and the general public," says the New York "Journal of Commerce" in its dry goods' review for August 21st. It adds: "Textile prices are falling all over the world, and it is finally being acknowledged by bankers and others that merchandise is not at all scarce anywhere, in so far as famine is implied by scarcity." The effort to circulate propaganda aimed at keeping up buying has already been referred to in these columns. Dullness in business indicates that it has been far from successful.

Trade with the Orient

With correspondents of the highest standing in China, Japan, India and other countries of the Orient, and branches in all the principal ports on the Pacific coast of North America, namely:

Prince Rupert	Portland, Ore.
Victoria	Seattle
Vancouver	San Francisco

this Bank is excellently equipped to serve the interests of Canada's growing trade with the Orient.

PERSONAL NOTES

Geo. A. Watson, who for eight years has been commissioner of telephones in Manitoba, has resigned on account of failing health. Mr. Watson will continue as commissioner until a successor is appointed.

A. C. Flummerfelt, Victoria, was elected president of the British Columbia Bond Dealers' Association, at the organization meeting in Victoria on August 23. The organization comprises the chief bond houses of the province.

Orville B. Shortly, who was last week elected president of the Life Underwriters' Association of Canada, is manager for the Metropolitan Life Insurance Company in Toronto, and before coming to Toronto he was manager for the company in Ottawa. For many years past he has taken an active interest in the work of the association, and last winter was elected president of the Toronto Life Underwriters' Association. Important developments are planned for the coming year by the underwriters. Application will be made for a Dominion charter, and arrangements are to be made for a series of educational congresses in different parts of Canada. In accordance with the practice for several years past the president will make a tour of Canada, visiting the local associations and investigating the problems of the life insurance agents from coast to coast.

OBITUARY

Alexander Bruce, K.C., one of Ontario's most prominent barristers, died at his home at 91 Bedford Road, Toronto, on August 20th, at the age of 84. Born in Aberdeenshire, Scotland, on November 23rd, 1836, Mr. Bruce came to Canada while yet a young man and located at Hamilton. He was head of the firm of Bruce, Bruce and Counsell, when he moved to Toronto in 1905 to become general solicitor of the Canada Life Assurance Company. In addition to being general solicitor, Mr. Bruce was made a director of the company, and also of the National Trust Company. In 1886 Mr. Bruce was made a Bencher of the Ontario Law Society.

OSLER AND CO. REORGANIZED

Messrs. A. E. Osler and Co., Toronto, announce the retirement from the firm of A. E. Osler, to accept the presidency of A. E. Osler and Co., Ltd., a company formed with an authorized capital of $500,000 to take over with Gordon Taylor the business of A. E. Osler and Co. Directors of the new company are: A. E. Osler, president; T. W. McGarry, K.C., vice-president and chairman of the board; Gordon Taylor, managing director; W. W. Butler, president, Canada Car and Foundry Co., Montreal; Charles McCrea, M.P.P., Sudbury, Ont.; J. E. Regan, secretary-treasurer.

UNITED STATES' TRADE WITH CANADA INCREASES

United States total trade with Canada for the twelve months ended June, 1920, was $1,427,512,404, showing an increase over the total trade between the two countries for the corresponding period of last year of over $150,000,000, according to the monthly summary of foreign commerce of the United States. United States sales to Canada for this period reached a total of $890,135,023, as against $810,745,160 for the corresponding period of 1919. Canada's sales to the United States for the twelve months ended June, 1920, were $537,377,381, as against $468,954,818 for the corresponding period of 1919, an increase of $70,000,000.

Canada sold to the United States in the twelve months ended June more goods than any country in the world except Cuba. In the same period Canada bought from the United States twice as much as all the South American countries, one-half of what comprised United States total sales to the whole of North America, and nearly $200,000,000 more than France, which is now the United States' third best customer, the United Kingdom and Canada being respectively first and second.

LIFE INSURANCE TAXES IN QUEBEC

The Eastern Townships Life Underwriters' Association has passed the following resolution, protesting against heavy taxes in the province:—

"Whereas life insurance companies and agents are taxed by the federal government, by the provincial government and by many of the municipalities in the province of Quebec, and in some of the latter cases both the company and the agent pay a tax, to wit:—

"Canadian life insurance companies have to deposit: (1) $50,000 with the federal government for their charter. (2) Have to pay for the support of the department of insurance. (3) Pay the Quebec provincial government 1¾ per cent. on their premium income. (4) Pay the Quebec provincial government an annual fee of $150. (5) Pay some of the municipalities as high as $50 to do business in the city or town.

"The agents in Quebec have to pay: (7) A provincial tax of $5 or $3 per year. (8) A municipal tax scaling down from $25 in many places. (9) A non-resident tax in many municipalities of an amount double and treble the resident tax.

"Whereas these special accumulated taxes are imposed upon the companies and the agent in addition to the usual taxes paid by the ratepayers, such as real estate, rent, income, etc.

"Therefore, be it resolved that:—

"We, the members of the Life Underwriters' Association of the Eastern Townships in annual meeting assembled do hereby record our protest against this multiplication and duplication of taxes, which are unjust and a burden too onerous to be borne, and we respectfully request the Canadian Life Officers' Association to take immediate steps to relieve the situation, particularly having reference to the provincial tax of 1¾ per cent. and the municipal tax on agents, as the latter, to our minds, is ultra vires of the provincial government to authorize, seeing,—

"1. That all the Canadian companies are chartered by the federal government to do business throughout the whole Dominion, and business cannot be secured without the intervention of agents.

"2. That the agents have a provincial license to do business throughout the province, and it seems to us that the provincial license is sufficient authority for the agents to do business anywhere, and any municipality which ignores this license and refuses to allow its holder to do business within its borders is defying the provincial government, is placing the government in an undignified position and over-riding the government authority."

HARVESTING IN FULL SWING IN THE WEST

Threshing Will be Fairly General Next Week—New Brunswick Grain Yield Will be Satisfactory—Quebec Crops Generally Fair

HARVESTING is now in full swing in the west, all three prairie provinces reporting good progress in this connection, and threshing is expected to be fairly general next week. W. A. Black, vice-president and managing director of the Ogilvie Flour Mills Co., has just returned from a tour through the western wheat growing provinces. Mr. Black was inclined to take a conservative view of conditions, but speaks of conditions on the whole as very satisfactory. He says:—

"From what could be judged, and the experience of those on the spot, and from the appearance of the crop prior to actual threshing, I formed the impression that the western wheat crop in Manitoba, Alberta and Saskatchewan would run from 225,000,000 to 250,000,000 bushels, as compared with from 165,000,000 to 170,000,000 last year. This is really a good showing in view of the reduced acreage.

"It was satisfactory to note that a considerable percentage of the area that only gave a poor yield last year has produced a fair crop of wheat this year. As to the oat crop, I found that over a very considerable area the yield was poor, but on the whole a fair average may be looked for. Barley, rye and flax promise a good yield, and if favorable weather continues, a very satisfactory quality of grain will be harvested."

Regarding the quality of wheat for flour purposes, Mr. Black said: "From what I could judge, the wheat is of good milling quality. Practically none of the western wheat has yet been marketed, but with a continuation of the present weather, it is likely that a considerable quantity of western wheat will be threshed during the coming week, and deliveries of the new wheat may be expected at the elevators in the west by about September 1st. Probably some of the new western wheat will arrive in Montreal about the middle of September, both for milling and export."

Grain Harvest in New Brunswick

According to the report of the New Brunswick Department of Agriculture, the grain harvest has commenced in some parts of the province. The report further says:

"Northumberland, Restigouche and Gloucester counties report wheat an average crop and oats 20 per cent. above average. The condition of the grain crop is good throughout the province and the yield should be quite satisfactory and the quality good. The turnip crop is good while buckwheat is reported doing well, but somewhat short in the straw. The past week has been very poor weather for curing hay, owing to the cloudy, wet weather. Considerable hay remains uncut in some parts of the province.

"Late blight of potatoes is reported to be in evidence in a small way in some sections, while generally reports indicate a rapid maturing of the crop due to excessive heat. Just how serious the blight infection will prove to be will not be determined for several days. Early potatoes are turning out well and are giving a good yield.

"Cows are reported to be failing considerably in milk production. The pastures are short and this coupled with the heat has been the primary cause. Farm labor is reported difficult to get with wages for haying and harvest at $1 to $5 per day and board.

"The apple crop is of excellent quality and clean of scab up to the present. The quantity will be less than last year but the quality very much superior."

Quebec Crops Generally Fair

A bulletin respecting agricultural conditions in the province of Quebec as at August 15 has been issued by the Quebec Bureau of Statistics. The bulletin sets forth the situation somewhat as follows:—

"In the county of Rimouski the hay crop has been very small, not even a ton to the acre, and hay will have to be imported. Dairy products have also decreased owing to the poor pastures. There will be a heavy crop of potatoes. The products that will yield more than the last decennial average are wheat, barley, rye, peas and flax. There will also be a fairly good crop of oats. The hay crop in the Quebec region was an average one in some counties, such as Montmagny, Charlevoix and Drummond; the yield was under one ton to the acre. There will, however, be probably enough for local consumption. The cereals and potatoes promise a more than ordinary yield. That of vegetables, fodder corn and fruit will be rather small. In Charlevoix, root plants were kept back by cold weather. Hail also did considerable damage in a portion of that county. Dairy products in the Quebec region are less abundant than last year owing chiefly to poor pastures.

"In the Montreal region the hay crop varies between one and two tons to the acre, although in Brome the agronomist gives three-quarters of a ton to the acre and Chateauguay gives two and one-half tons to the acre. There will be enough for local consumption. Cereals, potatoes and root plants will give a higher yield. There will be an ordinary yield of fodder corn, vegetables and fruit. In this region, as elsewhere, the pastures are poor and the dairy industry feels the effects. The hay crop was small throughout the north of the province, that is, Lake St. John, the counties of Hull, Labelle and Temiskaming. Hay will have to be imported there, or a great many cattle will have to be sold in the fall. At Lake St. John, cereals and potatoes will give a greater yield; on the other hand, vegetables, fodder corn, as well as clover seed, are of very poor quality, and there, as elsewhere, the production of butter and cheese has decreased owing to poor pastures.

Vegetables Not So Good

"In the counties north of Montreal, most of the crops have a fine appearance, but the yield of vegetables, fodder corn and fruit, will be inferior. The Abitibi agronomist reports that, judging by appearances, the potato and vegetable crops will be marvelous. The varieties of early oats will probably yield from 25 to 30 bushels to the acre. In the southwest part of the county of Hull, the oat fields have been almost completely destroyed by an insect hitherto unknown.

"In the Richmond region the yield of hay is weak, while in the east, about Sherbrooke, Compton and Megantic, the yield has varied between 1½ and two tons to the acre. It is probable that some will have to be imported on account of the heavy consumption in timber shanties. Cereals, oats, especially, will yield a superior crop; fodder corn, and corn for husking, as well as fruit, have almost completely failed. In Megantic, among other places, the pastures were poor and the production of butter and cheese will feel it.

"On the whole, the hay crop will suffice for ordinary needs in most counties, although in some, especially in the east, south and north of Quebec, hay will have to be imported, particularly where large lumbering operations are being carried on. The drought of the month of June last caused irreparable damage to the pastures and, in consequence, the production of butter and cheese will be less abundant this year than last.

"Cereals and potatoes in particular will yield more of an average than in the last decennial period. Vegetables, fodder corn and corn for husking, fruit and root plants in certain regions will yield but little owing to drought and cold weather. Hay, the gathering of which is over in the western part of the province, is being finished in the north and lower part of Quebec. The cereal harvest is begun and will probably finish at the end of the month (except in the Lower St. Lawrence part), provided the weather is favorable."

The Quebec division of the Canadian Manufacturers' Association is extending an invitation to the Ontario branch to visit Quebec during September. Montreal, Quebec, Sherbrooke, Three Rivers and other points will be visited.

BANK BRANCH NOTES

Seven New Branches Announced This Week—Bank of Commerce Will Make Addition in Toronto

The following is a list of branches of Canadian banks which have been opened recently:—

Hull, Que.	Canadian Bank of Commerce
Kensington, P.E.I.	Canadian Bank of Commerce
Kapuskasing, Ont.	Imperial Bank of Canada
Hamilton, Ont.	Bank of Hamilton
Osoyoos District, B.C.	Canadian Bank of Commerce
Hamilton, Ont. (Gage and Barton)	Bank of Montreal
Toronto, Ont. (Stockyards)	Bank of Montreal

The last two branches in the above list were opened by the Bank of Montreal, not the Bank of Hamilton, as reported last week.

The Standard Bank of Canada has commenced construction of a $75,000 new building in Lethbridge, Alta.

The Canadian Bank of Commerce has taken out a permit for additions to their building on Atlantic Ave., Toronto, to cost $100,000.

The erection of a new bank at Markinch, Sask., is being made by Royal Bank of Canada.

J. F. Gillespie, accountant at the Cobalt branch of the Bank of Commerce, has been promoted to manager of the Iroquois, Ont., branch.

C. S. Cameron, accountant at the Imperial Bank at Cobalt, Ont., has been transferred to Hearst, Ont., as manager.

WEEKLY BANK CLEARINGS

The following are the bank clearings for the week ended August 26, 1920, compared with the corresponding week last year:—

	Week ended Aug. 26, '20	Week ended Aug. 28, '19	Changes
Montreal	$125,997,729	$104,206,621	+$21,791,108
Toronto	94,060,189	67,858,506	+ 26,201,683

CANADIAN BUSINESS FAILURES

Bradstreets report the number of business failures for the week ended August 19, 1920, as 22, compared with 14 in the previous week, 12 in the same week in 1919, 16 in 1918, 18 in 1917 and 37 in 1916.

DEVELOPMENT OF COLONIZATION SCHEME

Work to Begin in 1921—Grain Trading Resumed in Winnipeg—Mortgagors Benefit by Depreciated Dollar

(Special to *The Monetary Times.*)

Winnipeg, August 26, 1920.

HARVESTING and threshing operations are in full swing throughout western Canada, and, while in some localities the crop is termed spotty, on the whole a most satisfactory harvest is being reaped. Cutting in many localities is completed and threshing already is in full swing. Returns well above the average are being reaped and new wheat is daily being inspected at Winnipeg. Open trading on the local grain exchange has been resumed, which makes for a considerable renewing of activities.

Funds for Colonization

The first meeting of the executive of the Western Canada Colonization Association was held a few days ago in Regina. Several prominent Winnipeg business men who were present included J. H. Ashdown; H. B. Shaw, general manager of the Union Bank; W. H. Carter, president of Carter, Halls and Aldinger, and W. E. Milner, of the Board of Trade. They report that the proceedings were marked by great unanimity, the members of the executive being satisfied that the project under consideration ought to be prosecuted with the utmost vigor. Gratification was expressed at the remarkable progress which had been made in raising the necessary money. Business men in all parts of the Dominion have responded, and nearly a million dollars has been subscribed. It is proposed to raise an additional half million, and the members of the executive were of opinion that the effort should be made to secure all the rest of the subscriptions before the close of October. The balance of the year will be spent in arranging details, and the actual colonization work of the organization will commence in 1921.

Mortgagors Pay Off Loans

A large mortgage loan of $325,000 was negotiated in Winnipeg this week, the rate being $7\frac{1}{2}$ per cent., indicating the present price of money on a high-class loan. Mortgage companies anticipate that large sums will be offered to them this fall by farmers, and the advantage of the situation is with the latter. There are hundreds of mortgage loans outstanding which were made when wheat was worth less than one dollar a bushel, and they are being paid off when wheat is worth more than two dollars, a circumstance which was by no means contemplated by either party when the loans were made.

RAILROAD EARNINGS

The following are the approximate gross earnings of Canada's transcontinental railways for the first three weeks in August:—

Canadian Pacific Railway.

	1920.	1919.	Inc. or dec.
August 7	$3,956,000	$3,442,000	+ $ 514,000
August 14	4,043,000	3,298,000	+ 745,000
August 21	3,895,000	3,374,000	+ 521,000

Canadian National Railway

	1920.	1919.	Inc. or dec.
August 7	$2,235,110	$1,846,508	+ $ 388,602
August 14	2,253,719	1,926,349	+ 327,370
August 21	2,150,350	1,832,914	+ 317,436

Grand Trunk Railway.

	1920.	1919.	Inc. or dec.
August 7	$2,576,894	$1,894,875	+ $ 682,019

Succession Duties in Ontario

The rates of Succession Duty having been increased at the recent session of the Ontario Legislature, we have prepared a Booklet entitled "Succession Duties in Ontario." This Booklet contains schedules of the new rates, together with a summary of the main provisions of the Act. To readers of *The Monetary Times* we shall be pleased to send a copy free on request.

The Use of the Insurance Blue Book

General Public Does Not Understand It, So Chief Medium For Interpretation Must Be the Agent—Unfair Use of Figures in Comparisons Cannot Be Avoided—Some Recent Changes in the Blue Book

By G. D. FINLAYSON
Superintendent of Insurance for Canada

THE primary object of the issue of the "blue book" is the proper information of the public as to the financial standing and the comparative merits of the licensed life insurance companies. While this is the primary object it must be admitted that there is doubt as to whether that object is accomplished. The reason for this is that life insurance is a technical business, the mysteries of which are imperfectly understood by the great majority of the public. The statements of the companies and the summaries thereof made by the department are also necessarily somewhat technical, and to the mind of the layman probably complicated and obscure. This characteristic the insurance blue book shares with the majority of statistical reports issued ostensibly for the information and education of the public. In practice it becomes necessary to have the information they contain interpreted if wrong impressions are to be avoided, and the most natural interpreter of the insurance blue book is the insurance agent.

Incomprehensible to Average Person

It must often appear to the public that while the blue book contains a great mass of information it fails to give the very information most desired, and that is a clear statement as to the merits of the companies. In fact, if we are to judge from the enquiries which reach the department from prospective policyholders, the question with which they are concerned is, "What is the best company in which to insure?" and they find it hard to understand why a department dealing specially with this business cannot answer a question which the most inexperienced agent is prepared to answer offhand. The only practicable course open to the department in such a case is to send to the enquirer a copy of the blue book accompanied by a suggestion that if he will but devote himself diligently to the study of its contents he will be led inevitably and irresistibly to a satisfactory answer to his own question. We have usually no means of following up the subsequent history of any case, but I have no doubt that if the enquirer attempts at all to comply with the instructions he soon becomes weary of the task, throws the book down in disgust and goes to the life insurance agent in whom he has most confidence, and from whom he thinks he has the best chance of getting a square deal, and signs his name on the dotted line.

If this is so, it becomes all the more important that the life insurance agent should be in a position to interpret correctly for the public the facts which the blue book contains.

A Technical Publication

While the blue book is intended primarily for the information of the public there is contained in it much information of a technical character which is intended rather for the information of the insurance companies, and the student, it may be outside of Canada, of the conditions under which the life insurance business in Canada is carried on. The idea is that the book should constitute a book of reference to any person desiring to compare insurance company practices in Canada with those in other countries, and there is, therefore included in respect of Canadian companies much miscellaneous information as to methods of valuation and distribution of surplus which makes but little appeal to the ordinary prospect.

So far as the agent and the public are concerned however, the blue book is intended to enable the agent to properly estimate the standing of his own company and to get a perspective of the life insurance business as a whole. It is not intended to enable him to obtain a point of attack against the other company. If such is sought there is no doubt it can be obtained. We are told Scripture is sometimes quoted to serve malign purposes. In the same way the unscrupulous agent, if such there be, can easily find in the blue book apparently good foundation for serious allegations against reputable companies. The practice, however, of attacking the other company instead of boosting his own company is becoming more and more out of date. In the case of companies, as in the case of individuals, the old saying is probably true, that there is so much that is good in the worst of us, and so much that is bad in the best of us, that it does not become any of us to speak ill about the rest of us.

The relations between company and company and between agent and agent are, I believe, constantly improving, and every advance made in this direction goes to elevate and dignify the business in which you are engaged.

Unfair Comparisons

I have said that almost anything can be, apparently, proved by the use of figures from the blue book and from an examination of some of the statements and comparisons frequently seen it would appear that figures are very loosely used for the purpose of justifying a desired conclusion. There are some ratios and comparisons which cannot be justified on any consideration. It is probably possible for every company to devise some ratio which will place that company at the head of the list. We sometimes see a comparison of total assets to total business in force, total surplus to total business in force, total protection to policyholders to total insurance in force. Now it will be easily seen that such a ratio as total amount of assets to total business in force will put at the head of the list the company just organized and having written its first policy of $1,000. That company will show assets of $100,000 per $1,000 in force, a position which it is never likely to attain to again, for which the writing of the second policy its financial standing is impaired by 50 per cent. Such a company may be ten years removed from payment of dividends; it has all the difficulties incident to early growth ahead of it, but on this basis it is pre-eminent in the field. On the other hand, a company hoary with age and confining itself largely to renewal business, with a high and increasing mortality and decreasing rate of dividends and a surplus might find itself, in such a ratio, occupying a most favorable position.

It is unnecessary to refer to other ratios which are equally misleading, and it is useless to suggest that all comparisons between companies should be avoided. The remedy lies in the analysis of the comparison by the agent to see if it is fair and in the conscientious effort to use only such comparisons as fit the case. Failure to do this may result in the prospect obtaining the information from a competitor and the prospect naturally appreciates the agent who presents to him sound conclusions and reasoned judgments.

Past Results Are no Guarantee

The blue book contains very complete information as to the dividends which have been declared in the past on participating policies. Here again, the object of this publicity is to enable the public to inform themselves as to the profit earning power of the companies. The publication

of these results, however, no doubt makes more easy the furnishing of estimate, and the question arises, "what use can be made of these results without violating the prohibition of estimates?" Everyone recognizes that the use of past results is a legitimate feature of life insurance solicitation, and all are equally agreed that to hold up the results of the past as a guarantee or even an estimate for the future is a violation of the act. There is the danger, however, that, even if the figures are presented merely as earnings in the past, the prospect will be unconsciously impressed with the view that they may reasonably be expected to be continued in the future, and the experience of the last few years, during which, as a result of the war and influenza, dividends have been reduced, and quite properly reduced, has developed the fact that policyholders have regarded the old rate of dividends as practically guaranteed for the future, and their disappointment at receiving a lower rate of dividend is but little less than it would be at the failure of the company to pay the full amount of the policy at maturity. Estimates, like chickens, come home to roost, and in the experience of many agents the impression formed by the policyholder has caused much anxiety, and in many cases forfeiture of public confidence.

This experience should not be lacking in its lessons for the future. I think the time has come for the creation of some special order of merit for the agent who will display prominently on all his literature and stationery a statement to the effect that any information furnished by him as to dividends heretofore paid by the company must not be regarded as a guarantee, or even as an estimate of the earnings of the future. Naturally everyone hopes that when dividends are restored to their former levels a subsequent reduction will not be possible, but hopes, however, apparently well founded, may prove to be dupes, and the only prudent course is to play safe.

New Figures Now Shown

It should be pointed out that the dividend results published for the last year or two contain additional information to those previously in use. The quinquennial dividends are shown not only for the period just closed, but the accumulated dividend for all periods as well. This enables the results to be judged not only for the period in question but for the whole history of the policy. In the deferred dividends also there is now shown not only the dividend paid when the policy is continued in force beyond the end of the dividend period, but also the total cash settlement when the policy is surrendered. This latter value includes the reserve on the company's basis, and shows in the proper light the results of the company maintaining the higher reserve as compared with a company holding a lower reserve and paying possibly on that account a higher dividend if the policy is continued in force.

It is necessary here to refer to the effect of the change of basis of reserve, in 1900, upon dividends for the reason that the impression has sometimes been created that the total cash settlements at the end of the dividend period is affected by the change. The total settlement depends on the premium received, the claims and expenses incurred and the interest earned, and should be independent of the reserve held at any time against the policy. The change did, however, in many cases affect the amount paid as dividend when the policy is continued in force, since the amount necessary to raise the reserve from the original to the new basis is deducted from the amount which would otherwise have been paid.

Separation of Funds

One of the most valuable sections of the blue book is one incorporated during the last few years, which shows the separation of accounts between the various funds. These schedules are found on page 156 and following pages of the abstract for the year 1919. These statements are prepared on a strictly revenue basis, and show clearly the standing of the participating, non-participating and shareholders' funds of all companies paying dividends to either policyholders or shareholders. These tables show the relative importance of the two main branches of the business, and of the capital stock and shareholders' surplus. There is no information in the report more worthy of study by the agent than this table if a clear idea of the progress of any company is desired.

Decrease in Lapses

The blue book should be used by the agent to ascertain the figures respecting the persistence of the business from year to year, and to compare his own experience with the average. It must be gratifying to all insurance men to note that the loss of business from lapse and surrender, what might be termed unnatural terminations, is steadily being reduced. Commencing with the year 1914, we have the total lapse and surrender rate of 53% of the new business written. In other words, for $1,000,000 of new business written there was a gain of $470,000 in force, excluding terminations arising from death, maturity and expiration. This rate has shown a gratifying decrease ever since, the successive years showing the following figures:—1915, 51%; 1916, 42%; 1917, 32%; 1918, 29%; 1919, 21%; and it is also satisfactory to note that the decrease in the lapses has been responsible mainly for this decrease in the total surrenders, the ratio of lapses having decreased from 44% in 1914 to 16% in 1919, and terminations for surrender values decreasing from 9% in 1914 to 5% in 1919.

We must, of course, not conclude from this that lapses are fast approaching the vanishing point. Unfortunately, the actual amount of lapses just now is increasing year by year, but the annual increase in new business written is so large that the ratio is being reduced. Lapses are still too high, and should the increase in new business be for any reason arrested, the lapse ratio would probably mount to the old figure. This can be guarded against to some extent by care in the selection of risks now and by avoiding undue pressure in the placing of large amounts of insurance which are beyond the probable ability of the policyholder to maintain. At a time when business is offering so freely the interests of the company demand unusual care not only in the selection of risks from the physical standpoint, but in the guarding of the business against premature lapse. The boom which we are now experiencing may very well become, for both companies and agents, a boomerang, unless the necessary precautions are taken. While a warning against placing unduly large amounts may be in order, no such warning is necessary against the increase in the average amount of insurance carried. You will see from the blue book that the average amount of insurance in force is somewhat less than $300, or, assuming five to a family, $1,500 to a family. This will yield about $6 or $7 a month when invested for the family should the policy become a claim.

Sound Knowledge Necessary

It is, I am sure, needless for me to suggest that the blue book will be of value to the agent in direct proportion to the amount of study he has given to the fundamental basis of the science of life insurance. Facts acquired from the blue book without a mastery of the principles on which they are compiled may easily lead one astray. It is becoming more and more necessary that the insurance agent shall be a master of his business in order to compete successfully in the solicitation of trained business men who are quick to perceive any weakness in his preparation of his case. If the canvass of the agent is to possess the alchemy which will transmute a procrastinating prospect into a persistent policyholder, it must be prepared and analysed beforehand with all the care and precision which the scientist brings to his task in the laboratory, and a mastery of the elemental facts and theories of the science is as necessary in the one case as in the other. Having given this preparation and having added persistence, poise, and what is colloqually termed the punch, success in this rapidly expanding field should be assured.

You Should Make a New Will—if

ONTARIO REVENUE INCREASING

Ontario's revenue for the first eight months of this year totals over $1,000,000 in excess of the same revenue last year. Succession duties brought in more than half a million above those for the same period last year, and the amusement tax for eight months totals as much as the entire amount last year. The corporation tax has brought in practically nothing as yet, but this revenue will not come in until the end of the year.

EQUITABLE LIFE WITHDRAWING FROM CANADA

Will Also Cease to Write Business in Great Britain and Ireland—This Action Will Not Affect Present Policyholders

FOR many years the Equitable Life Assurance Society, New York, has been following the policy of gradually withdrawing from the writing of new business in territory outside of the continental limits of the United States, and of concentrating its energies upon the intensive development of its agency forces in the latter field. In furtherance of that policy the Equitable from time to time has so withdrawn from all outside fields except Canada, Great Britain and Ireland. It has now decided to discontinue writing new business in those countries.

Active in the Dominion

The Equitable in the past has conducted an active business in all three countries, particularly in Canada. According to the latest returns of the department of insurance, Ottawa, the total net assurance premium income is $1,269,532. In 1919, 2,308 new policies were issued amounting to $6,772,835. At the end of 1919 the number of policies in force numbered 15,012, amounting to $36,165,048. The withdrawal of the Equitable from this country leaves eleven United States companies now writing life business here.

The action of the Equitable in withdrawing from the Dominion will not affect in any way the rights of the present Canadian policyholders. So long as there remain any outstanding policies of the company in Canada, there will be maintained in the Dominion whatever offices and organizations may be necesary to properly serve the holders of such policies.

EMPLOYMENT CONDITIONS IN CANADA

The Employment Service of the Department of Labor reports that returns from the Dominion and Provincial Offices of the Employment Service of Canada for the week ended July 31 show a slight decrease in placements when compared with the returns for the preceding week. The offices reported that they had made 8,063 references to regular positions and that 7,216 placements were effected. This is a decrease of 51 when compared with the previous week when 7,267 placements were reported. In addition 1,558 casual jobs were supplied as compared with 1,737 during the week ended July 24. During the week 8,619 applicants were registered, of whom 948 were women and 7,671 were men. This compares with 8,636 applicants reported the preceding week, a decrease of 17. The number of vacancies notified by employers to the service during the week totalled 9,855, of which 1,170 were for women workers and 8,685 for men. This represents an increase of 865, when compared with 8,990 vacancies reported during the previous week. Of the placements in regular employment 620 were for women and 6,596 were for men.

Of the placements in regular employment 107 were reported by New Brunswick offices, as compared with 80 during the preceding week. Quebec offices reported 210 placements, 76 of which were in other provinces, as compared with a total of 240 during the week preceding. Placements reported by Ontario offices totalled 2,565, of which 2,510 were within the province and 55 in other provinces, as compared with a total of 2,611 during the week previous. Manitoba offices reported 1,155 placements, 1,061 within the province and 94 in other provinces, as compared with a total of 1,092 during the preceding week. Saskatchewan offices reported 690 placements, of which 13 were in other provinces, as compared with a total of 683 during the preceding week; [illegible] by Alberta offices, [illegible] of which were in other provinces, as compared with a total of 1,385 during the week previous. British Columbia offices reported 1,274 placements, 1,217 within the province and 57 in other provinces, as compared with a total of 1,206 during the week ended July 24.

Imports Show Falling Away in July

Reduction of About Seven and a Half Millions as Compared with Previous Month—Slight Recession in Export Trade—Large Increase in Wood and Paper Offset Declines in Agricultural, Vegetable and Animal Products

A FALLING away of about seven and a half million dollars in imports, as compared wtih the previous month, features the July trade statement of the Department of Customs. Exports show a slight decline for the month, but as compared with the same period a year ago there is a considerable reduction, while the advance in imports in the same comparison is equally as marked. The increase in imports of merchandise is $42,987,312, or over 80 per cent., compared with July, 1919, while exports show a decrease of $8,911,475. These changes reverse Canada's trade balance from a favorable one of $29,505,600 last July, to an unfavorable one of $22,393,187 in July, 1920.

For the four months ended July, 1920, the statement, as compared with a year ago, shows some notable changes. Under exports there was a recession in trade, which would have been much more serious but for the fine showing in wood and paper. Exports of agricultural and vegetable products and animal and animal products registered large declines, but these were offset to a large extent by the increase in wood and paper, etc. Fibres and textiles and iron and steel showed comparatively small advances.

Under imports there were heavy increases in agricultural and vegetable products. Fibres, textiles and textile products also show notable advances. Other increases are: Ores, metals and metal manufactures; non-metallic minerals and products; wood, wood products, paper, etc.; miscellaneous products.

The following is the detailed statement:—

Schuyler, Mutual of Canada; Annapolis Valley, H. E. Woodman, Canada.

Life Underwriters' Association Convention, Ottwa.

Business Insurance

On Thursday morning, H. W. Manning, Toronto manager of the North American Life, led a discussion on business insurance. The agent who would specialize in this line, he said, must, after obtaining a thorough knowledge of insurance, turn his attention to forms of business organization and finance. The volume of business insurance that has been written bears testimony to the fact that this has been successfully done. In the subsequent discussion on the subject Mr. Manning expressed the opinion that the limited payment policy would best suit the business owned by an individual, who would in all probability some day close it down or hand it over to another, and would then wish to assume the policy personally. The ordinary joint stock company, on the other hand, could continue to pay the premiums right up to the death of the assured. The difficult thing about selling business insurance, he said, was not the life insurance end, but the business end, because of the fact that no two cases were identical. The treatment of business insurance premiums in income tax returns was also discussed. It was pointed out that a deduction up to a certain percentage of profits is made in England, as allowance for insurance premiums; in Canada a deduction may be made if the insurance is actually carried.

Industrial Insurance

J. J. McSweeney, of Toronto, led a discussion on Industrial Insurance, quoting figures to show its importance in economic life. It is insurance by retail, he pointed out, and was necessary and useful in the same way that the selling of tea and sugar in small weekly quantities met the requirements of a large section of the people, the extra cost being offset by the convenience. Regarding the connection of industrial men with the association, he complained that subjects were not chosen to interest them at the local meetings. The two branches, ordinary and industrial, were part of the one business. T. J. Parkes, of the Sun Life, Sherbrooke, pointed ou[illegible] of industrial insuranc[illegible] many years past.

Group Business [illegible]

Group insurance was [illegible] W. White, of the Canada Life, Toronto. Th[illegible] in Canada, he pointed out, and he ha[illegible] addressing the association on the subject. It [illegible] experiment, the first group policy in America [illegible] written as recently as 1912. Its expansion in the United States was rapid, and numerous inquiries had been received about it in Canada prior to authorization last fall. The volume of business written during the winter was very large, and while the summer months were quiet, he expected a good demand, even if industrial conditions were quiet.

Income Insurance

E. J. L'Esperance, of Montreal, spoke on "Income Insurance," describing how in this way the maximum of income might be obtained by the beneficiary, in proportion to premiums paid. It was, therefore, well suited to the needs of the married man of small means, whose income was small in proportion to his responsibilities. Another advantage is the fact that no opportunity is given for spending the money foolishly, or losing it in unwise investments. It is to those of small means that life insurance is most essential, and they are usually inexperienced in handling of funds for investment.

Succession Duties

One of the best addresses, from the point of view of practical information for the agents, was that given by John T. Cowan, of the Toronto General Trusts Corporation, Toronto, on "Succession Duties and Life Insurance." Besides describing the succession [illegible] different provinces, Mr. Cowan stated that a life [illegible] always one of high grade investments [illegible] an estate. Life policies are [illegible] the ready cash thus provided [illegible] payment of succession duties and [illegible] prevented the sale of property [illegible] pay the duties within the time [illegible] from six to eighteen months in the different [illegible] the agents, however [illegible] in the form of income insurance [illegible] stopped until sufficient had accumulated [illegible] cited one case where a widow [illegible] could not get any cash [illegible] was required for that purpose.

Haley Fiske's address [illegible] Life Insurance," and that of Hon. Geo. [illegible] of Sir Henry Drayton, were [illegible] on August 19. Haley Fiske, who is president of the Metropolitan Life, is making a tour of Canada from Vancouver to St. John, N.B. The insurance agent's responsibility is a great one, he said, and he must live up to it. Speaking in reference to the Metropolitan, he pointed out that it had $504,000,000 invested in Canada, of which 25 per cent. is in government bonds, and most of the balance in municipal and other bonds and mortgages. It has over 1,100,000 policies in force in Canada, or about one in eight of the population. The company took a broad view of its responsibilities, and its work included the distribution of health literature and co-operation with health authorities, and the furnishing of nursing service to its policyholders.

Hon. Geo. E. Foster emphasized the value of life insurance in maintaining the family, which is at the basis of modern life.

Other addresses were: "Why I am a Life Insurance Agent," by O. B. Shortly; "Birdseye View of the History of Life Insurance," by M. Monaghan, Quebec; "What Life Insurance Agents Should Know," by W. Lyle Reid, Ottawa; "Uses of the Blue Book," by G. D. Finlayson, Dominion Superintendent of Insurance. The last mentioned is given in full in this issue of *The Monetary Times*. Mr. Monaghan's address, which was in French, was not given in full before the convention, but he gave a short summary of it in English, reviewing the growth of life insurance from the early experiments of the Romans up to modern times.

Photo at Dominion Experimental Farm, August 18, 1920

Resolutions Passed

The only important resolution was one which was introduced by T. J. Parkes, of Sherbrooke, and passed after being recommended by the resolutions committee. It recommends that the executive take action, in co-operation with the Life Underwriters' Association of the province of Quebec, and with the Life Officers' Association of Canada, to secure modifications in the system of taxing life companies and agents in Quebec province, especially as regards the provincial tax of 1¾ per cent., and the [illegible] on agents.

The executive committee, at its [illegible] August 17, endorsed a list of text books on [illegible] agreements which had been [illegible] sold through the association; [illegible] prepare and ex[illegible] the [illegible] provinces and prepare a chart [illegible] to show the prospect exactly [illegible] on his estate; decided to [illegible] association under Dominion [illegible] series of congresses from [illegible]

Victoria was selected as the place for the 1921 convention, the Vancouver delegates endorsing the invitation of that city. The plans for 1922 provide for a joint international convention at some central point in Canada, similar to that held in New York in 1918.

PIG IRON PRODUCTION FALLING OFF

Total for First Half of 1920 Was 502,667 Tons, Compared With 524,977 Tons During First Half of 1919

THE total production of pig iron in Canada during the first half of 1920, according to statistics collected by the mines branch of the department of mines, Ottawa, was 502,667 short tons (499,891 tons made in blast furnaces and 2,796 tons made in electric furnaces), as compared with a production of 524,977 tons during the first half of 1919, and 392,804 tons during the second half of 1919. The average monthly production of pig iron during the first half of 1920 was 83,778 tons, as compared with an average monthly production throughout 1919 of 76,482 tons.

The blast furnace plants active during the first half of the year were those of the Dominion Iron and Steel Co., Ltd., at Sydney; the Nova Scotia Steel and Coal Co., Ltd., at North Sydney, N.S.; the Algoma Steel Corporation at Sault Ste. Marie, Ont.; the Canadian Furnace Co., Port Colborne, Ont.; and the Steel Co. of Canada, Ltd., at Hamilton, Ont.

The blast furnace plants at Midland, Parry Sound and Deseronto, Ont., were idle throughout the period.

Pig iron was made from scrap iron and steel in two plants, the Shawinigan Foundries, Ltd., Shawinigan Falls, Que., and the Hull Iron and Steel Foundries, Ltd., Hull, Que.

Comparison by Months

The monthly production of pig iron in short tons since 1916 has been as follows:—

	1916.	1917.	1918.	1919.	1920.*
January ..	......	89,187	74,239	103,963	81,494

VICTORIA FIRE INSURANCE AGENTS

The first meeting of the Victoria, B.C., Fire Insurance Agents' Association was held on August 11th. An address by R. S. Day, president of the B.C. Fire Underwriters' Association, was the feature. The speaker declared that the fire insurance business had just passed through most momentous times during which the whole business had changed radically. The business, he said, had been taken from the agents and passed over to the companies. He was satisfied, however, that the change would not affect local conditions to the detriment of Victoria as compared with Vancouver. The change, he said, was from agency control to purely company control, and he urged the agents to form a strong and efficient organization to protect the public as well as their own personal interests. He pointed out that insurance agents had formed strong organizations all over the continent, and he felt that the local agents must be protected by the immediate formation of an efficient organization.

F. F. Fatt, temporary secretary, was appointed secretary of the association, and he has opened offices at 620 Sayward Building.

The Remedy!

THE only corrective for overloading of lines and excessive "Busy" reports is a charge proportionate to use of the service.

For street car transportation you pay by the ride; for gas when the tap is turned on; for electricity when the lights burn.

Why not for telephone service by the message—so much for each effective call you originate?

Flat rates, especially for business service in big cities, are unfair to the small user. A flat rate high enough to yield a fair return would aggravate this unfairness.

Pay for what *you* get, not for what someone else gets—that's the principle of message rate telephone service.

POSTDATED CHEQUE IS GOOD SECURITY

Union Bank Wins Case in Which it Had Advanced Credits Against Postdated Cheque on Which Drawer Stopped Payment

IN the Supreme Court of Alberta it was held in the case of Union Bank vs. Tattersall that where a customer deposits a cheque with his bankers with the intention that the amount of it shall be at once placed to his credit and the bankers carry the amount of it to his credit accordingly, they become immediately holders of the cheque for value and this notwithstanding that the cheque is postdated when the deposit is made.

Appeal was made from the decision of the trial judge on the ground that he had erred in holding that the Bank was holder for value, in good faith and in due course.

The facts of the case are as follows: On June 3, 1919, Tattersall agreed to buy some cattle from Shaw and Mountifield, Ltd., and gave a cheque for $600 payable to Shaw and Mountifield. He desired, however, to inspect the cattle and for that reason dated the cheque June 5. On the same day he sold Shaw some cattle and received from him a cheque of Shaw and Mountifield, Ltd., for $400. The cheque for $600 was endorsed for deposit "Shaw and Mountifield, Ltd., per H. R. Mountifield," and was deposited to the company's credit in the plaintiff's bank at Edmonton on June 4. There was then a slight overdraft and on June 5 a note was charged to the account which again left an overdraft. Tattersall inspected the cattle and found them satisfactory, but for some reason he never received them, and on 12th of June before the cheque had been paid by his bank he stopped payment. The bank sued and recovered judgment.

Followed English Judgment

Chief Justice Harvey in his written judgment says: "The decision of the English Court of Appeal in Royal Bank of Scotland vs. Tottenham is very much in point. In that case a cheque drawn on August 3rd was postdated August 10th. It was deposited in the plaintiff's bank on August 8th and cheques were drawn against it on August 10th and 11th. On August 10th, the defendant gave notice to his bankers to stop payment and on the 11th the plaintiffs received notice of the dishonour whereupon the cheque was charged back to the customer leaving a debit balance of about half the amount of the cheque. The plaintiffs recovered judgment for the full amount of the cheque which was affirmed on appeal. The Court held, following a previous decision that the mere giving of credit on the deposit, was good consideration, and that the bank thereby became holders for value. In the present case there is no doubt about the good faith of the plaintiff, or the negotiation being in due course.

"The appeal should be dismissed with costs."

PERSONAL LIABILITY OF PRESIDENT OF COMPANY

Servant Under 14 Years Killed by Negligence—President Held Liable for Putting Boy at Work Where Protection Was Not Sufficient

IN a recent case appealed to the Supreme Court of Canada from the Court of Appeal of Nova Scotia, it was held that the president of a company whose activities are such that he is regarded as the owner of the business and who has full authority to direct changes in the factory or machinery necessary to safeguard the employees is personally liable in damages for the death of a young boy whom he has personally hired and put to work in a dangerous place, thereby causing his death.

The facts of the case (Lewis vs. Boutilier) and the decision of the Supreme Court are given in the following judgment of Justice Mignault:—

"The action was taken against George Lewis personally, the plaintiff alleging that her son Frank, aged less than 14 years, had lost his life through the negligence of the defendant by whom he was employed at a factory owned by him at Lewiston, N.S. The jury found that the deceased was employed by the Lewis Hardware Co., Limited, but that the defendant, Mr. Lewis, who was the president of this company, had put him to work at the carrier on the morning of the accident and had instructed him as to his duties. They found that there was negligence in so placing the boy at work; that this negligence was that "there was not the proper equipment to protect the boy, no seat across the carrier, no guards on the side to protect against falling into the carrier"; and that this negligence was the efficient cause of the accident.

Work Was Dangerous

"There was evidence to support this finding. The brothers of the deceased testified that they had worked on this carrier; that they had stood or sat astride the carrier, one foot on each side, and Robert Boutilier swore that he was working there and in that manner on the morning of the accident, and that Mr. George Lewis told him to come down and sent his brother, the deceased, to work in his place. If the jury believed these witnesses, and this was a matter for him to consider, it was entirely consistent with this evidence for them to find that there was negligence in not providing a seat across the carrier and guards on each side to protect against falling into the carrier.

"I felt some hesitation in view of the fact that the action was taken against Mr. George Lewis personally as having employed the boy, and that the jury had found that he was employed by the Lewis Hardware Co., Limited. But I cannot but think that even granting the employment of the boy by the company, an action would lie against Mr. Lewis if he personally put the boy at a dangerous work without proper safeguards to protect him from mishap. The jury having found that Mr. Lewis did put the boy at this dangerous work, and they have also found that proper safeguards were not provided. Under these circumstances, liability was incurred, in my opinion, by Mr. Lewis, the president of the company, even although the boy was employed by the company. I would dismiss the appeal with costs."

DECISION AGAINST STANDARD BANK

Appeal will be made by the Standard Bank against a decision against it early this month, made by a Vancouver judge in F. J. Finucane vs. Standard Bank. The case came to trial last spring and the financial dealings of the Rainy River Pulp and Paper Co. and the Holley Mason Hardware Co., of Spokane, together with the principals in the action, are discussed in the judgment.

The Rainy River Co., being indebted to the bank, hypothecated its output as security for that indebtedness. Subsequently, the same company obtained a loan of $50,000 from the Holley Mason Hardware Co. and the bank waived certain security to that amount to permit the transaction to go through. In March, 1919, Mr. Finucane advanced funds to carry on the pulp company and the Holley Mason agreement was assigned to him. The bank contended that it did not approve of the loan of $50,000 by the hardware company to the pulp concern, but only at the rate at which the loan should be repaid. The agreement, which came into the hands of Mr. Finucane, provided he should receive $10 per ton on the output of the pulp company, but after the sale of considerable quantities of pulp and paper, the bank would not recognize the validity of the agreement, and refused to hand over any moneys to Mr. Finucane.

His lordship interpreted the approval of the bank as a "definite undertaking to see at least that the payment of $10 per ton was carried out, and with that object in view continue to honor the company's cheques as issued." Regarding the payment of $10 a ton, he decided the bank "stepped into the shoes of the Rainy River Co., and in my opinion, are trustees for such sums as may be found due in an accounting."

News of Industrial Development in Canada

International Nickel Company Planning Heavy Expenditures at Sudbury—Output of Plant of Spanish River Company at Sturgeon Falls to Be Increased By Installation of New Machine—Dominion Steel to Spend Four Millions in Coal Development in Nova Scotia—Baldwin's Canadian Steel Plant Will Soon Be Producing at Toronto

THAT the International Nickel Co. is planning the expenditure of about $3,000,000 on a new rolling mill at Sudbury, Ont., is the information given out by Frank L. Culver, mining magnate, who has just returned to Toronto from the convention of the Ontario Mining Association, which was held at Sudbury last week.

This plant is to be used exclusively for the rolling of monel metal—work that is now done at Bayonne, N.J.—and eventually, it is understood, all the operations of the company will be carried out in Canada, either at the mine and plants at Sudbury and Copper Cliff, or at the recently established refinery at Port Colborne, Ont. Monel metal is a composition of pure nickel and pure copper, and is in demand because it is not susceptible to the influence of acids, because it is only affected in small measure by the presence of heat or cold, and because of its freedom from oxidization it will not, like steel, gather barnacles.

Mr. Culver is particularly interested in the work that the International Nickel Co. is completing in the neighborhood of High Falls, where a dam 90 feet in height is being erected that will hold water back for a distance of twenty-five miles. All the area that is to be submerged has been carefully cleared by the company, so that no refuse of any kind can be swept down towards the dam to interfere with the operation of the power wheels supplying electricity to the plant. The dam has been made as high as it is in order that, even in the depth of winter, the ice and snow may not impede the flow of the water underneath. In the construction of the dam 88,000 cubic yards of cement have been used, and the total cost of the work will be in the vicinity of $4,000,000.

Recent advices from the plants of the Spanish River Pulp and Paper Co. in northern Ontario are to the effect that the new machine being installed at Sturgeon Falls' mill will be ready to start operations about January 1 next. Some delay has been experienced in securing electrical equipment, but progress is being made now. This machine will increase the output of the mill by about fifty tons of newsprint each day.

A sawmill of Frank Beban, near Extension, B. C., which was destroyed by bush fire recently at a loss of about $75,000 will be rebuilt. The new mill will be built on the old site, and will be capable of handling fifty thousand feet of lumber per day.

The Manouan Pulp and Paper Co., Ltd., is a concern now in process of organization, whose plant will be located in the St. Maurice district of the province of Quebec. The interests behind the new corporation include a number of prominent American and Canadian interests, who are already largely identified with the pulp industry. Prominent among them are: Frank L. Moore, president and managing director of Newton Falls Paper Company, of Watertown, N.Y., and former president of the American Pulp and Paper Association; Thomas Fynes, of the Continental Bag Company, of New York, and several pulp and paper companies, both in Canada and the United States, and George R. Smith, M.P.P., manager of the Bell Asbestos Mines.

In preparation for proceeding with the construction of dams on the Tobique River and a pulp and paper manufacturing plant at Tobique Narrows, a few miles from the town of Andover, in Victoria county, N.B., the Fraser Companies, Ltd., who now operate several pulp mills and about a dozen lumber plants in New Brunswick and Quebec, are said to be obtaining options now on properties which will be required in carrying out their immense new project.

Lumber stocks in western yards are reported by retail men as lower than at any period since the war Business is reported as exceptionally good, but their accounts are mostly with farmers, and they cannot make collections until after the harvest. Meantime, they are not ordering stock from the coast as the banks on the prairies are restricting loans until after the cro phas been removed. Lumber trade in the west will remain dull, as far as original mill shipments are concerned, until October 15th.

Coal and Steel

The Dominion Steel Company announces the commencement of operations for the expansion of coal production by a programme involving an expenditure of four million dollars in the Cape Breton mines and half a million dollars at Springhill, N.S. The company expects to develop the Springhill mines eventually to yield one thousand tons per day.

Colonel Sir Charles Wright, a director of Baldwin's, Ltd., is visiting Toronto. This week he inspected the plant of Baldwin's Canadian Steel Corporation at Ashbridge's Bay and expressed himself as pleased with the location of the plant and the progress made in its erection. Sir Charles mentioned that the commencement of operations is now clearly in sight. The last piece of the large rope wheel had left Pittsburg, and was expected to be delivered at the plant toward the end of the present month. Immediately upon its arrival its erection will be proceeded with and the first unit of eight mills set in operation.

It is not the intention of the company to bring into Canada any more men than is absolutely necessary for the starting up of the plant. Opportunity will be given to Canadians to learn the trade of rolling, doubling and finishing the sheets, and it is the particular wish of the company that only Canadian labor will be engaged.

"The intentions of the corporation," said Sir Charles, "were to install forty mills at an outlay of about $3,000,000, but owing to the shortage of power the plans had to be curtailed to suit the available power which the Hydro-Electric Power Commission could let us have, which has reduced the plant to one unit of eight mills. The original idea will be resorted to when the Chippawa-Queenston development is fully carried out and we are able to receive our full requirements of 20,000 horse-power."

Maritime Brick Manufacturing

Immediate expenditure of several million dollars is to be made by the Empire Silica Co., in the development of silica properties near Whycocomagh, N.S., and in the erection of factories for the manufacture of brick of various kinds, as well as lime and cement products, according to an announcement by Major Burton, of New York, in Sydney, N.S., recently.

The brick manufacturies which are planned will give employment when in full operation to at least 1,000 men, said Major Burton, and will be operated under the management of a Canadian company, incorporation for which is now being sought. The various silica lime and clay properties which are situated in the district of Sky Mountain near Orangedale, N.S., consists of nearly 60,000 acres containing silicia, limestone and fire clay. The property is at present being surveyed and a Sydney engineer is at present at work completing surveys which are to be handed over to the new Canadian company which will acquire all rights of the Empire Silica Co. The board of directors of the new company will consist of the directors of the Empire Silica Co., with the addition of several Canadian financiers. The headquarters of the company will be at Sky Mountain.

Manufacture Hard Rubber Goods

The Joseph Stokes Rubber Co., of Trenton, N.J., have acquired a three-acre site in Welland, Ont., adjoining the Grand Trunk Railway, and will erect a plant for the manufacture of hard rubber goods, plates and cells for batteries, etc. It is proposed to erect the factory as soon as material can be placed on the ground.

The size of the first unit will be 65 x 160 feet, with a separate power-house and office. The railway spur is being laid the entire length of the property, so that shipping facilities will be available to other units as they are added. The company expects to operate by December, and estimates the number of employees at 150 by the end of the second month. About 1,500 people are employed by the parent organization in Trenton, N.J.

The company will be incorporated under an Ontario charter, and a by-law will be submitted to Welland ratepayers at the next municipal election giving a fixed tax assessment to cover everything except special and school taxes for a ten-year period.

About the middle of October the new warehouse now under construction for the Marshall Wells Alberta Co., at Edmonton, Alta., will be ready for occupancy. This new building, which is the largest commercial warehouse devoted to one line west of Winnipeg, represents an investment of well over $500,000. Since July, 1912, the present building at the corner of 102nd Ave. and 103rd St., has been occupied. At that time they bought out the business of Ross Bros. Previous to that the Marshall Wells interests had operated the Somerville Hardware Co., including its wholesale department, but in 1912 the two businesses were amalgamated. The territory served from Edmonton embraces a very wide area and includes everything west to Prince Rupert, east to the Saskatchewan boundary, south to Calgary and north to the Arctic Ocean.

NEW INCORPORATIONS

International Petroleum Co., Ltd., Sarnia, $20,000,000—American de Levaud Manufacturing Company, Ltd., Toronto, $7,500,000

The following is a list of companies recently incorporated under Dominion and provincial laws, with the head office and the authorized capital:—

Hecla, Man.—C. Tomason Co., Ltd., $40,000.

Kingston, Ont.—Wettlaufers, Ltd., $800,000.

Marpole, B.C.—Murray Motors, Ltd., $10,000.

Senlac, Sask.—Senlac Salt Co., Ltd., $150,000.

Morris, Man.—Western Brick Co., Ltd., $5,000.

Revelstoke, B.C.—Comaplix Mills, Ltd., $10,000.

Perth, N.B.—Geo. B. McLaughlin, Ltd., $49,900.

Dunnville, Ont.—J. H. Charles Co., Ltd., $40,000.

Chesley, Ont.—Bruce Woodworkers, Ltd., $40,000.

Waterville, Que.—Weaver Products, Ltd., $24,000.

Sandwich, Ont.—Border Transit Co., Ltd., $50,000.

Canterbury, N.B.—Benton Land Co., Ltd., $99,000.

Calgary, Alta.—Caldwell-Mount Co., Ltd., $50,000.

Moncton, N.B.—Moncton Orangemen, Ltd., $49,000.

Cole's Island, N.B.—West Lumber Co., Ltd., $90,000.

St. Boniface, Man.—Belgian Baking Co., Ltd., $18,000.

Nashwaksis, N.B.—Hawkins Lumber Co., Ltd., $98,000.

Windsor, Ont.—Dominion Motor Castings, Ltd., $250,000.

Lion's Head, Ont.—Eastnor Thrashing Co., Ltd., $10,000.

Peterboro', Ont.—G. J. Jopling and Sons, Ltd., $100,000.

Penticton, B.C.—Penticton Stationery Store, Ltd., $10,000.

Merritt, B.C.—Nicola Valley Silver Fox Co., Ltd., $35,000.

Cookshire, Que.—East View Small Mills Co., Ltd., $50,000.

Bracebridge, Ont.—Archer-Heintz Lake Service Co., Ltd., $12,000.

Sarnia, Ont.—International Petroleum Co., Ltd., $20,000,000.

Bear River, N.S.—The Bear River Steamship Co., Ltd., $150,000.

1870 —— OUR GOLDEN JUBILEE —— 1920

Co-Operative - Scientific - Successful

"How did the Mutual Life of Canada succeed in attaining its present impregnable position in the financial world? It may be replied that the promoters of the Company did not organize it as a commercial undertaking but that it might serve as a public benefactor giving the largest amount of genuine life insurance for the least possible outlay. Unselfish devotion to the success of the enterprise supplied the place of capital. Although strictly co-operative or mutual, yet the Company has been built up on a scientific basis as an old line legal reserve life insurance company. The Mutual Life of Canada is a beneficent idea worked out on scientific lines—that is the secret of its popularity. The Mutual being essentially a company of policyholders, conducted by policyholders in the interests of policyholders, naturally became a great success.

BE A MUTUALIST!

The Mutual Life Assurance Co. of Canada

Waterloo Ontario

Hume Cronyn, M.P., President Charles Ruby, General Manager

A REMINDER

As it has been well said—some of us are "absent-minded beggars," and fail to look ahead. Many families have suffered from this cause. Yet if everybody knew at how trifling a cost such suffering could be altogether avoided there would be fewer who fail to take advantage of the opportunity of Life Insurance.

If the reader of this announcement has hitherto failed to secure the protection he ought to have, let him take the first step towards remedying this omission by sending his name, address, and age to

News of Municipal Finance

Regina and Calgary Civic Utilities Falling Behind Financially—Montreal Assistant City Treasurer Suggests Caution in Order That Maturing Loans May be Met—Kingston Auditor Criticizes City's Accounting—Large Increases in Cobalt and Portage La Prairie Tax Rate

Seymour Township, Ont.—At a special meeting of the council on August 24th a by-law was passed fixing the tax rate at 23 mills on the dollar.

Calgary, Alta.—During the two discount periods between July 1 and August 20, approximately $2,250,000 was received by the city treasurer in payment of current taxes.

Cobalt, Ont.—The tax rate this year has been struck at 32.5 mills for public school supporters and 50 mills for separate school supporters, as compared with 38 and 44.3 mills last year.

Owen Sound, Ont.—The city council has set the tax rate for 1920-21 at 40 mills on the dollar for public school supporters and 35.5 mills for separate school supporters. The total amount required by the city is $271,665 and the assessed value is $7,042,581.

Portage la Prairie, Man.—The tax rate for this year has been fixed by the city council at 42 mills on the dollar. This is an increase of 8 mills over last year. The increase is due largely to an increase of four mills asked for by the school board, made necessary by increased salaries to teachers.

Lethbridge, Alta.—At a recent meeting of the city council a by-law authorizing a bank credit of $313,000 was passed. This was done at the instance of the Bank of Montreal which asked that a by-law covering the full line of credit for the year be passed. The council decided that the best thing to do was to pass one for 80 per cent. of the current year's taxes, and then use whatever might be necessary of the amount.

Oak Bay, B.C.—A by-law for the relief of returned soldiers owing taxes on property within the municipality is being considered by the council. At a recent meeting the by-law was investigated to some extent, but certain difficulties prevented any definite arrangement being made, and the council instructed their solicitor to look into the matter. The by-law deals with arrears owing up to December 31st, 1919, and allowed a five-year extension, with interest, for property on which a taxpayer does not reside, and a five-year extension, without interest, on the property on which a tax-payer does reside. Payments must be made annually, and the first by September 1st of this year.

Winnipeg, Man.—Property to be sold this year for taxes represents a total in tax arrears of $278,798, the smallest amount in years, according to the list submitted to the city treasurer's department by H. R. Pattinson, city tax collector. The sale covers 1917-1919. The properties on which taxes are in arrears will be advertised for sale at once, and the sale will be held earlier than usual, probably in September. Ratepayers will still have an opportunity of keeping their property from sale by paying all arrears to date to the city treasurer at once. The 1919 sale covering arrears from 1916 to 1918, called for $591,251. The taxes in the 1918 sale called for $499,079; in the 1917 sale, $318,753, and in the 1916 sale, $624,151.

Hamilton, Ont.—City Clerk Kent has received a letter from the United Gas and Fuel Company containing a new offer in connection with the city's proposal to take over the company's holdings. The plant of the company is now offered to the city for $3,050,000, the city to assume the outstanding bonds of $1,050,000, due in 1923, and pay the balance in city of Hamilton 6 per cent. sinking fund bonds. The company also asked that the city buy any stocks of coal, oil and other supplies on hand at the prices paid for them. The company's first offer was $3,200,000, and the city offered $2,800,000 for the plant. The city later increased its offer to $2,900,000, and the company's latest offer spilts the difference between the price asked and the city's second offer. No definite decision has yet been made.

Kingston, Ont.—Auditor Muir, in submitting his report to the city council on the 1919 financial statement, makes some severe criticisms. He says: "Seven months after the close of the financial year is rather late to submit a report. The reason is the same as for the past two years, and is on account of difficulties in connection with the accounting department of the Public Utilitie. Commission. On July 20, 1914, the city council passed a resolution in accordance with the Public Utilities Act, asking the local commission to submit quarterly statements of the business of the three utilities. As yet you have not had a statement except the annual reports which I have filed. If the accounting department was on an efficient and permanent basis, as it should be, there is no reason why these statements should not be submitted shortly after the end of each quarter. The deficit of the 1919 council was $14,306, the Board of Works being responsible for the greater part. The municipal business of 1919 was the most poorly conducted that I have seen. For five months from July 1st, the city's business, especially the work's department was conducted without any regard for the statutes, municipal by-laws, or any other procedure, being done principally by the so-called round robins. I am very glad to see that so far the 1920 council is trying to properly conduct the city's business, and it is to be hoped that future councils will not follow the example set in 1919."

Montreal, Que.—Assistant City Treasurer Patrick Collins has just issued the annual report of the city's receipts and expenditures for 1919. In the course of his remarks he calls the attention of the civic authorities to the fact that between December 1st, 1922, and September 1st, 1923, loans to the extent of $18,000,000 will become payable, and suggests caution so that these loans may be met promptly when due. The report shows that the total revenue for last year was $19,808,651; receipts on loan account and special revenue, $14,650,652; moneys due by bankers outside of Canada, $162,397; balance on hand on January 1st, 1919, $203,969, forming a total of $34,825,669.

The expenditures were as follows: Cost of administration on revenue account, $19,882,861; expenditures on loan account and special expenses, $14,620,589; moneys owed to bankers outside of Canada, $16,982, making a total of $34,520,432, leaving a cash balance on hand on January 1st, 1920, of $305,257.

As regards the preparing of the annual budget, Mr. Collins points out that, while the civic budget has now to be prepared for January 1st, the revenue included in said budget does not begin to come available until the following May 1st, and this method has been followed for the past twenty-five years. The assistant treasurer considers this to be an anomaly which could be remedied in the new charter of the city, which is now being drafted by the Charter Commission.

Calgary, Alta.—In making up the estimates for 1920, it was estimated that the civic hospitals would have a deficit of about $273,000 this year. The showing made for the first seven months seem to indicate that unless certain changes are made before the end of the year, this figure will be greatly exceeded. Based on the estimate for the year of $273,360, the deficit for the seven months should have been about $159,464. The actual figure for that period, however, was $162,710.

The municipal market is facing a situation very much the same as that of the civic hospitals. While expenditures are constantly increasing, revenues are practically stationary, as compared with last year, the result being a steadily

increasing deficit. The report of city comptroller, W. C. Wood, for the seven months of 1920 just elapsed, show that whereas $27,110 was estimated by the council as the total expenditure for the year on the market, $15,997 had been expended up to the end of last July, leaving a balance of $11,113 to operate the market for the remainder of the year. In the same period, revenues only amounted to $6,325, leaving a deficit of $9,672 for the first seven months of the year.

The expenditure of $15,997 for the first seven months of 1920 compares with $12,380 expended in the first seven months of 1919 and the revenue of $6,325 for seven months of this year is a trifle less than the revenue for the same period of 1919, which was $6,350, and a deficit for the same period of $6,031. These figures are inclusive of all charges for interest, sinking fund, taxes, insurance, reserve, etc.

Regina, Sask.—The city council is setting itself the task of cleaning up an accumulation of balances on capital expenditure by-laws covering a number of years back in the city's history. Over-expenditures on local improvement and general by-laws to date total $612,864. Unexpended balances aggregate $809,255, leaving a balance in favor of under-expended by-laws of $186,391.

In preparing the above statement the city auditors recommend that special legislation be secured from the Saskatchewan government authorizing the city to merge the unexpended balances and apply them against the over-expenditures, and it is probable that this course will be adopted by the council.

With the exception of the waterworks, the civic utilities are running behind rapidly. At the end of July the electric light and power department had accumulated a deficit of $41,442 as compared with an estimated surplus for the year of $20,710. The adverse showing is entirely due to the accident in January, when a big, new 5,000 kilowatt turbine generator was destroyed. The company is replacing the machine without cost to the city, but in the meantime inefficient machines are being used. These are eating up fuel at an alarming rate, and there being no reserve power, little can be done to repair defects until the new machine arrives and is installed.

In comparison with an estimated loss of $21,960 for the entire year, the street railway showed an actual deficit of $36,562 at the end of the first seven months. This is partially due to a falling off in anticipated traffic receipts, but to a greater extent to the increase in operating costs. The inauguration of an increase in fares from five cents to a straight cash fare of ten cents and tickets at seventeen for the dollar will, it is believed, stem the rising tide of adverse finances for the system.

Government and Municipal Bond Market

Several Ontario Municipal Issues Disposed of During Past Week—Halifax Selling Half Million Through Local Brokers—Calgary Will Try "Over-the-Counter" Method—Alberta Issues Disposed of in the United States

SEVERAL Ontario municipal issues were disposed of during the past week, the total sum involved being about $900,000. The prices received by the various municipalities, however, were not of the kind to encourage others who anticipate coming on the market at the present time. The yields on the Oshawa, York Township and the United Counties of Stormont, Dundas and Glengarry bonds, were between 6½ and 7 per cent.

The $2,000,000 6 per cent. 10-year Alberta bonds purchased by the United Financial Corp., Ltd., last week, have practically all been absorbed by United States investors at a price of 89.50, to yield 7½ per cent.

More Local Selling

Because of the success of certain municipalities in placing their debentures locally, and chiefly because the open market does not yet look sufficiently attractive, other municipalities have decided to arrange their own financing. A good illustration of this new method is that of Goderich, Ont. The town disposed of in a few days over the counter to citizens at par, $10,000 6 per cent., 20-year debentures. The proceeds of the issue will be used for sewer construction.

Another loan has been floated by Halifax, N.S. An issue of $500,000 6 per cent. bonds, due July 1, 1950, and debenture stock, is being offered by local brokers at 98.16, to yield 6¼ per cent. The bonds are in denominations of $1,000, while the stock, which is registered both as to principal and interest, is issued in certificates of $100 and upwards. This issue is similar to the one made in May last, and the offering price is exactly the same.

At a recent meeting of the Calgary, Alta., council, the recommendation of the finance committee that the city dispose of $75,000 bonds to local citizens, the proceeds to be used in gravelling trunk roads throughout the city, was adopted. The original recommendation, with amendments, reads that "short-term debentures be issued in the nature of a domestic loan, for $75,000, extended over a period of five years; the bonds to be serial annuity, with interest at 6½ per cent., denominations of $50, $100, $500 and $1,000."

Cloverdale, B.C., may, in the near future, float a school loan locally. Particulars are not yet available.

Coming Offerings

The following is a list of issues offered for sale, particulars of which are given in this or preceding issues of *The Monetary Times*:—

Borrower.	Amount	Rate %.	Maturity.	Tenders close.
Lachine, Que.	$154,000	5 & 6	Various	Aug. 31
Calgary, Alta.	250,000	6	15 & 30-inst.	Aug. 31
Lakefield, Ont.	33,500	6	30-instal.	Sept. 1
Dauphin S.D., Man.	50,000	6½	20-years	Sept. 2
Milton, Ont.	48,000	6	30-instal.	Sept. 7
West Kildonan, Man.	56,849.37	6	Various	Sept. 7

Lakefield, Ont.—Tenders will be received until September 1, 1920, for the purchase of $33,500 6 per cent. 30-instalment hydro-electric debentures. W. Sherin, clerk.

West Kildonan, Man.—Tenders will be received until September 7, 1920, for the purchase of 6 per cent. debentures as follows: $26,248.95, 30-years; $23,150.61, 30-years; $6,641.24, 20-years; $808.57, 7-years. (See advertisement elsewhere in this issue.)

Debenture Notes

Exeter, Ont.—Ratepayers have approved of the by-law authorizing the raising of $8,000 for paving purposes.

Balmoral, Man.—Ratepayers have voted against a by-law authorizing the raising of $12,000 for a new skating rink.

Walkerville, Ont. The town contemplates issuing debentures to the amount of $100,000 for pavement construction purposes.

Prince Albert, Sask.—Debentures to the amount of $65,700 for waterworks intake will not be offered for public sale. E. F. Webb, city treasurer, informs *The Monetary Times*. The city purchases all debentures issued with its present sinking fund.

Sarnia, Ont.—Messrs. Brent, Noxon and Co. have been given a thirty-day option at 95 on the following debentures:

Victory Bonds a Bulwark

Just as the Great Silent Fleet was England's sure shield against the aggressiveness of German Kaiserism, so are Victory Bonds your strongest bulwark against misfortune and a "rainy day." The security is unrivalled. Interest is prompt and sure, and should necessity arise for immediate cash, your Victory Bonds can be readily sold. Furthermore, no other security maintains its value so well.

Mail your order or write for particulars.

RSC
INVESTMENT SERVICE

Basic Development —Not Inflation

Many investors who do not appreciate the exhaustion of other countries' pulpwood reserves, fear that the past years' advance of the Canadian pulp and paper industry, and the corresponding rise in value of its securities, is artificial.

This is not so — and the reasons why it is not so are very clearly shown in the current number of *Investment Items*. If you are a holder of pulp and paper securities it will add greatly to your satisfaction to read this number; so we recommend you to write for a copy.

Even though you may not at present hold such securities, you will be interested in it. Write for a copy today.

$55,893.82 6 per cent., 5-instalments; $37,479.77 6 per cent., 10-instalments; $70,000 5½ per cent., 10-instalments; $6,460 6 per cent., 20 instalments; total, $169,833.59.

Moose Jaw, Sask.—Only about one-half of the city's $22,200 debenture issue has been taken up by local citizens. A renewed effort will be made to dispose of the balance. Kern Agencies has undertaken the sale of the debentures without cost to the public treasury.

Hamilton, Ont.—All bids were turned down by the city this week on the $272,000 5 per cent. 10 and 20-instalment debentures. A list of tenders has not been made public, but it is understood that under the highest bid the city would have had to pay 6.70 per cent. for its money.

Lethbridge, Alta.—September 18 is now set as the possible date for the election in the Lethbridge Northern Irrigation District. On this date it is hoped that the farmers of the community will vote overwhelmingly for the issue of debentures to cover the expenses of constructing the district. Two possibilities for delay are still evident. One is that the drafting of the debenture by-law will not be ready and the other is that some of the farmers in Macleod district may decide to appeal the assessment notices.

Bond Sales

Stormont, Dundas and Glengarry, Ont.—The united counties, on August 20, awarded $400,000 6½ per cent. 10-year road debentures to A. E. Ames and Co., at 97.79, which is on a basis of about 6.82 per cent.

Truro, N.S.—The Eastern Securities Co., Ltd., recently purchased $27,000 5½ per cent. bonds, dated August 1, 1920, and due August 1, 1950. The bonds are now offered at 90 and interest, yielding 6¼ per cent.

Charlottetown, P.E.I.—The Royal Securities Corporation recently purchased $75,000 5½ per cent. bonds, maturing September 1st, 1940. The bonds, which are payable in Toronto and other principal Canadian cities, will be offered on about a 6¼ per cent. basis.

Fort Garry R.M., Man.—The Canadian and General Securities, Ltd., recently purchased $150,000 6 per cent. 30-year bonds, and are now making the offering at 87.52, to yield 7 per cent. The bonds are payable in Winnipeg, Toronto and Montreal.

York Township, Ont.—Messrs. Wood, Gundy and Co. have purchased $278,248.41 6 per cent bonds as follows: $140,000, 25-instalments; $138,248.41, 10-instalments. The price paid was 95.07. Other tenders were:—

A. E. Ames and Co.	94.601
Dominion Securities Corp.	94.531
C. H. Burgess and Co., and A. Jarvis and Co.	94.32
National City Co., Ltd.	93.67
Macneill, Graham and Co.	92.27

Macneill, Graham and Co. also offered 97.75 for 6½ per cent. bonds. The Canadian Bank of Commerce bid 96.534 for $25,000 only. Brent, Noxon and Co. put in two separate bids, $131,681.61 for the ten-instalment block and $129,150 for the 25-instalment block.

Oshawa, Ont.—The United Financial Corporation, Ltd., was the successful tenderer for the $220,000 6 per cent. bonds, which were issued as follows: $125,000, 30-instalments, for waterworks; $35,000, 30-instalments, for schools; $50,000, 20 instalments, for parks; $10,000, 20-instalments, for bridges. The price paid for the combined issues was 92.43. Bids received were as follows:—

United Financial Corp., Ltd.	92.43
A. E. Ames and Co.	92.29
Wood, Gundy and Co.	92.14
Dominion Securities Corp.	90.33

In addition to the above, which were all straight offers, Brent, Noxon and Co. bid 93 for $60,000, and asked for an option on the balance at 92.50. A. Jarvis and Co. bid 91 for $60,000 and asked for an option on the balance at the same price.

Saskatchewan.—The following is a list of debentures reported sold by the Local Government Board from August 5th to August 12th, 1920:—

Schools.—Mawer, $6,900: Harris, Read and Co., Regina. Fortsburg, $3,500, Point Lake, $4,500, Ipsley Mound, $4,000, Roanoke, $4,200, Scotsguard, $5,000, Antelope Valley, $3,650; Waterman-Waterbury, Regina. Weldon, $6,500; Hardy H. Wood, Regina. Wiley, $1,000; T. Hogg, Regina. Hollington, $2,500; S. J. Ripley, Kipling.

Rural Telephones.—Rhein, $28,400, Killaly, $9,300; Harris, Read and Co., Regina. Star City, $33,000, Poplar Crescent, $500, Valleyfield, $8,400, Allen East, $16,400; W. L. McKinnon and Co., Regina. Dinsmore, $1,200; Wood, Gundy and Co., Saskatoon. Erie, $5,100; F. Somerville, Regina. Sprattville, $3,000; R. C. McCallum, Regina. Quinton, $1,400; J. Burnett, Regina.

Towns.—Watrous, $4,085, $3,365.

JULY BANK STATEMENT

Current loans in Canada showed an increase of more than $12,000,000 in the July bank statement, as compared with the previous month. Total deposits in Canada showed a decline of $1,738,102 in the same comparison. Principal changes are:—

	July, 1920.		Changes from June, 1920.
Note circulation	$ 231,534,233	+	$ 3,758,980
Reserve fund	130,027,965	+	1,352,965
Demand deposits	639,415,025	—	11,207,558
Notice deposits	1,253,170,433	+	9,469,456
Total deposits in Canada	1,892,585,458	—	1,738,102
Deposits elsewhere	348,008,545	—	12,349,841
Current coin	81,060,510	+	96,225
Dominion notes	171,307,950	—	2,384,038
Deposits, central gold reserve	99,850,000	—	550,000
Call loans in Canada	115,360,894	+	88,307
Call loans outside	203,045,209	—	16,169,222
Current loans in Canada	1,377,276,853	+	12,125,770
Current loans outside	190,914,052	+	6,585,588
Total liabilities	2,778,714,531	—	32,444,241
Total assets	3,066,861,431	—	24,810,080

A detailed review will be given in these columns next week.

An Essential Raw Material

Asbestos has become established as a material necessary to many industries; and with world-wide realization of the quality of the Asbestos mined in Canada, has come a remarkable increase in the price per ton.

This in turn has had its effect upon the financial position of the Companies engaged in the business—one of which, the Canadian Asbestos Corporation, is analyzed at length in the current issue of the *Greenshields Monthly Review.*

A copy will be sent to any investor on request.

Corporation Securities Market

Tone of Canadian Stock Markets Improved Notwithstanding Diminished Business—Another Factor Enters the Credit Situation—New York Stocks Active and Strong—Western Canada Pulp Bonds Offered to Public—Automobile Club Issue Now on the Market

DEVELOPMENTS in the Canadian markets for the week ended August 25 were void of importance, and the general situation remains practically the same. Trading, particularly during the last three days, was reduced to a minimum, and came very near approaching the low record of last March. At times there was a bearish tendency to stocks in both Montreal and Toronto, but at the close the tone of both markets seemed greatly improved, and losses sustained during the week were in the majority of cases retrieved, while some stocks showed small gains. The general outlook of the markets is regarded as hopeful, but somewhat clouded as to the future of money. Hitherto the chief cause of money tightness has been attributed to the necessity for funds for crop movement, and brokers were looking for a let up in call money restrictions in a few weeks, followed by a generally easier period immediately following the crop movement period. A new factor has been mentioned, however, which makes the situation rather uncertain. An authoritative banker points out that once the crop is moved the banks rather anticipate heavy calls will be made upon them by the Dominion government, which will continue to tie up funds which would otherwise come into the market. In this connection, however, a great deal depends upon the national railroad situation in regard to the schedule of rates.

Action of New York stocks for the week were almost entirely opposite to those of Canadian securities. Trading was brisk and at times there was an inclination towards buoyancy. Call money which was at 7 per cent., all week, rose to 8 per cent. at the closing session, and as a result there was a slackening in operations, but the tone of the market was steady. In brokage circles the opinion is expressed that business conditions and the money situation do not justify the beginning of a new and sustained upward movement. In important business circles, however, the opinion differs. It is claimed that changes in the business situation are in progress that will work for its ultimate good and that of the securities market as well.

New Issues

An offering of $600,000 8 per cent. cumulative preferred shares of the Automobile Club of Canada, Ltd., is being made by the Provincial Bond Co., Ltd., Toronto, at 98 and accrued interest, with a bonus of 40 per cent., common stock.

The Automobile Club of Canada, Ltd., is being organized to purchase land and to build the largest automobile club, garage and service station in the Dominion. The building site comprises the southwest corner of Richmond and Sheppard Sts., Toronto. It is proposed to erect an eight-story building of steel and concrete construction, with accommodation for approximately 1,000 cars. The building will be modelled on the lines of successfully operated similar buildings in New York, Boston, Cleveland and Detroit.

Public offering is now being made by Graham, Sanson and Co., of the $1,000,000 7 per cent., serial bonds, maturing annually from February 1, 1923, to February 1, 1940, of the Western Canada Pulp and Paper Co., at par, with a bonus of five shares of common stock with each $1,000 bond.

The new British Columbia District Telegraph and Delivery Co., Ltd., Vancouver, has just successfully completed the flotation of $55,000 worth of eight per cent. cumulative preference shares, all the stock being subscribed for locally. The new company takes over the British Columbia District Telegraph and Delivery Co. and Fire Patrols, Ltd., both of which have been in existence for some time.

Capitalization Increases

Noden, Hallitt and Johnson, Ltd., have obtained supplementary letters patent from the Ontario legislature to increase the capital stock from $50,000 to $100,000, by the creation of one thousand shares of stock of $50 per share.

The Fort Francis Pulp and Paper Co., incorporated under the laws of the province of Ontario, have obtained supplementary letters patent to increase the capital stock of the company from $50,000 to $3,000,000, by the creation of 29,500 shares of new stock of $100 per share.

R. J. Whitla Co., wholesale dry goods, Winnipeg, Man. have been authorized to increase the capital stock from $2,000,000 to $4,000,000.

Shareholders of the New Brunswick Telephone Co., Ltd. at a meeting at Fredericton last week, authorized the directors to increase the capital stock of the company from $2,000,000 to $4,000,000.

American Cyanamid to Purchase from Holders

Shareholders of the American Cyanamid Co. are in receipt of an offer from the company to purchase pro rata from the holders of preferred stock of record August 16 23,983 shares, being 30 per cent. of its preferred stock that outstanding. The price offered is $60 per share in New York funds, which is in line with present market quotations in New York.

It is understood that the company considers the present an opportune time to make this deal, as it has considerable accumulated funds, and the price has been thought low in view of the prosperous condition of the operation. The company's main plant in its manufacture of chemicals is at Niagara Falls, Ont., and it is a large customer of power from the Ontario Power Co., or rather its successor, the Hydro-Electric Commission. Quite a number of shareholders reside in Canada, particularly in the Niagara district.

ONTARIO'S RIGHTS TO WATER POWERS

Dominion Has Control of Navigation and Shipping, Which Over-rides Claim to Water Power Development

By A. T. DRUMMOND, LL.D.

IT is not always pleasant to run counter to public opinion, but there is a prevailing impression in Ontario, fostered by the Hydro-Electric Commission and [illegible] to some extent, by government officials at Toronto, that the province has claims to the power which can be generated on the St. Lawrence River between Prescott and the international boundary line between Cornwall. It may occasion some surprise, especially to the municipal organizations which have passed resolutions on the subject, and which have evidently taken their cue from the assertions of the commission, to be told that this claim has really no foundation, and that, so far as Canada is concerned, the Dominion alone has rights in, and control over, the waters of the river. It has, in the past, been recognized that where there was water power available in rivers that were not navigable, certain rights accrued to the owners of the land on either side of the undeveloped power, but on navigable rivers these rights are not only very restricted and open to question, but are absolutely subject, at all times and under all conditions, to the proper navigation of the river and the necessary works to ensure this.

Under the confederation act, the provinces have no control over navigation and shipping, or over ships, railways, canals and other works which extend beyond the province, nor over lines of communication between any one and any other province or a foreign country. Further, provincial control is excluded from all matters not of a local or private nature, and applying this to Ontario and the St. Lawrence River, the dams erected to raise the water for navigation purposes, and the attending canals and locks, all for the passage of shipping to and from the ocean, would certainly not be matters of a local character.

Navigation First Consideration

The requirements for the unobstructed navigation of the river necessarily stand first in importance: the creation of power for industrial purposes is merely a valuable consequence arising from the erection of dams to aid navigation, and from the surplus waters flowing over these dams. In this particular case, the United States is concerned along with Canada, both in the navigation of the river and in the creation of power, and this, if there were no other reason, would in itself militate against any claim of the province of Ontario. The necessary works must be constructed under a joint agreement of the two countries and must be financed under some joint arrangement. The canals and the water stretches between will be available to the ocean shipping destined for, or coming from, the ports on the great lakes of either nation, and the power obtainable will be divided between them in agreed-on ratios. The Dominion will necessarily have control over its share of the power [illegible], as it is imperative to maintain an ample depth in the river for steamships up to a fixed draft of water at all seasons of the year, and especially during the years, periodically occurring, of low water in Lake Ontario. Further, with the St. Lawrence as an ocean highway through both the provinces of Quebec and Ontario, Montreal, which at present obtains much of its hydro-electric power for industrial purposes from this river, above the city, will demand from the Dominion government a share of the new power to be developed near to it on this ocean highway.

Niagara Falls Power

It has always appeared to me that the rights of Ontario to the waters at and above Niagara [illegible] except so far as they may be granted by the Dominion. They were, no doubt, assumed by Ontario at the time when the river front was taken over for park purposes, and at a time when the Dominion government had not begun to give consideration to power problems in Canada's industries. The Niagara Falls, like the St. Mary's Falls between Lakes Superior and Huron and like the Long Sault Rapids and the Lachine Rapids above Montreal, was merely an obstruction to navigation. The natural course of the waters of the great lakes to the sea is over these obstructions, and to overcome them for navigation purposes, canals have had to be built. Steamboats from Toronto run daily up the Niagara River to Queenston, as far as the rapids below the falls permit, whilst above the falls reasonable safety is the limit of its use. But for the Falls, the vessels from the upper lakes would proceed by this river route to Kingston and Montreal with their cargoes of grain and other products. The canal and its accompanying locks would have been built around the falls, but it was found more convenient and less expensive to take advantage of physical features in the land a few miles further westward, and construct what is now known as the Welland Canal.

Not Altered by Welland Canal

The conditions as to provincial rights are precisely the same at Niagara Falls as they are on the St. Lawrence at the Long Sault Rapids, or between Lakes Superior and Huron at the St. Mary's Falls. It is only a question of the size of the obstruction, and the special method of overcoming it. All of these falls and rapids are merely physical features in the course of a great and largely international highway from the centre of the continent to the Gulf of St. Lawrence. The waters at the three points named form the boundary line between the United States and Canada, and are subject, in each case, to international conditons, as well as to the terms of our confederation act. As the two countries have in their western sections grown in population and in developed resources, facilities have had to be provided by both for through transportation, and all obstacles have had to be surmounted. That the Welland Canal was, on account of the convenience and lessened expense, constructed a few miles west of the main downward course of the lake waters, did not thereby transfer to Ontario any right to take possession of the main flow of these waters at the Niagara Falls. Every obstruction in this great waterway has been surmounted, not by the province in which it occurred, but by the Dominion, which constructed, and continues to operate, all of the canal systems and locks. Even the deepening of the river between Montreal and Quebec is entirely a Dominion undertaking, through the harbor commissioners of Montreal.

Navigation Under Federal Authority

The intention of the confederation act is clearly that, for the purposes of navigation and shipping, navigable rivers are under federal jurisdiction, and not that of the provinces, and especially so when the rivers are between province and province, and between Canada and the United States, and are utilized for shipping to foreign countries. When these canals are accompanied by dams to raise the height of the water for navigation purposes, the water powers resulting from the surplus overflow are secondary in importance to navigation and subject to its requirements, and are necessarily under the control of the Dominion. Why should [illegible] ownership in the waters of the great lakes which are [illegible] passing through their connecting rivers and the St. Lawrence onward to the sea? Not the different states and provinces, [illegible], as the waters in their progress skirt their lake and river borders, and much less the individuals who may own the shore lands of these borders. The direct rights and interests in navigation, shipping, fisheries and trade, here exercised by the United States and Canada, suggest the only reply.

Corporation Finance

American Cyanamid Company Makes Satisfactory Showing in Past Fiscal Year—Organization of New International Petroleum Company Planned—Montreal and Winnipeg Street Railway Rates Increased—St. Maurice Paper Company Increases Dividend—Dominion Steel Made Good Progress in First Quarter

St. Maurice Paper Co., Ltd.—Dividends on the capital stock of the company have been increased from 5 per cent. to 8 per cent.

Montreal Tramways Co.—At a meeting of the board of directors of the company at Montreal on August 25th it was decided to declare another dividend to shareholders of record September 8th next of 2½ per cent. on arrears, to be paid on capital stock of the company. This dividend is for the quarter ending March 31st, 1919, and makes the fourth payment, amounting to 10 per cent., on the total of 15 per cent. arrears originally accumulated.

Canadian Wm. A. Rogers Co., Ltd.—Preferred shareholders of the company have received dividends amounting to 7 per cent. for the whole of the fiscal year ended June 30th last, paid out of the earnings of the Canadian company. In the announcement covering the remittance the company reports a favorable outlook, with plant running to capacity. It is proposed to change the fiscal year to end December 31st instead of June 30th so as to conform more closely with other associated companies.

Dominion Steel Corporation.—Good progress is reported by the company for the first four months of the fiscal year, and earnings for the period mentioned are stated to be substantially ahead of the same period last year. The corporation has decided to pay out of the current earnings for some improvements the directors have authorized, including opening of two new coal mines. The opening of these two mines has been decided upon owing to the increased demand for coal, of which every effort of the company will be made to take advantage.

Winnipeg Electric Railway Company.—Seven-cent cash fares on the city lines of the railway on August 23rd were authorized by the Public Utilities Commissioner of Manitoba. Four tickets will be sold for 25 cents. This is an increase from a six-cent fare, when nine tickets sold for 50 cents. Workmen's tickets, which have been good during limited hours, and sold at five for 25 cents, are abolished. The price on children's tickets remains unchanged at eight for 25 cents. There are increases also in suburban fares. The same judgment increased the price of gas by 25 cents per 1,000 feet from $1.35 to $1.60.

Montreal Tramways Company.—Following a brief hearing, brought about by the increased salaries to employees, the Montreal Tramways Commission on August 20th made public the following:—

"Starting early in September, those who use strip tickets will pay at the rate of four tickets for 25 cents. The present rate is five tickets for 30 cents, so there is an increase of one-quarter of a cent a ticket. Books of fifty tickets now selling for $2.50 will then cost $3. This tariff is for the district covered by the 'uniform tariff' as stipulated in the agreement of 1918. There is no change in the charges for places outside the 'uniform tariff' area. Similarly, there is no change in the cash fare—7 cents; in the night fares, 15 cents cash, or in the children's fares, seven for 25 cents."

The company at the time of the new wage award let it be understood that it would grant the men the increases mentioned, provided the commission sanctioned an increase in fares commensurate with the new wage schedule.

In its report the commission points out that the deficit of the company for the year ending June 30th, 1920, was $1,728,812, but included in this is the deficit of $1,364,111 carried over from the previous year, which made the deficit on last year's operations $364,701. In this connection it is also pointed out that the tariff authorized last year went into effect only three months after the commencement of the year, while the increases granted then to the employees dated back to July 1st, 1919, and were much in excess of the present $800,000 wage increase. The same situation applies this year. The new wages will date back to July 1st, and the increases granted recently commence September 1st, or two months later. Hence there will be an additional loss of two months, which will have to be made up later.

American Cyanamid Company.—Net income of the company for the year ended June 30th, 1920, amounted to $1,525,876, as compared with $1,048,751 in 1919 and $1,601,410 in 1918. Total sales for the year were $8,684,084, as against $6,205,385 a year ago. Net profits on sales amounted to $1,716,360 and total profits $2,092,177, as compared with $1,573,041 and $1,798,129 in 1919. The surplus as at June 30th last was $2,292,629, while a year ago the figure was $1,723,529. Principal figures from the balance sheets of 1920 and 1918 compare as follows:—

	1920.	1919.	1918.
Current assets	$ 4,381,021	$ 4,730,384	$ 2,927,88
Current liabilities	980,386	1,023,532	871,17
Plant, etc., less reserves	2,997,311	3,791,139	4,172,99
Investments in subsidiary companies	4,761,740	4,700,388	4,864,141
Total assets	18,620,741	18,591,787	17,609,13

Frank S. Washburn, president, in his report, states "Operation of the cyanamid plant at Niagara Falls, Ont., ha been at full capacity for the entire year. The two new an improved carbid furnaces, of a capacity in excess of the eigh old furnaces which they replace, were during the month o May, and from the standpoints of economy and efficiency hav fully met expectations. Operation of the ammo-phos plan at Warners, N.J., was less than capacity, due to interruption in deliveries of materials by the railroads, but, on the whole this plant is doing well. Operation of the phosphate mine at Brewster, Fla., was seriously interfered with for si months by the walkout of employees. For the past si months, however, normal output has been attained, and eve exceeded."

International Petroleum Company, Ltd.—Announcemen was made on August 21st by G. H. Smith, president of th company, and J. C. Trees, president of the Tropical Oil Co of the conclusion of negotiations which have been in progres for some time past. Holders of more than 90 per cent. o the Tropical shares and of a large majority of the International stock have consented to arrangements as follows:—

It is planned to organize a new International Petroleu Company, Ltd., under the laws of Canada, authorized to issu at least 100,000 preference shares of a par value of $5 an at least 7,118,138 common shares without par value. Th Tropical Company has outstanding approximately 1,575,00 shares and the International 2,606,802 shares of common an 100,000 shares of preferred.

For the outstanding stock of both companies the ne International Petroleum, Ltd., will exchange its shares o the following basis: To the Tropical Oil Co., 1,804,534 common shares upon receipt of 1,575,000 shares of Tropica After setting aside enough of the common stock to meet obl gations the Tropical will have 1,732,500 common shares new International, which it will exchange in the proportio of 1.1 shares for each share of Tropical. To the old International Petroleum Co., Ltd., 5,313,604 common shares and 100 000 preference shares, to be exchanged on the basis of o share common and one preference share for each preferen share now outstanding and two shares of the new commo for each share of old common stock now outstanding.

The International Petroleum Company, Ltd., was inco porated in Canada in 1914, and acquired control of thr

British corporations, the London and Pacific Petroleum Co., Ltd., and the Laganitos Oil Co., Ltd., [illegible], and the West Coast Oil Fuel Co., Ltd., [illegible]. It operates in Peru, with a refinery [illegible] at Talara. It has nine tank steamers, with a [illegible] of 55,500 tons, and a 20,000-ton vessel under construction. The company supplies the local trade in Peru and exports to Chile, Ecuador and Panama. Surplus crude [illegible] are shipped in bulk to Vancouver. The company also purchases large quantities of Mexican oil. It has between 500 and 600 square miles of territory, of which only sixteen square miles have been drilled upon, besides 125,000 acres in Ecuador.

The Tropical Oil Company was organized in Delaware in 1916, and acquired the de Mares concession of two million acres in Colombia. It has drilled three wells, estimated at from 1,000 to 5,000 barrels daily capacity each. The company is constructing a road and pipe line from its wells to the Magdalena River, a distance of twenty-eight miles, and a refinery and tanks on the river bank. It is planned eventually to build a pipe line from the concession about 300 miles to the Atlantic coast. The Colombian government has consented to transfer of the de Mares concession to the Tropical Company, which has since inaugurated an aggressive campaign of development.

GRAIN STOCKS IN ELEVATORS

According to returns received at the Dominion Bureau of Statistics for the week ended August 13th, 1920, the quantity of grain in store at the different public elevators throughout Canada, has decreased by 1,735,501 bushels in oats, barley and flax, as compared with the previous week. Decreases are shown of 1,147,528; 487,849 and 100,124 bushels, respectively, in the foregoing grains. Wheat indicates an increase of 52,587 bushels and rye 3,162 bushels. Briefly, the situation of grain in store is as follows:—

In the public terminal elevators at Fort William and Port Arthur an increase is shown in wheat of 475,342 bushels and in rye of 3,238 bushels; while oats indicates a decrease of 106,090 bushels; barley, 2,800 bushels, and flax, 46,180 bushels. The private terminal elevators show a decrease in all grains of 53,632 bushels. Decreases are shown in wheat of the 25,818 bushels; oats, 10,212 bushels, and barley 17,602 bushels.

In the interior terminal elevators the quantity of grain in store has decreased by 222,431 bushels in all grains. Decreases are shown in wheat of 151,729 bushels; oats, 58,789 bushels; barley, 1,250 bushels; flax, 10,587 bushels, and rye, 76 bushels.

In the public elevators in the east the quantity of grain in store has increased by 614,757 bushels in wheat, oats and flax. Increases are shown of 528,905; 49,702; and [illegible] bushels respectively. Barley indicates a decrease of 227,527 bushels.

The inspections show 726 cars as compared with [illegible] of the previous week.

DEBENTURES FOR SALE

SCHOOL DISTRICT OF DAUPHIN TOWN
No. 905.

TENDERS FOR DEBENTURES

The undersigned will receive sealed tenders for the purchase of $50,000.00 20 years, 6½% debentures of the above School District

Tenders will be received up to and including 2nd September, 1920.

This issue is for additional School Accommodation.

No tender necessarily accepted.

R. M. CARDIFF,
Secretary-Treasurer.

Dauphin, Man. 207

TENDERS FOR DEBENTURES

Sealed tenders, endorsed "Tenders for Debentures," will be received by the undersigned up to Twelve o'clock noon, Tuesday, the seventh day of September, A.D. 1920, for the whole or part of the following debentures, dated July 19th, 1920, bearing interest at the rate of six per cent., payable yearly:—

By law No. 325	...	$26,248.95	30 years
" " 326	.	25,150.61	30 years
" " 327	....	6,641.21	20 years
" " 328	......	808.57	7 years

Delivery, Winnipeg. Interest and principal payable at Winnipeg, Toronto and Montreal.

The highest or any tender not necessarily accepted.

WILLIAM BALLARD,
Secretary-Treasurer, Rural Municipality
West Kildonan, Man

FULLY-QUALIFIED CHARTERED ACCOUNTANT desires to become associated with progressive organization as accountant or auditor, or similar position of authority. Available October 1st. For full particulars address Box 329, Monetary Times, Toronto.

RECENT FIRES

Bush Fires Have Been Raging in British Columbia, Northern Ontario and New Brunswick. Considerable Damage Done —Several Other Places Have Suffered a Heavy Loss

FOREST fires are reported in several parts of Canada, and some damage has resulted during the past week. A serious one near Glace Bay swept over Crown timber lands and Dominion coal property on August 21st and 22nd, but was extinguished by rain. South Porcupine, Cobalt and Bourke, in northern Ontario, were also threatened early this week, the flames coming to within a half-mile of South Porcupine before the wind died down. Rains have relieved the situation, but northern Ontario is still dry. In northern Manitoba, Moose Lake and Sturgeon Landing were in danger, and two trading posts were destroyed early this week; these are in the district along the Hudson Bay Railway. Another severe fire in Manitoba was in the Mulvihill district. Bad fires are also reported in British Columbia, both on the mainland and on Vancouver Island.

Banff, Alta.—Many bad fires have been raging around Banff. Village of Kananaskis and Mount Assiniboine badly damaged.

Cobourg, Ont.—August 21—Barn, owned by Joseph Greer, Kingston Road, was destroyed.

Edenbridge, Sask.—August 13—Two stores belonging to H. Boudy and Mr. Shore were destroyed. The loss was partly covered by insurance.

Hamilton, Ont.—August 21—Two frame houses occupied by E. Williams, Fairfield Avenue, were destroyed. The flames spread to nearby dwellings, which were slightly damaged.

Hatley, Que.—August 14—Buildings on the farm of H. L. Moulton were completely destroyed. The fire was caused by lightning.

Hyde Park, Man.—August 24—Barn of Robert Kennedy, 7th concession, was destroyed. The loss is estimated at $8,000.

Marmora, Ont.—August 20—Office, sheds, planing mills and kiln, owned by the Pearce Co., Ltd., was damaged by fire. The loss is estimated at $25,000, partly covered by insurance.

Moncton, N.B.—August 23—Residence of Stanley Hanson, High Street, was destroyed, with contents.

August 24—Brunswick Hotel was badly damaged when a fire started in the kitchen. The building and contents were estimated to be worth $400,000.

Montreal, Que.—August 17—Store belonging to Wm. Dube, 197 St. Jerome Street, was damaged to an extent of $400.

August 18—Fire broke out on the fourth floor of the harness and trunk manufactory of Lamontagne, Ltd., 338 Notre Dame Street. The fire is believed to have been caused by a cigarette butt. Mattress factory of Messrs. Rolland, Freres and Co., 927 Coloniale Street, was damaged. The fire was caused from the picking machine. The damage is $5,000, with no insurance.

August 23—Victoria Jubilee Bridge, connecting Montreal with the south shore of the St. Lawrence, was damaged by fire. The city incinerator plant at the corner of St. Patrick Street and Atwater Avenue was destroyed by fire.

Mulvihill, Man.—Twenty houses, a schoolhouse, crops and stock were destroyed, with three fatalities. Fire was caused by dry weather.

Newcastle, N.B.—August 21—Lumber yards of the Edward Sinclair Lumber Co. destroyed. The loss is estimated at $300,000, partly covered by insurance.

Odessa, Ont.—August 18—A woodworking shop belonging to Mr. Babcock, residence of Mrs. Kelly and a blacksmith shop were damaged by fire. The loss is estimated at $6,000, with no insurance.

Ottawa, Ont.—August 20—Store belonging to D. [illegible], Ltd., was the scene of a fire when an electric iron was left connected. An estimate of the loss is not yet known.

Peterboro, Ont.—August 18—Peterboro' Lock Works damaged by fire. The fire is believed to have been caused by a spark on the roof.

Saint Tite, Que.—August 19—Fire destroyed the boot and shoe factory of C. Trotter and a number of stores and houses. The loss is estimated at $200,000.

South Vancouver, B.C.—August 16—Plant of the Champion Shingle Mill was damaged by fire. The loss is $20,000.

Simcoe, Ont.—August 25—Storehouse of Wm. Jaques and Son, wholesale rag dealers, was damaged by fire. The loss is estimated at $20,000, with insurance of $5,000 on the building. The storehouse of Edmonds and Co. caught fire and suffered a loss of $3,000.

Vancouver, B.C.—Bush fires have been raging along North Thompson River. Many ranches have been destroyed. Estimated loss, $100,000. Business section of town of Chilliwack damaged with a loss of $60,000.

August 11—Columbia cigar store, 70 Hastings Street West, was damaged by fire to the extent of $4,000. The loss is covered by insurance.

Verdun, Que.—August 19—Barn at the Protestant Hospital for Insane was destroyed. Nine horses were burned to death.

Westmount, Que.—August 14—Fire damaged the Metcalf Apartments, Cote St. Antoine Road. Estimated loss, $10,000, with insurance of $100,000 in the Yorkshire Insurance Co.

ADDITIONAL INFORMATION CONCERNING FIRES

Port Coquitlam, B.C.—August 5—Business section of this town damaged to the extent of $100,000, with insurance of $48,800. The fire is believed to have been caused by a spark from the roof.

PREPAYMENT ON SHIPMENTS TO CANADA

Prepayment of freight rates to Canada on goods shipped from points within the United States was suspended from August 18 to December 16, 1920, by a decision of the Inter-State Commerce Commission handed down on August 17. The commission held up tariff schedules putting such rates into effect. This decision was the result of the complicated foreign exchange situation. With the Canadian dollar at a discount as compared with the United States dollar, it is to the advantage of the shipper to pay for the transportation at the Canadian end. With the lower Canadian money under schedules filed with the Inter-State Commerce Commission, which are now suspended, the railroads would be allowed to collect charges in advance in the higher United States currency.

The tariffs containing new schedules of individual and joint rates were filed with the commission by F. A. Leland and W. J. Kelly as agents, and were to become effective on August 18. The order of the commission on this subject reads as follows:—

"It appearing that said schedules provide certain rules and regulations requiring the prepayment of freight charges on traffic from points in United States to points in Canada and the rights and interests of the public appearing to be injuriously affected thereby, it is the opinion of the commission that the effective date of the said schedules contained in said tariffs should be postponed pending said hearing and decision thereon. It is ordered that the operation of the said schedules contained in said tariffs be suspended and that the use of the rates, charges, regulations and practices therein stated be deferred upon inter-state traffic until the 16th day of December, 1920, unless otherwise ordered by the commission and no charge shall be made in such rates, charges, regulations and practices during the said period of suspension unless authorized by special permission of the commission. It is ordered that the rates and charges thereby sought to be changed shall not be increased and the regulations and practices thereby sought to be altered shall not be changed by any subsequent tariff or schedule until this investigation and suspension proceeding has been disposed of or until the period of suspension and any extension thereof has expired, unless authorized by special permission of the commission."

Trust Companies' Assets Increased in 1919

Total on December 31 Was $689,795,777, Compared With $551,428,791 at End of 1918—Guaranteed Accounts Stationary, But Assets Under Administration Increased Greatly Profits Also Improve, Being 9.5 Per Cent. of Paid-up Capital

FIGURES compiled by The Monetary Times show that assets of trust companies in Canada totalled $689,795,777, as at December 31, 1919, in comparison with $551,428,791 at the end of December, 1918. A comparison of the principal figures is as follows:—

	1918	1919.
Capital paid up	$ 17,722,209	$ 26,109,966
Reserve	8,687,364	11,069,886
Capital assets	37,451,593	49,024,381
Guaranteed accounts	41,085,811	42,782,299
Estates, trusts, etc.	471,345,812	598,581,140
Total assets	551,428,791	689,795,777
Net profits	1,530,814	2,476,418

These large increases are to some extent accounted for by the fact that the 1919 list of companies is more complete than the 1918 list. This is especially true in the case of the profits figures. For comparative purposes the results for the eleven companies which have a paid up capital of $1,000,000 or over may be compared, as they are complete for both years. The totals for these eleven companies are as follows:—

	1918.	1919.
Capital paid up	$ 12,155,927	$ 12,907,468
Reserve	7,709,926	7,903,893
Capital assets	24,627,020	25,954,581
Guaranteed accounts	36,693,485	36,547,060
Estates, trusts, etc	424,993,027	490,525,311
Total assets	481,475,089	548,150,291
Net profits	1,287,042	1,507,616

The net profits for these eleven companies average 11.7 per cent. of their paid-up capital, compared with 10.6 per cent. last year. For all the companies the figures are 9.5 per cent. and 8.6 per cent., respectively.

The relative growth of the larger companies is shown in the following comparisons:—

HUGE AND GROWING PENSION BILL

$25,000,000 Required in Year Just Ended, and $35,000,000 Will Probably be Needed Next Year

(Special to The Monetary Times.)

Ottawa, September 1st, 1920.

WILL Canada's annual pension bill, like that of the United States after the civil war, increase rather than decrease from year to year? This question has occasioned some concern in this country. Those who are in any way disabled as the result of the war are now supposed to be on the pension list, so that future additions could only be the result of "pork-barrell" distributions, like those which featured congressional sessions in the United States, when, after the recovery from the civil war, revenues from the tariff were so great that the government was worried as to what to do with the money. Canada has no "pork-barrell," however, and the spending departments seem to be quite able to cope with such an emergency in case it should arise.

Beginning this month, the new pension scale provided at the last session of parliament goes into effect. Canada's pension bill for the twelve months ending August 31st this year was, it is estimated, in the neighborhood of $25,000,000. With the increases going into effect on September 1st of this year it is estimated that the pensions bill for the next twelve months will be increased by $10,000,000, and the total will be $35,000,000. This is exclusive of the payments necessary through the commutation of pensions, as provided for in the amendments to the Act.

For the purpose of explaining to returned soldiers, and also to the public who are interested, the provisions of the amended Pension Act, and also the Returned Soldiers' Insurance Act, Colonel John Thompson, chairman of the Board of Pension Commissioners, and Colonel J. W. Margeson, commissioner, will make a tour of the western provinces this month, addressing public meetings. At the same time the Pension Commissioners will hear appeals from Pension Board awards. Leaving Ottawa September 16th, the Pension Commissioners plan to commence a series of meetings in one of the British Columbia cities, and thereafter visiting every large city in the four western provinces. Then they will go to some of the United States cities where there are a great number of former C.E.F. men and address them also. There are several pension appeals in the United States centres to be heard and these must be heard by two members of the Pensions Board.

Millers Want Lower Flour Rate

The Cabinet received a deputation from the Dominion Millers' Association last Friday, the subject for discussion being the freight rate on flour carried on government ships. The millers urged that it should be the same as the rate on wheat. It was stated that a grave danger menaces the milling, dairying, live stock and other interests in Canada from the possibility of the high rates for flour being continued by the ocean combine. They asked specifically that the government ships, instead of being part of the combine known as the North Atlantic Conference, should be used solely in the best interests of Canada, and this could best be accomplished by carrying flour for export at the same rate of freight as wheat, thus giving to the Canadian taxpayer all the benefits accruing therefrom instead of the British [illegible] getting all these benefits, and the ocean combine crushing out of existence one of Canada's basic industries in which over $77,000,000 is invested, not to mention the effect on the dairying and live stock feeders and other allied interests.

A memorial presented referred to a [illegible] in a report made by Sir Henry Drayton when appointed in 1912 by the government as a commissioner to investigate the combine called the North Atlantic Conference. It was to the effect that the combine had power to make such rates "as will extinguish the traffic." "The government steamships are now part of this combine, and the ocean freight rates charged to them will certainly extinguish the traffic," says the memorial.

The delegation also pointed out the importance of mill offals from flour to the dairymen and stock feeders. The mill offal from export flour is not nearly enough and the price would become prohibitive with a resultant increase in the price of dairy products, meats, etc., as well as of flour, through the upward trend of costs because of short-time production. The deputation was asked to prepare a further memorial setting forth their proposals to right the conditions complained of.

WILL DISCUSS INSURANCE LAW

A conference of the provincial superintendents of insurance for Saskatchewan, Alberta, British Columbia, Manitoba, Ontario and Quebec, at which representatives of the maritime provinces may possibly be present, will be held in Winnipeg on October 4. Among the subjects which will be discussed at the meetings are the following:

(1) Uniformity in insurance law covering the following: (a) Statutory conditions for accident and sickness contracts. (b) Statutory conditions for automobile insurance.

(2) Discussion of the Model Fire Insurance Policy act as drafted by the commissioners on uniformity of legislation in Canada.

(3) Uniform laws governing beneficiaries under life insurance contracts.

(4) Legislation governing the solvency of fraternal societies.

(5) Uniformity in agents' certificates. (a) Form of application. (b) Qualifications. (c) Reciprocal relations between provinces. (d) Insurance brokers.

(6) Legislation governing unlicensed insurance.

(7) Legislation relative to reciprocals and inter-insurers.

(8) Hail insurance.

(9) Uniform reports from insurance companies.

(10) Duty of insurance departments in fire prevention work.

GRAND TRUNK PACIFIC RECEIVERSHIP

The Canadian National Railways management has been retained as manager for the receivers of the Grand Trunk Pacific Railway, according to a statement made by W. P. Hinton on August 25. Mr. Hinton, who is vice-president and general manager of the Grand Trunk Pacific, becomes consulting officer to the receiver, the minister of railways, and will remain in Winnipeg, where he will be available in a consulting capacity with the Canadian National Railway management. He expressed his satisfaction with the arrangement, especially as it involves the retention of the official staff of the Grand Trunk Pacific.

MUTUAL LIFE MEETINGS IN WEST

Executive officers of the Mutual Life Assurance Co. of Canada recently visited the west. At a meeting in Calgary on August 27, Hume Cronyn, the president, referred to the act passed at the last session of the federal parliament providing insurance for returned soldiers whose physical condition made it impossible for them to secure insurance from the regular life insurance companies. He explained briefly the provisions of the act and invited the co-operation of the agents present in an effort to bring to the notice of returned men who could not secure life insurance otherwise, the benefits provided by the new act.

Several of the other prominent officials of the company addressed the gathering. These included C. M. Bowman, chairman of the directors; Dr. J. H. Webb, the medical director of the company; S. C. Tweed, superintendent of agencies; and Charles Ruby, the general manager.

UNION OF NOVA SCOTIA MUNICIPALITIES

Sinking Funds Should be Invested at Good Interest Rates—Single Tax on Land—A. C. McCormick, Sidney Mines, is New President

THE 15th annual convention of the Union of Nova Scotia Municipalities was held in Windsor, N.S., August 25 to 26. About 50 delegates were present. Mayor Slack, of Windsor, in welcoming them, said it was an inspiration to have such an influential body of men visit the town. Warden Thompson, of East Hants County, pointed out that municipal councillors, not being elected on party grounds, represented the people more truly than did the federal or provincial members.

Executive's Report

The report of the secretary, A. Roberts, of Bridgewater, showed that the membership had increased to 60, consisting of 39 cities and towns, and 21 rural municipalities. The report of the executive gave a resume of the work of the committee during the year. It was stated that "nothing further has been heard of the resolutions of the last convention duly presented to the government, and no legislation had been enacted with reference thereto." The executive considered it wise to refer to the convention two of the resolutions, namely: (a) Taxation for school purposes, and (b) old age pensions.

The report referred to "The Fire Prevention Act" of 1919, as legislation that had met with some approval, including favorable comment from some of the other provinces. The executive also considered uniform municipal accounting and bookkeeping, and urged continuation of this matter until improvements were brought about.

Complaints had been received re: (a) assessment appeal courts in towns, and (b) town licenses. The aim of the union is to make it a clearing house of municipal experience, and to impart knowledge leading to much-needed reform.

The report referred to the neglect of the provincial government to add a department of municipal affairs such as exists in nearly all the other provinces. A properly equipped municipal department could not only give quicker and better service, but could be the means of avoiding much financial expense, both for the municipalities and the province.

Assessment and Taxation

H. P. Blanchard, Ellershouse, gave an address on "Taxation and Assessment." With the possible exception of the franchise, he said, there is no subject of more importance to the municipalities. Mr. Blanchard showed the fallacy of imposing a tax on improvements and personal property, and advocated land tax as the only real solution of the present problem, as it meant justice to all concerned. "Land has two values," he said. "The first or inherent value is upon just so much land as will supply food to the occupying tiller of the soil and his family. Surround that land with a community, give it adjacent roads, shops, neighbors and civilization, and the land takes on a value that multiplies its worth. The present unjust methods of taxation are undoubtedly working to the advantage of some, but the question to-day is not, Will the land and income tax ever be placed upon our statute books? Rather is the question, Who and what party and element will enact the law?

The speaker hoped that from the convention there would go forth such an impulse that at no late date the legislature would take up in earnest this subject and enact such assessment laws as will harmonize with the basic elements of right and justice, and will impose taxation upon land values and income, and exempt absolutely all improvements and personal property.

F. H. Bell, K.C., city solicitor of Halifax, followed with an able speech on the same subject. He clearly demonstrated that the assessment problems of cities and towns did not apply to the rural districts. He showed that land values varied according to locality. He thought a solution of the assessment problem might be solved in three ways, namely: A business tax, for the privilege of doing business in a thriving community; a habitation tax, for the privilege of residing in a city or town; a tax on a man according to the benefit he receives.

Investment of Sinking Funds

A. W. Weston, of Halifax, gave an address on "Investment of Municipal Sinking Funds." He pointed out the fallacy of towns not seeking better investments for their sinking funds than the 3 per cent. usually obtained by bank deposits. The art of making money work and earn to its fullest capacity was one not yet understood by the general public. As in other scientific work, the need was for investment specialties. He had informed towns that they were losing money annually. It was poor business to borrow money at $5\frac{1}{2}$ per cent. and lend town funds at $3\frac{1}{2}$ per cent. and 4 per cent. Under the Acts of 1914 towns are permitted to invest in bonds of the province of Nova Scotia, municipalities and towns of the province and dominion of Canada war and victory bonds. If all the towns took advantage of this law, all moneys set aside each year for sinking funds would be available for the purpose of taking up at least a portion of all issues made by each town and municipality each year. This would supply a greater market for the various issues of towns and pay practically the same rate of interest from one period to another, so that towns would secure the same rate of interest on sinking funds that they paid on bond issues. These monies invested and re-invested at compound interest would make an enormous difference in totals over a period of years.

Resolutions

Among the resolutions passed were the following:—

(1) Resolved, that in the opinion of the Union of Nova Scotia Municipalities the time has now arrived for the legislature of the province to take up the matter of the home for the feeble minded, and take such action as will assure the erection and maintenance of such an institution.

(2) Resolved, that executive be requested to consider the possibility and advisability of making use of the publications of our proceedings to advertise the attractions and advantage of Nova Scotia as a vacation resort.

(3) Resolved, that the government be requested to amend existing legislation so that municipalities will be authorized and empowered to sell and otherwise dispose of electric current purchased from the Nova Scotia Water Power Commission.

(4) Resolved, that the executive again wait on the government and urge on behalf of the Union the desirability of immediate action being taken re adjusting the Assessment Act.

(5) Resolved, that government be asked to enact legislation to enable cities, towns and municipalities to impose a tax in addition to that already collected by the government from show houses and other places of amusement in each respective city, town and municipality.

A resolution to the effect that the rule of the road should be changed from left to right was withdrawn.

Officers Elected

At the final session on August 26, Halifax was selected as the meeting place next year, and the following officers were elected:—President, A. C. McCormick, mayor, Sydney Mines; 1st vice-president, Parker Archibald, municipal clerk, Halifax Co.; 2nd vice-president, H. L. Dennison, solicitor, Digby.

Executive committee—J. S. Parker, mayor, Halifax; Peter H. Ross, municipal clerk, Lunenburg; Mrs. Eleanor Herbert, town clerk, Yarmouth; F. C. Whitman, councillor, Annapolis Royal; W. Ker Dimock, municipal clerk, West Hants; G. W. Thompson, warden, Pictou Co.; H. A. Rice, mayor, Canso, N.S.; Wm. Fitzgerald, mayor, Sydney; J. S. Liscombe, town clerk, Dominion, C.B.; W. W. Ferguson, municipal clerk, Col. Co.; F. W. W. Doane, city engineer, Halifax; R. W. Ralston, mayor, Amherst.

"STABILIZING" THE BOND MARKET

VICTORY Loan bonds, which were "stabilized" by being placed under the control of a market committee, have just suffered the worst decline since they were issued. The truth of the matter is that the action of the committee has amounted to no more than fixing the price for day to day trading. To really stabilize the market and maintain a fixed price would necessitate the buying in by the government or some other body of such surplus bonds as might be offered at one time, and at another time the placing on the market of sufficient bonds to meet the excess of demand over supply. Such a plan, especially during the present uncertain times, would be entirely unsatisfactory to the government, and no other organization has offered to take the responsibility. With a fixed amount of securities outstanding, the balance must be struck by changing the price. Time after time the committee has endeavored to meet a declining market by pushing the sale of the bonds, and the government has at times redeemed some of the surplus bonds which have accumulated, but the volume offered has been so great that the price had finally to be lowered by a considerable amount, with a resulting shock to the security market as a whole. This has happened several times, but the latest reduction is the most substantial so far.

The committee has therefore failed to maintain Victory bond prices in the face of changing conditions. Control that does not control is worse than useless. Perhaps the most that the committee has accomplished has been the maintenance of a spread of one per cent. between buying and selling prices, a margin which may be satisfactory to the bond dealers, but which is obviously not so to those who buy and sell. There was a theory that this margin enabled the dealers to push the sale of Victory bonds more actively, as the whole one per cent. went to the selling broker, and that the price was, therefore, to some extent supported; but just why the prospective buyer should be discriminated against by this artificial maintenance has not been made evident, and Victory bonds, which are by right Canada's premier security, have lost favor on this account. The market for war bonds is the broadest that has ever been enjoyed by any security. The margin of trading profit should, therefore, be the lowest. Victory bonds should be released from control, listed and traded in openly, so that buyers and sellers may benefit by the freest possible competition, and so that the day to day variations in business may be fully adjusted by corresponding fluctuations in the price of the security.

THE INSURANCE AGENT AND HIS COMMISSIONS

WHILE every other organization of workers has demanded and obtained increases in wages the insurance agents, we are told, obtain no more commission than they did in 1914. In fact, the whole cost of life insurance has not increased. That it should not have increased is obvious from a consideration of the fact that insurance is not a commodity, but a contract to pay a sum in dollars. The effect of higher commodity prices on insurance is reflected in the increased volume of business being written; for as the dollar will now purchase less, more protection is necessary. The depreciation of the dollar applies to the indemnity as well as to the premium.

To take a specific example of life insurance: Suppose a man in 1914 insured his life for $5,000, the agent's commission on which might be, say, $100. A life policy of $10,000 would now be required to give as much protection, for the latter sum would [illegible] purchase [illegible] the $5,000 in 1914. To sell an amount of insurance equivalent to $5,000 in 1914, the agent, therefore, would have to place a policy for $10,000 [illegible] commission would be doubled, though the [illegible] would be approximately the same. To demand a higher rate of commission would be asking the insurer to contribute a larger proportion of the premium towards commission, rather than facing the task of selling him a proportionately higher amount of insurance.

RAILROAD RATES AND PRICES

THE ultimate effect of an increase in railroad rates is at present being carefully considered in Canada. Will the higher costs of transportation which must of course be passed on to the consumer, still further depress business? In the United States, where an increase has already been authorized, the same subject is being discussed. What the effect of the increased rates on prices of commodities will be, only the facts of the future can determine. Some of the American railroads themselves have undertaken to show that there should be no large increases, and that in many cases the increase in rates per pound or per dozen or per quart will be so small as to be practically incalculable. Upon this point Vice-President Dixon of the Pennsylvania system says:

"The public should be forewarned and forearmed against any attempts to take advantage of the freight rate advance for the purpose of justifying profiteering. While it is true that in the case of some few articles and commodities small increases in price may be justified, nevertheless the amounts which in any instance could fairly be added to the present prices are a very small fraction of the whole, and in the case of practically every article or commodity of daily consumption the increases in transportation charges are relatively so small as to be practically negligible."

The National Security League sums up its warning to the same effect with the following: "The $1,500,000,000 advance in freight and passenger rates may seem a huge sum, but when it is considered that this is not more than 2 per cent. on the annual production of the farms, factories and mines in the United States, a proper perspective can be obtained of how slightly the advance affects the cost and price of any particular commodity."

THE KNOWLEDGE OF FIRE INSURANCE

MANY holders of fire insurance policies have never read them. Possibly a majority of house-owners whose houses are covered by a contract including the co-insurance clause are ignorant of its meaning, or perhaps are not even aware of its existence. Ignorance of the technicalities of fire insurance is excusable in the case of the layman, and the responsibility resting upon the agent is correspondingly heavy. Fire insurance on large properties such as stores and manufacturing plants is, however, sometimes placed without due regard to the needs. The number of cases where the provisions of a contract have been violated by the assured is proof of this fact. Arthur Hawxhurst, who for over 40 years placed the insurance on all the American properties of Marshall Feld and Company, Chicago, describes, in July *System*, the main features which must be kept in mind by those responsible for securing coverage on large properties.

"From a long experience in placing insurance I have drawn one broad general conclusion," he says. "The business man who gets first class insurance knowledge either in person or in the person of someone upon whom he can depend, and who then sees to it that this knowledge is scrupulously applied, will have few regrets when his policies become claims. Instead of regrets, he will have the money to make up the greater part of his loss. If I were reducing this to a rule for the man who looks after a concern's business, I might phrase it this way: First know what constitutes the right way and the wrong; then inspect the premises often enough to know that what is going on is not being done the wrong way. One of the favorite diversions of business people—so it sometimes seems to the harassed insurance man—is bringing inflammable material such as benzine, celluloid window trimmings, and the like, into an otherwise safeguarded building!

"After he has learned all the printed conditions of a policy, the insured must see to it that the form or written portion (so called) is so drawn that the policy when delivered and accepted covers his property, as he wants it to be fully covered. It is worth remembering that every conceivable kind of property and condition is written upon the same printed form of terms; if there is anything in this printed part of the contract that conflicts with one's particular interest, he must have it erased by the wording of the written form. If the form is not correctly written, the insurance companies cannot be held responsible. That is why it is advisable for the business man to see before a fire that his property is properly protected by his insurance contract. If he does this, with his insurance in reliable companies he will experience no trouble with its adjustment."

Mr. Hawxhurst sums up the points to be kept in mind by the assured, in the following rules: (1) Find out the fundamental facts of insurance; then see that the rules are complied with. (2) Know the provisions of the policies, and that the protection covers exactly what he wants to cover. (3) When building alteration or new construction is planned, have the plans checked by his local board of underwriters. (4) Be sure that the insurance is placed in reliable, responsible companies.

A WHOLESALE GROCER ON PRICES

A WORD of praise for the Board of Commerce was given by Hugh Blain in his presidential address before the convention of the Canadian Wholesale Grocers' Association in Toronto last week. "In view of the ignorant and sometimes malicious criticism of the public," said Mr. Blain, "I congratulate the trade on having an independent capable tribunal like the Board of Commerce to appeal to under unjust treatment." The Board, it seems, had been expected to bring down the prices of commodities in Canada, in the face of a world wide movement of inflation. This was an impossible task, for the entire power of any one government could do little to offset such a widespread tendency. The world demanded more goods to consume than it was prepared to produce, and high prices were the natural result.

Mr. Blain was lenient towards "middlemen," who have been so often accused of being responsible for the rise in prices. "In my experience," he said, "the distributor actually made a lower percentage of profit on his turnover during the war than he did previously." The attempt to shift the responsibility on to the shoulders of any one class has failed. Excess of demand over supply, inflation of prices, and expansion of credit were essential parts of a movement for which no special interest was responsible.

The early birds in the Ponzi scheme got 50 per cent. interest on their money. The late ones will be lucky if they get back half of their principal.

* * * * *

Present interest rates are high only in comparison with recent years. A recently discovered note, dating from about 1962 B.C., calls for interest at 10 per cent. It was never paid, and all the wealth in the world would not meet the interest accrued on it up to the present time.

* * * * *

The experience of Moose Jaw and other Canadian cities which have tried to sell their bonds direct to the public demonstrates the fact that unfavorable money conditions cannot be overcome in this way. The many times' broader market reached through a bond house usually enables it to pay a higher price for the issue than the city could secure by selling retail.

* * * * *

Employees of the London Street Railway are attempting to deprive the bondholders of their interest. Labor's fair claim to a voice in management is offset by its unwillingness to recognize the claim of other factors to a share in the distribution of profits.

Exports

A special Department of this Bank is devoted to the interests of the foreign business of its customers.

Exporters and others having business relations with foreign countries are invited to avail themselves of the very complete information which has been gathered by the Bank's Foreign Department. This may be done through any one of the Bank's many branches.

PERSONAL NOTES

Lord Beaverbrook, formerly Sir Max Aitken, is now in Canada in connection with some important pulp and paper financing which is being planned. In accordance with the reputation established by Sir Max Aitken before leaving Canada, the new financing will take the form of a merger. It is understood that the companies concerned are the Laurentide Pulp and Paper Company, the Donnaconna Pulp and Paper Company, Brompton, St. Maurice, Wayagamack Kraft Paper Company, and possibly some others. The name "British Empire Pulp and Paper Company" will probably be adopted for the new concern. The Royal Securities Corporation, of which Lord Beaverbrook was formerly president, has been associated more or less with the financing of these companies, and I. W. Killam, who is now president, is now in London in connection with some of the issues.

A. C. **Flumerfelt**, who has just been elected president of the British Columbia Bond Dealers' Association, is one of the prominent financiers in the west. His business interest include the following: President, Hastings Shingle Mfg. Co.; president, International Coal and Coke Company; president, Royal Collieries, Limited; president, British Canadian Fire Insurance Company; president, Pacific Marine Insurance Company; president, Western Mortgage Corporation; director, Ames, Holden and Company; director, Miner Rubber Company; director, Redmond and Company; director, Patterson Shoe Company; director, Canadian Consolidated Rubber Company; director, Empire Trust Company; president, Cranby Consolidated Mining Smelting and Power Company, Limited; director, Trusts and Guarantee Company, Limited; director, British Northwest Insurance Company; director, Great West Life Assurance Company; director, Hutchinson Company, Limited; director, Canadian Bank of Commerce; chairman, Board British American Trusts Company; director, Cassidy's Limited, Montreal.

Cecil B. Reay, who was formerly connected with the manufacturing department of the Canadian Fire Underwriters' Association, has joined the Atlas Assurance Company as inspector for the province of Quebec.

E. P. **Withrow**, formerly manager for British Columbia of the Dominion of Canada Guarantee and Accident Insurance Company, has taken up the position of branch manager of the company at Winnipeg, with jurisdiction from the head of the Great Lakes to Moose Jaw, Sask. Mr. Withrow, who previously had his office at Vancouver, will be succeeded there by J. Cecil Stuart, inspector of the Ottawa branch of the company.

OBITUARIES

William P. Miller, representative in the Orient for the Canada Foundries and Forgings, Ltd., and formerly manager for western Canada of the same company, died at Virden, Man., on August 21st last. He was born at Morrisburg, Ont., where he originally operated a foundry.

J. B. **Hughes**, one of the oldest and best-known residents of Waterloo, Ont., died at his home there on August 26th, at the age of 84 years. For a number of years he was a recognized farmer in Hawkesville, Ont., where he was living at the time, but at the age of twenty-eight he commenced business in Waterloo as an insurance agent, in which occupation he has been engaged until a few months ago. He was recognized as the father of the Mutual Life Insurance Company of Canada, the head office of which is in that town. He was inspector of the Waterloo Mutual Fire Insurance Company for eighteen years, and for over a quarter of a century has been special agent in Canada for the Aetna Fire Insurance Company of Hartford, Conn. He served as a member of the town council for a number of years and was mayor for one term. He was an active member of the board of trade.

CREDIT STRINGENCY FELT THROUGHOUT WEST

No Relief in Sight Until Payments for Crop Come In—Important that Government Keep Out of Market

(Special to *The Monetary Times.*)

Winnipeg, September 2, 1920.

Cutting is now pretty generally completed throughout the west and threshing is everywhere in full swing. Excellent yields are being reported. One pleasing thing about this year's crop is the fact that, in many districts where the crops have been poorest during the past two seasons, they are best this year. The outlook for a good fall is very bright. Money, however, is exceptionally tight just at present, as all efforts are being directed towards crop financing.

Banks' Funds are Fully Occupied

The Manitoba provincial treasurer, on returning from the east recently, said that there were only two banks in Canada which had any money to loan. A prominent Winnipeg banker, discussing the situation this week, said that this was not quite correct that the fact was that there were none of the Canadian banks which had any money to loan, referring to new accounts.

Some relief will come in October and November, when the returns come in from the actual sale of the crops of this year. The public in the west ask whether they will be able to get money freely at that time, and one of the replies is that it depends on what the requirements of the national government are. If the government can finance itself and get large sums from the new taxes, money at the banks may be a little easier at the close of the year and in the early months of 1921.

THE STERLING BANK
OF CANADA

"Personal Banking Service" has meant not only a speeding up and an increase in the efficiency of every department of the Bank, but it has meant a more courteous and friendly spirit in handling ordinary banking transactions.

EXCELLENT CROP PRACTICALLY ASSURED

Harvesting of Grains Progressing in All Provinces Under Favorable Conditions—Alberta Leads the West in Wheat Yield, According to the Latest Estimate

IN practically all parts of the west cutting is well on toward completion, and threshing is in full swing in many districts. In Saskatchewan last week, rain was fairly general in the province and somewhat retarded harvesting operations. Frost has been reported from all three provinces, but as far as grains are concerned, the damage has been nil, while the damage to other crops has been very slight.

Ontario and Quebec rural districts report grain cutting nearly completed. In the Maritime provinces the oats crop is in fine condition, and is reported as being very much above the average. The apple crops, however, in both the Maritime provinces and British Columbia, show a decrease from last year's yield of from 30 to 40 per cent. The quality is better, however.

Judging from recent reports, the crop yields in the various provinces will be considerably above former expectations. It appears that preliminary estimates were somewhat conservative.

Alberta Leads the West

That Alberta will have the largest yield of wheat per acre of any of the western provinces, is the estimate of Thomas Atchison, agricultural agent for the Canadian Pacific Railway, who expects a general average for the province of 19 bushels an acre. Mr. Atchison, who is touring the west on an observation trip of crop conditions, places the average yield for Manitoba at 16.5 bushels, and that of Saskatchewan at 14.5 bushels. The acreage in the three provinces is placed at 3,614,000, 2,687,000 and 9,440,000, respectively.

It is approximately estimated that there will be about 50,000,000 bushels of oats alone produced this year in the three prairie provinces, irrespective of barley and rye. What Alberta's proportion will be has not yet been forecasted, but in the Canadian Pacific territory, it is estimated that there will be from 30,000,000 to 35,000,000 bushels of coarse grains that will be harvested, if the present weather conditions prevail. This is exclusive of the Peace River country and the far northern districts.

Ontario Conditions

A summary of reports to the Ontario Department of Agriculture as at August 21 last, sets forth the crop conditions as follows:

The apple market has been livelier than for several years past. Brant states that around Paris there are some orchards well loaded with the Northern Spy, and that buyers are offering from $1.50 to $2 for sprayed fruit, the purchaser to do the picking. Prince Edward reports much activity in fruit buying during the last week, when about two-thirds of the apple crop passed under the control of buyers at a wide range in prices. Some owners sold outright for a set sum; others to be paid by the barrel. An 8,000 barrel lot, owned by several growers around Wellington, sold for $2 a barrel on the trees, the orchardists being under no obligation except to draw the barrels, not even boarding the pickers and packers. Other growers in Prince Edward County have received as high as $5 a barrel for Nos. 1 and 2 f.o.b. One special lot, containing a high percentage of Spies, sold for $3 a barrel picked.

Tomatoes have been plentiful. The Welland representative says they are a glut on the market. Tobacco cutting has been started in the Lake Erie section. The crop is said to be very uneven, and much of it will be late. Middlesex reports that some fields of flax have been left for seed for lack of pullers.

While most of the spring grains have been cut a considerable quantity is still in the shock, and some sprouting is complained of. Reports are common of oats yielding from 50 to 70 bushels to the acre. Wentworth states that many farmers threshed their grains as they drew it in, so as to cut down the labor cost. New hay is selling in Peterborough at from $25 to $26 a ton, but Peel quotes loose hay as bringing around $20 a ton. The Fort William representative says there is practically no local market for hay.

UNITED STATES CROP ESTIMATE

In its report on the crop prospects for 1920 the Continental and Commerical National Bank of Chicago says: "Production of important crops will exceed that of last season, with the exception of wheat; the aggregate production will be in excess of all domestic demands. The average yield per acre is larger than for some years; the quality is excellent, and the shortage in the acreage has been more than overcome. In the past two months there has been a complete reversal of the dismal forebodings that attended the plantings under climatic restrictions; ideal weather conditions have turned the prospect of partial failure into bountiful harvests, and promise of still better return in the crops that come to harvest later in the season."

The 1920 crops, in comparison with those of 1919, are estimated as follows:—

	1920. Bushels.	1919. Bushels.
Corn	3,055,427,000	2,917,450,000
Oats	1,433,007,000	1,248,310,000
Winter wheat	558,791,000	731,636.000
Spring wheat	275,956,000	209,351,000
All wheat	834,747,000	940,987,000
Barley	188,416,000	165,719,000
Rye	88,425,000	88,478,000
Potatoes	394,512,000	357,901.000
Hay (tons)	83,209.000	91,326,000
Cotton (bales)	13,289,000	11,030,000

INCREASED RATES FOR AMERICAN ROADS

On August 14th the Board of Railway Commissioners for Canada granted the application of the American Railway Association for an increase in through rates, in so far as Canada is concerned, to correspond with increases recently granted by the Interstate Commerce Commission across the line. The increase, however, it is specifically stated, will not apply to freight rates on coal and coke. If there is to be an advance in the rate on these commodities, it is delayed until the decision of the board in the general freight rate case is made. The increase provided for in to-day's order is effective on or after August 26th upon not less than five days' notice.

The order of the commission, which is signed by Assistant Chief Commissioner S. J. McLean, sets forth that the Interstate Commerce Commission has granted certain rate increases which are applicable to the proportions of joint through rates to or from Canada accruing in the United States. It is deemed expedient by the board that the continuity of joint through rates should be preserved. Therefore, to quote the order:

"It is ordered that the proportions of through rates, fares and charges between the United States and Canada, fares in both directions, in effect at the date of this order, accruing within Canada, may, by general or blanket supplement to existing tariffs, be increased to the extent that the through rates and changes shall conform to the increases granted by the order of the Interstate Commerce Commission, except on coal and coke—increases which are reserved pending the judgment of the board in the application of Canada carriers for increased rates within Canada.

"That the through rates and fares from points in Canada to points in the United States so increased may be published and filed to become effective on or after August 26th, 1920, upon not less than five days' notice."

BANK BRANCH NOTES

Only two new branches of Canadian banks have been announced this week. These are branches of the Bank of Hamilton at Ridgedale, Sask., and at Guelph, Ont.

Hunter Gordon, assistant manager of the Canadian Bank of Commerce, at Calgary, Alta., has been promoted to the position of manager of the Regina, Sask., branch. He succeeds A. W. Ridout, who goes to Montreal to take charge of the securities department. Mr. Gordon will be succeeded in Calgary by Hedley Hill.

EXCHANGE QUOTATIONS

Messrs. Glazebrooke and Cronyn, exchange and bond brokers, Toronto, report local exchange rates to *The Monetary Times* as follows:—

Succession Duties in Ontario

The rates of Succession Duty having been increased at the recent session of the Ontario Legislature, we have prepared a Booklet entitled "Succession Duties in Ontario." This Booklet contains schedules of the new rates, together with a summary of the main provisions of the Act. To readers of *The Monetary Times* we shall be pleased to send a copy free on request.

New Record For Current Loans in Canada

Increase in That Account For July Not as Pronounced as in Previous Month However—Savings Deposits Continued Higher—Further Restriction of Credits for Stock Market Purposes—Substantial Reduction in Call Loans Abroad

	July, 1919.	June, 1920.	July, 1920.	Year's inc. or dec.	Month's inc. or dec.
Deposits on demand	$ 584,176,765	$ 659,622,583	$ 639,415,025	+ 9.4	—3.0
Deposits after notice	1,175,092,155	1,243,700,977	1,253,170,413	+ 6.6	+ .8
Current loans in Canada	1,014,387,206	1,365,151,083	1,377,276,853	+35.8	+ .9
Current loans elsewhere	138,217,957	184,328,464	190,914,052	+37.7	+3.2
Loans to municipalities	54,455,738	76,110,676	78,792,822	+46.3	+2.6
Call loans in Canada	93,587,497	115,272,587	115,360,894	+23.6	+ .07
Call loans elsewhere	178,098,431	219,211,431	203,045,209	+14.0	—7.3
Circulation	223,662,618	238,088,555	240,833,686	+ 7.6	+ .8

PRINCIPAL changes in the July bank statement, as given above, show little departure from the tendency of the previous report. It is apparent, however, that the efforts of the Canadian banks in bringing about deflation, are being successful to some extent.

Savings deposits continued higher in the period under review, the increase over June being about $9,500,000. The account is still more than $9,000,000 below the record of last October. Demand deposits show a reduction of some $20,000,000 for the month. It will be seen from the following table, that while notice deposits have been steadily recovering since the last Victory loan, the trend of demand deposits has been somewhat irregular:—

	Deposits payable on demand.	Deposits payable after notice.
1919—July	$584,176,765	$1,175,092,155
August	584,300,855	1,196,632,931
September	650,743,015	1,227,437,715
October	705,280,241	1,262,746,984
November	728,657,589	1,137,858,277
December	703,329,292	1,138,086,691
1920—January	621,408,024	1,163,297,037
February	620,069,555	1,187,027,307
March	657,412,028	1,197,719,570
April	652,918,760	1,209,573,990
May	645,957,229	1,229,073,515
June	659,622,583	1,243,700,977
July	639,415,025	1,253,170,443

The course of deposit accounts during the past six years is shown in the following table:—

July.	On demand.	After notice.	Total.
1915	$340,950,215	$ 691,731,719	$1,032,681,934
1916	431,958,188	789,363,919	1,221,322,107
1917	450,849,356	929,442,340	1,380,291,696
1918	549,068,651	992,015,137	1,551,083,788
1919	584,176,765	1,175,092,155	1,759,268,920
1920	639,415,025	1,253,170,143	1,892,585,468

Deposits outside of the Dominion declined from $360,358,386 in June to $348,008,545 in July.

Current Loans Move Upward

Current loans in Canada, which have been continually moving upward since August, 1919, established a new high record The increase in July was less pronounced than in the previous month, however, reflecting a restriction in credits to the industrial and commercial community. Call loans were practically stationary as will be seen from the following table:—

Loans.	Current in Canada.	Call in Canada.
1919—July	$1,014,387,206	$ 93,587,497
August	1,011,785,424	95,899,836
September	1,058,572,202	96,912,709
October	1,104,940,160	100,549,390
November	1,189,408,423	121,754,469
December	1,207,109,046	125,888,760
1920—January	1,226,962,963	132,015,334
February	1,257,015,902	127,251,919
March	1,322,267,030	128,233,310
April	1,317,238,230	125,644,859
May	1,349,079,981	119,114,493
June	1,365,151,083	115,272,587
July	1,377,276,853	115,360,894

Call loans in Canada have fallen away more than $16,000,000 since last January, and with banks placing further restrictions on funds for stock market purposes, it is most probable that further recessions will be shown in the August statement. Call loans abroad show a decline of more than $16,000,000, indicating that the demand for funds in Canada has brought to a close, temporarily at least, the successive increases in the amounts loaned in New York. The following table shows call loans elsewhere than in Canada since January, 1917:—

	1917. $	1918. $	1919. $	1920. $
January	155,747,476	132,687,066	140,819,656	170,206,805
February	162,344,556	160,239,494	155,983,681	184,469,882
March	161,616,735	167,296,701	160,116,443	205,202,133
April	159,156,054	179,818,531	155,533,666	206,229,451
May	168,692,675	172,259,879	157,176,325	213,964,182
June	159,309,133	170,034,476	167,236,045	219,214,431
July	151,875,676	167,112,836	178,098,434	203,045,209
August	176,610,625	160,544,990	174,176,578	....
September	166,480,004	159,680,810	169,532,489	....
October	151,018,747	157,040,858	158,194,085	....
November	139,832,552	171,035,732	169,626,880	....
December	134,483,482	150,248,322	172,232,161	....

The following table shows the course of the principal loan accounts in recent years:—

July.	Current loans in Canada.	Current loans elsewhere.	Call loans in Canada.	Call loans elsewhere.
1915	$ 758,349,517	$ 41,784,633	$ 71,168,233	$117,821,174
1916	740,040,741	62,356,259	87,355,648	176,121,733
1917	829,560,700	90,253,882	71,376,788	151,875,676
1918	905,677,233	99,702,919	74,382,762	167,112,836
1919	1,014,387,206	138,217,957	93,587,497	178,098,434
1920	1,377,276,853	190,914,052	115,360,894	203,045,209

A Newspaper Devoted to Municipal Bonds

THERE is published in New York City a daily and weekly newspaper which has for over twenty-five years been devoted to municipal bonds. Bankers, bond dealers, attorneys and public officials consider it an authority in its field. Municipalities consider it the logical medium in which to announce bond offerings.

NEW RECORD FOR CURRENT LOANS IN CANADA

(Continued from page 18)

Liabilities to Shareholders

Large additions were made in liabilities to the shareholders, as will be seen from the table below. These are explained by the stock issues made by the various banks in recent months:—

Banks.	Capital subscribed.	Capital paid up.	Reserve
Merchants	$ 161,500	$ 135,040	. .
Provinciale	1,000,000	810,124	
Royal	2,452,000	1,969,120	$ 984,560
Hamilton	834,200	736,810	368,405
	$4,117,700	$3,651,094	$1,352,965

Dominion Note Holdings Lower

Holdings of Dominion notes in Canada were lower by nearly $2,500,000, and of gold and subsidiary coin by more than $1,000,000, while other notes and coin showed increases. The following table shows the changes for the month:—

Gold and sub-coin in Canada	—	$1,101,739
Gold and sub-coin elsewhere	+	1,197,966
Total	+	$ 96,227
Dominion notes in Canada	—	2,417,340
Dominion notes elsewhere	+	33,300
Total	—	$2,384,040

Other Changes

Balances due from banks in the United Kingdom increased slightly during the month, while those from banks elsewhere were reduced by over $6,000,000.

Advances to municipalities increased more than $2,000,000, or 2.[illegible] per cent. This increase was not as great as in the previous month, however. Usually the loans to municipalities decrease during the last half of the year, but the low prices being secured for bond issues may prevent some

Of the deposit in Central Gold Reserves $10,500,000 is in gold coin, the balance is in Dominion Notes.

T. C. BOVILLE, *Deputy Minister of Finance*

of them from being liquidated by permanent financing this year.

The balance at the credit of the Dominion government in the banks was reduced $13,000,000, after large reductions in May and June of this year.

Deposits with the minister of finance for the security of note circulation increased from $5,997,526 in June to $6,252,442 in July, while deposits in the central gold reserves were reduced slightly.

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station for the week ended August 27th:—

McKinley-Darragh, 82,697; La Rose Mine, 87,915; Nipissing Mine, 521,241. Total, 691,853 pounds. The total since January 1st is 16,297,243 pounds, or 8,148.6 tons.

LOSS OF TIME ON INDUSTRIAL DISPUTES LOWER

The loss of time on account of industrial disputes was less during July, 1920, than during June, 1920, or July, 1919 according to the Labor Gazette. There were in existence at some time or other during the month 49 strikes, involving about 6,734 workpeople, and resulting in a time loss of 80,22 working days as compared with 60 strikes, 12,406 workpeople and 155,502 working days in June, 1920; and 71 strikes, 62,020 workpeople and 683,896 working days in July 1919. On July 1st there were on record 29 strikes, affecting 4,229 workpeople. Twenty strikes were reported as having commenced during July as compared with 27 in June. Sixteen of the strikes commencing prior to July and 14 of those commencing during July were reported terminated, leaving 19 strikes, involving about 1,442 workpeople, on record at the end of the month

EMPLOYMENT CONDITIONS IN CANADA

The Employment Service of the Department of Labor reports that returns from Dominion and provincial offices of the Employment Service of Canada for the week ending August 7th show an increase in the placements as compared with the returns for the preceding week. The reports show that 8,990 references to regular positions were made, and that 7,635 placements had been effected. This is an increase of 419 when compared with returns for the previous week, when 7,216 placements were reported. In addition, 1,522 casual jobs were supplied as compared with 1,558 during the week ended July 31st.

During the week 8,891 applicants were registered, of whom 7,859 were men and 1,032 were women. This is an increase in registration of 272 as compared with the preceding week, when 8,619 applications were made. The number of vacancies notified by employers to the Service totalled 10,924, of which 9,445 were for men and 1,479 for women. This represents an increase of 1,069 vacancies when compared with 9,855 reported during the week previous. Of the placements in regular employment, 6,990 were for men and 645 for women.

Of the placements in regular employment, 89 were reported by New Brunswick offices as compared with 107 during the preceding week. Quebec offices reported 329 placements, 298 within the province and 31 in other provinces, as compared with a total of 210 persons the previous week. Placements reported by Ontario offices totalled 2,408, of which 2,332 were within the province and 76 in other provinces as compared with the total of 2,565 during the preceding week. Placements were reported by the prairie provinces as follows: 1,387 by Manitoba offices, 1,301 within the province and 86 in other provinces as compared with a total of 1,155 during the week previous; 771 by Saskatchewan offices, 643 within the province and 28 in other provinces as compared with a total of 690 during the preceding week; 1,419 by Alberta offices, one of which was in another province, as compared with a total of 1,215 during the previous week. British Columbia offices reported 1,232 placements, 1,149 within the province and 83 in other provinces as compared with a total of 1,274 during week ended July 31st.

A booklet entitled "Canadian Bill Stamp Tax, 1920," has been issued by the Union Bank of Canada. This book is designed as a ready reference to the new stamp tax about which Canadian manufacturers and producers, corporations and individuals, who carry on a business with a banking institution should be completely informed. The booklet is a thorough digest, is carefully indexed, and for complimentary distribution.

DOMINION GOVERNMENT SAVINGS BANKS

Withdrawals from the Dominion Government savings banks for the month of May, 1920, exceeded deposits by $25,941, thereby reducing the balance at the credit of the depositors from $10,709,736 at the end of April to $10,683,795 at the end of May. The following are the returns:—

BANK	Deposits for May 1920	Total Deposits	Withdrawals for May 1920	Balance on May 31, 1920.

MONTREAL AND QUEBEC SAVINGS INSTITUTIONS

Changes in the July statement of the Montreal and District Savings Bank and the Caisse d'Economie de Notre Dame de Quebec were insignificant. Dominion government demand deposits continued the downward movement of the past few months, decreasing from $490,671 in June to $403,671. Notice deposits showed very little change. On the assets side, holdings of Dominion, provincial and other public securities were increased from $12,762,565 in the previous month to $13,544,170. Cash on hand and on deposit in chartered banks was reduced from $8,912,071 to $8,118,587. Canadian municipal bonds and other securities increased slightly. Loans on bank stocks and other securities showed slight reductions. Total assets of the two institutions at the end of the month amounted to $60,001,346 as compared with $60,164,108 at the end of June, while total liabilities were $54,992,905 as compared with $55,116,289. Complete returns as at July 31st last are:—

To the Shareholders of

International Petroleum Company, Limited

NOTICE is hereby given that a company has been incorporated under the laws of the Dominion of Canada under the name of International Petroleum Company, Limited, herein referred to as the New Company, and that an arrangement has been made whereby the New Company will issue to the Preference shareholders of the International Petroleum Company, Limited, (Old Company), one Preference share of $5.00 par value fully paid up and non-assessable and one share without nominal or par value of its Common stock fully paid up and non-assessable in exchange for each Preference share of the Old Company, *and to the Common shareholders of the Old Company two shares without nominal or par value of its Common stock fully paid up and non-assessable in exchange for each Common Share of the Old Company.*

The New Company proposes to issue 1,804,534 shares without nominal or par value fully paid up and non-assessable of the New Company in exchange for 1,575,000 shares, (being the whole of the outstanding stock), of the Tropical Oil Company, a company incorporated under the laws of the State of Delaware and holding concessions from the Government of the United States of Columbia. The delivery to the New Company of 90% of the outstanding stock of the Tropical Oil Company has been assured and in the event of the whole of such outstanding stock not being delivered then a pro rata reduction will be made in the number of shares in the New Company to be exchanged for the shares of the Tropical Oil Company delivered to it.

Holders of Bearer Share Warrants who surrender their warrants to the International Petroleum Company, Limited, (New Company) at 56 Church Street, Toronto, Canada, or to the Farmers' Loan & Trust Company, 16-22 William Street, New York City, U.S.A., between the 15th September, 1920 and the 30th September, 1920, inclusive *will receive in exchange therefor Bearer Share Warrants on the basis of two shares of the New Company for each share of the Old Company surrendered*, in accordance with the terms aforesaid.

No Warrants for "rights" will be issued and shareholders who fail to exchange their old shares for the new shares within the time limit and in the manner aforesaid will subject these rights to forfeiture.

The books of the Company will be closed from the 10th day of September, 1920, to the 30th day of September, 1920, inclusive, and no Bearer Share Warrants will be split during that period.

Holders of Bearer Share Warrants are recommended to send their Warrants by registered mail insured as the Company is not responsible for Share Warrants lost in transit and duplicate Share Warrants cannot be issued.

By Order of the Board,

I. R. CLARKE,

Secretary.

56 Church Street,
Toronto, Canada.

Incidence and Principles of Municipal Taxation*

Practice in Canada in Case of Income, Property, Business, Tenants and Occupants, and Public Utility Taxes—General and Local Improvement Rates—The Quebec Education Tax—Some Comments ond Suggestions

By E. T. SAMPSON, F.I.M.T.A.,
Treasurer, Outremont, Que.

TAXATION embraces, for the most part, the means by which the burden of public administration is distributed, and borne by those who are presumed to benefit by such administration. Indirect taxation (customs and excise duties) was until quite recently the main source of the revenue of the federal government. Direct taxation (income tax) has now been established and bids fair to outstrip the indirect in the not too distant future.

Income tax principles once adopted by the federal authorities supported with overwhelming precedents from other countries should be respected by all other public authorities, particularly municipal, who should now avoid or abandon this method of raising revenue and leave to the government the entire field. If this is not always practicable, then the principle of precepting should be adopted, viz.: One authority demanding its quota of tax product from another authority, which collects in full, and pays thereout the amounts precepted upon it. The precepts should be paid on specified dates within the fiscal period and not left until actual collections are made. The possibility of separate federal provincial and municipal income taxes seems intolerable to us all.

Real Estate Taxation

The purposes for which taxation on real estate by municipalities is imposed, are broadly divided into: general administration; special administration; and local improvement. General administration comprises all the services performed by a municipal corporation that are necessary to its maintenance and for the health, safety, and comfort of its residents. They do not require enumeration here. Special administration may comprise all or any service which may also be general, and other services, the benefits of which, however, are limited to special areas of the municipality or to particular residents. Local improvement may be described as any improvement (street, square, sewer, macadam, sidewalk, etc.), that is constructed or undertaken by a municipality for the benefit of any particular property or properties.

Real estate taxes as we all know them in Canada fall into two divisions: (1) General assesments, the rate of which is based on the assessed value of the property. (2) Local improvement assessments, charged usually upon the frontage of the property, or may be upon other bases.

General Assessment Tax

This tax which is common to all Canadian municipalities is based upon the capital value of the property, the assessed value of buildings (if any) is shown separate from the land. Great divergence of practice exists throughout the Dominion in establishing real estate values. The assessors of some municipalities claim their assessments to be at true value, others openly avow a partial valuation only; some even state their assessments to represent a conservative true value and admit there is an indeterminate margin between their figures and actual market values. As many writers have often stated, this want of uniformity renders impossible any accurate comparison between municipalities, either of assessments or tax rates and products.

The history of Canadian municipal taxation during the war period, particularly in the western provinces, has proved the failure of taxation on land only, a form of taxation much favored during the boom period (1909 to 1913). The wholesale abandonment for tax arrears of many outlying town lots by their proprietors, forced many municipalities to return to the practice of assessment of buildings in addition, and where reduced assessment of buildings was in vogue, then to a considerable augmentation of these assessments. Not many tears need be shed over these pseudo single tax principles; the altruistic spirit of the reformer (Henry George) was wanting in the whole enterprise; one section of proprietors placing on others a greater burden than their own, was inevitable.

Transfer of Incidence to Annual Value

"Ability to pay and taxation in proportion to benefits received" have now come to be recognized as two very sane guiding principles. To bring, however, these principles fully into practical utility, it will be necessary to revolutionize the incidence of the tax, and the basis of assessment. Reversion to assessment of annual value (or earning power) of all taxable properties is here recommended as a practical means of accomplishing this object.

A tax based on assessed annual value of a property will certainly become a charge upon the occupant (be he owner or tenant). There is no reason, however, that an owner of property be not held jointly responsible with his tenant for this tax, and that the taxes thus imposed become privileged claims upon the property in the same manner as the present real estate taxes. When property became untenanted, some measure of relief from the tax would surely be sought by its owner. A carefully prepared scale of abatements would have to be prepared in order to meet this contingency.

Undeveloped vacant land under this proposed basis would bear little of this tax burden. To offset this feature, an "increment tax" or tax on sale profits, would be very effective and desirable. An arbitrary percentage of sale profits would have to be established. This could be approximated after the product of the annual tax had been established, viz.: The unprovided balance, necessary to meet the expenditures of the municipalities. (This is not a radical reform when we consider that present taxes on vacant undeveloped land correspond to annual payments in advance from the profits the land speculator anticipates he will eventually receive).

Assessable Properties

Many valuable precedents in assessments on annual value are obtainable from Britain and other European countries. Many intangible forms of wealth would be included in the basis of assessment; a broad list of the assessable properties would be: Land, occupied or unoccupied; land and buildings, occupied or unoccupied; rights and privileges on land (passage, sporting, substitutions, advertisement hoardings, etc.), saleable timber quarries and mines, public utilities (right-of-way, etc.), including railways and tramways, gas and electric, water, telephone and other utilities.

The assessment of public utilities for municipal taxation purposes requires very careful study. Gross profit less operative cost is much favored in Britain, and the assessable profit is distributed among interested municipalities, either upon the basis of proportion of track mileage, etc., or upon a proportion of earnings made in each municipality.

---

*An address before the Union of Canadian Municipalities Convention, Quebec, July 27-29, 1920.

DEBENTURES FOR SALE

TENDERS FOR DEBENTURES

Sealed tenders, endorsed "Tenders for Debentures," will be received by the undersigned up to Twelve o'clock noon, Tuesday, the seventh day of September, A.D. 1920, for the whole or part of the following debentures, dated July 19th, 1920, bearing interest at the rate of six per cent., payable yearly:—

By-law No, 325	$26,248.95	30 years
" " 326	23,150.61	30 years
" " 327	6,641.24	20 years
" " 328	808.57	7 years

Delivery, Winnipeg. Interest and principal payable at Winnipeg, Toronto and Montreal.

The highest or any tender not necessarily accepted.

WILLIAM BALLARD,
Secretary-Treasurer, Rural Municipality
West Kildonan, Man.

TORONTO - CANADA

WANTED

An experienced fire insurance man for Western Canada, capable of organizing [illegible] and handling Head Office [illegible] Company. Excellent [illegible] ment. Apply [illegible] pe[illegible]

BOX 333, MONETARY TIMES,
Toronto, Ontario.

All applications treated as confidential.

Quarries and mines are usually assessed upon annual output.

Objections may be made by municipal officers to this proposed taxation of occupants, on the grounds of increased difficulties and time required to obtain collection. This objection will particularly arise in the larger cities and urban municipalities. To meet this objection, a system of tax collection by bankers, through their branches, is here recommended. The relief thus felt in tax collection departments would considerably more than offset the multiplication in assessments.

Permanently exempt properties as at present existing should remain exempt from the assessment on annual value.

Increment Tax Product

The product of an increment tax would naturally be very variable, rendering forecasting for the budget practically impossible, particularly in municipalities only partially developed. To overcome this difficulty, it would be advisable to appropriate the established product of this tax to revenue of the subsequent year after collection.

The revenue derived from this tax would form an excellent indication of the extent of farther development a municipality may wisely undertake.

The advantages of changing the basis of municipal assessments to annual value based on earning power may be summarized as follows:—

1. Stabilises the tax product.
2. Conforms to and brings to practical result the accepted principles of: Ability to pay, and taxation in proportion to benefits received.
3. Eliminates the speculative element from municipal assessments.
4. Discourages over-development by placing the burden of charges arising therefrom directly upon the residents.
5. Conversely encourages legitimate development.
6. Uniformity in municipal assessments attained.

Education Taxation in Quebec

This part of the subject seems unfortunately beset with many peculiar difficulties and problems. The following method is here suggestive only: Taxes for purposes of education to form part of the tax for general municipal administration purposes.

The local education authorities of each municipality to duly ascertain their financial requirements for the forthcoming year (for which the tax is to be imposed). The local education authorities shall submit the estimate of their financial requirements to the provincial education department.

The provincial education department shall examine and certify if satisfactory. The department's supervision shall be exercised for the following objects:—(1) To maintain equity between the panels. (2) To insist upon proper provision being made for all educational requirements. (3) To suppress illegal, unauthorized and unnecessary expenditures. (Code of regulations hereon would be very desirable).

Whenever the demands contained in the estimate of one panel of a municipality are out of proportion to the demands of another panel of the same municipality, the education department shall add to the estimate of the panel effecting economies an amount equal to the economies effected (but should at the same time distinctly enumerate these economies). The amount thus added to be applied to all or any of the following purposes:—(1) Increased remuneration to personnel. (2) Establishment and maintenance of superannuation fund for personnel. (3) Maintenance or improvement of any of the institutions owned or controlled by the local education authority.

The provincial education department to forward to the clerk of the municipality a copy of its certificates authorizing the provision of the funds necessary to meet the approved demands contained in the estimates of the local education authorities.

The municipality upon receipt of the certified demands shall include such amounts in the budget of its next tax levy for general municipal purposes, and shall collect same as part of the general municipal tax.

The municipality shall further pay to the local education authorities on dates to be specified on the said certificate or (precept) instalments of the amount (or the whole in one amount) as thus precepted.

Local Improvement Taxation

Local improvement assessment wherever in force is generally based on the "division of the annual loan charges of the total capitalized cost of the improvements, upon the several properties benefitting, according to frontage."

The tax is thus a fixed annual charge (or a diminishing annual charge, according to whatever method of repayment of principal that has been adopted) upon the properties assessed.

The tax is further susceptible of commutation and whenever a sheriff's sale of any such property occurs, then the commuted amount of the local improvement taxes thereon must be claimed in addition to whatever taxes then remaining due.

Arbitrary rebates of flankage and of intersecting street frontage are allowed by some municipalities. In actual practice, it is often found that some properties are more heavily burdened than others for improvements identically similar. This is explained by the fact that the cost of improvement work is continually changing (for the last decade it has been continuously increasing).

Suggested Averaged Local Improvement Tax

While there may be justification for saddling each property with the cost of its particular improvement, especially of properties that offer peculiar difficulties of development, it yet appears more equitable to charge only the averaged annual cost of each class of improvement upon all properties provided with such improvement benefits.

The local improvement taxes would thus become annual taxes variable and not susceptible to commutation (and by specific amendment necessary to be made in municipal law) not eliminated by sheriff's sale.

Inasmuch as maintenance, repairs, and renewals of all local improvements are generally a charge upon the general municipal fund of a municipality and are defrayed out of the general municipal tax, to which unimproved properties contribute in proportion to their assessments, there is thus sufficient justification to assess all properties enjoying local improvement benefits to averaged local improvement taxes, until all the respective local improvement loans of the municipality have been redeemed or provided for.

That portion of the local improvement taxes of a municipality representing repayments of principal (including sinking fund instalment) should be credited in total in the books of municipality either to the sinking fund or to whatever account or fund that is established for the reduction or extinction of the loan, even the requirements of the specific loan by-laws do not require such an extensive provision.

Business Taxes

This form of taxation appears to be a ready means of raising revenue for a municipality, particularly so when business is prosperous. It has the following undesirable features:—(1) Restraining trade. (2) Difficult to establish equitable assessment basis.

All benefits of imposition are capable of preservation by the enhanced value of the property on account of the business. This would be more obvious if assessments were based on earning power.

The tenants' and occupants' tax which is provided for by the municipal law of Quebec is limited to 8% of the annual value of the assessed dwelling, would necessarily disappear, or rather be merged with the general municipal tax if the [illegible] as here recommended were changed to occupation.

YEAR'S TRADE BALANCE IS ADVERSE

Latest Statement Shows Decline in Exports to Several Countries—Business with United Kingdom Not So Favorable to Canada—Other Foreign Trade Continues Satisfactory

FOR the twelve months ended July, 1920, Canada's trade statement shows less favorable results than in the previous report. Total imports, which for the twelve months ended June, 1920, were about $1,210,000,000, for the period at the end of July were $1,253,000,000, while total exports, which were $1,276,311,542 at the end of June, were $1,264,463,537 at the end of July.

Our trade with the United States has assumed a more favorable aspect in regard to exports, but with the United Kingdom the situation is not so cheerful. Foreign trade continues to show favorable results with the exception of one or two countries, including France and Japan. In regard to trading with the latter country, Seizaburo Shimizu, consul-general of Japan, was in Ottawa recently, and while there he stated that there is an opportunity for Canada as a whole to cultivate a more general business that is to be done between the country which he represents and the American continent. He pointed out that steel and iron in ingots and manufactures, such as rails and different kinds of construction materials, shipped from Canada to Japan during the year 1919, constituted the largest item of business of that year, amounting to something over six million dollars.

The following table, prepared by the Dominion Bureau of Statistics, sets forth the general trade situation in a comprehensive manner:—

	Twelve Months ending July		
	1918	1919	1920
IMPORTS FOR CONSUMPTION	$	$	$
Dutiable Goods	522,826,842	529,968,597	821,457,699

LIABILITY ON UNPAID LOAN SHARES

Shareholders in Provincial Permanent Loan Co. Who Had Received Partly-Paid Shares in Dominion Permanent Loan, Held Liable For Full Amount

WHEN the shareholders of one company accept shares in another, and certificates for whole shares in the latter company are issued for fractional shares in the former company, such shareholders are liable to the extent of the amounts unpaid on such shares, according to a decision of the Ontario Supreme Court a few weeks ago. The facts of the case are that in April, 1902, an agreement was drawn up, which later became valid and effectual, by which the shareholders of the Provincial Permanent Loan Co. accepted stock in the Dominion company of the same name, paid up by the transfer of assets. One clause of the agreement provided "in case the amount of stock . . . to which any shareholders . . . is entitled is a fraction of a share or a number of shares and a fraction, then in either of such cases the stock to be issued for such fraction shall be one share with the amount of such fraction paid-up, and the shareholder to whom such stock is allotted shall have the privilege of paying up the balance of such share of stock so issued."

Held Full Shares Only

In his judgment, Justice Middleton says in part: "What I regard as of vital importance is that no attempt was made to constitute the shareholders of the Provincial holders of fractions of shares or of fully paid up shares for uneven amounts, but by the terms of the agreeement these sharesholders became holders of shares for $100 on which the named amount was paid.

"Under the statute then in force, the Loan Corporations Act: 'No shareholders shall be liable for or chargeable in respect of permanent shares with the payment of any debt or demand due by the corporation, save only to the extent of the amount unpaid on his shares in the capital stock of the corporation.'

Liable to Creditors at Least

"What was done in this case was to issue $100 shares upon which a certain sum was paid up. These shares were accepted; and even if the unpaid balance could not have been called in by the company by reason of the wording of the agreement which gave the privilege of payment to the shareholder, the shareholder would remain liable to the creditors by virtue of the statute until the full amount should be paid."

Justice Lachford also says: "As between the company and the holders of a share on which but a fraction of the par value had been paid, it is a matter of contract unequivocally expressed that the holder could not be compelled to pay the balance unpaid on such a share. He had the option of paying the balance, but none of the shareholders affected by this appeal had exercised that option. Each held a share paid for but in part and in part unpaid for. To the extent of the amount unpaid, the statute, in my opinion renders the holder liable."

HAIL COMPANY HAS GOOD YEAR

The Agricultural Insurance Co., Ltd., Regina, report success in its initial year's business. During the past seaso it wrote $1,250,000 of hail insurance, yielding gross pre miums of $73,000, of which $52,000 was paid to reinsuranc companies. After paying all losses, commissions to agent and all costs of operation the company made a net profit o hail of $12,000. The company has written $600,000 fire in surance and has yet to record its first loss. J. H. Mitchell of Bell and Mitchell, secretary of the company, said that th success was due to the loyalty of the farmers to the insti tution in which they had invested. The company has at pre sent close on a thousand shareholders, and many of those wh invested only a small sum are now seeking to increase thei holdings to the maximum allowed, namely, twenty-five shares

News of Industrial Development in Canada

Another New Pulp and Paper Concern to Locate in Quebec Province—Steel Rolling Mill for Manitoba—Will Utilize Western Coal—Million Dollar Fur Pack Reaches Alberta from Northern Trading Posts — Canadian Woollen Mills Receive Large Orders from Roumania — Rope Factory to Open in New Westminster

A NEW company, under the name of the Manouan Pulp and Paper Limited, has been incorporated under the laws of Quebec to operate in the province. A brief notice to this effect was contained in these columns last week, together with the names of the directors. The company proposes to acquire a power known as "Allard Falls" on the St. Maurice River, above La Tuque, which has about 38,000 h.p., and also a mill site of about 1,590 acres at the same location. Only about 9,000 h.p. will be necessary for present needs for the proposed 100-ton ground wood mill. A highly-qualified engineer states that, owing to the natural formation of the surroundings, power can be developed at a much less cost than any other on the river. At the power site the waterfall is arrested by two islands of granite formation, thus facilitating hydro development and providing ideal anchorage for the dam. It is the last remaining power of magnitude on the St. Maurice which is possible of development on an economical basis. The Transcontinental Railway parallels the river at this point and runs directly through the mill site, assuring economical shipping facilities.

The company will acquire two tracts of timber on the Manouan River containing approxmately 100,000 acres, and estimated conservatively to contain 1,380,000 cords of spruce and balsam pulpwood, and in addition 17,000,000 feet, B.M., of pine. There is also estimated to be about 70,000 cords of other woods suitable for pulp and a very considerable quantity of birch, etc. A feature of these limits is the small quantity of balsam as compared with spruce, it being estimated that there is not more than 2 per cent. to 7 per cent. balsam. It is a recognized fact that spruce is superior for groundwood pulp purposes.

It is estimated that the timber available from the limits and surrounding territory will ensure a supply for the proposed 100-ton mill for a period of about sixty years. An issue of bonds and debentures, which is being offered by a Montreal financial house, particulars of which are given elsewhere in this issue, will supply the capital required for all construction, logging operations and working capital. The most ample provision has been made in this regard, it being deemed desirable by the directors to be rather over than under estimated requirements.

Manitoba Steel Rolling Mill

Formal opening of the new open-hearth furnace plant for the use of pulverized coal in the manufacture of steel took place at the plant of the Manitoba Rolling Mills Company at Selkirk, Man., on August 26th. The plant, which has just been completed, is a building of a large white brick, and has been constructed at an approximate cost of $200,000, bringing the total investment of the rolling mill well up to $1,000,000. A fifteen-ton McLain-Carter open hearth furnace has been installed, the most modern of its kind and the first in Canada, and the plant is equipped with three fifteen-ton ladles and a huge electric crane, making the complete equipment a replica of the most advanced steel factories of the continent. This, when operating at full capacity, which will be in three weeks' time or less, will produce from four to six heats per twenty-four hours, or from 60 to 90 tons of steel ingots per day.

Scrap iron, mixed with a small quantity of iron ore, ferro manganese and ferro silicon, make the ingedients of the steel manufactured by this process which has proven itself to be cheaper and better than Bessemer steel in every way. Soft coal, of certain grades only, from the western mines will be used

Speaking of the new plant, T R. Deacon, president of the company, said: "We hope for the present to relieve the shortage of reinforcing steel and steel bars in the prairie provinces, and when running to full capacity expect to turn out from 60 to 90 tons of steel ingots per day. Our market is more than assured, as we will supply railway companies and manufacturing companies in all parts of the west. As for our supply of scrap iron, we have no fear of running short on that. At the present time there is a supply two and a half times as great as we need available, though the Duluth iron manufacturing plant is a serious competitor for the purchase of western scrap iron."

Denies Establishment of Nickel Plant

J. L. Agnew, vice-president of the International Nickel Company, announced on August 26th that there was nothing in the report given out in Toronto on the authority of Frank L. Culver that a $3,000,000 rolling plant would be established by the company at Sudbury, Copper Cliff or Port Colborne. This project has been mooted for some time, owing to the inconvenience which the company has sustained from having to send the metal to customs mills at Bayonne, N.J., to undergo the rolling process, but it is considered that the construction of such a plant in Canada, especially in the Sudbury district at the present time, would be impracticable. Mr. Agnew stated that if a rolling plant were built it would have to be so situated that the securing of pure oil, free from sulphur, at first hand, would be an easy matter. No conclusion has as yet been arrived at as to the location of the rolling mill when it has been decided to build one, but it is practically certain that it will not be built at Sudbury or Copper Cliff.

Good Fur Pack in North

About a million dollars' worth of raw furs has just reached Edmonton, Alta., from the far north, representing the annual pack of the Hudson's Bay and Northern Trading Companies from their Mackenzie River and Arctic coast posts. It came in over the A. and G.W. Railway from Fort McMurray, having been brought to that point by the steamers operated on the northern water route by the two companies. C. T. Christie was in charge of the fur cargoes for the Hudson's Bay Company and A. L. Sawle for the Northern Trading Company. Both made the trip to the end of the line, Mr. Sawle going as far as Scenic, 100 miles past Fort McPherson, and both brought down their year's fur catch without the loss of a single skin.

In quantity and quality the 1920 fur pack from the far north is declared to be a good average and somewhat ahead of last year. Mink, marten, white fox, beaver and rats are in the majority, with rats perhaps the leader because of the unusually high prices paid this past year for that particular fur. Both companies will shortly reship their packs to London, where they will be sold on the market. The Northern Trading will assort and repack the lot, but the Hudson's Bay will forward direct as received, to be sorted out in London for final selling. Shipment will be made as soon as possible.

The Hudson's Bay furs, totalling between twelve and thirteen tons, have come from the Mackenzie, Coronation Gulf, Laird River and West Arctic posts. The Herschel Island post has not contributed to the present pack, but will have a good catch to send down next time. Mackenzie River, Tree River and Coronation Gulf posts furnished the Northern Trading Company's cargo. This companys steamer made the first trip on record to Scenic, well down the Mackenzie delta, and there gathered up a good supply of furs that the Eskimo huskies had caught in the near-Arctic wilds. The Northern Trading Company's pack is the largest and best

Canadian Woollens for Roumania

Allotment has recently been made among Canadian woollen mills of orders totalling about $7,500,000 from Roumania. This amount represents several contracts from that country, including a large order from the Roumanian government for khaki frieze and serge, and $500,000 for knit goods, principally heavy woollen socks, sweaters, jerseys, and hosiery. The fabrics are, for the most part, blanket cloth, curl cloth and oxford tweeds of a heavy character in small demand for the domestic market and the order, coming at a time when the Canadian mills had practically completed deliveries under the contract with Greece, will keep in full operation for some months Canadian woollen manufactories, the capacity of which were largely expanded to meet war demands.

Deliveries to Roumania must be completed within six months from October 1st. The order is being financed by a British syndicate and will not involve any credits from the Canadian government. Frederick H. Yapp, secretary of the Canadian Woollen Manufacturers' Association, negotiated the order. Canadian woollen manufacturing plants which produce only finer grades of fabrics did not participate in these particular orders, as such factories are devoting their entire output to the Canadian market.

Miscellaneous Trade Notes

Messrs. Toner and MacBride, practical box and crate makers, have decided to open up a factory in Moose Jaw, Sask., and it is expected that deliveries will commence shortly.

A huge floating drydock, large enough to accommodate the largest freighters on the Great Lakes, is now being put together in Ashbridge's Bay. It was built in Montreal for the John E. Russel Shipbuilding Co., and two of the six fifty-foot sections have already arrived at their destination. They were towed up from Montreal by the tugs "James L. Russel" and "Glide," and four other sections are now on their way.

Owing to increase in business the plant of the New England Fish Co. will expend $200,000 in new buildings and improvements at Vancouver, B.C. They include a $50,000 canned salmon storage warehouse and improved canning and curing establishments. The company handles thousands of tons of fish through the plant yearly.

Three great harbor projects at Vancouver, B.C., will be well under way by the end of the month. The Ballantyne pier, to cost at completion about five million dollars, is to be started at once, the harbor authorities announce. The big drydock, to cost at least three and a half millions, will be commenced before the end of the month, and steel and concrete work on the four million dollar C.P.R. pier will also see an early commencement on the completed excavation.

The establishment in Canada of a branch of the Vulcan Motor and Engineering Co., a famous English automobile firm, is contemplated to be undertaken shortly, according to an announcement by Walter S. Walker, general manager of the company, who recently visited Montreal. Mr. Walker intends making a trip through the Dominion to survey general conditions with regard to the country's ability to supply the steel and material required in construction and labor at reasonable rates.

A new digester is being installed at the plant of the Western Canada Pulp and Paper Co., Howe Sound, B.C., which, when completed, will double the output of the plant to forty tons per day of sulphate pulp and kraft pulp. The new digester, it is expected, will be operating in a few days' time.

A recent amalgamation of four British match manufacturing firms will erect in the province of Quebec a match manufacturing plant at an investment of five million dollars through the medium of a Canadian associated company. Complete information will be given out in the course of the next few weeks. Sir Alexander Maguire, the chairman of the British amalgamation, who has been investigating conditions here for the past few weeks, made an announcement to this effect in Montreal this week.

NEW INCORPORATIONS

Canadian Associated Goldfields, Ltd., Toronto, $30,000,000—Fort William Paper Co., Ld., Toronto, $15,000,000

The following is a list of companies recently incorporated under Dominion and provincial laws, with the head office and the authorized capital:—

Ottawa, Ont.—United Delivery, Ltd., $40,000.
Arnaud, Man.—Arnaud Town Hall Co., Ltd., $3,000.
Kamloops, B.C.—Kamloops Canneries, Ltd., $20,000.
Hanover, Ont.—Spiesz Furniture Co., Ltd., $200,000.
London, Ont.—Reid Brothers and Co., Ltd., $250,000.
Grandview, Man.—Grandview Land Co., Ltd., $20,000.
Owen Sound, Ont.—Superior Theatres, Ltd., $500,000.
Cobourg, Ont.—Douglas Packing Co., Ltd., $1,000,000.
Prince Rupert, B.C.—Pattison, Ling and Co., Ltd., $20,000.
Manotick, Ont.—The Manotick Realty Co., Ltd., $25,000.
Orillia, Ont.—Forest Home Telephone Co., Ltd., $3,360.

Creemore, Ont.—Nottawasaga Co-operative Co., Ltd., $5,000.

1870 —— OUR GOLDEN JUBILEE —— 1920
Co-Operative - Scientific - Successful

How has the Mutual Life of Canada [illegible] attained its present impregnable position in the financial [illegible]? It may be remembered that the promoters of the Company did not organize it as a commercial undertaking, but that it might serve as a public benefactor giving the largest amount of genuine life insurance for the least possible outlay. Unselfish devotion to the success of the enterprise supplied the place of capital. Although strictly co-operative or mutual, yet the Company has been built upon a scientific basis as an old line legal reserve life assurance company. The Mutual Life of Canada is a beneficent idea [illegible] on scientific lines—that is the secret of its popularity. The Mutual being essentially a company of policyholders, conducted by policyholders in the interests of policyholders, naturally became a great success.

BE A MUTUALIST!

The Mutual Life Assurance Co. of Canada
Waterloo Ontario

News of Municipal Finance

Edmonton's Half-Yearly Statement Reflects Satisfactory Position—Good Showing Made by Tax Collection Departments—Operation of Utilities Results in a Deficit—Abnormal Amount of Tax Arrears—Serious Weakness in Calgary Financial Position—London Wants Municipally-Owned Telephone System

Hillier Township, Ont. The tax rate for the current year has been fixed at 27 mills on the dollar.

Stamford Township, Ont.—The council has struck the tax rate at six mills on the dollar, an increase of one mill over last year.

London, Ont. At the next meeting of the city council a motion will be put before the assembly that the city take steps toward the establishment of a municipally-owned telephone system. It is contended that the municipalities, which have made a success of the hydro scheme, could easily make a municipally-owned telephone system pay.

Manitoba.—Officials of the provincial tax commission are pursuing their policy of visiting municipalities and gathering data on the equalization of taxation and assisting rural assessors in their work. Leo. Donley, chairman of the commission, and W. Watts, secretary, have been travelling almost continuously for the past month, covering the south and eastern territory. The trips have extended to the districts of Gimli, Kreuzberg, Rockwood, St. Andrews, St. Clements, Springfield, Lac du Bonnett, St. Vital, Fort Garry, Salisbury, Hanover, Louise, Franklin, Montcalm, Pempina, Stanley, Argyle, Lorne and Rhineland. At each of these and the other points visited, they have been in conference with the assessor and the council, explaining to them the system of taxation recommended and perfected by the tax commission. "The object of the trip," Mr. Donley stated, "is to look over the province and confer with the assessors on assessment problems and also to gather data in connection with equalized assessment. We are getting first-hand knowledge of matters through these trips."

Alberta.—Tax collections by the department of municipal affairs up to the first of August are reported by Deputy Minister J. H. Lamb to be 100 per cent. ahead of the corresponding period for any previous year. The figures are $1,089,811, as compared with $590,109 in 1919. These sums represent the wild lands, supplementary revenue and educational taxes, which are now collected by the department from the unorganized districts and by the municipal districts within their own bounds. Mr. Lamb figures that the province has saved $10,488 in interest charges alone if it had had to borrow an amount equal to the excess of taxes collected. The success of the collections, despite the fact that portions of the province were hard hit by crop failures, is attributed by the deputy minister to the increased efficiency of the present methods, by which all the taxes are included in one bill.

The provincial government's municipal assessment equalization board has completed its purview of the southern part of the province, and has covered a considerable portion of central Alberta as well. There still remains practically the whole of the northern district to be done, and this unfinished work is now being taken up. A complete report of the board's work is to be ready for submission to the legislature by January 10.

Calgary, Alta.—In preparation of the issuance of $75,000 bonds locally, W. C. Wood, city comptroller, has issued a statement of the city's finances, in which he takes a hopeful view of the outlook although the situation at the present time does not look very rosy. Total assets exceed liabilities by $1,534,481, assets being $27,908,458 and liabilities $26,373,977. Unpaid taxes amount to $4,979,321, a serious weakness in the city's financial position which Mr. Wood admits. On the subject he says:—

"The amount of outstanding taxes is altogether abnormal. During the years 1914 to 1919, the city was very lenient, and rightly so, in the collection of its taxes However, that time is past and the city is now determinedly collecting the taxes it has levied in past years. It should be made very clear to the people that all properties in arrears will surely be confiscated if the taxes be not paid." Further, the comptroller adds: "The fact cannot be ignored that the very act of confiscating certain properties must result in correspondingly higher taxes in the remaining taxable properties."

It is estimated that from 30,000 to 40,000 vacant lots with an overwhelming burden of taxes which will never be paid, will revert to the ownership of the city at the tax sale in the fall. Of course, where there is any chance of the property paying out, the taxes will be paid by the purchasers, and only that which is regarded as virtually worthless will go to the city. But for years past the city has been levying taxes on this property, thereby reducing the mill rate, though the taxes have not been paid, which accounts for the huge amount of unpaid taxes totalling nearly $5,000,000, much of which have been hypothecated, money having been borrowed against them which must be paid.

The condensed statement of the city's revenues and expenditures at the end of December, 1919, as prepared by the comptroller, shows that three city utilities made surpluses in that year, and three had deficits. Thus, the electric light and power department had a surplus of $24,219, the street railway department had a surplus of $24,233, and the waterworks a surplus of $9,742 in 1919, according to the comptroller's method of computation. In the same manner he shows the city hospitals to have a deficit for the seven months that the city operated the general hospital in 1919 of $145,759, and the city paving plant a deficit of $94,343.

In regard to the revenue and outlay of the city the comptroller remarks that "in 1919 on its current year's business operations, the city's revenue exceeded its expenditure by $111,036, which, were it a company, would pay 4½ per cent. on its capitalization over 27 millions, and further," he adds, "the city's assets, as above stated, are taken at cost, less proper, correct and adequate depreciation. Thus, while its liabilities during the last five years have remained nearly stationary, because of the fall in the purchasing power of money, many of its assets, if offered for sale, would realize a very great deal more than book value."

Under the heading of assets and liabilities, the comptroller's statement shows the following accounts:—

General assets, $18,627,141; liabilities, $17,427,500.

Electric light and power—Assets, $2,696,435; liabilities, $2,418,247.

Street railway—Assets, $2,577,893; liabilities, $2,420,095.

Waterworks—Assets, $3,191,814; liabilities, $3,579,190.

Hospitals—Assets, $592,939; liabilities, $308,258.

Market and weigh scales, $118,428; liabilities, $118,428.

All departments—Assets, $27,908,458; liabilities, $26,373,977. Surplus, $1,534,481.

Mr. Wood includes the unpaid taxes in the statement as a revenue asset, under the general heading of "convertible into cash or available as an offset."

Edmonton, Alta.—A satisfactory showing is presented in the statement of finances of the city for the six months ended June 30th, 1920, by D. Mitchell, city comptroller. Sundry revenue for the period amounted to $209,724, as compared with $101,253 in 1919.

A particularly good showing is made in the matter of tax collections, the total for the first seven months of the year being approximately one million greater than for the corresponding period of last year. Inclusive of arrears, amounting to $611,832, the aggregate of these with current taxes of $2,155,213, is shown to be $2,797,045, as against

$567,752 arrears and $1,177,033 current taxes, or a total of $1,744,785 for the seven months of 1919.

Expenditures for general administration, usually termed controllable, for the first six months amounted to $604,781, compared with $392,727 for the corresponding period last year, representing an increase of $212,054. On a proportionate basis the expenditures in the aggregate are well within the current year's estimates, the total estimate for the whole year being $1,434,696, but those of the engineer's and streets department indicate that it will be necessary to considerably reduce the ratio of monthly expenditures of that department during the second half of the year, in order that the authorization of the council may not be exceeded. Uncontrollable expenditure for the six months, including interest, discounts and exchange, debenture interest and redemption, totalled $843,719, as against $864,171 last year.

In connection with the issue of ten-year debentures authorized in 1919 against consolidated tax arrears, there have been sold $1,431,000. The proceeds of this issue with part of the tax arrears recovered, were applied towards redemption of outstanding debentures previously issued on the security of tax arrears for the years 1914, 1915 and 1916, the amount being $1,760,768.

Deficit For Utilities

The net result of operation of all utilities for the half-year was a deficit of $49,466, as compared with a net surplus for the corresponding of last year of $71,292. For the month of June there was a net deficit of $50,529, as against a net surplus for June, 1919, of $9,059, the street railway alone being responsible for approximately $40,000 of this deficit. The abnormal loss on this utility is partially explained by the circumstances that retroactive wages paid to the street railway employees, amounting to $23,472, are included in the cost of operation of this department during the month. The city comptroller in commenting on this says: "The constantly recurring deficit on this department would seem to indicate the necessity for considering revision of the present street car fares. Figures for the first six months of the year are as follows:—

Net Surpluses		
Electric light and power		$28,652
Pumping and filtration plant		514
Telephone		23,614
		$52,780
Net Deficits		
Power house	$24,318	
Street railway	77,296	
Waterworks	632	
		$102,246
Net deficit		$49,465

In commenting on the operation of the utilities, the city comptroller remarks:—

"It should be remarked that the utilities are meantime passing through the least profitable months of operation, and that the balance of the year will doubtless show substantial recovery. So far, however, as it is possible to make a forecast from the present situation, it scarcely seems likely that the utilities as a whole will complete the year on the basis of an even break; but the extreme vigilance in restricting operating costs to a minimum, it might even yet be possible to avoid incurring a deficit."

Government and Municipal Bond Market

Victory Bond Prices Reduced to Conform with Present Situation—Delines of From One to Three Points—Manitoba Sold Four and a Half Million Bonds During Past Month—Alberta's Domestic Loan Meeting With Good Demand—Moncton Sells Another Issue

OUTSIDE of the Victory Loan, the bond market during the past week was quiet. The announcement by the special committee of the reductions in Victory bond prices was received in financial circles more or less by surprise, although such a move was unavoidable, and was made in order that the prices would be in conformity with present conditions. The principal problem of the committee, it is explained, was that business houses who were unable to get sufficient money from the banks under present restricted credits were forced to sell their Victory bonds at a rate faster than the committee could absorb them. Under the new prices it is felt that the demand will quickly absorb any floating supply of bonds. The following table gives a comparison of the old and new selling prices, together with the present yield:—

Maturity	Old price	New price	Present Yield
1922	99	98	6.38%
1923	99	98	6.14%
1927	99½	97	6.00%
1933	99½	96½	5.88
1937	101	98	5.68%
1924	98	97	6.27%
1934	96	93	6.24%

The question of control is another matter which is under discussion. Stock brokers and bondmen are under an agreement with the government, with regard to the control of the bonds, which expires on September 30, and which covers the 1917 and 1918 loans. They are also under another agreement which expires on December 31, and which covers the 1919 loan. It is expected that when the first agreement expires it will be renewed until the end of the year. What course will then be taken is yet to be decided. Stock brokers, of course, favor placing the bonds on the open market, while bond dealers are of the opinion that restricted trading should continue for at least a short time longer. One bond dealer is of the opinion that if the bonds were put on the open market to find their own level, they would go considerably below the present fixed prices. He believes, however, that the bottom has been nearly reached and after the crop moving period prices should gradually improve.

Coming Offerings

The following is a list of debentures offered for sale, particulars of which are given in this or previous issues of *The Monetary Times*:—

Borrower.	Amount.	Rate %.	Maturity.	Tenders close.
Milton, Ont.	$ 48,000	6	30-instal.	Sept. 7
West Kildonan, Man.	56,849.37	6	Various	Sept. 7
St. James S.D., Man.	180,000	6	20-years	Sept. 15

St. James S.D., Man.—Tenders will be received until September 15, 1920, for the purchase of $180,000 6 per cent. 20-year debentures. S. B. Drennan, secretary-treasurer, Sturgeon Creek P.O., Man.

Debenture Notes

Newmarket, Ont.—Ratepayers have voted in favor of a by-law authorizing the raising of $20,000 for waterworks.

Windsor, Ont.—On September 4, ratepayers will be asked to authorize a debenture issue of $150,000 for waterworks.

RSC INVESTMENT SERVICE

Basic Development —Not Inflation

Many investors who do not appreciate the exhaustion of other countries' pulpwood reserves, fear that the past years' advance of the Canadian pulp and paper industry, and the corresponding rise in value of its securities, is artificial.

This is not so and the reasons why it is not so are very clearly shown in the current number of *Investment Items*. If you are a holder of pulp and paper securities it will add greatly to your satisfaction to read this number, so we recommend you to write for a copy.

Even though you may not at present hold such securities, you will be interested in it. Write for a copy today.

BANK OF TORONTO BUILDING
TORONTO

Saanich, B.C.—Ratepayers recently defeated by-laws authorizing the raising of about $1,000,000 for water and sewer purposes.

Coaticook, Que.—A by-law to borrow $60,000 for the building of a new cement dam has been passed by the council. Ratepayers must now give their approval.

Park Hill, Ont.—Ratepayers will be asked to vote on two money by-laws authorizing the raising of funds for improvements to the high school and to the waterworks system.

Lachine, Que.—The sale of $154,000 5 and 6 per cent. debentures has been postponed, it is understood. Tenders were asked until August 31st, but whether any offers were received or whether any were accepted is not known.

Winnipeg, Man.—The city council has authorized a bond issue of $300,000 to be used in connection with the civic housing scheme. The bonds, which are for a period of twenty years, will bear interest at the rate of 6 per cent.

Kitchener, Ont.—City Treasurer Huber reports satisfactory disposal of civic debentures locally since the commencement of the year. Nearly $100,000 has been disposed of, and it is expected that the remainder of the block for sale will soon be taken up by local investors. The bonds bear interest at 6 per cent.

Ontario County.—Authorities rejected all tenders on the $50,000 6 per cent. 20-instalment debentures, being under the impression that a higher bid could be secured. The highest offer was on a basis of about 6.72 per cent. Tenders were received as follows:—

Æmilius Jarvis and Co.	94.43
Brent, Noxon and Co.	94.112
A. E. Ames and Co.	94.11
C. H. Burgess and Co.	93.917
United Financial Corp., Ltd.	93.88
Harris, Forbes and Co.	93.677
Dominion Securities Corp.	93.531
Macneill, Graham and Co.	93.31
Wood, Gundy and Co.	92.65

Bond Sales

Exeter, Ont.—Debentures to the amount of $28,000 are being sold locally. The proceeds will be used for street paving purposes.

Charlottetown, P.E.I.—The issue of $75,000 $5\frac{1}{2}$ per cent. 20-year bonds, which were recently purchased by the Royal Securities Corp., Ltd., are now being offered at 92 and accrued interest, yielding over 6.20 per cent.

Alberta.—The province's domestic loan seems to have met with popular demand, and to such an extent that the provincial treasurer is confident that the whole amount will be fully taken up within the time anticipated.

Moncton, N.B.—Messrs. F. B. McCurdy and Co. are offering $300,000 6 per cent. 10-year school bonds, maturing July, 1930, which they recently purchased. The price is 98.50 and interest, to yield the purchaser 6.20 per cent.

Quebec, Que.—The Municipal Debenture Corporation, Ltd., has acquired the balance of the latest issue of debentures of the city amounting to $75,000, bearing interest at 6 per cent., and maturing in 10 years. The bonds are now being offered at par.

Quebec, Que.—Beausoleil, Ltd., a Montreal investment house, will shortly offer to the public $1,000,000 6 per cent. 5-year bonds of the province at par and accrued interest. The bonds comprise part of an issue which was placed in the hands of the Bank of Montreal during July for sale to the public at par.

Hamilton, Ont.—The city has disposed of $285,000 debentures to private purchasers so far this year, of which amount $90,000 went to persons outside of the city. The bonds run from one to twenty years and yield 6 per cent. interest. The sale was better in the earlier part of the year, but it is believed that there will be increased activity in buying aftr the summer vacation.

Manitoba.—During the month of August, the province disposed of several blocks of bonds amounting to $4,500,000, maturing in five years and bearing interest at 6 per cent. The transactions were made privately through A. Jarvis and Co., Toronto, and the First National Co., of Detroit. The bonds have all been sold in the United States to yield the investor slightly over 8 per cent.

BRITISH COLUMBIA BOND DEALERS' ASSOCIATION

New Organization Aims to Supplement Work of Dominion Association—Complaints of Unscrupulous Bond Dealings

THE following firms comprise the membership of the British Columbia Bond Dealers' Association which was organized last week: A. E. Ames and Co.; Burdick Bros.; British American Bond Corporation, Ltd.; Ceperley Rounsefell and Co.; R. P. Clark and Co.; Gillespie, Hart and Todd, Ltd., Pemberton and Son; Royal Financial Corporation; Waghorn, Gwynne and Co. A. C. Flumerfelt was elected president and J. H. Talling, secretary. "The association," says Mr. Talling in a wire to *The Monetary Times*, "was primarily organized for the purpose of unifying and standardizing methods and affording protection to buyer and seller of investment securities. It is hoped and earnestly desired that the British Columbia organization will receive recognitions from and be permitted to work in close harmony with the Dominion association."

Fair Treatment for Investor

In a further communication to *The Monetary Times*, Mr. Talling says:—

"This association has been formed primarily to ensure the local investor of fair and equitable treatment at the hands of the legitimate bond dealer, whose dealings have seriously been interfered with by the more unscrupulous so called bond broker, and it is the intention of the newly formed organization to work in harmony with the older established organizations along similar lines in the east. Feeling that the distance intervening between the Pacific Coast and the east prevents the dealer from securing the full benefits that might be derived from association with the Bond Dealers' Association of Canada, has resulted in a very scattered membership from British Columbia, and which can hardly be termed representative.

"The association feel very fortunate in having secured the co-operation of every recognized dealer within the province and the good to be secured from such co-operation should be felt within a reasonably short time."

Executive Elected

The executive elected is as follows:—

President—A. C. Flumerfelt, Esq., director, British American Bond Corporation, Ltd., Victoria and Vancouver.

Vice-president—J. R. Waghorn, Esq., Waghorn, Gwynne and Co., Vancouver, B.C.

Secretary—J. H. Talling, British American Bond Corporation, Ltd., Victoria, B.C.

Executive—Brig.-Gen. R. P. Clark, R. P. Clark and Co., Victoria; J. H. Gillespie, Gillespie, Hart and Todd, Ltd., Victoria; Harry A. Ross, A. E. Ames and Co., Victoria; S. B. Burke, Pemberton and Son, Vancouver, B.C.; E. B. McDermid, Royal Financial Corporation, Ltd., Vancouver, B.C.; E. A. Earle, Ceperley Rounsfell and Co., Vancouver, B.C.; Major J. C. Ross, Burdick Bros., Ltd., Vancouver, B.C.

Offices will shortly be opened in Vancouver, B.C., by the Royal Securities Corp. Ltd., and will be in charge of R. C. Buchanan, who served for three years in Vancouver as sub-district intelligence officer during the war. Mr. Buchanan is now in Vancouver arranging for the opening.

Corporation Securities Market

Lack of Interest in Canadian Stocks Again Reflected in Dealings On Montreal and Toronto Exchanges — Prices Close Firm On Latter Market — Manouan Pulp and Paper Bonds Offered—Reorganization of the Wabasso Common Shares

ALTHOUGH money at times ruled as high as 9 and 10 per cent., the New York market for the week ended September 1st was active and strong, and at the close industrials were firm, rails were buoyant, and there was a tendency towards broader trading. Brokers are of the opinion that the continued strength of the rails is impressive, and reflects a growing conviction on the part of the public that the railroad legislation last winter was a step in the right direction of putting the companies on their feet, which is an important factor to the business of the country as a whole. It is considered that all that is required to restore confidence in securities is a reasonable, stable money market, together with the drastic liquidation of commodities, which, in the opinion of some, should not be long.

Lack of public interest in Canadian stocks was again reflected in dealings on the Montreal and Toronto exchanges for the week ended September 1st. The reduction in the price of Victory bonds was one of the most important influences of the week, tending towards lower prices of listed securities. In the case of the Montreal exchange the prices movement was irregular all week, and at the close net losses were prominent, although certain issues showed a sign of recovery, but not to such an extent as to cover the losses sustained during the week. On the Toronto exchange prices were somewhat firmer and the number of issues showing net gains at the close was fairly substantial. Money continues to be the most important factor in the Canadian markets and will continue so for some time.

Manouan Pulp and Paper Bonds

Private offering is now being made by the Atlas Bond and Security Co., Ltd., Montreal, of $1,750,000 7 per cent. first mortgage sinking fund gold bonds, dated September 1st, 1920, and maturing September 1st, 1945, and $650,000 7½ per cent convertible 15 year debentures, dated September 1st, 1920, of the Manouan Pulp and Paper, Ltd., Montreal, a company incorporated under the laws of the province of Quebec. The capital of the company is as follows: Stock, $5,000,000 (50,000 shares, $100 par value), of which $1,000,000 is to be issued; bonds, $2,500,000, of which $2,000,000 is to be issued; debentures, $1,000,000, of which $900,000 is to be issued.

Interest on bonds and debentures is payable in Montreal, Toronto, New York and Chicago, at the option of the owner. The debentures will be convertible on or before May 1st, 1927, for equal par value in common shares. For this purpose 10,000 shares are left in the treasury. The bonds and debentures are redeemable on any interest date at 105 and interest. A sinking fund will be provided to retire the issues by annual payments, commencing the second year.

It is presently planned to make public offering of these issues shortly at par, with 30 per cent. of common stock for bonds and par, with 50 per cent. of common stock for debentures. A review of the company's plans and possibilities are contained elsewhere in this issue.

Capitalization Increases

Companies registered under Dominion charter have been authorized to increase their capitalization as follows:—

	Former capital stock.	Increased to
Canadian B. K Morton Co., Ltd...	$ 50,000	$ 200,000
Traders Sugar Co., Ltd.	1,000,000	3,000,000

New shares to be issued by the latter company will have a par value of $100. In the former case, 8 per cent. cumulative participating preferred shares of a par value of $50 and common shares with a par value of $50 will be issued.

Supplementary letters patent have been issued by the province of Manitoba to the following companies, authorizing them to increase their capital stock. In each case the new shares to be issued will have a par value of $100:—

	Former capital stock.	Increased to
Hingston Smith Arms Co., Ltd...	$ 50,000	$ 100,000
Premier Grain Elevator Milling Co.	60,000	400,000
N. Bawlf Grain Co., Ltd.	1,000,000	2,000,000

The Cobalt-Frontenac Mining Co., Ltd., incorporated under the laws of the province of Ontario, has been authorized to increase the capital stock from $2,000,000 to $3,000,000 by the creation of 1,000,000 shares of new stock with a par value of $1.

At a special meeting of the shareholders of the Wabasso Cotton Co., Ltd., following the annual meeting, which was held in Montreal on August 27th, the proposal of the directors to reorganize the common capital was ratified. Instead of the present 17,500 shares of common stock there will be 35,000 shares of no par value. Shareholders will be allotted the new stock in the proportion of two shares for each share of the present stock of $100 par value now held.

English Interest in Davidson

According to an announcement just sent to shareholders of the Davidson Consolidated Gold Mines, Ltd., important new financial arrangements have been made. As a result of the visit to England during recent months of H. H. Suther-

CORPORATION SECURITIES MARKET

(Continued from page [illegible])

land, managing director, an arrangement has been made for the sale of 1,500,000 shares of treasury stock at a price of 75 cents per share net to the company, which will provide the Treasurer with $1,125,000. The entire block of stock is to be taken up by April 1, 1921, and the greater proportion of the payments are to be made before the end of 1920. It is stated that a substantial payment has already been made.

A condition of the agreement is that the English interests shall receive a further option on 2,000,000 vendors' shares—1,000,000 at $1 per share and 1,000,000 at $1.25 per share. The option is to remain in force until the first 500-ton unit of the mill is completed, but in no case to exceed a period of two years. As a result of this arrangement between the company and the English interests, an extensive plan of development is to be carried out, which will include the sinking of a three-compartment shaft to a depth of 1,000 feet and the construction of a mill with a daily capacity of 1,000 tons, the first unit of which will handle 500 tons per day. Tenders for the shaft work have already been asked, and the construction of the mill is to be undertaken at once. It is estimated that after erecting the mill and carrying out all development work there will be a cash working capital available of approximately $300,000.

DIVIDEND NOTICE

THE CANADA LANDED AND NATIONAL INVESTMENT COMPANY, LIMITED

DIVIDEND No. 131.

Notice is hereby given that a **Dividend of Two and One-Half per Cent.** (being at the rate of ten per cent. per annum) on the amount paid up on the Capital Stock of this Company has been declared for the quarter-year to the thirtieth day of September, 1920, and that the same will be payable at the office of the Company, 23 Toronto Street, Toronto, on and after the first day of October, 1920, to Shareholders of record at the close of business on the sixteenth day of September, 1920.

By order of the Board.
EDWARD SAUNDERS
Managing Director.

Toronto, 1st September, 1920. 219

To Company Directors

Financial Executive, of standing and experience in organization and administration, now engaged with Large Canadian concern, is open to consider change of business connections. Remuneration required proportionate to responsibilities suggested. Correspondence confidential.

Our September "Investment Guide" Is Now Ready

SEPTEMBER presents to the investor a period when many interest coupons and dividend checks are due, thus placing at his disposal surplus funds for re-investment.

Present conditions call for unusual care in the selection of investments, so that your funds will return to you the greatest income, consistent with safety.

For your assistance in selecting the proper securities we have compiled in our "Investment Guide" for September, a complete list of current offerings, which carry our recommendation.

These bonds are suitable for every form of investor, and for the investment of large or small amounts.

A copy of this issue will be mailed to your address upon application, and each month as published, without obligation.

Increase in Canadian Pacific's Operating Expenses More than Offsets Increase in Gross Earnings—Winnipeg Will Appeal on Street Railway Fares Decision—London Street Railway Employees Oppose Claim of Bondholders—Brazilian Earnings Increased in July

Brazilian Traction, Light and Power Company.—The statement of combined earnings and expenses of the tramways, gas, electric lighting, power and telephone services operated by subsidiary companies controlled by the company for the month of July, 1920 (in milreis), is as follows:—

	1920.	1919.	Increase.
Total gross earnings......	11,745,000	10,070,000	1,675,000
Operating expenses	5,627,000	4,681,000	946,000
Net earnings	6,118,000	5,389,000	729,000
Aggregate gross earnings from January 1st	72,785,000	64,033,000	8,752,000
Aggregate net earnings from January 1st	39,175,000	33,739,000	5,436,000

The above figures are approximated as closely as possible, and will be subject to final adjustment in the annual accounts of the subsidiary companies.

The gross earnings were the largest for any month in the year, but operating expenses were maintained on a much higher basis.

Canadian Pacific Railway.—Gross earnings of the company for the first seven months of the year amounted to $109,433,347 as compared with $91,442,630 last year, constituting a new high record. On the other hand, the showing made by net was the lowest on record. The figures are:

	1920.	1919.	Increase.
Gross	$109,433,347	$91,442,630	$17,990,717
Expenses	96,385,675	76,259,448	20,126,227
Net	$ 13,047,672	$15,183,182	$2,135,510

*Decrease.

For the month of July the earnings created a new high record for the month, being more than $2,500,000 above the gross for July a year ago, but the greater increase in working expenses left net earnings for the month more than $1,270,000 under net for July, 1919. July's gross amounted to $17,375,761 and net to $1,619,486, the largest gross and the smallest net in the past ten or twelve years. The increased gross reflects the increase in traffic for the summer months, during which the working expenses should have decreased as the gross went up, instead of which actual increase in operating cost, plus the fact that the company has taken into consideration provision for estimated increase under new wage award for July, has caused a resultant decline in net earnings to below any of the years mentioned

London Street Railway Company.—While the Ontario Railway and Municipal Board claims that it cannot default in the payment of the bonds of the company, Dr. H. A. Stevenson, M.L.A., states that the members of the board have full powers of directors, and by virtue of this power could refuse to make the annual payments. In this event the deficit would be made up by the shareholders in some manner, either directly or from the physical assets of the road. In case the latter method were adopted the payment would probably be made at the time the road is sold in 1925.

It is pointed out that the railway board could easily pay the men 52 cents an hour if the payments on the bonded indebtedness were not made out of revenue. These payments amount to approximately $750 weekly, and this would increase the wages to the rate asked by the men, and which rate they say that they are determined to get. The employees have repeatedly stated that they never expected that this bonded indebtedness would be considered before their wages or they would not have returned to work under the conditions.

At the conferences which were held recently between the labor men of the city and Vice-Chairman Ingram, of the railway board, this question was the one on which they disagreed. Many of the labor men claim that the wages should be paid first, and then if there is anything left over it could be applied to reducing the bonded debt. Mr. Ingram contended that the payment on the bonds is the first call and the increase in wages comes next. As a result of carrying out this principle the men have received only 49 cents an hour for July and the latter part of June.

Granby Consolidated Mining and Smelting Company.—The judgment of Justice Gregory, favoring the Esquimalt and Nanaimo Railway Company in the suit over the title to the Granby Company's coal lands near Cassidy, B.C., is to be appealed by the Granby Company, and it is expected will eventually reach the Privy Council. An investment of nearly a million and a half dollars made by the Granby Company at Cassidy alone is affected by the judgment. The validity of the grant made by the provincial government of undersurface rights to settlers in the E. and N. belt, under the Settlers Rights Act of 1917, is questioned by his lordship in the judgment.

The property in question was acquired by the Granby Company from Wilson and McKenzie and Mrs. Dunlop, the two former being executors of the estate of the late Joseph Ganner, of Nanaimo. The vendors in each instance assigned to the Granby Company their grants under the Act of 1917, which awarded undersurface coal rights to settlers who failed to register within the statutory time under the Settlers Rights Act of 1894.

Justice Gregory finds that proper notice of the proceedings before the executive council were not given to the E. and N. Company before the grants were issued to the Granby Company, and that the Granby Company has not complied with Section 104 of the Land Registry Act and are debarred from pleading that they are innocent third parties. "They purchased with full knowledge, and their title must fail," says his lordship. The trial was held at Victoria last February.

Winnipeg Electric Railway Company.—On September 1st last street car fares came into effect on the city lines as follows: Seven cents cash, or four tickets for 25 cents; children's tickets, seven for 25 cents; workmen's tickets at reduced rates abolished. Fares on the suburban lines were increased about 25 per cent

These increases were authorized by the Manitoba Public Utilities Commission in a judgment handed down on August 23rd. During the past two years the commission has conducted an elaborate and thorough appraisal of the company's property, which it has valued at $24,369,431. On the matter of return the commission's judgment says: "The rate of return is not a difficult one to set. To ensure continuance of a satisfactory service the rate must be such as will be attractive to investors, for the business is one which requires additional capital. In my judgment 8 per cent. is the proper rate to fix." The commission further points out that the new fares will now provide surplus funds for contingencies.

The company also operates the gas utility in Winnipeg, and two increases in the price of gas have been granted since A. W. McLimont, vice-president and general manager, took charge, the last increase of 25 cents per 1,000 cubic feet having also been authorized on August 23rd.

The decision of the commission of the matter of increased rates marks the successful close of a consistent effort to put the company on its feet by Mr. M[illegible] took charge of the property in October, [illegible].

It has been decided by the city [illegible] to appeal the order of the commission.

Lake Superior Corporation.—A statement of the financial standing of the company's subsidiaries for the year ended June 30th last has just been issued and shows net earnings from operations, excluding the Algoma Central and Hudson Bay Railway, at $3,722,153 as compared with $[illegible] in the previous year. W. H. Cunningham, president, in his report gives the reason for the decline. "Operations of the steel plant for the fiscal year," he says, "continued throughout the first quarter at below 50 per cent. capacity on account of scarcity of new orders, and subsequently until April were seriously curtailed, notwithstanding heavy orders on hand booked in November and December. The winter was unusually severe, and operations were seriously hampered by heavy snowfalls and extremely cold weather. These conditions affected our own transportation facilities, and interfered with shipments by rendering it impossible at times for the railways to supply sufficient cars. Sickness was very prevalent during the winter, at one time 20 per cent. of the operating force being absent from this cause. Not until the last quarter was the plant able to operate approximately to capacity."

Disbursements from the net earnings of the Lake Superior Corporation show some changes from the previous year. The sum of $1,315,522 was taken for interest on bonds of subsidiary companies, on bank and other advances and rentals, compared with $1,235,710 in 1919. For general depreciation and losses the sum was $1,024,064 as against $1,500,000, while for depletion and depreciation of mining properties and quarries there was allowed $88,598 as against $324,463. Last year, however, $365,000 was reserved against abnormal cost of new plant and equipment, and $260,000 for depreciation, renewals, etc., of special assets. This year the sum of $2,592,237 is carried forward by all companies as against $1,589,388, the dividend to Lake Superior Corporation being, however, only $180,000 this year, compared with $1,054,000 last year. The balance sheet of the Lake Superior Corporation shows total assets of $49,305,2[illegible]4, against $50,552,101, the reduction being practically accounted for on the one item of investments and securities.

The statement of the Algoma Steel Corporation, the company's principal subsidiary, shows net earnings from operations and other profits of $3,147,694, and dividends from subsidiaries of $500,000, or $3,647,694, against net earnings from operations in the previous year of $[illegible]. Deductions show little change, except the reserve for general depreciation is $1,000,000, instead of $1,500,000 in 1919, while back dividends paid on preference amounted to $175,000, compared with $1,050,000 paid in the previous year. The balance carried forward is $2,793,114 as against $1,4[illegible]. Dividends are now in arrears from March 31st, 1916, and income and business profits taxes from June 30th, 1917. Current assets for the Algoma Steel Corporation are $1[illegible], compared with $13,834,842, while current liabilities are $1,[illegible]73,031, against $2,449,790.

Spanish River Pulp and Paper, Ltd.—Ever since the improvement started in the pulp and paper industry, Spanish River has given personal attention to [illegible] all its undertakings and in this way put itself in a position to meet any conditions that might arise. Of equal importance to the shareholders has been the improvement in the financial position. All deferred [illegible] away by the settlement of all arrears of [illegible] on the preferred stock. At the same time the company was able to build up a working capital of [illegible] represented by current assets of $10,71[illegible] [illegible] current liabilities of $1,102,8[illegible]. At the same time reserves have been built up of over $8,000,000. These reserves include miscellaneous and contingent reserve [illegible], depreciation reserve $1,926,[illegible], bond sinking fund reserve $638,000. The current assets reflect the [illegible] the company has been adding to its [illegible] mills, the principal accounts showing as follows: [illegible], $[illegible],46[illegible],647; woods equipment and stores and [illegible], $1,97[illegible],267; [illegible], $[illegible],240, accounts receivable, $2,953,0[illegible]; Victory bonds, $[illegible]; company's bonds purchased and held, $[illegible]; cash in banks and on hand, $[illegible]. Current liabilities are made up of loans from banks $1,000,000,000, accounts and bills payable $2,[illegible],47[illegible], accrued interest on bonds and [illegible] notes $267,378.

The net profits for the year, before depreciation, but after allowing for the full preferred dividend of $400,000, was equivalent to 29.9 [illegible] on the common stock. After allowing both for the preferred dividend had it been paid and full depreciation, the net profits were equivalent to approximately 22½ per cent on the common stock. The net profits for the year of $2,202,069, added to the balance as at June 30th, 1919, of $2,368,222, brought the total amount available for distribution up to $4,570,291. This was appropriated as follows: Accumulated preferred dividends to 30th June, 1920, met by issue of preferred stock, $2,871,493, bonds, sinking fund, reserve $638,000, making a total amount of $3,509,493 and leaving a balance to be carried forward into the new year of $1,060,798.

AMERICAN MILLERS TOUR CANADIAN WEST

Large Interests in Wheat and Flour Represented in Delegation of Fifty—Some Impressions of Western Growth

(Special to *The Monetary Times*.)

Winnipeg, August 30, 1920.

A TOUR of considerable importance to western Canada has just been completed by a number of influential bankers and grain dealers from the United States. The party comprised official representatives of F. H. Peavey and Co., of Minneapolis, possibly the largest grain operators on the American continent, and who control, along with allied companies, over 500 country elevators in western Canada, as well as two large terminal elevators at the head of the lakes. The party was under the personal guidance of E. W. Kneeland, manager in Winnipeg of the British-American Elevator Co. Those comprising the party were as follows:—

Minneapolis:—F. T. Heffelfinger, president, F. H. Peavey and Co.; F. P. Heffelfinger; T. P. Heffelfinger; E. L. O'Brien; F. B. Wells, vice-president, F. H. Peavey and Co.; A. L. Searle, vice-president, Globe Elevator Co.; C. F. Deaver, treasurer, F. H. Peavey and Co.; H. G. Dickey, vice-president, Monarch Elevator Co.; E. C. Warner, president, Midland Linseed Products Co.; S. T. McKnight, vice-president, First National Bank; C. B. Mills, president, Midland National Bank; J. A. Latta, vice-president, Northwestern National Bank; A. C. Loring, president, Pillsbury Flour Mills Co.; J. F. Bell, vice-president, Washburn-Crosby Co.; R. Wells, president, Minneapolis Trust Co.; Judge W. A. [illegible], attorney; C. S. Langdon, president, [illegible] Association; H. C. Clarke, president, Shevlin, Carpenter and Clarke Co.; Chas. F. Heffelfinger, real estate.

Duluth:—Wm. G. Hegardt, vice-president, American Exchange National Bank; F. N. Bradley, vice-president, Globe Elevator Co.

St. Paul:—G. H. Prince, [illegible] National Bank.

Chicago:—D. R. McLennan, Marsh and McLennan (insurance); Chas. W. Folds, Halsey, [illegible] (commercial paper brokers).

[illegible]

New York:—[illegible] Trust Co.; [illegible] National Bank; [illegible] (commercial paper brokers).

Boston.—S. P. Ware, Bond and Goodwin (commercial paper brokers).

Philadelphia:—S. Bell, Jun., Samuel Bell and Son Co. (flour jobbers).

Impressions of Visitors

Upon his return to St. Paul, George H. Prince, chairman of the board of directors of the Merchants National Bank, expressed his surprise at the progress which had been made since his previous visit in 1902. When he passed through Saskatchewan 18 years ago there were only two houses in Saskatoon and there were less than 4,000 people in the present city of Calgary. There were no paved streets in the latter place, no granolithic sidewalks and comparatively no sidewalk of any kind.

Mr. Prince estimated the value of the western crop at about a billion dollars and said that only about 15 per cent. of the tillable area of the provinces was under cultivation. The wheat crop of the year, he thought, would be in the neighborhood of 250,000,000 bushels, and the area under crop, he was informed, was 29,000,000 acres. Mr. Prince anticipated that the United States would aid materially in financing western Canada and that very large quantities of the wheat raised would be milled in Minneapolis.

RECENT FIRES

McNair Shingle Company, Port Moody, B.C., Trading Posts, The Pas, Man., and Dominion Park Property, Montreal, are Heaviest Losses this Week

FOREST and bush fires are reported this week from Manitoba and Saskatchewan, near Prince Albert, but the latter have been quenched by rains. In Manitoba considerable property was destroyed near Ste. Rose du Lac, Eriksdale and several other places.

Belleville, Ont.—August 30—Schuster Company's freight warehouse and lower offices were destroyed by fire. The loss is estimated at $15,000.

Blaine Lake, Sask.—August 25—Electric power plant of Larsen Brothers was damaged by fire. The loss was partly covered by insurance.

Brigden, Ont.—August 30—Implement building of J. R. Sinclair and the printing office of the Brigden "Progress" were damaged. The loss is $10,000.

Charlottetown, P.E.I.—August 26—Barn, belonging to Alex. Richard, was destroyed. The loss is estimated at $7,000. Fire was caused by incendiarism.

Chateau Richer, Que.—August 29—A fire broke out in a bakery and completely destroyed six houses. The loss is estimated at $12,000, with a small amount of insurance.

Gamebridge, Ont.—August 30—Barn and contents belonging to Jay Morgan were destroyed by fire. The fire was caused by a spark from the engine of the threshing machine. The loss is $3,000, partly covered by insurance.

Montreal, Que.—August 30—Building, belonging to the Progress Spring Bed Manufacturing Co at 152 Cadieux Street, was destroyed by fire. Dominion Park damaged by fire. Several small booths were destroyed. The loss is estimated at $25,000.

Moose Jaw, Sask.—August 27—Fruit store of Gus Kellos, 128 Main Street North, was damaged by fire. The loss is estimated at $2,500, partly covered by insurance

August 28—Barn on the property of W. D. Dexter, [illegible] Athabasca East, was damaged by fire. The damage amounts to $600.

North Vancouver, B.C.—August 26—Fish and chip restaurant at 54 Lonsdale Avenue was damaged by fire. Several other buildings were slightly damaged. The loss is estimated at $3,000.

Peterboro', Ont.—August 27—Barn, situated on the property of Walter Stocker, Weller Street, was damaged. The loss is not yet known.

Port Huron, Ont.—August 26—Windermere summer hotel damaged by fire.

Port Moody, B.C.—August 27—The new plant of the McNair Shingle Co. was damaged to the extent of $75,000.

Revelstoke, B.C.—August 23—Residence of Mrs. Cleland was damaged by fire. The fire is believed to have been caused by electric wiring. The loss will exceed $3,000, with $2,000 insurance.

Ridgetown, Ont.—August 25—An unoccupied house on Alpha Street was damaged by fire. The loss is estimated at $500.

South Vancouver, B.C.—August 22—Residence at the corner of Euclid and Spencer Streets was damaged by fire. The loss is estimated at $5,000.

Stratford, Ont.—August 21—Barn, belonging to Mrs. Michael Teehan, on the tenth concession of Downie, was destroyed. The fire is believed to have been caused by children playing with matches.

Sydney, N.S.—August 31—The transforming station of the Dominion Steel Co. was destroyed. The fire was caused by an electric storm.

The Pas, Man.—August 25—Two trading posts were wiped out by fire with a loss of $35,000.

Toronto, Ont.—September 1—Vulcanizing plant occupied by Herbert Chaperon, 1592 Queen Street West, was damaged The loss is estimated at $1,800.

Wolf Island, Ont.—August 31—Lightning struck the barn of Jas. Dalsy and it was completely destroyed, together with the contents. The loss is $9,000.

ADDITIONAL INFORMATION CONCERNING FIRES

Manitoba.—During the month of June 110 fires occurred in the province with a monetary loss of $73,579, showing a decrease of 25 in the number of fires, with a corresponding decrease of $45,079 in the amount of loss, compared with June of last year, when 135 fires were reported with a loss of $118,658. The following were the principal causes of fires: Hot ashes 40, careless handling matches 80, smoking 48.

Ontario.—The fire marshal's report for July, 1920, shows that during the month there were 729 fires, with a loss of $676,297, on which $551,301 of insurance was carried, the loss not covered by insurance being $124,996. During the month only two losses of importance took place, St. Thomas Foundry, $150,000, and Porquis Junction Stores, $100,000.

River Charlo, N.B.—August 7—Three barns, dwelling-house and dairy, owned by W. D. Miller, damaged. The fire was caused by an electric storm. The loss was $12,000, with no insurance.

Simcoe, Ont.—August 25—Public feed barn and storage on the estate of F. Edmonds. The fire caught from burning building nearby. The building was completely destroyed, with insurance of $4,500 on Merchants and Gore Insurance Companies.

Toronto, Ont.—The fire losses for August are the lowest for the year. During the month there were 138 alarms, with an estimated damage of $7,677. Unknown causes 14, fire caused by rubbish and dumps 13, number caused by autos 10, dumps and grass 9, children and matches 8.

Vancouver, B.C.—The fire losses in July were not serious, aggregating the total of $27,715. The loss was covered by insurance, with the exception of $3,084. There were forty-five bush fires around the city. Fires where loss occurred 25; fires, no loss resulting, 14; chimney fires, 2; exhibition runs, 2; false alarms, 7; rubbish fires, 4. The following shows the cause of fires: Backfire carburetter, 3; bush fires, 37; carelessness with cigarettes, 6; children playing with matches, 2; chimney fires, 3; electric iron left on switch, 1; electrical origin, 6, lightning, 1.

Westmount, Que.—August 15—Metcalfe Apartments were damaged to the extent of $6,300, with insurance of $5,000. The cause of the fire is unknown.

Comparison of Workmen's Compensation Laws*

Dominion and Eight out of Nine Provinces have Workmen's Compensation Laws—Rapidly Adopted in Canada, Following Introduction into Great Britain—Payments Approximate Those of most Liberal States—Administrators are Permanent Officials in Canada

By CARL HOOKSTADT

WITH the single exception of Prince Edward Island, all of the provinces of Canada, including the Dominion government, have enacted workmen's compensation legislation. The law of Saskatchewan, however, although designated in its title as a workmen's compensation law, is merely an employer's liability act, and is therefore not included in the following discussion. The Dominion act provides that if a federal employee (government railroads excepted) sustains an injury he shall receive the same compensation as any other person would under similar circumstances receive under the law of the province in which the accident occurred. Administration of the Dominion act is placed in the hands of the provincial boards, and any compensation awarded may be paid by the Dominion Minister of Finance.

Chronologically, Canadian legislation practically parallels that of the United States. The first law was enacted by British Columbia in 1902, followed by Alberta in 1908, Quebec in 1909, and Manitoba and Nova Scotia in 1910.† These early laws were patterned after the British act and were really modified employers' liability laws. No administrative commissions were provided, and usually suits for damages were permitted. A radical departure from the British type of law, however, took place in 1914 when Ontario enacted the first of the collective accident compensation acts prevailing in most of the provinces at the present time. These laws were patterned upon the mutual liability idea of the German workmen's compensation system and upon the exclusive state fund plan of the Washington act. Nova Scotia enacted a similar law in 1915, followed by British Columbia in 1916 and by Alberta and New Brunswick in 1918.

Canadian and American Laws Compared

An analysis of the Canadian laws reveals a number of striking characteristics and of deviations from the American type of compensation act. Some of the more important of these are the following:—

1. In Canada there is a remarkable uniformity among the several compensation laws. This uniformity applies to the scope of the acts, benefits, [illegible] administration, and procedure. In the United States, [illegible] are distinguished more for their [illegible] than for their uniformity.

2. In Canada all of the [illegible] the employers coming within the scope of the [illegible] United States only 13 are compulsory, while [illegible]

3. In Canada the scope of the law in each province (Yukon excepted) is limited to enumerated hazardous employments. There is some diversity in the number of such employments, but the principal hazardous industries are covered, including manufacturing, mining, construction, and transportation. In the United States only 13 states limit their scope to the so-called hazardous industries, while 32 states cover the "nonhazardous" as well as the "hazardous" industries.

Occupational Diseases Enumerated

4. In Canada occupational diseases are compensable in every province except Quebec and Yukon. Such diseases, however, are limited to those enumerated in the statutory schedule. In the United States only 6 of the 45 state laws include occupational diseases, but in these six states all occupational diseases are covered.

5. In Canada all of the provinces except Manitoba, Quebec, and Yukon have exclusive state insurance funds. In Ontario, however, employers under schedule 2 (municipalities, railroad, express, telephone, telegraph, and navigation) are permitted self-insurance. In the United States only eight of the 47 states have exclusive state funds, while nine have competitive state funds.

6. In Canada probably the most significant characteristic of compensation legislation is the assumption of liability on the part of the province. Injured workmen are paid direct by the workmen's compensation board out of the accident fund. This is true, irrespective of whether or not the employer has contributed his premium to the fund and even if the employer is [illegible]. Failure on the part of the employer to [illegible] obligations does not [illegible] the [illegible] of compensation benefits. [illegible]

No Appeal Except in Two Provinces

7. [illegible]

8. [illegible] except that in

---

*From the "Labor Review" of the Bureau of Labor Statistics, U.S. Department of Labor. This comparison includes 1919 legislation.

†In the United States the Federal Compensation Act was passed in 1908, while Montana enacted a compensation law in 1909 and New York in 1910, though [illegible] were later declared unconstitutional.

British Columbia the term of office is 10 years. In most of the provinces, however, they are subject to compulsory retirement at the age of 75. Each board is authorized to appoint its officers and employees and to fix their salaries. The term of office of such employees is subject to the pleasure of the board. In the United States the term of office of compensation commissioners is usually three, four, or five years.

Amount and Period of Compensation

9. As regards liberality, the benefits of the Canadian laws are about on a par with the more liberal of the American acts. The scale of benefits is considerably lower, but on the other hand the periods for which benefits are paid are much longer. In Canada compensation is usually paid during disability or until death or remarriage of the widow, while in most of the states the compensation periods terminate at the end of 300, 400 or 500 weeks. In none of the provinces (Yukon excepted) is the waiting period over one week, and in most of the laws compensation when payable begins from the date of the injury, whereas in the United States seven states have a waiting period of 10 days and 13 states of two weeks. In all of the Canadian laws the amount of compensation in case of disability is 55 per cent. of the employee's earnings, except that in Quebec the percentage is 50; in the United States 20 states have a percentage of 60 or greater. The early Canadian laws did not provide for medical benefits, but some of the provinces have recently made provision therefor; in the United States 42 of the 45 states provide medical service. All but five of these states, however, place some limitation upon the amount of the medical service which the employer is required to furnish.

Compensation and Insurance Systems

All of the Canadian laws are compulsory upon employers coming within the scope of the act. In the five provinces of Alberta, British Columbia, New Brunswick, Nova Scotia, and Ontario* all employers must contribute to the accident fund. Quebec and Yukon Territory have no state fund, nor are employers in these jurisdictions required to insure. Manitoba has a hybrid system. Employers are required to insure in private casualty companies or provide self-insurance. Such insurance companies or self-insurers, however, must contribute to the accident fund. They must also contribute 7½ per cent. of their premiums to the administration fund.

Out of these accident funds, which are managed by the workmen's compensation boards, are paid all compensation claims. The board classifies the industries according to the hazard, fixes and collects premiums, receives and investigates claims, grants awards, and pays the compensation benefits. As already noted, the workmen's compensation board assumes liability. Injured workmen are always paid direct by the board from the accident fund, irrespective of whether or not the employer is insured or carries his own risk. Failure on the part of the employer to meet his compensation obligations does not deprive the employee of his compensation benefits. This obligation is assumed by the accident fund, which, in turn, has redress against the defaulting employer through an action at law.

Scope or Coverage

The scope or coverage of the Canadian laws is more restricted than that of most of the American Acts. In all of the provinces (Yukon excepted) the employments covered are limited to enumerated hazardous industries. Agriculture and domestic service are universally excluded. Most of the laws also exclude outworkers, travelling salesmen, non-hazardous clerical occupations, non-hazardous public employments, and casual employees employed otherwise than for the purpose of the employer's business. Alberta also excludes railroads. Moreover, the workmen's compensation boards have been given discretionary power both to increase and to decrease the scope of the Acts by adding to or subtracting from the industries enumerated in the statute. Under this authority the original statutory scope of the Acts has been considerably changed. Many new classes of industries have been added; others have been excluded. In addition, the Ontario Board has exempted certain classes of employers having less than a stipulated number of employees. The policy of the boards in including and excluding certain industries is apparently determined by the hazard of the particular industry and by the administrative difficulty of collecting premiums in the case of small employers. Exempted employments usually are given the privilege of coming under the Act if either the employer or employee so desires.

Under all of the Canadian laws employees injured without the province are entitled to compensation benefits if the place of business of the employer and the usual place of employment of the workmen are in the province. The following provision found in the Alberta law is typical of that in the laws of practically all the provinces:—

Location of Accident

(1) Where an accident happens while the workman is employed elsewhere than in the province which would entitle him or his dependents to compensation under this Act if it had happened in the province, the workman or his dependents shall be entitled to compensation under this Act—

(a) If the place or chief place of business of the employer is situate in the province and the residence and the usual place of employment of the workman are in the province and his employment out of the province has immediately followed his employment by the same employer within the province and has lasted less than six months; or

(b) If an accident happens to a workman who is a resident of the province and the nature of the employment is such that in the course of the work or service which the workman performs it is required to be performed both within and without the province.

(2) Except as provided by subsection 1, no compensation shall be payable under this Act where the accident to the workman happens elsewhere than in the province.

The following table shows more in detail the scope of the several Canadian Compensation Acts:—

SCOPE OF CANADIAN COMPENSATION LAWS

[illegible]	[illegible]	[illegible]	[illegible]	Casual employees not in usual course of employer's business	[illegible]
[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]
[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]
[illegible]	[illegible]	[illegible]	[illegible]	Manitoba	[illegible]
[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]
[illegible]	[illegible]	[illegible]		Nova Scotia	[illegible]
[illegible]	[illegible]			[illegible]	[illegible]
[illegible]					[illegible]
	[illegible]			[illegible]	[illegible]

Accidents and Occupational Diseases

Canadian compensation laws cover both accidents and occupational diseases. The provisions of the British Act, both as to content and phraseology, have been adopted practically without change in nearly all of the provinces. Every law except Quebec uses the phrase, "Personal injury by accident arising out of and in the course of the employment, unless it is attributable solely to the serious and willful misconduct of the workman." In four provinces, however, injuries due to willful and serious misconduct are compensable if they result in death or serious disability. In addition, New Brunswick excludes injuries if intentionally self inflicted, due to intoxication or caused by a fortuitous event not connected with the industry. Quebec also excludes intentionally self inflicted injuries, while Yukon excludes those caused by intoxication.

---

*Except employers enumerated in Schedule 2, which include municipalities, and railroad, express, telephone, telegraph and navigation companies. Employers in these industries are individually liable, though they must deposit funds with the board, which pays the compensation direct to the injured employee.

Alberta, British Columbia, Manitoba and Nova Scotia.

As regards occupational diseases, the Canadian provinces followed the compensation law of Great Britain which originally included the following diseases and processes:—

OCCUPATIONAL DISEASE SCHEDULE OF BRITISH WORKMEN'S COMPENSATION LAW OF 1906

[illegible]	[illegible]
[illegible]	[illegible]
[illegible]	Any process [illegible]
[illegible]	Any process [illegible]
[illegible]	Any process [illegible]
[illegible]	Any process [illegible]
[illegible]	[illegible]

Canadian Variations from British Law

Manitoba and British Columbia adopted verbatim the British Act of 1906; Alberta and Ontario added miners' phthisis to the original list, while Nova Scotia added the three following diseases: Subcutaneous cellulitis of the hand (miners' bent hand), subcutaneous cellulitis over the patella (miners' bent knee), and acute bursitis over the elbow (miners' bent elbow). New Brunswick did not adopt the British schedule, but grants compensation benefits for all occupational diseases, as determined by the board, contracted in industries within the scope of the Act. Quebec and Yukon do not compensate for occupational diseases.

However, the foregoing diseases are compensable only if they are due to the nature of any employment in which the workman was employed at any time within one year previous to the date of disability. Compensation shall be payable in the first instance by the last employer. The latter, however, may recover from other employers whose employment had within the year contributed to the contraction of the disease.

Waiting Period

With the exception of Yukon Territory none of the Canadian compensation laws have a waiting period of over one week. In two provinces the waiting time is only three days. Furthermore, in most of the provinces compensation when payable begins from the date of [illegible]. The following table shows the waiting period for each province:—

CANADIAN COMPENSATION LAWS

[illegible]	[illegible]
[illegible]	[illegible]
[illegible]	[illegible]
[illegible]	[illegible]
[illegible]	[illegible]
[illegible]	[illegible]
[illegible]	[illegible]
[illegible]	[illegible]

Compensation Benefits

The compensation benefits of the Canadian laws are about on a par with the more liberal American laws. The scale of benefits is [illegible] lower [illegible] the periods for which benefits are paid [illegible] compensation usually [illegible] during [illegible] death or remarriage of the widow. [illegible] the usual provision is a fixed monthly pension [illegible] with an additional [illegible] a month for each child [illegible] $40 in all. In case of [illegible] 55 per cent. of the [illegible] disability. The following table shows the per cent. of wages paid as compensation, maximum weekly or monthly payments, and maximum period and amount of compensation payable in case of death, permanent total disability and partial disability:—

PER CENT OF WAGES PAID AS COMPENSATION, MAXIMUM WEEKLY OR MONTHLY PAYMENTS AND MAXIMUM PERIOD AND AMOUNT OF COMPENSATION PAYABLE IN CASE OF DEATH, PERMANENT TOTAL DISABILITY AND PARTIAL DISABILITY

[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]
Alberta	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]
British Columbia	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]
Manitoba	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]
New Brunswick	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]
Nova Scotia	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]
Ontario	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]
Quebec	[illegible]		[illegible]	[illegible]	[illegible]
Yukon	[illegible]		[illegible]	[illegible]	[illegible]

The provisions relative to weekly or monthly maximums differ widely as between death and disability. In case of death the monthly maximum is usually $40 (Ontario, $60), but not over 55 per cent. of the employee's wages. In case of total disability the weekly maximum amounts range from $13.20 in Nova Scotia to $22 in British Columbia, Manitoba and Ontario. The Quebec and Yukon laws make no provision in this regard.

Compensation benefits in case of death are not based upon wages. Instead, all of the provinces except Quebec and Yukon provide a fixed monthly pension of $20 for the widow ($30 in Ontario), with an additional $5 for each child ($7.50 in Ontario). Payments to the widow continue for a period equal to the probable industrial life of the deceased husband, or, to quote the law: "The payments shall continue only so long as, in the opinion of the board, it might reasonably have been expected had the workman lived he would have contributed to the support of the dependents." Payments to the children cease at sixteen years and to the widow upon remarriage, except that in the latter event she is paid a lump sum equal to two years' compensation. Two of the above provinces have a maximum limit; in Alberta this limit is $2,500 and in New Brunswick $[illegible]. Under the Quebec law the death benefits are four years' earnings of the deceased employee (maximum, $2,[illegible]), while the Yukon law provides a flat sum of $2,500. In addition to the compensation benefits, most of the provinces provide also for burial expenses, the maximum allowance usually being $[illegible].

Total and Partial Disability

In all of the provinces except Yukon [illegible] total disability [illegible] continue during disability and in case of permanent disability, during the life of the injured workman. [illegible] Alberta and Quebec [illegible] In [illegible] British Columbia [illegible] Nova Scotia and Ontario the amount of compensation [illegible] per cent. of the employee's [illegible] In Quebec [illegible] In Alberta [illegible] a weekly [illegible]

The [illegible] partial disability [illegible] Most of the laws in the United States contain a schedule of specified [illegible] for which [illegible] for stated [illegible] a percentage of wages [illegible] In Canada all of the provinces except Alberta and Yukon base the amount of compensation upon the [illegible] or impairment of earning capacity, payments continuing during disability. The workmen's compensation boards have authority to formulate partial disability schedules in which the loss of earning capacity of the various disabilities is expressed in percentages of total disability. The age and occupation of the injured workman is usually taken into consideration in determining his impairment of earning capacity. One of these provinces, however, has a maximum limit—New Brunswick, $1,500. Alberta and Yukon have adopted the Washington method and provide fixed amounts for certain specified injuries.

Medical Service

Although none of the early Canadian Acts provided medical or surgical service in the present acceptation of the term, some of the provinces have recently made provision therefor. The following table shows for each province the amount of medical and surgical aid and the conditions under which it is furnished:—

MEDICAL SERVICE PROVIDED UNDER CANADIAN COMPENSATION LAWS

[illegible]	[illegible]
[illegible]	[illegible] case of employees furnished medical aid from employer's hospital fund or State accident fund to which employees must contribute
[illegible]	Such service as reasonably necessary; transportation included; special provision for seamen; employer's hospital fund permitted
[illegible]	Such medical attendance as board deems reasonable, maximum $100; additional special treatment in permanent disability cases if compensation cost can be reduced
[illegible]	Such [illegible] medical and surgical treatment as will conserve the accident fund; and such medical and hospital treatment as the board may require
[illegible]	Reasonable service for 30 days in compensable injury cases; additional treatment if necessary to reduce disability; special provision for seamen; approved establishment benefit schemes permitted
[illegible]	Necessary service in compensable injury cases, transportation included; approved establishment benefit schemes permitted
[illegible]	No provision
[illegible]	No provision

Non-Resident Alien Dependents

With the exception of Quebec, all of the provinces grant compensation to non-resident alien dependents, but with certain qualifications and restrictions. In Alberta the law provides that it shall be conclusively presumed that a workman, two years after his arrival in Canada, has no non-resident dependents other than his parents—one year after his arrival in case the workman is not of British nationality. In British Columbia non-resident alien dependents are entitled to compensation, but the board may award such lesser sum as will, according to the conditions and cost of living in the place of residence of such dependents, maintain them in a like degree of comfort as dependents of the same class residing in Canada and receiving the full amount of compensation would enjoy. In the other five provinces (Manitoba, New Brunswick, Nova Scotia, Ontario and Yukon) a non-resident alien dependent shall not be entitled to compensation unless by the law of the country in which he resides the dependents of a workman to whom an accident happens in such country if resident in Canada would be entitled to compensation. Moreover, the amount of compensation shall not be greater than that granted under the foreign law. Furthermore, in Manitoba and Ontario non-resident enemy aliens are excluded entirely from the benefits of the Act. Ontario also denies compensation to a resident of a country "voluntarily withdrawn from alliance with the British Empire during the Great War, or of a country in default of establishing peaceful and harmonious relations with the British Empire." The Quebec law does not grant compensation to non-resident alien dependents.

Administration

In all of the provinces except Quebec and Yukon, which have the court type of law, the administration of the compensation Acts is under workmen's compensation boards. The members of the boards are appointed by the lieutenant governor, and hold office during good behavior, except that in British Columbia the term of office is ten years. In four* of the provinces, however, the commissioners are subject to compulsory retirement at the age of seventy-five. Each board is authorized to appoint its officers and employees and to fix their salaries. The term of office of such employees is subject to the pleasure of the board.

The boards have final and exclusive jurisdiction over all compensation matters, no appeal to the courts being permitted except in New Brunswick and Nova Scotia. In these two provinces appeal may be had to the supreme court upon questions of law, but only with the permission of the judge of said court.

Accident Prevention

Of the six Canadian provinces having administrative compensation boards, the British Columbia board is the only one which has statutory jurisdiction over accident prevention work. In all of the other provinces this function is performed by other State or private agencies. The Alberta and Manitoba compensation laws made no provision for accident prevention at all, while the laws of New Brunswick, Nova Scotia and Ontario authorize employers' associations to undertake this work, with a rather loose supervision by the workmen's compensation board.

---

*Manitoba, New Brunswick, Nova Scotia and Ontario.

COLONIAL LOAN PLANS CAPITAL REDUCTION

Redemption of Half Capital Stock Would Have Effect of Doubling Proportion of Reserve to Paid-Up Capital

SHAREHOLDERS of the Colonial Investment and Loan Co. have been advised that a special general meeting will be held on September 14 for the purpose of considering a by-law for the redemption of one-half the company's capital stock. The capitalization of the company at present consists of permanent preference shares which have been subscribed to the extent of $2,455,010, on which $2,438,421 has been paid up, and of ordinary permanent stock subscribed to the amount of $100,000, and on which $20,000 is paid up. The reserves total $400,000, and the total assets at the end of 1919 were $5,416,569.

The by-law provides for the redemption at par of one-half of the permanent preference shares, power to do this having been included in the company's charter. Such redemption would take place on October 1, 1920, by redeeming one-half the shares held by each stockholder, and where an odd amount is held, one share would be excluded in calculating the amount to be redeemed. Fifteen days' notice of intention to redeem is to be given, unpaid balances are to be paid up, and dividends upon the shares to be redeemed are to cease on September 30th.

To Strengthen Company's Reserve

This proposal accounts for the activity which has taken place in the shares of the company on the Toronto exchange during the past two weeks, and for the advance in price from around 67 to 74. The purpose of the by-law, said J. H. Mitchell, secretary of the company, in an interview with *The Monetary Times*, is to strengthen the company's position by increasing the proportion of reserve to paid-up capital and thereby ensure the continuation of the 6 per cent. dividend. There are, he pointed out, no deposits from the public, and the $123,[illegible] of debentures remaining outstanding at the end of 1919, mainly in England, have since been paid off. The liquid assets will also enable it to meet the cash outlay of about $1,200,000, which would be required by the redemption, he said, and among these were over $1,600,000 of Anglo-French bonds due October this year.

The Colonial Investment and Loan Co. was organized about twenty years ago, and the shareholders have received dividends of 6 per cent., with the exception of the early years and a short time during the war. Although a proposal to acquire the controlling interest in the Imperial [illegible] was voted down by the shareholders last year, it [illegible] that the present plan will be approved, as the [illegible] will receive $100 cash for shares having a [illegible] around $70.

PUBLIC REGULATION NOW BEING TESTED

UPON the decision of the Board of Railway Commissioners for Canada, in three cases before it this summer, depends to a large degree the future of three of the important industries of this country. In one of these cases, the application of the railways for increased rates, the Board has just made a commendable decision, which should mean that the burden of the national system will fall less heavily upon the shoulders of the taxpayer, and that the railways as a whole will be in a position to render efficient service. Good service cannot now be expected at old rates. The other two cases are the applications of the Bell Telephone Company and of the express companies for higher rates.

It is not merely the future prosperity of these industries that is in the balance, but the question of ownership itself. Judging by past experience, however, both alternatives which are open to the Board would seem to lead inevitably to public ownership. The public is certainly in no mood to pay heavy rates for transportation and telephones in order that exceptional profits may be made by the companies, and a policy of too great liberality on the part of the Board towards the latter would result in a demand, which we would not [illegible] soon be put in force, that they be taken over by the government. Similarly, to refuse any increase in rates would mean, at present costs, that shareholders, and perhaps bondholders, would receive little or nothing, that new securities could not be sold, and, as a consequence, that needed extensions and improvements in the services could not be made. How quickly such a condition leads to government operation we have already witnessed in the case of the railways.

To enable the companies to continue to function successfully, and at the same time to convince the public that the maximum service is being rendered, is the exceedingly difficult task now resting upon the shoulders of the railway board. Government control of industry is newer in Canada, and it has not been entirely successful in the U.S. It seems to be a half-way point between corporation finance and public ownership. It has wavered between an over-friendliness towards the companies and a too great zeal on behalf of the public, according to the sentiment of the day and the views of the regulating officials. So great has been the ardor of restriction in recent years that there is scarcely a railroad or a public utility company on this continent which has been able to pay even a moderate dividend upon its stock, and in many cases bond interest is in default. The zenith of economic prosperity finds industrial and financial institutions making profits greater than ever before, and individuals receiving high and still increasing salaries and wages, while these services which are essential to industrial and private life are starved for lack of adequate revenue.

What is to be considered a fair profit in these cases? If the dividends of the most successful corporations are restricted to six or eight per cent., no investor in his senses would buy their securities at par at a time like the present, when the same rate can be secured on good bonds and mortgages. For the profits from successful enterprises must be sufficiently large to compensate for the failure of the others, and the investor will not buy stock unless the possibility of loss is counterbalanced by the possibility of a return substantially above the assured return from an investment in which his principal will be unquestionably safe. There is, moreover, always the chance that one of these services, no matter how essential it may seem now, will pass out of use as the result of a new invention or great change in economic life. The vast properties of a telephone company might be made valueless overnight by the general adoption of wireless telephony. That such a vast change is not unknown in actual history is instanced by the [illegible] canal system of the United States, built up in the early nineteenth century and supplanted in the latter half by the railways. These and other considerations must be taken into account in calculating a fair return upon an investment in shares of a railroad or public utility enterprise.

In estimating what rates would be fair, consideration must, of course, be given to [illegible] rather than to nominal capitalization. There is much merit in the proposal that the capitalization of the [illegible] National Railways should be written down to a reasonable basis. Having done this, it would then be necessary to see that earnings were sufficient to meet expenses.

WHAT WE MUST PAY THE UNITED STATES

SOME food for serious Canadian thought is found in a statement of foreign loans in the United States, compiled by the Guaranty Trust Company and published in the Federal Reserve Bulletin of July. This country is conspicuous in the list of foreign borrowers. This is, of course, to be expected, considering the geographical, industrial and financial relations between the two countries. But while it is a fine thing to enjoy good credit, there is such a thing as making too free a use of such credit. One country may obtain a strangle-hold upon another by finance alone, and, though it is not suggested that any political difficulties might arise by the predominance of United States capital in Canadian enterprise, yet the financial relations set up in this way must constitute one of the main factors in the development of this country.

The statement shows the amount of foreign loans in the United States outstanding as of July 1st, 1920, by classes of securities and by countries. Those made by Canada and Newfoundland compare with the totals as follows:—

	Total.	Can. and Newf.
Government	$ 1,555,744,000	$152,500,000
State and municipal	264,606,313	130,425,313
Railroad	264,416,265	121,328,500
Public utility	81,345,000	80,095,000
Industrial	55,899,500	39,899,500
Total	$ 2,222,011,078	$524,248,313
Cash advances and other charges against credits established by U. S. up to May 11th, 1920	9,598,855,000	....
Grand total	$11,820,866,078	$524,248,313

The immense total of cash advances are mostly to Great Britain, France, Italy, Belgium and Russia for purchases in the United States. Confining our attention to the bond issues, however, we find that Canadian loans comprise nearly one-fourth of the total. Again, leaving aside the government loans, which include the Anglo-French loan and the issues of United Kingdom notes, etc., we find that Canadian issues loom still larger in the total. They are one-half the state and municipals, nearly half the railroads, nearly all the public utilities and about three-fourths of the industrials.

The Canadian government loans were the issue of $75,000,000, made in March, 1916, and due 1921, 1926 and 1931, and another issue of $75,000,000, made in August, 1919. The states and municipals are made up chiefly of issues of the provinces and of such large municipal corporations as Greater Winnipeg Water District, Toronto Harbor Commission, Hamilton, London, Calgary, etc.

This total of $524,248,313, which does not include American subscriptions to Canadian domestic loans, holdings of stocks and other securities or direct investment in industry or property, means an annual interest charge of around $30,000,000. This is a considerable item in striking our annual balance with the United States, an item which must be offset by an excess of exports to that country. Our present imports are greatly in excess of our exports, indicating that the borrowing process is still under way.

UNIFORMITY IN INSURANCE LAW

UNIFORMITY in provincial insurance, in so far as [illegible] is possible, is desirable. Such uniformity can be obtained best through joint consideration on the part of the provincial superintendents and close co-operation between the superintendents and the companies. The third annual conference of provincial superintendents is to be held in Winnipeg, October 4th to 7th, and it is expected that subjects of the foremost importance will be discussed. The provinces will all be represented, and it is the desire that insurance companies be also represented. Particular importance is attached to this conference because of the recent reorganization of the Ontario department, which is now engaged in a comprehensive consolidation and revision of the Ontario Insurance Act, to be presented to a special committee of the legislature for consideration at its next session. This revision was recommended by the Hon. Justice Masten in his report on insurance in Ontario, and must deal with subjects which will be discussed at the conference.

The sessions will be open to the public, but only invited delegates are expected to take part in the discussions. A. E. Fisher, superintendent of insurance in Saskatchewan, Regina, is secretary of the conference. The range of subjects to be discussed included the following: Uniform forms of departmental return from insurance companies; insurance transacted in Canada by unlicensed foreign companies; taxation of insurance companies; a discussion of the model fire policy act, drafted by the commissioners on the uniformity of legislation, and consideration of draft forms of statutory conditions for automobile insurance and for accident and sickness insurance; the administration of the licensing system for insurance agents, brokers and adjusters; the forecasting of legislation governing solvency of fraternal societies; and a discussion of the subject of reciprocal fire insurance exchanges.

JUST EVERY-DAY EFFICIENCY

A WORD may lose its value by over-use. One which has been over-cultivated, to the loss of its real meaning, is "efficiency." Efficiency means the shortest and quickest way of doing a thing. It has a double value, a quadruple value, an unlimited value. It is not something to be reserved for comprehension of the elect. It is not a thing to be called scientific management and used as a bugaboo. It is, on the contrary, nothing but common-sense applied to every-day affairs. The doing of a thing in a better, quicker, and more economical way than at present, the doing of a thing in the right way, the easy, the adept, the direct and natural way, rather than in the careless, slovenly, wrong, or round-about way. Efficiency is the duty not alone of every man to himself, but every man to his neighbor. It is a slogan that means prosperity, and a watchword of honest effort and well-directed energy.

The one comprehensive word covering efficiency in its fullest and broadest sense is "results," not the initial result but the final result. The unit measure is but the starting point, but the combination of units brings about a complete and finished article of efficiency. Figures having but a relative value should always be measured by results. The unit having but an initial value should be combined with other units, and compressed into a complete and finished whole.

This is expressed in the necessity for each unit of efficiency standing elbow to elbow, and shoulder to shoulder, to the next unit of efficiency, thereby making a compact and invincible whole proof against the onslaught of competitors, and whatever organization they must have at variance with [illegible]

The recent drop in the price of Victory bonds has increased the determination of owners to hold rather than sell at a loss. At the same time buyers are not encouraged, because the bottom may not yet be reached.

[illegible] are objecting to the rate increase by the Board of Railway Commissioners. This increase, combined with previous increases, will mean an increase of about [illegible] per cent. since 1914. Will the farmers [illegible] that this is out of proportion to [illegible] averaging 100 per cent., and [illegible] ranging from 50 per cent. to 300

FOREIGN BUSINESS

Much attention is being directed at the present time to export business. This Bank has a number of foreign branches as well as close working arrangements with banks of the highest standing in many other countries which enable it to offer special facilities in the financing of trade with foreign points.

PERSONAL NOTES

[illegible] M. [illegible], manager of the Victoria office of the Great West Permanent Loan Company, was in Toronto this week.

W. N. McIlwraith, a member of Wood, Gundy and Company, Toronto bond dealers, sailed for England this week, where he will be associated with the company's London office for a time.

Hon. Rodolph Lemieux, formerly postmaster-general of Canada, and now member of the House of Commons for Maissoneuve and Gaspe, Que., and Hon. E. M. Macdonald, of Picton, N.S., were elected directors of the National Life Assurance Company at a meeting of the Board on September 8th.

Lyman Root, who was recently elected president of the Canadian Fire Underwriters' Association, is one of the foremost figures in the Canadian fire insurance field. He was born in Westfield, Mass., in 1869, and held various positions with the Hartford Fire in Hartford, Conn., from 1889 to 1905. In the latter year he came to Canada as the company's inspector for the Dominion. After a time he formed a partnership with D. C. Edwards, operating an insurance agency for two years in Sault Ste. Marie, Ont. Then in 1914 he became assistant manager of the Sun Fire Insurance Company, and in 1916 was appointed manager. Mr Root is also president and managing director of the Imperial Underwriters' Corporation of Canada.

G. S. Ralston, who was formerly associated with the Canada Bond Corporation, Toronto, has joined the investment house of Housser, Wood and Company, Toronto. Previous to his association with the Canada Bond Corporation, Mr. Ralston served for some time with the Canadian forces overseas.

John J. Henry, who has been with A. E. Dyment and Company, stock brokers, Toronto, for several years as manager, has been appointed assistant manager for Ontario, with offices in Toronto, for the Educational Motion Picture Bureau, Inc., a Massachusetts corporation, with headquarters in Boston.

A. E. D. Holden, who has been serving as chief accountant with the Canadian Trade Commission at Ottawa for some time past, has been appointed secretary-treasurer of the Hew R. Wood Company, Montreal bond dealers. In his early endeavors in the bond business, Mr. Holden was formerly associated with the Hew R. Wood Company.

J. P. Bell, general manager of the Bank of Hamilton, is at present touring the west for the purpose of inspecting the bank's branches there. He was at Winnipeg this week and while there conferred with F. E. Kilvert, western superintendent and manager of the Bank's Winnipeg branch, and Isaac Pitblado, K.C., who is the western member of the Board of directors.

GRAIN EXCHANGE PRESIDENT WELCOMES OPEN TRADING

Past Year Has Been an Eventful One in Grain Trading—Present Price Around $2.77 per Bushel

(Special to *The Monetary Times.*)

Winnipeg, September 9, 1920.

Wet weather in some parts of the west has delayed threshing operations this week. Threshing is now general all over the west and the yield and grade are quite satisfactory. The new wheat crop is moving marketward at a rate that will average well up to former years, although not so heavy as in the corresponding period of 1919, when the harvest was two weeks earlier.

Up to September 6th, 2,117 cars of wheat have been inspected in Winnipeg, as against 5,424 cars for the same period last year. On the basis of 1,225 bushels to the car, which is a fair average, there has already been marketed 2,593,325 bushels, all of which has been practically absorbed by western mills and very little has yet found its way to the head of the lakes.

The demand for the new wheat has been very keen, resulting in premiums of from 10 to 16 cents being paid over the October prices, and the farmers who have already sold their wheat have been securing about $2.77 per bushel on the basis of Fort William, which means that a sum of $7,183,510 has already passed into the farmers' hands for this year's wheat.

Grain Exchange Meeting

The annual meeting of the Winnipeg Grain Exchange was held to-day when the following officers were elected: President, Norman L. Leach, vice-president and general manager of the National Elevator Co.; vice-president, C. H. Leaman; secretary-treasurer, Dr. Robt. Magill; executive council, T. J. Anderson, W. R. Bawlf, E. S. Parker, T. Brody, J. E. Botterell, J. A. Richardson, D. C. Maclachlan, C. Tilt, A. K. Godfrey, A. Kelly, C. C. Fields.

The retiring president, John E. Botterell, who has held office during one of the most trying years of the exchange, and during whose term of office trading in wheat futures was again resumed after three years of closed markets, said, in part, in the course of his address: "The most important event that has taken place during the year affecting the grain trade was the reopening of the wheat market. After very mature consideration of the matter from every point of view, the government decided to restore free and open trading of wheat by the exchanges, and the market was opened on August 18. The government passed a bill which enables it at any time, should conditions render such a step necessary, to resume control and reappoint the Canadian wheat board.

"We, of course, in the trade, welcomed the opening of the markets, and we did so, not merely because our business had been affected by the long-continued method of handling of wheat, but also because we believe that all experience justifies our confidence that government trading is not as efficient and economical as private trading."

New Mortgage Company Formed

A charter has been asked and obtained in this province for a new mortgage and colonization company, which will have an authorized capital of $4,500,000. The moving spirit in connection with this matter is G. W. Prout, who was formerly in the bond business, and who is well-known through his activities in the matter of the provision of credit facilities to farmers. Mr. Prout's company will be known as the Com- [illegible] Co. It will list bonds for sale and will [illegible] with in the acquisition of land and in the [illegible] development of it. It also has power to [illegible] of his products. The other [illegible] directors are: A. W. Miller, [illegible] and A. C. Grant. Of the [illegible] capital $3,000,000 will be preferred [illegible] of no par value.

THE STERLING BANK

AUGUST WEATHER A BOON TO CANADA'S CROPS

Reports From All Parts of the Dominion Express Satisfaction Over Conditions—Vegetables and Grains in Excellent Condition—Fruits Light

SATISFACTION as to the condition of crops is expressed in reports to the Dominion Bureau of Statistics from various parts of the Dominion at the end of August. The following dispatches were received:—

Prince Edward Island.—Prolonged hot weather early in August ripened all cereals very quickly, reducing yields, but favorable for saving balance of hay. Sufficient beneficial rains fell throughout month for corn, roots and potatoes. Some blight has been reported on potatoes, but crop prospects are good. Large fruit looking well. Pastures fair.

Nova Scotia.—Kentville: Fine harvest weather during latter part of month. Fifty per cent. of grains now harvested in good condition. Yields are good of all cereals. Corn exceptionally good and root crop fair. Fall pastures are good. Potato blight in places with yield fair to good. Apple crop about one million barrels of good quality. Amherst: Hay-making well advanced. Crop 80 per cent. of average. Weather catchy. Roots, ensilage and potatoes good Grain ripening fast. Fruit light.

New Brunswick.—Fredericton: August weather favorable for crop growth and harvest. Moisture sprouted some grain in stook and started blight among potatoes. Haying about finished. Grain two-thirds cut, and will give high yield. From 30 to 40 per cent. of potatoes down blight. Apples light crop.

Quebec.—Ste. Anne de la Pocatiere: August has been warmer than July and cereals are ripening normally. Hay crop harvested in poor condition. This crop much deficient in the east. Twenty-five per cent. of cereals harvested. Potatoes give promise of a good crop, so will European plums. Lennoxville: Weather during month generally fair with exception of heavy rains from 13th to 15th and on the 22nd. More than half the grain crop already harvested. Yield very good. Corn crop fair. Potatoes are affected with rust. Swedes average crop. Vegetables good.

Wet Weather Caused Slight Delay

Ontario.—From the Ontario Department of Agriculture: Wet weather delayed harvesting. Oats and barley yield well with long straw. Spring wheat rather poor. Fall wheat moderate yield but grain plump and much of it overweight. Midsummer pastures good. Milk flow satisfactory. Second growth of clover, alfalfa, etc., good. Corn now growing prosperously. Potatoes and roots good.

Manitoba.—From the Manitoba Department of Agriculture: Grain cutting almost completed. Threshing over 50 per cent done in the south. Starting in the north. Considerable rust on late crops in portions of the Red River Valley, but many areas unaffected. August warm and very dry with little loss from frost damage. Crops vary from very heavy to very light. On the whole, wheat, oats and barley will give slightly above average yields. Excellent feed situation. Straw [illegible] somewhat [illegible]. Potatoes light. Morden: "We have experienced one of the hottest and driest summers that southern Manitoba has had." Despite this the wheat has yielding fair crops of No. 1 grade. [illegible]. Potatoes a light crop but of excellent quality. All sorts of garden products limited, with prices high. Pastures dead.

Saskatchewan.—From the Saskatchewan Department of Agriculture: Wheat cutting is practically completed. Threshing has started in many points. Rain generally in the past week delayed harvest operations for a few days. Preliminary average wheat yield for province estimated at 14 bushels per acre. Rosthern: Wheat cutting completed under favorable weather conditions, but threshing delayed by rain. Estimated wheat yield 20 bushels. Oats 50 per cent. cut, yield 40 bushels. Barley 90 per cent. cut, yield 30 bushels. No damage from hail or frost, but slight damage to late wheat from rust. Scott: No rain from 4th to 28th. Early sown crops matured rapidly, cutting commenced on the 23rd; 40 per cent. crop in stook at the end of month. Heavy rain last four days stopped harvesting operations. Three degrees of frost on the 20th injured tender vegetation and caught some late wheat.

Alberta.—Lethbridge: Weather conditions in August have been favorable for ripening and harvesting grain in southern Alberta. Seventy-five per cent. wheat now cut and good start made on coarse grains. As yet insufficient grain threshed to make reliable estimate of yield. The feed situation good and consequently demand for hay not strong.

Conditions at the Pacific

British Columbia.—From the British Columbia Department of Agriculture: Weather during August has been settled with the exception of the last few days of the month, when rains were prevalent in practically all sections of the province. Sixty per cent. of grain harvested and threshing is in progress at many points. Oats and wheat promise heavy yields. All root crops show great improvement and good yields are anticipated. Invermere: Crops are being harvested in good condition. Most of the grain is being cut. Alfalfa has made a good second growth. Corn and sunflowers are giving good yields. Potatoes and roots promise well. August has been exceptionally dry. Summerland: Apple and pear crop is sizing up well and is of excellent quality. Packing houses seem to anticipate an 80 per cent. crop, compared with last year. In this district hay crop not as heavy as average, but well harvested. Agassiz: Precipitation for August 1.67 inches. Excellent harvesting weather. Harvesting practically completed and about 25 per cent. threshing done. Yields below average. Pastures and roots require more moisture. Sidney, V.I.: Favorable weather for harvest. No damage done by rain. Threshing and straw baling active. Grain crops yielding well. Soil in good condition for ploughing. Orchard fruit, corn and roots developing satisfactorily.

TRADE WITH BRITISH WEST INDIES

A booklet on "The British West Indies and British Guiana," just issued by the Bank of Montreal, is a most timely publication in view of the new trade agreement between Canada and the West Indies now awaiting the ratification of the respective governments. The booklet gives a concise and interesting description of the salient features of the various colonies which are party to the agreement, including the physical characteristics, area, population and principal exports and imports. It shows that there are most promising markets awaiting development by enterprising Canadian merchants and industrial firms.

At the present time, it is stated, the British West Indies, British Guiana and British Honduras have a total population of over 2,000,000, with natural resources that have really only just begun to be developed. For instance, it is recently estimated that there are at least 20,000,000 acres of [illegible] in the British West Indies not yet beneficially occupied, whereas the area under cultivation is only one and a half million acres.

The opinion is expressed that under the system of preference granted by Canada and the United Kingdom, and with the growing world demand for such commodities as the West Indies produce, the development of these colonies will proceed apace. There is every prospect of considerable and [illegible] increase of the population. If all the fertile land there were brought under cultivation the colonies which are in the new agreement could easily support a population of between [illegible] and [illegible]. Even at the present time the interchange of natural products between Canada and the British West Indies is only a tithe of what it well might be, and progress will go with the larger preference [illegible] improved steamship services [illegible].

BANK BRANCH NOTES

Net Gain in Number of Branches in July was 32—Royal Bank Took Lead with Eight New Branches

ONLY one new branch is announced as being opened this week, this being a branch of the Canadian Bank of Commerce, at Hull, Que.

The Merchants Bank of Canada will open a branch at Humboldt, Sask. The building to be erected is to cost $30,000.

At an expenditure of $55,000, extensive alterations are to be made to the premises of the Royal Bank of Canada at the northeast corner of Robson and Granville Streets, Vancouver, B.C.

New Branches in July

Thirty-five branches of Canadian banks were opened in July, distributed among the various banks as follows: Montreal, 1; Nova Scotia, 3; Royal, 8; Commerce, 3; Dominion, 1; Nationale, 3; Merchants, 1; Provinciale, 4; Hochelaga, 3; Imperial, 5; Home, 3.

The following three branches were closed in July: Bon Accord, Alta., Merchants; Cedar Springs, Ont., Commerce; Hampton, Ont., Standard.

The following is a list of branches of Canadian banks which were opened in July and have not already been mentioned in *The Monetary Times*: Arrowhead, B.C., Imperial; Avening, Ont., Merchants; Bayfield, N.B., Nova Scotia; Bethany, Man., Home; Brownsburg, Que., Nova Scotia; Cap Chat, Que., Nationale; Carlton, Sask., Imperial; Connaught Sta., Ont., Imperial; Fabre, Que., Hochelaga; Friedenstal, Alta., Imperial; Montreal, Que., Royal; Nevis, Alta., Royal; Notre Dame de Charny, Que., Royal; Papineauville, Que., Provinciale; Piopolis, Que., Provinciale; Plamondon, Alta., Hochelaga; Riviere la Madeleine, Que., Nationale; St. Cecile de Whitton, Que., Provinciale; St. Denis sur Richelieu, Que., Hochelaga; Ville St. Leonard, Que., Nationale; Virgil, Ont., Imperial; Wallaceburg, Ont., Royal; Wickham West, Que., Provinciale.

FUTURE OF RAILWAYS NOW ASSURED

Rate Increases of Thirty-five and Forty Per Cent. Authorized, to Take Effect on Monday

(Special to *The Monetary Times.*)

Ottawa, September 9, 1920.

SUBSTANTIAL increases in railway rates were authorized on Wednesday by the Board of Railway Commissioners for Canada, to go into effect on September 13. Eastern freight rates may be raised 40 per cent., and western freight rates 35 per cent. After December 31 the increase in the freight rate in eastern Canada is reduced from 40 to 35 per cent., and in western Canada from 35 to 30 per cent.

Simultaneously with the increase in freight rates, passenger rates all over the country are advanced 20 per cent., so long as they do not exceed four cents a mile. This increase is effective only to December 31. After that date (December 31) and for the six-months' period, from January 1, 1921, to July 1, 1921, a 10 per cent. increase is authorized. Following July 1, passenger rates return to those in force at the present time.

The judgment authorizes increases of 50 per cent. in sleeping and parlor car rates, and an increase of 20 per cent. in the rate on excess baggage. No increase is authorized in the rates on milk. Authorization is given for an increase in freight on coal from 10 to 20 cents a ton.

Much Evidence Submitted

A summary of the judgment, which has been handed down by the railway commission in the application of all Canadian railways for increased rates, was given out by the chief commissioner, Hon. F. Carvell. The chief commissioner stated that during the exhaustive hearing which opened on August 10, and continued for nearly two weeks, a tremendous mass of documentary evidence had been submitted. The work of going through this evidence had been a very large one, and it was only by the greatest effort on the part of the commissioners that a judgment was arrived at so soon.

Authorization is given for an increase in the freight rate on coal from 10 to 20 cents per ton (flat rate), according to distance. When the freight rate is under eighty cents per ton an increase of 20 cents is allowed; when it is over 80 cents and under $1.50 the increase authorized is 15 cents, and when the rate is over $1.50 the increase will be 20 cents per ton. The rate on cordwood, slabs, mill refuse, etc., for fuel purposes, is increased 10 per cent.

In his judgment, Hon. F. B. Carvell, chairman of the board, says: "I realize that these rates will be a substantial burden upon the people of Canada, but it was admitted by all parties at the hearing that the cost of everything entering into the operation and maintenance of railways has increased more than 100 per cent. during the past four years, while the railway companies have been granted increases, in what are known as the 15 per cent. and 25 per cent. cases, amounting on an average to not more than 35 per cent."

The chairman estimates that from the increased rates granted, the Canadian Pacific Railway will collect $66,720,000 more from the people of Canada than it would have done if the present rates remained in effect, or a total of $270,-[illegible],000. He estimates that the expenses of the Canadian Pacific for 1921 on the present basis of costs would be $217,-[illegible],000, including $21,000,000 for labor increases, on account of the [illegible] wage award adopted by Canadian roads, retroactive to May 1; $10,000,000 more for increased cost of [illegible] than [illegible],000,000 for materials, and more than [illegible] to bring the maintenance of way up to pre-war standard. With all these allowances, the C.P.R. will have a [illegible] of [illegible],500 after paying $22,127,000 for dividends, [illegible] per cent. income tax, and $11,350,000 [illegible] charges and pension fund. That $15,064,500 surplus, the judgment acknowledges, "is probably more than [illegible] should be entitled to, and probably a little less than the actual surplus should be for the year's operation, [illegible] the maintenance-of-way labor [illegible]

DIVIDEND No. 97

Notice is hereby given that a Dividend of Three Per Cent. has been declared upon the Paid-up Capital Stock of this Corporation for the quarter ending September 30th, 1920, being at the rate of

TWELVE PER CENT. PER ANNUM,

and that the same will be payable on and after Friday, the 1st day of October, 1920.

The Transfer Books of the Corporation will be closed from Monday, September 20th, until Thursday, September 30th, both days inclusive.

By Order of the Board of Directors.

A. D. LANGMUIR,
General Manager.

Toronto, August 31st, 1920.

Income Insurance

This Form Offers Maximum of Protection and Security Removes all Doubt as to Necessities of Dependents—Interest on Cash Value of Policy is Supplemented by Repayments of Principal—Represents Effort on Part of Company to Meet Needs of Policy-holder

By E. J. L'ESPERANCE
Imperial Life Assurance Company, Montreal

IT is scarcely necessary to define what income assurance is, because the tremendous advance in sales that has taken place in the last three or four years is indicative that salesmen know pretty well what it is. If there remain, however, a few not fully informed as to what income assurance is and what is meant by the term, let me state that it is just the same as any other assurance, built up in the same way, carrying the same cash values as paid up assurance. The sole difference is in the method of payment. This difference in the method of payment by the company is really the big thing in income assurance. If every widow invested her money wisely and well, and if over a period of time, it guaranteed her an income for her life, she would have something that would be somewhat comparable to income assurance in its results.

In other words, the principal sum that is left at the death of the deceased is capitalized at a certain rate of interest, which, plus part of the principal, is extended over the beneficiary's entire life—that is, where the plan is a continuous income for the beneficiary. The calculations on which income assurance is based includes both lives, the life of the insured and the life of the beneficiary. The younger the beneficiary, the longer her probability of life, and hence the more money the company will pay.

Principal Gradually Repaid

Income assurance guarantees a certain rate of interest to the beneficiary for a certain length of time. Through the amortization of the principal this revenue is increased to the amount shown on the face of the contract.

A beneficiary, age 35, would have a minimum amount of $18,110, which is always in force, on our books in the event of the assured's demise. However, the company have considerably in excess of this, as the sum must be large enough to continue payments according to her expectancy. At age 35 this amounts to the sum of $25,432 in hand out of which to pay instalments, and which earns interest. The first month the company would pay the beneficiary $100, which would be taken out of capital, leaving a sum in our possession amounting to $25,332. The second month the sum of $100 would be made up somewhat as follows: The company guaranteeing 3 per cent. per annum on the sum in our possession, we find that one twelfth of 3 per cent., or one month's interest, is $63.58. We find, then, that we need an amount of $36.12 out of principal. These two amounts combined form the guaranteed amount of $100 to the beneficiary. However, she shares in the dividends which the company earns. This year the monthly excess dividends amount to $1.12, which mean an increase in the principal sum of some 51 per cent., or $1.51. This gives you an idea as to how the sum per month is arrived at, and also explains how and why the monthly amount is slightly reduced each month. This is due to a slow consumption of principal.

Provides for Needy Period

The working out of a plan of this kind is ideal for a man who is unable by lump sum payment to leave principal enough so that the revenue therefrom will be sufficient to keep his dependents and give them the amount they should have. In a monthly income plan there is a gradual consumption of principal which swells the revenue and makes it considerably larger than from interest alone. Some men say, "I do not like a plan which makes for the consumption of principal." This fact must be borne in mind that most men —by far the majority—do not buy insurance to leave a great amount of cash to their children, but rather to make certain that their educational period shall be successfully passed and that the widow shall have sufficient for her needs throughout her life.

Through the amortization of capital through the income plan this is exactly what happens. The income is swelled to the greatest possible amount, and, while the capital is consumed, a sum is guaranteed throughout the entire life of the widow to make certain as to what she shall receive. As most plans sold are for the life income of the widow and guaranteed for twenty years, certainly the present-day monthly income policy covers every possibility, every need of the ordinary man. In the event of the death of his widow before having received the income for twenty years her children receive it. If she lives beyond the twenty years she receives it as long as she lives.

Consider the case of a man age 35 years and his wife of the same age. Suppose that she dies after having received the income for five years, his dependents are guaranteed this sum for fifteen years. Even supposing there is a small baby in the family of one or two years old, this will enable the child to receive the benefits, directly or indirectly, until he is twenty one years of age, when the educational period will be passed. Furthermore, if she lives, the widow continues to draw the income for life.

Gives Maximum Protection

For the young married man this type of contract, which is a decreasing type of insurance, is ideal. In the earlier years, before he has amassed any amount of this world's goods, he needs for his wife and family all the protection he can get. This type of contract gives him the maximum. For instance, assuming that he is age 30 and his wife the same, the amount of money carried on the company's books in the event of his death at this age is $26,590. At 40, due to the fact that the beneficiary's expectancy is less, this has been reduced to $24,220. At 50 the amount is now $21,679, which will give you an idea of its decrease. However, at 50 the amount is still over $18,110, and is never less than $18,110, or the commuted value.

Income is Secure

The monthly income plan, wherein the widow shares in the company's profits, to my mind, offers the maximum of protection to the widow from every viewpoint. It gives the maximum revenue with security. We do not hear of very many life assurance companies failing; in fact, I believe it is the boast of Canada that never has a policyholder lost a dollar in any Canadian company. It gives the widow a guaranteed amount upon which she may count, and it gives it to her with a certainty that she shall have it as long as she lives.

The income plan means that as soon as the assured's name is taken off the company's pay-roll his widow's name goes on instead, and the mail-man brings a cheque to her for a certain guaranteed definite amount each month. It means that the beneficiary, who at this time has not yet recovered from the blow and is considerably upset, does not have to worry as to whether her tenants will pay their rent. She does not have to worry about the oil wells having gone

dry, or the shipbuilding company having failed, or the thousand and one things that occur in business and with investments. She is absolutely certain, in so far as man can guarantee it, that she will receive an income of a certain amount as long as she lives.

It gives her a peace of mind and a feeling of security in knowing just how far she may go in the matter of her expenses. There is no ambiguity in connection with a monthly income policy; there is no indefiniteness. It comes to the beneficiary in plain terms of $25, $50 or $100, or whatever amount it is, per month, and will come to her as long as she lives. There is no chance of misunderstanding. She is not misled through thinking that such-and-such an amount of money will produce so much revenue, that she will have no end of it to spend, and immediately begin spending it without its having first been produced. There is no mistaking and making that common error of to-day of considering capital or principal as income—an error which she would be too apt to commit. It means to her a continuation, perhaps on a reduced scale, of living as she has always lived, with a certain amount of money coming in regularly. It enables her to plan thoroughly and carefully as to the disposal of this income because of its fixed amount and because of its frequent appearance. It gives her a month-to-month basis of living rather than a year-to-year one, which would not be familiar to her.

Dependent Knows Her Position Exactly

It enables an adjustment to be made immediately after the death of the assured to the proper basis, and one which can be easily understood, figured on and arranged for. It does away with all perplexing problems as to what to do with this or that security, as to whether this piece of property should be sold because of its being non-paying. True, husband had the idea of selling it, but he was waiting for a good price. It does away with the embarrassing situation as to whether she may continue to live on the same scale as heretofore, and her believing (through hope) that the estate which he has left will be sufficient for her to do so. In other words, it gives her a clear insight as to the future, and she does not fool herself.

How many thousands of widows are going to meet the same vexing situation in the future through their husbands not having made arrangements for the disposal of the principal and providing proper payment of revenue to his dependents? How many are going to wonder what they will do with the money? How many are going to take bad advice—foolish advice? How many are going to lose their money through not knowing? How many through over confidence in themselves? How many anxious hours are the widows going to have in the future, wondering what to do with this money, that they may get the maximum revenue with maximum security? How many are going to find, when the breadwinner has passed away, that $20,000 of assurance which husband has left, and which sounded so large to them, is only in terms of income $100 a month? This could have been obviated had husband considered his insurance in terms of income. He would have bought more. This same $20,000 of assurance in an income contract including excess dividends, would mean, in round figures, about $150 a month to the beneficiary for a long term of years. A beneficiary, [illegible], in the second monthly payment would have an increase over the guaranteed amount of over 51 per cent., and even in the twenty-first year, over 26 per cent. Figure it out for yourself, and you will find that an income plan gives a widow more revenue, with a certainty of having it. It is a more ideal method of payment than any other plan of assurance that any company writes.

Attitude of the Company

The insurance company has nothing to gain through [illegible] monthly income. I say, nothing to gain except possibly two things. We know that the present-day insurance company officials are a fine, clean lot of men and have the welfare of the policyholder at heart; they want to see maximum results given to the policyholders. In fact, between you and me, as an insurance salesman, they want to give results so badly that the insurance salesman's commissions are the only thing that have not increased, as has everything else, within the last ten or twenty years. I think this is due entirely to the fact that they are doing their best for the policyholder. In the monthly income plan they derive the satisfaction of knowing that maximum results are being given, and they derive another benefit as well. When the widow has started to receive her cheque, on which is printed the name of the company, the spending of this for the necessities of life at the grocer's, the butcher's, the clothing store, etc., makes a splendid medium of publicity for the company. The grocer knows that Madam Smith comes in each month with her cheque, and he knows that she will have it. It gives him a better idea of insurance, because it shows its permanency, and therein is the whole secret, after all, of the income plan—its permanency, its security.

BRITISH COLUMBIA WORKMEN'S COMPENSATION

During the first six months of 1920 10,285 accident cases were dealt with by the British Columbia Workmen's Compensation Board, E. S. H. Winn, chairman, stated a few days ago. Of this number of accidents, 73 proved fatal. The greatest toll was in connection with the lumber industry. Out of the total number of deaths 34 were caused through the various lumbering activities, or an equal of 46 per cent. Accidents in connection with lumbering totalled 2,231. Construction work proved the second most hazardous. In connection with this work there were 770 time-loss accidents, of which 12 proved fatal. Deaths and accidents attributed to other industries were as follows: Coal mining, 542 accidents, 6 deaths; railroads, 468 accidents, 9 deaths; iron and steel industry, 3 deaths; Dominion government service, 3 deaths; provincial government service, 2 deaths; fishing industry, 2 deaths; electrical plants, 1 death; mining, 1 death.

STREET RAILWAY FARES GOING UP

"Municipal ownership," says the *Winnipeg Electric Public Service News* of August 16, "so often referred to as the panacea for ills afflicting privately-owned tramways, is receiving a severe mauling at the hands of 'hard experience' in the west.

"First Seattle adopted a ten-cent fare, when twelve months previously they had denied a private company, then running the street railway, to raise fares over the nickel stage. Next in the dime column came Calgary, and last week Regina succumbed and passed over to the ten-cent stage. Incidently Brandon, during the fair week, charged a ten-cent fare.

"In Saskatoon the city council there is face to face with a deficit of $40,000 for the past year's operation of its street railway. They have had seven-cent fare there for some time, and while this added to revenues, yet operating costs have increased in greater ratio. Reduced service has been tried in the endeavor to make ends meet, but has caused more dissatisfaction than it was worth.

"The history of the street railway experiences in these 'municipally-owned' cities is interesting. Raises in fares have been more rapid, and more steep, on municipal railways than on privately-owned, in spite of the fact that the latter are saddled with pavement charges, franchise taxes, and other burdens which are not chargeable to the car riders when the road passes over to the city. There is one commendable feature about municipal ownership of street railways, as shown by the experiences of these western lines, and that is as soon as revenues become inadequate, fares are raised by the simple expedient of introducing a resolution in council and passing same. Most privately-owned companies, heir to the same ills as afflict the municipal ones, have to go through a period of 'corporation baiting' and legal fights resulting in the expenditure of thousands of dollars. This money has to be paid out of car fares, and makes a [illegible] the necessity of the private company [illegible] for a further increase."

CHANGING CONDITIONS

August Bond Sales Large Despite Lower Prices

Volume of Provincial Financing In August Heavy, But Not as Great as in Previous Months—Municipal Transactions Increased Notwithstanding Lower Prices—Two Pulp and Paper Issues

DEAR money and the vacation season are not reflected to any great extent in the volume of new provincial and municipal financing in August, the total bond sales for that month being well up to the figures of previous periods this year. There was not very much activity in the industrial field, only two corporations floating loans, while no railroad issues came on the market. The following is a summary of last month's transaction in all fields, with comparisons, according to *The Monetary Times'* record:—

	August, 1920.	August, 1919.	July, 1920.
Provincial	$10,000,000	$3,500,000	$15,800,000
Municipal	3,404,644	1,321,124	2,755,733
Corporation	3,400,000	1,750,000	500,000
	$16,804,644	$6,571,124	$19,055,733

The large increase over 1919 is due to the fact that in August a year ago bond selling organizations were making preparations for the approaching Victory loan, and as a result the greater part of other financing was suspended temporarily. Provincial bond sales last month showed a reduction as compared with the previous period, while on the other hand the total of municipal and corporation transactions increased.

Municipal Sales

Municipalities are apparently adapting themselves to the changed conditions, and are paying the prices demanded by the market. In a few cases last month bids were rejected, the municipalities being under the impression that they could get a better price for their securities at a later date. It is not thought, however, that they will benefit very much by

their decision if they need funds this year. Classified by provinces, municipal bond sales in August were as follows:—

Ontario	$1,643,519
Quebec	650,000
Saskatchewan	385,495
New Brunswick	300,000
Manitoba	150,000
British Columbia	168,230
Alberta	5,400
Prince Edward Island	75,000
Nova Scotia	27,000
Total	$3,404,644

Pulp and Paper Bonds Popular

This year, to date, pulp and paper bonds have been put on the market to the extent of more than $12,000,000, including the two issues made last month, or approximately 50 per cent., of the total of industrial loans floated this year. Pulp and paper securitoes are at present very popular, and have been for some time past, and the issues made this year were quickly taken up, with the exception of the latter two, which were only made recently, and have, therefore, not had time to be absorbed. A large amount of this class of bonds is still to come on the market this year, judging from recent developments.

FIRE LOSSES STILL AHEAD OF LAST YEAR

August Total Was $1,857,800, Compared with $1,374,195 in August, 1919—Moncton, N.B., St. Tite, Que., Carp, Ont., and Morinville, Alta., were Chief Losers

FIRE losses in Canada amounted to $1,857,800 in August, compared with $1,374,195 in the same month last year, according to *The Monetary Times'* estimate. The totals for the first eight months of 1920 and of 1919 are $16,266,913 and $15,556,821, respectively, indicating that this year's figure will be ahead of that for last year. The August loss is made up as follows:—

Fires exceeding $10,000	$1,272,000
Small fires reported	85,000
Estimate of unreported fires	500,000
	$1,857,800

The Monetary Times' record of the past four years shows the following monthly losses:—

Month.	1917.	1918.	1919.	1920.
January	$ 1,918,660	$ 2,688,556	$ 3,915,290	$ 2,637,850
February	2,009,95[illegible]	2,215,762	1,091,834	1,895,57[illegible]
March	2,050,650	1,682,286	2,154,095	1,79[illegible],200
April	1,514,714	3,240,187	1,080,070	[illegible],229,000
May	1,103,110	3,770,014	1,785,190	2,901,819
June	1,184,627	3,080,98[illegible]	3,[illegible]77,750	1,121,219
July	1,101,734	3,269,684	1,118,377	1,420,850
August	1,[illegible]40,188	5,110,115	1,374,195	1,857,800
September	1,301,700	917,286	1,910,272	
October	704,605	6,119,145	1,023,288	
November	979,019	1,04[illegible],[illegible]80	2,339,870	
December	5,141,100	1,7[illegible],917	2,04[illegible],196	
Totals	$20,080,085	$31,815,844	$2[illegible],207,647	$16,266,913

List of Large Fires

The following is a list of fires in which the loss was $10,000 or over:

Quebec, Que., Aug. 1, garage, $10,000.
Carp, Ont., Aug. 1, business block, $100,000.
Revelstoke, B.C., Aug. 4, bakery, $10,000.
Morinville, Alta., Aug. 7, business section, $10[illegible].
Nanaimo, B.C., Aug. 8, lumber mill, $85,000.
Chatham, N.B., Aug. 9, business block, $25,000.
Vancouver, B.C., Aug. 11, police barracks, $25,000.
St. John, N.B., Aug. 12, grist mill, $10,000.
Westmount, Que., Aug 14, apartment house, $10,000.
South Vancouver, B.C., Aug. 16, shingle mills, $20,000.
St. Tite, Que., Aug. 19, factory, $200,000.
Marmora, Ont., Aug. 20, building, $25,000.
Moncton, N.B., Aug. 24, Brunswick Hotel, $400,000.
Simcoe, Ont., Aug. 25, storehouse, $20,000.
The Pas Man., Aug. 25, trading posts, $35,000.
Chilliwack, B.C., business section, $60,000.
Port Moody, B.C., Aug. 27, shingle company, $75,000.
Chateau Richer, Que., Aug. 29, bakery and six houses, $12,000.
Belleville, Ont., Aug. 30, warehouse, $15,000.
Brigden, Ont., Aug 30, implement building, $10,000.
Montreal, Que., Aug. 30, building, $25,000.

Analysis of Causes

Among the causes reported were: Sparks, 3; oil lamp, 1; electrical storms, 7; defective wiring, 1; bush fires, 6; incendiarism, 1; matches, 1; cigarette butt, 1; electric iron, 1.

The following structures were destroyed or damaged last month: Residences, 39; office buildings, 13; factories, 2; barns, 17; mills, 4; stores, 12; garages, 3; business section of towns, 4; banks, 1; billiard parlors, 1; barracks, 1; schools, 1; lock works, 1; apartments, 1; hotels, 1; bakery, 1.

Deaths from Fire

Fourteen deaths during the month were directly due to fires, the following being the circumstances:—

Montreal, Que., Aug. 10, clothing caught fire	1
Regina, Sask., Aug. 12, in burning house	1
Montreal, Que., Aug. 16, playing with matches	1
Barrie, Ont., Aug. 17, explosion	1
Vancouver, B.C., Aug. 18, forest fires	2
Lethbridge, Alta., Aug. 19, explosion	1
Lindsay, Ont., Aug. 20, explosion	1
Oshawa, Ont., Aug. 24, explosion	1
Winnipeg, Man., Aug. 30, bush fires	2
Mulvihill, Man., forest fires	3
	14

Comparison of Deaths

The record of deaths from fire has been as follows:—

Month.	1913.	1914.	1915.	1916.	1917.	1918.	1919.	1920.

DOMINION TRUST SUES ROYAL BANK

In the British Columbia Supreme Court on September [illegible], suit was commenced in which the liquidator of the Dominion Trust Co. is suing the Royal Bank for the return of [illegible] of over $1,300,000, the market value [illegible] between $200,000 and $300,000. All [illegible] securities is also being asked for. The [illegible] the Dominion Trust had no [illegible] securities for loans and that the bank had no [illegible] retain them.

To the Shareholders
of
International Petroleum Company, Limited

NOTICE is hereby given that a company has been incorporated under the laws of the Dominion of Canada under the name of International Petroleum Company, Limited, herein referred to as the New Company, and that an arrangement has been made whereby the New Company will issue to the Preference shareholders of the International Petroleum Company, Limited, (Old Company), one Preference share of $5.00 par value fully paid up and non-assessable and one share without nominal or par value of its Common stock fully paid up and non-assessable in exchange for each Preference share of the Old Company, *and to the Common shareholders of the Old Company two shares without nominal or par value of its Common stock fully paid up and non-assessable in exchange for each Common Share of the Old Company.*

The New Company proposes to issue 1,804,534 shares without nominal or par value fully paid up and non-assessable of the New Company in exchange for 1,575,000 shares, (being the whole of the outstanding stock), of the Tropical Oil Company, a company incorporated under the laws of the State of Delaware and holding concessions from the Government of the United States of Columbia. The delivery to the New Company of 90% of the outstanding stock of the Tropical Oil Company has been assured and in the event of the whole of such outstanding stock not being délivered then a pro rata reduction will be made in the number of shares in the New Company to be exchanged for the shares of the Tropical Oil Company delivered to it.

Holders of Bearer Share Warrants who surrender their warrants to the International Petroleum Company, Limited, (New Company) at 56 Church Street, Toronto, Canada, or to the Farmers' Loan & Trust Company, 16-22 William Street, New York City, U.S.A., between the 15th September, 1920 and the 30th September, 1920, inclusive *will receive in exchange therefor Bearer Share Warrants on the basis of two shares of the New Company for each share of the Old Company surrendered*, in accordance with the terms aforesaid.

No Warrants for "rights" will be issued and shareholders who fail to exchange their old shares for the new shares within the time limit and in the manner aforesaid will subject these rights to forfeiture.

The books of the Company will be closed from the 10th day of September, 1920, to the 30th day of September, 1920, inclusive, and no Bearer Share Warrants will be split during that period.

Holders of Bearer Share Warrants are recommended to send their Warrants by registered mail insured as the Company is not responsible for Share Warrants lost in transit and duplicate Share Warrants cannot be issued.

By Order of the Board,

J. R. CLARKE,

Secretary.

56 Church Street,
Toronto, Canada.
23rd August, 1920.

Financing Wheat Crop By Use of Credit

Extraordinary Demand for Accommodation in Last Five Months of Year—Domestic Resources must now Handle Situation — Result is General Tightening of Credit for Commercial Purposes

By A. B. BARKER

As usual, at this time of the year, there has been a steady curtailment of credit throughout the country in preparation for the heavy demands which the harvesting and marketing of the grain crops will entail this fall and winter. As usual too, this curtailment has been felt most keenly by speculators who must of necessity depend on borrowed money to finance their commitments. The pressure has been somewhat greater this year owing to the falling value of the dollar, as compared with other commodities. According to the index numbers compiled by the department of labor, the value of the dollar is about 40 cents as compared with 1913, and it can therefore do that much less work.

As compared with other commodities values have not materially altered in recent years. A suit of clothes will exchange for about the same amount of bacon or wheat as before the war. To measure values, however, we use one commodity—money—and when this commodity shrinks the amount required to carry out any mercantile transaction is increased accordingly.

Dealing in Credit

Trade is carried on by the use of credit, and like other commodities is measured by money. Credit is produced by trade and is handled by dealers in credit—the banks. These do not manufacture credit in the sense of creating it, except to a very moderate extent; they merely collect it from their depositors and make it available. They manufacture it in the sense that they give it a realizable value. They turn an unknown credit into a known credit and so give it a wider circulation and use. John Smith may be a well known man in his own community, and in local dealings his standing unquestioned. A hundred miles away, however, no one has heard of him. Strangers cannot deal with each other except on a cash basis. Through the medium of the banking systems of this and other countries this credit is collected and organized, and can be sent where it is most in request.

Deposits at Base of Credit

The resources of the banks from which their supplies of credit are derived are their deposits, and the extent to which deposits can be attracted depend upon the savings of the community, and the confidence of the depositing public that the funds deposited will be available to the depositors when wanted. If everyone wanted his money at the same time no bank could exist, and trade as we understand it would be impossible. Experience has shown that only a certain percentage will be required from day to day ordinarily, and by retaining sufficient cash to honor these demands, with a margin in case of emergencies, the fund derived from these deposits can be utilized to make advances to farmers, traders, and manufacturers in the regular course of their business.

In the United States banks are compelled by law to carry cash reserves to the extent of 15 to 25 per cent. of their deposits, depending on the locality. In Canada there is no fixed percentage, but in practice Canadian banks carry 20 to 25 per cent. of their liabilities in cash (specie and Dominion government notes and bank balances), and much more in readily realizable assets. These [illegible] materially reduce the balance available for loans.

The demands in the banks in the crop moving season are heavy. They begin in the latter part of August and steadily increase until the peak is reached in December and January. From then on the advances reduce rapidly and by April are practically cleaned up in normal times. As their resources are not unlimited careful preparation is necessary in order that other lines of business shall not be unduly restricted. Some years ago a clause was embodied in the Bank Act permitting an increase in circulation over the amount of paid-up capital for this purpose. On this excess interest was payable to the government while this excess circulation was outstanding. The rate was five per cent. And when to this was added the ordinary expense connected with the circulation so issued, there was little if any profit to the bank. It was merely enabled by this means to extend additional temporary accommodation.

Of course this tax is not levied until the notes are outstanding, and the bank may keep a full supply on hand in its vaults without expense, other than the cost of making and handling. In this respect they are better off than banks in the United States, who when supplies of currency are required can only obtain them from the Federal Reserve Bank by rediscounting trade paper with that institution. Considering the circulation taxes now levied in Canada, however, it is doubtful whether the cost of the necessary excess circulation is not about the same in both countries. The methods of obtaining currency in the United States, however, emphasize more clearly the fact that bank advances must be for definite trading purposes, with definite terms of payment, if the various classes of business are to obtain the supplies of credit to which each is entitled.

Loans from London

In the years before the war temporary assistance at this time could be obtained from London, pending the marketing of the grain in Britain. This year this source will not be available, as much of the crop sent to that market must be disposed of on credit, which must be extended by the Canadian seller. This will require the assistance of the owners of the credit. If the entire task is thrown on the banks the business community in Canada as well as speculators will find their supplies increasingly hard to obtain. The banks will of course be blamed, and unjustly, as they must keep their resources in such shape that they can honor the demands of their depositors. During the war this marketing was arranged by the government, but, now that trade is, it is hoped, working back to a normal basis the less of governmental trading there is the better.

The credits for the purpose of disposing of our surplus crops to Europe must be obtained directly from the owners of the credit, the depositing and investing public. There is at all times a considerable supply of credit utilized in speculative channels, and if some plan could be devised which would attract these funds there would in all probability be sufficient to finance the sales of grain in Europe.

Short-Term Debentures Suggested

It has been suggested that short term debentures be issued for the purpose under government auspices and supervision, the funds so derived earmarked so that the transactions of each year would be allocated to the issue for that year, each issue to carry its own profit or loss. Such issues would readily sell on the market and the bank credits would then be left to fulfil their proper function of facilitating [illegible] working capital. The speculative public would welcome such a scheme, as, with the prospects of [illegible] interest, if the debentures or certificates [illegible], there would always be a [illegible]

What would You do with it?

If you owned this Company, what would you aim to do with it?

You would want to give good service to your patrons—

To pay good wages and provide agreeable working conditions for your employees—possibly make provision also for their old age—

And to pay a fair return to investors who had put their money into the business—such a return as would attract other investors so that you would be certain to obtain necessary new money for extending the system.

This is just what we are aiming at—no more; no less! *These things cannot be done on our present revenues.*

That is why we are asking for a readjustment of our rates for service!

DEPARTMENT OF CUSTOMS AND INLAND REVENUE

NOTICE

To Manufacturers, Wholesalers and Retailers

NOTICE is hereby given to all concerned, that Returns, accompanied by remittance of Luxury and Excise Taxes, must be made as follows to the local Collector of Inland Revenue from whom any information desired may be obtained.

Returns of Luxury Tax must be made on the first and fifteenth day of each month.

Returns of Jewellers' Tax, Manufacturers Tax, and Sales Tax must be made not later than the last day of the month following the month covered by the return.

Returns for Taxes in Arrears must be made forthwith otherwise the penalty provided by law will be enforced.

By order of the
DEPARTMENT OF CUSTOMS AND INLAND REVENUE
GEO. E. DUNBAR,
Collector of Inland Revenue,
TORONTO.

EVOLUTION OF GRAIN MARKETING FACILITIES

Increasing Grain Crops Tax Transportation and Storage Facilities—Eighty Per Cent. of World's Wheat is Harvested in Late Summer—Production in West Will Probably Increase for Many Years to Come

By CHARLES BIRKETT

Secretary, Fort William and Port Arthur Grain Exchange

WHEAT and other grains, as everybody possibly knows, are harvested every month of the year in some part of this old world of ours. It has been stated, however, that 80 per cent. of the world's supply is harvested in one-third of the year, from June 15th to October 15th. This being the case, a storage and transportation problem of considerable magnitude exists.

From 60 to 70 per cent. of the western grain crop comes forward to Fort William and Port Arthur between the 1st of September to the close of navigation, December 15th. This happens every year, and the result is that Canada's transportation and storage facilities are taxed to their very utmost.

Elevators are considered as part and parcel of our great transportation system. They fill an important part in the gathering and distribution of our field crops and perform an economic and useful function.

The most difficult problem we have to face in the next decade is to make transportation facilities keep pace with production. Have the elevator facilities kept pace with production during the last decade or two? We will answer this question later. Production, we believe, is ready and waiting to jump forward with a bound. It is very important to Canada, from an economic standpoint, that our facilities are such as will take care of this increased production from time to time.

Eight Hundred Per Cent. Increase

We will take the production of wheat as being indicative of the general run of things. In the crop year 1900-1 Canada produced 47,867,000 bushels of wheat; in the crop year 1915-16 Canada grew her largest crop of wheat and other cereals, the wheat crop totalling 376,303,000 bushels. This means that during the period under review (fifteen years) the wheat crop increased approximately eight times. It is necessary to state, however, that the 1915-16 crop was what is commonly known as a bumper crop and has not been approached since that year. The average crop of wheat is approximately 200,000,000 bushels, which would be about five times in excess of that of 1900-01.

How did our elevator capacity keep pace with this development? In 1900-01 there were 421 country elevators in western Canada with a total capacity of 12,759,000 bushels. In 1915-16 the number of elevators had increased to 2,995, with a total capacity of 94,322,000 bushels. This works out approximately eight times greater than the first-named year. It will then be seen that the grain trade in the building of storage space has kept pace with the development of western Canada, even allowing the figures for the bumper crop year to remain as a standard. If, however, an average crop is taken into consideration, the development of the storage space has been much greater than that of production.

Country and Terminal Elevators

Very few people to-day are aware of the tremendous increase in the elevator storage capacity of Canada during the last twenty years. We have in Canada at the present time 3,730 country elevators, with a total capacity of 127,000,000 bushels. We have in Fort William and Port Arthur eighteen public terminal elevators with a capacity of 51,500,000 bushels and twelve private elevators with a capacity of 2,755,000 bushels, making a total storage capacity of 54,255,000 bushels. Taking Canada as a whole, there are 3,797 elevators, with approximately storage capacity totalling 226,256,970 bushels. This in itself shows the wonderful growth in Canada, and brings to our attention the splendid grain handling facilities that have been provided for the moving of our principal basic product, grain.

The following figures, taken from an official report of the Board of Grain Commissioners for Canada, will give some idea as to the evolution of the grain marketing facilities of Canada:—

Grand Totals. Year	Stations.	Elevators.	Warehouses.	Capacity.
1900-01	219	426	97	18,329,352
1901-02	243	544	87	22,549,000
1902-03	285	750	82	29,806,400
1903-04	323	919	64	40,636,000
1904-05	359	977	46	46,403,630
1905-06	415	1,059	50	50,453,200
1906-07	491	1,221	52	55,222,200
1907-08	526	1,318	36	58,535,700
1908-09	647	1,446	41	78,016,100
1909-10	788	1,802	38	94,266,100
1910-11	863	1,909	32	105,472,700
1911-12	937	2,0[illegible]	31	108,649,900
1912-13	1,048	2,319	37	127,224,550
1913-14	1,217	2,607	24	154,765,000
1914-15	1,247	2,813	28	168,624,000
1915-16	1,334	3,059	19	180,988,000
1916-17	1,400	3,360	..	193,844,000
1917-18	1,463	3,694	..	211,591,800
1918-19	1,484	3,777	..	221,279,964
1919-20	1,511	3,797	..	226,256,970

We have in the three prairie provinces a total land acreage of 358,805,198 acres. The latest figures obtainable, those of 1916, show that 73,300,135 acres had been taken up for farms. Out of this amount 34,330,246 acres were improved farm lands and the balance unimproved. Of the improved farm lands 23,766,364 acres were growing wheat, oats, barley and flax.

In 1919 the total acreage for grain had increased from 23,766,364 to 30,071,312 acres, an increase of 7,000,000 acres.

Probable Increase in Acreage

A study of the statistics showing the development of western Canada clearly proves that the increase in the acreage of field crops from year to year is fairly consistent, notwithstanding the fact that during the past five years very little development has taken place in the building of railroads in new territory. The resumption of such will undoubtedly cause a further increase in the total area of farm lands taken up for cultivating purposes. In the meantime a large proportion of the unimproved land will be cultivated and cropped. It seems quite reasonable to assume, therefore, that when the 1921 census is taken it will be found that the increase from 1916 has been fully maintained to that of previous years. Using that as a basis, the following figures are obtained, allowing for a considerable slowing up as compared with the past ten years:—

Year	Total area improved. Acres.	Total area under field crops. Acres.	Total area under principal grain crops. Acres.
1921	40,000,000	34,000,000	32,000,000
1926	48,000,000	40,000,000	37,500,000
1931	56,000,000	45,000,000	42,000,000

The above, we think, is a fair estimate, considering the fact that it is a general belief that the population of western Canada will materially increase during the next ten years.

There does not seem to be any doubt that the grain trade of western Canada will, when necessary, still further increase the elevator facilities to handle the crops, and, in connection with the transportation companies, will provide ample facilities for the handling of the crops as they are grown.

An attempt was made a few days ago to cash a stolen $1,[illegible] [illegible] 5½ per cent. bond, bearing the stamp of the Standard Bank, at the Manhattan Banking Company, New York.

INSURANCE POLICY AS COLLATERAL SECURITY

Assured's Estate is Entitled to Such Proportion of Policy and Profits as was Borne by Assured During His Life

THE transfer of a mortgagor's interest in a property, and the failure of the purchaser to buy back an insurance policy which they had undertaken to assume as part of the sales agreement, brought up a complicated case in the Alberta courts. This was Standard Trusts Co. vs. Canada Life Assurance Co., decided on February 4, 1920, by the Supreme Court of Alberta.

The facts of the case as stated in the judgment of Harvey, C. J., are in effect that the Standard Trusts Co. is the executor of the will of Ferris, who in his lifetime was a half owner of certain Edmonton property upon which a mortgage for $50,000 was given to the Canada Life Assurance Co. It was a condition of obtaining the mortgage at the rate of 7 per cent., payable $5,000 a year for four years and the balance in five years, that an insurance policy for an amount equal to the principal should be given and assigned to the company as collateral security. The policy was issued to Ferris and assigned, but half the first premium was charged to his co-owner.

Purchaser's Agreement

The second premium was paid by Ferris, one-half being charged to and paid by the individual defendants who had then acquired the half interest of Ferris' co-owner, but before the third premium became due the individual defendants had acquired the whole interest in the lands mortgaged. A term of the mortgage made the insurance premiums a charge on the land if not paid by the assured and upon the acquisition by the defendants of Ferris' interest on July 10, 1914, an agreement was entered into between them which provided that Ferris should assign the policy to the defendants, but that they should pay the premiums. Also that if the mortgage money was repaid before Ferris' death "the owners hereby covenant and agree to and with the assured to assign and make over the same at such date to the assured upon payment by him to the owners of a sum equivalent to the cash surrender value of the said policy at such date, and the assured hereby in such event covenants and agrees to and with the owners to pay the said sum forthwith after the repayment of the moneys secured by the said indenture of mortgage." Also that upon repayment by the owners of any instalment of the principal, the assured shall pay to the owners "a sum equivalent to what would be the cash surrender value under the said policy of the amount of such instalment or other payment or both at the date or respective dates of payment based on the proportion which the amount of any such instalment or other payment bears to the total surrender value of the said policy at such date and shall thereafter pay to the owners a sum equivalent to the premium in respect of any such instalment or other payment so repaid, based on the proportion which the premiums in respect of the instalments or other payment so repaid bears to the total premium payable in respect of the said policy."

Assured was Killed in War

Although one instalment of $5,000 was past due at the time of this agreement it had not yet been paid. One instalment of $5,000 was subsequently paid and Ferris paid the defendants $110 which was one tenth of the surrender value at that time of the policy and reimbursed the defendants one tenth of the next annual premium. Before any other instalment was paid or any further premium paid Ferris who had gone to the war was killed in action.

His Lordship in his written judgment says in part: "When the necessary proofs to obtain the insurance moneys were forwarded it was found that a mistake had been made by Ferris in understating his age and that at his proper age the premiums paid would be the premiums for an insurance of $17,500 instead of $50,000, and in accordance with the terms of the policy the policy was treated as one for $17,500. Just how this little error affects the terms of the agreement and the rights of the parties is what is in issue in this action."

Not Entitled to Full Interest

"I agree with the trial Judge that the plaintiff is not entitled to the full beneficial interest in the policy, subject to any claims of the defendants for reimbursement of the premiums paid and have nothing to add to the reasons he gives for reading that conclusion.

"I also agree with him that the plaintiff is not entitled to an interest in the policy represented by the three $5,000 instalments which were payable by the terms of the mortgage but only one of which had been actually paid at the death of the assured."

"I agree with the trial Judge also that the plaintiff is entitled to one-tenth of the profits because Ferris was bearing the burden of one-tenth of the policy which had been released to him."

"I would therefore allow the appeal and declare that the plaintiff is entitled to one-tenth of the amount of the policy and profits amounting to $4.750 and $75.57 respectively. The plaintiff should have judgment against the individual defendants for $4,825.57 with interest at the legal rate from January 16, 1917."

TRUST COMPANIES IN CANADA

Trust companies are as firmly established as banks in this country, said S. Lawrie, manager of the Royal Trust Co., in Edmonton, at a meeting of the Rotary Club in that city on August 25. He showed the progress of the trust company, and claimed that it was the highest development on the financial side of civilization. It was only possible when the community had developed a high degree of honesty and integrity in its social and economic life.

"One of the highest developments of civilization is credit," said Mr. Lawrie. "By its means, the greater part of modern business is transacted and civilization itself is increased. The highest development of credit is trust. Credit means reposing confidence in another that he will pay money due at a certain date. It implies that he is financially responsible. Trust means imposing a confidence that another will not only pay money, but that he will perform certain acts and exercise discretion in the proper way. The question we are continually asking is not: 'Shall we trust?' but 'Whom shall we trust?'"

Mr. Lawrie showed that the duties of a trustee are more strictly circumscribed by the law and more jealously guarded by the courts than any other business relation between men. The trustee may take no action in carrying out a trust that is averse to the interests of the donor or the beneficiaries.

"The development of the trust company idea in the United States and Canada has been rapid," said the speaker, "and to-day the modern trust company combines every function of financial business and has truly been called the department store of business. For a long time, the use of the words 'trust' or 'trust company' by irresponsible concerns was not forbidden to any extent by the legislatures of Canada, but steps have now been taken, both by the dominion and some of the provinces, to remedy this evil. Even the new legislation, however, which has been passed on this point has not always provided for the discontinuance of the use of the name by the act. Consequently it is very important for any person who contemplates doing business with a Canadian trust company to inquire carefully into its standing."

Boards of trade in Alberta will shortly hold a conference in Edmonton, with a view to forming a provincial organization.

The Imperial Bank has issued a writ in Toronto, claiming [illegible] from Clayton Fielding under alleged obligations assumed by Fielding last year on behalf of the Niagara Falls Pickles, Ltd.

News of Industrial Development in Canada

Investigating Market for British Columbia Steel—Another Pulp and Paper Deal being Consummated—Maritime Fisheries Depressed by Low Prices—Ontario Timber Purchased by Manchester Merchant—Will be used for Shipbuilding Purposes in England

FOR the purpose of studying the market for British Columbia steel, Major D. B. Martyn, industrial commissioner for the province, and James McVety, of Vancouver, are now on a tour of American cities. They will later be joined at San Francisco by Nicol Thompson, of Vancouver. Messrs. McVety and Thompson compose the steel committee of the advisory board of the provincial department of industries by which a number of projects have of late been considered, projects being promoted by individuals who are applying for loans to permit of the inauguration of steel manufacturing plants.

This question of the inauguration of an iron and steel manufacturing plant in the province has received the attention of the provincial government, which has already passed legislation granting a bonus for iron produced in British Columbia. But, so far, no private enterprise has come forward with any definite plan designed to take advantage of the assistance promised. At the last session of the legislature Hon. William Sloan, minister of mines, made the definite declaration that should no private enterprise be established this year, the government would seriously consider the project of inaugurating a government steel plant.

British Columbia Cement Industry Prospering

During the past three or four years the market for British Columbia cement has been somewhat depressed. An indication of this is the fact that the plant of the British Columbia Cement Co., at Tod Inlet, Vancouver Island, the principal cement-producing plant in the province, has, since 1915 been turning out about one-third of its capacity and operating only six months in the year. Only about one-tenth of the company's actual capacity output has been sold during the past four or five years, and, as a result, the company has been operating at a loss. Just recently the situation has been greatly changed, however, although whether permanently or not, it is not known.

Within the past few months Australia, New Zealand, South America, the Fiji and Philippine Islands have commenced to bid for British Columbia cement, a development unheard of until the high cost of labor, shortage of fuel and transportation difficulties gave Vancouver Island a distinct advantage over other Pacific cement plants on account of its tide water location and easy access to sea transportation.

Another Large Pulp Deal

A new company, headed by Greenshields and Co., of Montreal, has been formed to take over the operation of the plant of the Dryden Pulp and Paper Co., at Dryden, Ont., from the late English owners. The chief production of the plant has been in kraft pulp and paper, which will be continued by the new organization, only on a much larger scale. An issue of securities will be shortly made by the new company, the proceeds of which will be devoted to the completion of the plant and extensions. Owing to various causes, including the exchange situation, the English interests have not been ready to provide the company with the necessary capital to complete the plant. It is understood that the Canadian interests, on the understanding that they would provide the capital, were able to purchase the property at approximately its pre-war valuation.

The Dryden Co. holds 1,157 square miles of timber limits adjacent to Lake Wabigoon and Eagle Lake, in the Kenora District of Ontario, between Winnipeg and Port Arthur, containing a large stand of accessible pulpwood. The company's history dates back to before the war, when it was originally formed as a lumber and power concern. It went into liquidation in 1913, at the time when the lumber business went into depression. Additional capital was secured and the company's sulphate mill, which was under construction previous to liquidation, was completed. Under the reorganization, the company's capitalization was scaled down to a low figure. The pulp and paper plant was gradually developed out of earnings, and additional timber holdings and power sites secured. The additional powers have been partially developed, and the mills, which are laid out for a much larger capacity, have been brought up to a present production of 45 tons of sulphate pulp, 18 tons of building paper and 15 tons of kraft paper per day. The company's timber limits are adjacent to two lakes of approximately 100 square miles each, which enables them to secure their pulp wood, it is said, at a very low per cord cost of the pulp wood delivered at the mill.

Among the directors of the reorganized Dryden enterprise will be included: W. A. Black, vice-president and managing director of Ogilvie Flour Mills and a member of the Abitibi Pulp and Paper Board; J. B. Beveridge, who has for some time been associated in the chief executive capacity of the company; J. N. Greenshields, K.C.; J. H. A. Acer, director of the Laurentide Power Co.; Senator Lorne C. Webster and Dan McLachlin, president McLachlin Brothers, Ltd., of Arnprior, Ont.

Maritime Fisheries Depressed

A bulletin has been issued by the eastern division of the Canadian Marine and Fisheries Department, which speaks of the depression of the fishing industry in the Maritimes. The bulletin says in part:

"The fishing industry at present is in a somewhat perilous condition, not only in the Maritime provinces, but also along the Atlantic coast of the United States. Large stocks are on hand, and great difficulty is experienced in marketing sufficient supplies to ease the situation. The result is that the dealers will probably lose heavily, either in prices or in the deterioration of the supplies, or both. And as a consequence the fishermen will also suffer, as the dealers are not in a position to satisfactorily handle the catches.

"Indeed, so far as the fishermen are concerned, the season thus far has been quite disastrous, with the exception of the lobster fishery, which has been the most successful and remunerative for some years. Cod and haddock have been plentiful on large sections of the coast, but the prices to the fishermen are unusually low, particularly when it is remembered that the cost of gear is at least one hundred per cent greater than under normal conditions.

"Owing to the unsatisfactory conditions, the dealers, with hardly an exception, are curtailing operations, and in some instances have closed their plants; while many of the fishermen have had to engage in other occupations. This is particularly true in some districts in Cape Breton and Grand Manan, N.B.

"The sardine fishery of New Brunswick is most unsatisfactory. Owing to the scarcity of tin plate, the canneries, both on the Canadian and American sides, could take only small quantities of herring. Darrel Cheney is constructing a sardine cannery at Little River, Digby County, and proposes to utilize the catches of St. Mary's Bay."

Manchester Merchant Buys Timber Here

While in Montreal recently, G. Mason, of Manchester, England, made a statement regarding the purchase by his company of twenty-five million feet of timber from the [illegible] saw mill at Milton, Ont. He intimated that the purpose of his present trip is to make forwarding arrangements to have the timber, as it is put through the mill, forwarded to the company's distributing yards in Manchester, where they have large storing ground and shed

space, adjacent to the ship canal, and possessing railway communication. During the past four years, through the war period, the company was debarred from purchasing timber in Canada, owing to an embargo of the British government which sought to conserve tonnage. With a very large demand for timber supplies which is prevalent throughout Great Britain, for engineering and shipbuilding purposes, Mr. Mason was led to make the deal he is now marshalling, and he states that his company is open to purchase all the white pine timber they can get in Quebec and Ontario and elsewhere in the Dominion of Canada.

The timber, as it is cut for the company's purposes, is fashioned into boards and deals and is sold in that way. The Midland mill has a capacity of about fifty million feet a year and it is estimated that the timber supply that is tributary to it is good for about fifty years. At Midland, the company, which is known as G. Mason and Co., Ltd., has established offices, with Major G. L. Main, of Galt, in charge, for the purpose of looking after their present investment, and to negotiate any further purchases of timber which they may be able to make in this part of the country.

United Kingdom Industries

Cable advices have been received by F. W. Field, the British government trade commissioner in Toronto, from the Department of Overseas ,Trade, London, England, that the United Kingdom iron and steel industries are fully occupied with home orders to the capacity of raw materials available. Manufacturers of tinplates, galvanized sheets, hardware, cutlery and pottery are in a little better position and can deal with an increased export business. Among the industries in the United Kingdom which can now handle larger business are machine tools, motor cars (except the higher grades), electric batteries and accumulators, drapery, clothing, hosiery and hats, and musical instruments. Indications in these industries point to a larger export trade in the near future. The same remarks apply to glass and glassware.

Miscellaneous Trade Notes

A new sash and door factory is to be established at Mission City, B.C., by the Canadian Western Door Co., Ltd., at the cost of about $135,000.

Quarters have been secured by the St. Catharines Silk Mills, Ltd., at Port Dalhousie, Ont., where silk gloves will be produced. About fifty persons will be employed.

Adams Wagon Co., Ltd., a subsidiary of the Cockshutt Plow Co., has acquired the plant of the Petrolea Wagon Works at Petrolea, Ont., and is fitting it up for the production of sleighs and trucks. This will enable the Brantford plant of the Adams Wagon Works to concentrate on other lines of farm wagons, etc.

The Ontario Paper Co., Ltd., is erecting a new building at Thorold, Ont., 60 by 300 ft. A new paper-making machine is being added to the plant's equipment, and it is announced that the capacity of the mill will thus be raised from 2[illegible]0 to 300 tons of newsprint per day.

A factory is being erected by the Dominion Motor Castings, Ltd., at Windsor, Ont., which, when completed, will have a floor space of 2[illegible],000 square feet. The new company, which is applying for a charter, with a capitalization of $250,000, will manufacture different types of castings [illegible] for automobiles, etc.

With a capacity of 8,000 pounds of hemp per day, a new cordage plant will open at New Westminster, B.C., in October, to supply not only the British Columbia market, but also that of the prairie provinces. The plant of the company represents an investment of $260,000, of which the provincial government loaned $200,000, and the stockholders took up $60,000. The plant is under the management of John Pa[illegible], who has had thirty years' experience in New Zealand cordage manufacture. The first product is expected to be turned out by October 15. At present the building is completed and part of the machinery is on the ground, while another part is en route west and the balance is on order to be shipped as quickly as possible. To meet early manufacture, 132 tons of raw materials is now on the ground, and a steady importation of hemp from Manila and New Zealand will be maintained.

NEW INCORPORATIONS

Mount Royal Hotel Co., Ltd., $10,000,000—Airtight Valve Co., Ltd., $3,000,000—Loblaw Groceterias, Ltd., $300,000

The following is a list of companies recently incorporated under Dominion and provincial laws, with the head office and the authorized capital:—

1870 —— OUR GOLDEN JUBILEE —— 1920

Co-Operative - Scientific - Successful

How did the Mutual Life of Canada succeed in attaining its present impregnable position in the financial world? It may be replied that the promoters of the Company did not organize it as a commercial undertaking, but that it might serve as a public benefactor giving "the largest amount of genuine life insurance for the least possible outlay." Unselfish devotion to the success of the enterprise supplied the place of capital. Although strictly co-operative or mutual, yet the Company has been built up on a scientific basis as an old line legal reserve life insurance company. The Mutual Life of Canada is a beneficent idea worked out on scientific lines—that is the secret of its popularity. The Mutual being essentially a company of policyholders, conducted by policyholders in the interests of policyholders, naturally became a great success.

News of Municipal Finance

High Tax Rate for Calgary Next Year Unless a Definite Plan is Formed in Regard to Arrears—Prince Rupert Debt Reduced—Shortage in Windsor Sinking Fund Denied—Vancouver and Lethbridge Tax Collections Show Increases

Lethbridge, Alta.—Taxes collected during the discount period, which ended on August 31, amounted to $276,000, representing 54 per cent. of the total, compared with $212,000, or 49.5 per cent of the total, in the same period last year.

Vancouver, B.C.—Since the middle of July more than $650,000 has been received in taxes. Heavy collections are anticipated towards the end of the discount period, which expires on September 15, and at that date receipts are expected to reach $1,000,000 or more.

Montreal, Que.—Water and business taxes collected during the discount period which ended on September 1 last, amounted to $2,303,399, as compared with $1,792,893 received in the same period last year. During the following sixty days, interest at the rate of six per cent., will be collected on arrears, and after that 7 per cent.

The administrative commission on August 30, decided to purchase for its sinking fund, the following bonds of the city of Montreal, from H. B. Robinson and Co.: £5,000, 4½ per cent., due 1951-3, at 66.50; £2,140, 4 per cent., due 1932, at 73; £5,000, 4½ per cent., due 1963, at 67.50.

Windsor, Ont.—A special audit made recently by Dadson, Fitzgerald and Co., revealed a shortage of about $12,975 in the city's sinking funds. This, however, has been contradicted by F. J. Holton, city auditor, who demands an investigation by the city council, and who is backed in his statements by City Treasurer Thompson.

Speaking of the matter, Mr. Holton explained that the sinking fund of a city is always considered as a sacred trust, and that any statement such as appears in the report of the special audit will injure the credit and reputation of the city. "It is libellous and should be corrected," he said. "Not only is all the money there which should be there, but there is a surplus of $2,200, which has been earned by investing sinking fund money in debentures drawing a higher rate of interest than that allowed by the banks."

Prince Rupert, B.C.—A reduction in the debt of the city of $12,269 last year, is shown in the annual statement just issued. The total bonded debt as at December 31 last, amounted to $1,609,222. The sinking fund was intact, and fully paid in at that date.

There was a deficit for the year on general revenue account of $19,582, but to offset this profits were earned by the various utilities amounting to $26,861. The city thus had a net surplus for the year of $7,178, which was not enough, however, to pay the exchange on a payment of $80,952 due on the city's bonds, and payable in New York on April 1, 1920. Taxes levied for general purposes during the year amounted to $175,697, as compared with $154,751 in 1918. Local improvement levies amounted to $59,186. Total collections, including arrears, were considerably over the sum of these two amounts and uncollected taxes at the end of the year were reduced from $196,2[illegible]0 to $172,712, which includes both general and local improvement taxes.

Montreal, Que.—The finance committee of the Charter Commission will request the Chamber of Commerce, the Board of Trade, the Manufacturers' Association, the City Improvement League and other similar organizations, to send in their suggestions on the best system of taxation adaptable to the conditions prevailing in the city. In making the announcement, A. Lambert, chairman of the finance committee, drew attention to the importance of financial machinery required for the administration of Montreal. Mr. Lambert added that he would ask the committee to adopt the suggestion at its next meeting. "If the commission has ever needed the opinion of citizens it is on this matter," said Mr. Lambert. The committee will also study the taxing systems in use in other cities.

Up to the appointment of the present administrative commission, Montreal adhered to the rigid system of having a fixed realty tax, which, however, completely broke down during the stress of the times following the outbreak of European hostilities. The city was confronted for two or three years with annual deficits, which were wiped out only with the power of increasing the realty tax. The new law authorizes the city commissions to assess property with a rate of taxation not exceeding 1½ per cent., or $1.50 on each $100 valuation of property. The city commissioners have succeeded, however, in administering the affairs of the city on a property tax of $1.35. Now, in view of the drafting of a new city charter, the sub-committee will go into the question of taxation and submit their recommendations to the general charter commission.

Calgary, Alta.—At a recent meeting of the finance committee, the question of tax arrears and the tax sale was the principal topic. It was finally decided that a definite policy must be framed to provide revenue in lieu of taxes from property which will be sold this fall. Alderman Johnston and McCoubrey expressed the opinion that there was a possibility of a 70-mill tax rate in 1921, unless the city sold instead of trying to lease lands that came into its possession through the tax sale.

It is variously estimated that from 30,000 to 40,000 lots will come into the city's possession, which will mean probably striking another $1,500,000 from the already greatly reduced taxable property of the city, which is now down to some $75,000,000. The most serious phase of this situation, however, is the possibility of a decision from Judge Carpenter, of the Public Utilities Commission, compromising taxes on property classed as farm lands, and making the compromise retroactive over a term of years. Such a decision might mean wiping another $5,000,000 off the assessment rolls.

Another question of importance which was considered was that of sinking funds. Ald. Johnston made that statement that the city fell behind in payments into the sinking fund to the amount of $92,000, as compared with the previous year. The advisability of investing more money out of the fund in Calgary bonds, was also discussed, and it was finally decided to ask the council to authorize the committee to invest sums from the sinking fund, not to exceed $50,000 at one time, in Calgary bonds of ten or fifteen-year

Emphasis was also laid on the fact that no loans shall be made from the sinking fund on local mortgages, which is a repetition of a decision made long ago. At the present time, according to a statement made by Mayor Marshall recently, the city has $500,000 cash in its sinking and $700,000 invested in Victory bonds, besides mortgage loans and other investments. Prior to the war period, most of the sinking investments were in mortgages on local property. Alderman Johnston expressed the opinion that the city eventually would lose some $100,000 on these mortgage investments, but Commissioner Samis expressed the opinion that by 19[illegible]1, when sinking fund payments fall due, the property on which loans were made will be worth the principal and deferred interest.

Government and Municipal Bond Market

Two Municipalities Borrow on Seven Per Cent. Basis During Past Week—Prospects for British Columbia Domestic Loan this Fall Considered Bright—Calgary Sells Treasury Notes instead of Debentures

THE past week in the bond market was an inactive one. Two small Ontario municipal issues were disposed of at prices which indicated no change in the situation. There are a few issues coming up in the future, but these are not of any significance, and it seems at the present that September will not be a very active month. As far as known, the provinces have just about completed their financing for this year, although there will probably be a few more issues. British Columbia is anticipating floating a domestic loan this fall, the proceeds of which will be used for the economic development of the province. Hon. John Hart, the minister of finance, considers the prospects for such an issue are bright, and does not expect that the present credit stringency will adversely affect a heavy subscription, which is anticipated. It is probable that the various committees which took charge of the Victory loan campaign in the province last year will be called upon to take an active part in this new campaign.

Calgary Sells Treasury Notes

No direct tenders were received for the $225,000 6 per cent. 30-instalment and the $25,000 6 per cent. 15-instalment debentures of Calgary S.D., Alta., but two conditional offers were received, one being from Wood, Gundy and Co., at 87.50, and the other from Brent, Noxon and Co., at 85, both companies asking for a thirty-day option at these rates. Neither offer was accepted and the school board called a meeting for a later date to discuss the matter.

At the meeting last week, the board instructed Chairman Selwood and Trustee Sinnott to negotiate the sale of treasury notes at par on the security of the debentures for a period of not less than three years, to the full amount of the debentures. Mr. Sinnott stated that he had been practically assured of an offer, whereby the board could borrow the amount covering the debentures for a period of three years by giving the bonds as security, at a rate of interest of about 6 per cent. In this way, he pointed out, the board would be able to dispose of the bonds at any time during the three years, when the market would be in a better condition to receive the securities. In view of this and the fact that the board needs funds to pay for the new schools which are now being constructed, the decision was made as stated above.

At a further meeting of the board on September [illegible], at which the committee appointed to arrange the sale of the treasury notes reported the result of their negotiations, arrangements were completed for the sale. The committee reported to the board that they had interviewed the representative of W. Ross Alger and Co., of Edmonton and Calgary, and Morris Brothers, Inc., of Portland, Ore., and found that their offer for notes of the board to be at the rate of par if repayable in two years, $98.[illegible] on the $100 if repayable in two and a half years, and $97.50 on the $100 if repayable in three years. The committee were of the opinion that the two and a half year rates were the best, and, accordingly the following recommendation was made to the board:—

"That the board of trustees of the Calgary School District No. 19 issue treasury notes payable as to principal and interest at the office of any branch of the Imperial Bank of Canada, in the cities of Calgary, Montreal, or Toronto, Canada, or at the office of the Bank of Manhattan Co., in the city of New York, U.S.A., bearing interest at the rate of 6 per cent. per annum, payable semi-annually, said notes to mature on March 1[illegible], 19[illegible], and that the debentures [illegible] bearing interest at 6 per cent. issued under by-laws Nos. [illegible] and [illegible], be lodged with the Imperial Bank of Canada at Calgary or Toronto, as the purchaser may desire, to be held by the said bank as security for the due payment of this note."

The recommendation of the committee, as stated above, was adopted by the board.

Coming Offerings

The following is a list of debentures offered for sale, particulars of which are given in this or previous issues of *The Monetary Times*:—

Borrower.	Amount.	Rate %.	Maturity.	Tenders close.
Etobicoke Tp., Ont.	$ 17,361	6½	5-instal.	Sept. 11
Essex Border Utilities, Ont.	$ 117,615	6	28-instal.	Sept. 13
St. James S.D., Man.	180,000	6	20-years	Sept. 15
Bexley Tp., Ont. ...	7,000	7	....	Oct. 1
Glenwood, Man. ...	25,000	5½	30-instal.	Oct. 4

Etobicoke Tp., Ont.—Tenders are being received until September 11, 1920, for the purchase of $17,361 6½ per cent. 5-instalment debentures.

Bexley Tp., Ont.—Tenders will be received until October 1, 1920, for the purchase of $7,000 7 per cent. school debentures. Alfred Taylor, Victoria Road, Ont.

Glenwood, Man.—Tenders will be received until October 4, 1920, for the purchase of $25,000 5½ per cent. 30-instalment good roads debentures. Securities to be dated December 31, 1919, and are payable at the Union Bank, Souris, Man. J. W. Breakey, Souris.

Essex Border Utilities, Ont.—Tenders will be received until September 13, 1920, for the purchase of $117,615 6 per cent 28-instalment debentures. Bids were asked in June last for an issue practically the same, but those received were turned down. The act validating the issue has been changed slightly, as was intimated at the time bids were rejected, so that now the debentures are a direct charge against all the municipalities in the section, instead of against only some of them.

Debenture Notes

Almonte, Ont.—The town is considering the installation of a waterworks system at the cost of $263,695.

Bienville, Que.—Ratepayers have passed a by-law authorizing the borrowing of $25,000 for public works.

Windsor, Ont.—Ratepayers have approved of the issuing of $150,000 debentures for waterworks improvements.

Ayton, Ont.—Ratepayers have endorsed a by-law authorizing the issue of $11,000 debentures for hydro purposes.

Halifax, N.S.—An order-in-council has been received by the council from the provincial secretary's department, directing the issue of [illegible] in debentures to provide $25,000 for school purposes. The council has instructed the finance committee to provide the money.

Lethbridge, Alta.—Major Muckleston, chief engineer of the Lethbridge Northern Irrigation District, after an interview with the provincial government, reports that financial arrangements have been made so the district can carry on. The bond contract will take place at the end of this month, [illegible].

Saskatchewan.—The following is a list of authorizations granted by the Local Government Board from August 13 to 18, 1920:—

[illegible] per cent. [illegible] annuity: Banger, $4,000; [illegible], $[illegible]; [illegible], $[illegible]00; Crocus, $5,600, 8 per cent [illegible], $5,500; Lampman, $15,000

The

TORONTO

Rural Telephones.—8 per cent. 15-years annuity: Laurie, $22,300; Whitewood, $10,000; Parkbeg, $2,400; North West Smiley, $13,500; Readlyn, $10,200; Tadmore, $4,400; Glen Adelaide, $4,800; Cana, $8,500; Castleton-Pennock, $6,400; West Osage, $1,250. McTaggart-Weyburn, $800, 8 per cent. 14-years annuity.

Village.—Hubbard, $10,000, 10-years 8 per cent. instalment, for street grading and sidewalks.

Rural Municipality.—Fertile Valley, No. 285, $5,050, 10-years 7 per cent. instalment, for building municipal office.

Township of Toronto, Ont.—Tenders will be received until September 14th, 1920, for the purchase of $37,000 6 per cent. 20-year school debentures of School Section No. 2. J. K. Morley, Cooksville, Ont.—

Bond Sales

Lakefield, Ont.—A. E. Ames and Co. have purchased $33,500 6 per cent. 30-instalment debentures of the town, at a price which costs the municipality about 7 per cent. for its money.

Grand Forks, B.C.—The municipality has announced that it has sold locally $25,000 debentures. The purchasers had the option of either 5 or 20-year securities, but the latter maturities proved to be the most popular.

Brantford, Ont.—City Treasurer Bunnell advises *The Monetary Times* that the city has disposed of $500,000 6 per cent. debentures and $125,000 5½ per cent. debentures. The former were sold locally at par, either over the counter, or by the local brokers, while the latter were sold outside of the city at a price which cost the city a fraction over 6 per cent. for its money. The bond are all serials, and mature on December 31, annually, from 1920-39, and were disposed of since the beginning of the year, it is understood.

Milton, Ont.—Wood, Gundy and Co. have been awarded an issue of $18,000 6 per cent. 30-instalment debentures at 90.31. Several tenders were received as follows, the first few being very close:—

Wood, Gundy and Co.	90.31
United Financial Corp., Ltd.	92.23
Turner, Spragge and Co.	90.21
A. E. Ames and Co.	89.56
C. H. Burgess and Co.	86.75

Saskatchewan.—The following is a list of debentures reported sold by the Local Government Board from August 13 to 18, 1920:—

Schools.—Scotsguard, $5,000; Antelope Valley, $[illegible]; Bradley, $5,500; Campbell, $5,000; Boharm, $5,700; Edward Grey, $12,000, all sold to Waterman-Waterbury Mfg. Co., Regina. Odessa Village, $7,000, sold to the Regina Public School Sinking Fund Trustees. Onward, $1,000; Morton, $2,000; Creswell, $[illegible]; MacVert, $900; Clunie, $200, all sold to C. M. Gripton, St. Catharines, Ont.

Rural Telephones.—Balgonie, $8,000, A. Diewold, B[illegible]; [illegible], $5,750, Nay and James, Regina; Cotswold, $[illegible],500, W. L. McKinnon and Co., Regina; Laurie, [illegible], Harris, Read and Co.

Town.—Strasbourg, $2,000, M. McKay, Morden.

BOND DEALERS' PHOTOGRAPH

DOMINION DEBT SHOWS APPARENT REDUCTION

Statement for July—Decrease Due in a Large Measure to Transfer of Soldier Settlement Loans Account—Good Showing in Revenue and Expenditure

An apparent decrease of $65,622,115 in the net debt of the Dominion at the end of July, 1920, is shown in the statement issued by the Department of Finance. A despatch from Ottawa commenting on this remarks:—

"The figures are, however, more apparent than real, this exceptionally good showing being due in a large measure to transference from the consolidated funds to "investments" of $40,000,000 covering loans to soldier settlers by the Land Settlement Board. Deduction of the $40,000,000 still leaves the debt smaller than it was at the end of June by $25,000,000, but this again is in a measure due to a change in the government's interest-paying period which was largely responsible for a drop in expenditures for July to $22,789,304 as compared with $40,084,840 during July, 1919."

For the four months ended July 31st revenue amounted to $145,049,589 as compared with $99,621,970 for the same period last year, an increase of about $45,000,000, which easily covered the advance in ordinary expenditure of $28,000,000. Expenditure on capital account for the four months totalled $6,990,918, as against $117,276,824 last year, the principal reductions being in war and public works accounts.

Corporation Securities Market

Business on Canadian Exchanges Quiet, but Prices Firm — New York Market Develops Reactionary Tendency — Two New Stock Issues Offered— Dryden Pulp and Paper Common Shares Nearly all Disposed of

AFTER enjoying a period of activity and strength, the New York market, at the close of the week on September 8, developed a reactionary tendency, although some industrials advanced. The downward movement started in the railroad section, but did not appear to be directed by any new development. Call money was much easier, being loaned at the rate of between 6 and 8 per cent., during the week, and closed at 7 per cent.

Developments on the Montreal and Toronto stock exchanges during the week ended September 8, indicate that the condition of the Canadian market is sound. Business was not brisk, but the majority of the issues showed a tendency towards strength, and there was a firm tone at the close. Paper issues were the most prominent, both in activity and strength, but their position now is not as dominant as it has been. Spanish River was the feature of that section, gaining substantially on comparatively heavy dealings, presumably as a result of the record financial report published last week. There was considerable interest in other issues, including Asbestos Corp., in Montreal, and F. N. Burt pfd., Canada Steamships, Canners and Penmans in Toronto. The latter issue was notable for its weakness, while the others all registered substantial gains. Colonial Investment and Loan shares, which two weeks ago gained about seven points to 74 on the Toronto exchange, went back below 73 this week, with few transactions.

Dryden Pulp Stock Issue

An offering is now being made by Greenshields and Co., Montreal, Toronto and Ottawa, of 100,000 shares of common stock of the Dryden Pulp and Paper Co., Ltd., of Dryden, Ont., which company was formed to take over the properties of a company with a similar name, which was formerly controlled by English capitalists. The capitalization is as follows: Ten-year 6 per cent. bonds, due October 1, 1928, $465,000; thirty-year 6 per cent. debentures, due October 1, 1945, $1,100,000; common stock, no par value, 100,000 shares.

The English interests, who held the bonds and debentures, will retain the same, while the common shares are being sold in Canada. The offering is now being made at the price of [illegible] per share, and already the greater part of the issue has been taken up. Application will be made in due course to list the shares on the Montreal Stock Exchange. Particulars of the company's operations and plans are given elsewhere in this issue.

Rubber Company Stock Offered

R. M. Heffernan and Co., Ottawa, Kingston and Montreal, are offering to the public $600,000 8 per cent. cumulative participating preferred shares of the Rubber Co. of Canada, Ltd., at $100 per share, with a bonus of 25 per cent. common stock (one common share with four preferred shares). The rubber company is capitalized at $1,000,000 preferred stock, and $1,000,000 common stock. All of the common stock is to be issued, while only $600,000 of the preferred will be issued. The company has no bonded debt.

The Rubber Co. of Canada, Ltd., has been organized to handle the rapidly expanding rubber goods business of Canada, and for this purpose have acquired, as a going concern, the Panther Rubber Co., Ltd., with extensive manufacturing plant at Sherbrooke, Que., a company which has been in successful operation for the past six years. The company is at present producing a variety of articles manufactured of rubber, and embracing the following: Heels, soles, automobile and household mats, stair treads, packing, plumbers' supplies, balls, etc., and upon completion of present financing will manufacture automobile inner tubes.

Capitalization Increases

Companies registered under Dominion charter have bee authorized to increase their capitalization as follows, shares to be issued in each case to have a par value of $100:—

	Former capital stock.	Increased to
Blue River Lumber Co., Ltd.	$100,000	$ 200,000
Franke, Levasseur and Co., Ltd. ...	60,000	160,000
Canada Glue Co., Ltd.	250,000	1,000,000

No definite action was taken by the directors of th Canadian Car and Foundry Co. at a meeting in Montrea last week, in regard to the issue of income bonds, which i contemplated in connection with the paying up of the 22¾ per cent. preferred dividend arrears. The matter may b given consideration at the next meeting of the board i October.

Allen Theatre Issue Coming

In the near future, a large issue of securities of th Allen Theatre enterprises will be offered for public subscrip tion. The securities, it is understood, will be in the form o eight per cent. preferred shares, and will be issued to th extent of $2,500,000. The issue is in connection with the re organization of the capital, and will be brought out by Hous ser, Wood and Co., Toronto, and other investment houses Complete particulars will be available when the offering i made, which will be within the next two weeks.

CANADIAN BUSINESS FAILURES

The number of failures in the Dominion, as reported by R. G. Dun and Co. during the period ended August 27, 1920, in provinces, as compared with those of previous weeks, and corresponding weeks of last year, are as follows:—

Date.	Ont.	Que.	Man.	Alta.	Sask.	B. C.	N. S.	N. B.	P.E.I.	Total.	1919.
Aug. 27	9	16	1	0	1	2	1	1	0	31	12
Aug. 13	3	3	0	4	1	0	1	2	0	14	10
Aug. 6	1	8	4	0	2	3	0	3	0	21	16
July 30	6	4	1	0	2	1	0	4	0	18	..

Business failures in Canada for the week ended September 2, 1920, according to Bradstreet's, totalled 16, as compared with 26 in the previous week, 11 in the same week in 1919, 16 in 1918, 17 in 1917, and 28 in 1916.

EXCHANGE QUOTATIONS

Messrs. Glazebrook and Cronyn, exchange and bond brokers, Toronto, report local exchange rates as follows:—

	Buyers.	Sellers.	Counter.
N.Y. funds	10⅜ pm	10 7-16 pm	....
Mont. funds	par.	par.	⅛ to ¼
Sterling—			
Demand	$3.90	$3.9050	....
Cable transfers	3.9075	3.9125	....

New York quotations of exchange on European countries, furnished by the National City Co., Ltd., Toronto, as at September 9, 1920, are as follows:—London, cable, 354; cheque, 353¼; Paris, cable, 6.80; cheque, 6.79; Italy, cable, 4.37; cheque, 1.36; Belgium, cheque, 7.33; Swiss, cheque, 16.40; Spain, cheque, 14.28; Holland, cheque, 31.55; Denmark cheque, 14.40; Norway, cheque, 14.40; Sweden, cheque, 20.45; Berlin, cheque, 1.93; Greece, cheque, 10.95; Finland, cheque, 3.40; Roumania, cheque, 2.30.

MORE RESTRICTIONS ON FOREIGN INVESTING

On September 9th the following statement was issued at Ottawa by the minister of finance, relating to the embargo on the purchase of securities outside of Canada:—

"Owing to the financial conditions arising out of the war and the change in Canada in recent months from a favorable trade balance to an adverse trade balance, the minister of finance has requested the Canadian banks to decline to facilitate the importation or carrying of Canadian and other securities which have been held abroad. To that end the minister is requesting the banks to have purchasers of sterling of foreign exchange in amounts of a thousand dollars or over, and drawees of drafts received for collection from outside of Canada for the like amounts, certify that the exchange so required or the draft from abroad does not represent the purchase outside of Canada of such securities. The minister is of the opinion that it is impossible for Canada to absorb this portion of its foreign debt or foreign securities at the present juncture without embarrassment to general financial conditions. Every available dollar now in Canada is required for the business of the country and particularly to finance the crop movement and if money is withdrawn in the way referred to, the withdrawal will seriously affect and restrict the commercial activities of the country."

The advertisements of the Imperial Life Assurance Co. have been exceptionally striking and attractive. Some of them have been reproduced in a handsome booklet, "A Hundred and One Reasons For Life Insurance," and prepared for the use of the company's agents.

CO-ORDINATION OF CANADA NATIONAL AND GRAND TRUNK

Announcement was made from Winnipeg on August 30 last of some big changes affecting the control of the co-ordinated lines of the Canadian National and Grand Trunk Pacific Railways in western Canada. Joseph R. Cameron, who was assistant general manager of the C.N.R., has been appointed assistant general manager with jurisdiction over the Grand Trunk Pacific line between Edmonton (not including Edmonton and Edison) and all lines west of Edison, including Vancouver Island lines. His office will be at Vancouver.

H. H. Brewer, has been appointed assistant general manager with jurisdiction over all Grand Trunk lines between Winnipeg and Edmonton, and Canadian National lines west of Armstrong, Ont., west of and including Port Arthur, Ont., to Lobtick Junction, Alta. His office will be in Winnipeg.

The jurisdiction of George Stephen, freight traffic manager of the Canadian National at Winnipeg, has been extended to include the Grand Trunk Pacific Railway and the Grand Trunk Pacific Coast Steamship Company.

The jurisdiction of W. G. Manderson, Toronto, passenger traffic manager, has been extended to include the Grand Trunk Pacific Railway and the Grand Trunk Pacific Coast Steamship Company.

DIVIDEND NOTICES

THE RIORDON PULP & PAPER COMPANY, LTD.

PREFERRED STOCK DIVIDEND No. 33

Notice is hereby given that a dividend of 1¾% (being at the rate of 7% per annum) on the Preferred Stock of this Company has been declared, payable September 30th, 1920, to shareholders of record at the close of business September 24th, 1920.

Insufficient Capital, Labor and Management and Inability to Collect Debts given as Reasons of Failure of the Dominion Shipbuilding Company—General Manager of Winnipeg Electric Railway Endeavors to Correct Misapprehension Regarding Company's Return on Investment

Porto Rico Railway Co., Ltd.—The following is the comparative statement of earnings for July:—

	1919.	1920.	Increase.
For July:			
Gross	$ 86,496	$114,698	$ 28,202
Net	33,967	36,748	2,780
For Seven Months:			
Gross	654,466	787,024	132,558
Net	244,088	301,616	57,527

Winnipeg Electric Railway.—A statement has been issued by A. W. McLimont, vice-president and general manager of the company, endeavoring to correct the misapprehension that is apparently gaining credence in some sections regarding the rate of return received by the company. The statement remarks:—

"There appears to be a general misapprehension with reference to the Public Utilities Commission's judgment dealing with the rate of return the company is entitled to earn. The assumption is made that because the commission finds 8 per cent. reasonable that it is a guaranteed rate. This assumption is quite wrong. The commission finds that 8 per cent. is a reasonable rate of return, and the commissioner estimates that the fares, which he has allowed, will yield the company this rate of return, but there are many contingencies which might easily prevent this. In the first place, the commissioner assumes that the company will carry 65,250,000 passengers this year, that there will be no further increase in wages, and that no other event will happen which might interfere with the company's operations.

"As to the number of passengers carried, we have never, in our best years, carried even 60,000,000 passengers a year; there is no guarantee that there will be no recurrence of anything in the nature of another epidemic, strike, increased demands for pay or some accident over which the company has no control interrupting the service, and many other contingencies which may arise. The 700 shareholders of the company have not received any return for five years, the shares of the company have been a drug upon the market, and to-day they can be bought for under $[illegible] a share, and, notwithstanding the judgment of the commission, there does not appear to be any rush to buy them, even at present bargain prices."

Britannia Mining and Smelting Company, Ltd.—The annual report of the Howe Sound Company, which is the holding company of the Britannia organization, of [illegible], B.C., discloses the large operations which the company carried on at Howe Sound. During the year 9[illegible] tons of ore were broken down and 64[illegible] tons were [illegible] the rock-pile, leaving a total of broken ore in [illegible] 1,8[illegible] tons. The average copper content [illegible] per cent., based on [illegible] samples [illegible] in place amounting to 2,2[illegible] tons, averaging [illegible] per cent. copper. Also 6[illegible],910 tons were transported to the mill, resulting in the treatment of [illegible] tons, yielding [illegible] tons of concentrates, shipped to the [illegible] smelter. These concentrates [illegible] gold, [illegible] ounces; silver, [illegible] ounces; copper, [illegible] pounds.

The total receipts from [illegible] and from [illegible] $1[illegible],011. The expenses were: Mining, $[illegible]; transportation, $[illegible]; milling, $[illegible]; smelting and marketing, $[illegible]; [illegible] expenses, $[illegible]; administration, $[illegible]; taxes, $[illegible]; depreciation and depletion, $1[illegible]; and interest, $[illegible], leaving a balance to be carried forward to the new year of $1[illegible],365. Regular quarterly dividends of five cents per share were paid. The Britannia Company's investments in the Dominion of Canada war bonds aggregated $500,000, pa value.

Including the Mexican operations of the company, despite the unsatisfactory features of the copper market during the year, it was the most prosperous in the history of the mine, due to the greater tonnage produced and the highe prices realized for silver metal.

Dominion Shipbuilding Company.—Osler Wade, assigne in charge of the affairs of the failed company, in a statemen before Master-in-Chambers Cameron and a group of creditors during the winding-up proceedings at Osgoode Hall Toronto, on September 3rd, said that insufficient capital labor and management, and the inability of the company t collect its debts were the causes of the failure. The financia statement which Mr. Wade presented shows an apparen surplus of $1,557,263 as follows:—

Assets—Cash on hand, $1,069; cash on deposit wit Hannevig and Co., bankers, New York City, $12,462; Victor bonds (assigned to bank), $68,600; bills receivable, $100,000 accounts receivable, $533,874; general supplies and work i progress, $389,320; office furniture, $6,000; drafts, pattern and moulds, $10,000; building on leasehold land, $532,624 machinery, $317,907; yard equipment, $615,026; undergroun equipment, $104,591. Total assets, $2,691,476.

Liabilities—Bank, $158,805; rent of leasehold, $15,300 H. W. Petrie and Co. $5,299; Burroughs Adding Machin Co., $270; Canadian General Electric Co., $1,383; city of Toronto, taxes, $22,962; Workmen's Compensation Act, $5,22 Dominion Government Sale Tax, $585; wages, $106,252; cred tors, as per an accompanying list, $520,349; Gulf Navigatio Co., $60,000; London Guarantee Co., on performance bond t Marine Department, Federal government, $137,800; Marin Department, $100,000. Total liabilities, $1,134,213.

"The capital invested in this company was $1,000,00 as compared with $1,600,000 in fixed assets for the plant, said Mr. Wade. "It is quite obvious, instead of having an working capital, the company has a liability of $600,000, o that the working capital was $600,000 less than nothing making it necessary to rely upon loans and advance pa ments on contracts to conduct operations."

Dealing with labor conditions, Mr. Wade said that th combined labor and material cost per ton on hulls laid dow during 1918, 1919 and 1920, respectively, had been $116, $16 and $156, and that on the last hull it had been $167, wit the result that the hull was laid down at a loss of $300, t which were added penalties of $72,000. The arrangeme [illegible] at the time of liquidation was for a five-day wee of [illegible] hours, with double time for Saturdays and overtime.

"It is quite apparent that the policy of the closed sho had [illegible] labor costs which were constantly increa [illegible] while the [illegible] has been decreasing since th [illegible]," said Mr. Wade, who claimed that if the shi [illegible] to succeed the capital ou [illegible] on a competitive bas [illegible] of other countries, or, failing this, th government would have to subsidize to equalize any diffe [illegible] overlooked this fact, an [illegible] conditions were not met, that th [illegible]. Mr. Wade told the credito that it would require about $600,000 to meet the preferr claims [illegible] without making a provision for unsecured creditors. If this could not be do from the [illegible] the required sum might b raised by [illegible].

It's a Hard Rub

For a woman to unexpectedly find it necessary to become a breadwinner. You wouldn't like your wife to come to that, would you?

But what about your widow? Why not provide for her a regular monthly income to begin at your death and continue as long as she lives? You can do it by means of an Imperial Life policy.

Quebec Railway Light, Heat and Power Co.—Preliminary figures of the annual financial statement of the company for the twelve months' period ended June 30th last, to be submitted at the forthcoming annual meeting of the shareholders, shows that gross earnings from operations amounted to $2,372,034, compared with $2,077,621, an increase of $294,413 over those of the previous year, representing a gain of slightly over 14 per cent. The 1919-20 figures are also $571,182 in excess of those reported two years ago, an increase of over 32 per cent. Costs of operation and maintenance, however, in common with the experience of other public utilities, were higher by $325,047 than in the previous year, the aggregate to the end of last June being $1,769,563, against $1,441,516 in the previous statement.

Net earnings from operation for the twelve months under review amounted to $602,471, compared with $633,105, being a decrease of $30,634, insufficient by $44,703 to meet the requirements of fixed charges, taxes and depreciation on equipment placed out of service during the year. This deficit of $44,703 compares with one of $65,273 in the preceding statement. After charging this and an amount of $55,055 in connection with the recent adverse Privy Council judgment against surplus account, there remained a credit balance in the latter of $582,704, compared with $582,463 as at June 30th, 1919.

RECENT FIRES

Gladstone Avenue Rink, Producers Dairy, Ltd., and Other Ottawa Properties Suffer Loss of $150,000—Dominion Shingle Co., New Westminster, Loss $70,000

Belleville, Ont.—September 1—Residence, barn, wagon-house and drive-house belonging to Wm. J. Tufts, of Zion's Hill, Thurlow township, was destroyed by fire. The loss is estimated at $12,000, partly covered by insurance.

Dominion Association of Chartered Accountants

Membership Increased by Twenty-two — Bankruptcy Act a Great Benefit, says G. T. Clarkson, But Operation Must be Kept Simple—President Reviews Events of the Year as Affecting Accountants—Reports of Provincial Institutes

THE annual meeting of the Dominion Association of Chartered Accountants was held in Toronto on Tuesday, Wednesday and Thursday of this week, with about 100 members in attendance. After a council meeting on Tuesday morning, a welcome was extended to the visitors by R. J. Dilworth, on behalf of the Ontario Institute. The president, A. C. Neff, of Toronto, conducted the meetings. In his presidential address Mr. Neff said in part:—

"Since we last met here, in 1912, great changes have come over the world, and, though peace has been declared in most countries, there is still an element of unrest in many of them. There is also such a change in economic conditions as few of us could have imagined a few years ago, such as the prices of commodities, the cost of living, the rate of wages and of rent, the rate of exchange and relative value of money, and, as important as any, the enormous increase in the national debt and obligations and the cost of government and the consequent burden of taxation in many new forms. With these has come a remarkable increase in evidence of wealth and gain.

"With it all, there is a heavy increase in our work and responsibilities, in which I hope we shall not fail to acquit ourselves with due credit to our profession, and that we shall bear a worthy part in the solution of the great problems of the day.

Increase in Membership

"Turning to our own affairs, the membership of the association, as shown by the last returns, is now 570, an increase of 22 over that shown last year, the details by provinces being as follows:—

Incorporated:	1919.	1920	Increase or Decrease.
1880—Quebec	85	89	4
1883—Ontario . .	168	177	9
1886—Manitoba . .	80	80	.
1900—Nova Scotia	32	35	3
1905—British Columbia	62	62	
1900—Saskatchewan	55	64	9
1910—Alberta . . .	57	55	2*
1918—New Brunswick .	5	7	[illegible]
1902—Members at large..	4	3	1*
	548	570	22

*Decrease.

Regarding the new Dominion Bankruptcy Act, the president said:—

"At last year's meeting there was a discussion of the desirability of all chartered accountants being registered as trustees under this act, and the president, in his address, mentioned the fact that, as appointments are made by order-in-council, it might not be practicable to appoint the members as a body. It is now hoped that chartered accountants will be *prima facie* considered as sufficiently qualified for appointment on application to the governor-in-council, and so would be eligible for registrations wherever there is room on the panel of the district.

"It appears to me that there are a number of accountants who have no desire to practice in the Bankruptcy Court, and some of the partners in firms would not wish to carry the permanent bond for $15,000 which, under the latest regulation, is required before registration.

"From my early enquiries, it appeared that the duty on accountancy books is regulated by Customs Tariff Act, and can be changed only by an amendment to the act. Books on law and medicines are under the same duty as those on accountancy, and the only effort which promised benefit was to lay our case fully before the tariff commission when it is making its enquiries this fall. However, within a few days I have learned that if accountancy books are placed upon the curriculum of a university in Canada, and registered by the departments, they will be entitled to free entry. As some of our institutes have affiliations with universities, this should be capable of arrangement by the universities.

Rulings on Dominion Tax Acts

"I wrote the commissioner of taxation pressing upon him the necessity for a pamphlet or book of these rulings, or some means by which accountants could become possessed of authoritative information on the subject, and recently added to the enquiry an invitation to him to meet us again, at this convention, and give us a further address, or talk, on the subject. Owing, no doubt, to his being extremely busy with the new legislation, I have had no reply from him. Meantime, the increasing difficulty of following the changes in the act accentuate the necessity for some reliable guide for the use of the profession and of the general public.

"When the announcement was made some months ago that an Association of Cost Accountants had been formed in the United States, under the auspices of the American Institute of Accountants, it was thought to be wise to take similar action here, and a Dominion charter was applied for by the presidents of the eight provincial institutes, who were the provisional directors or trustees. The organization has been carried to completion and the first annual meeting of the society will be held on Wednesday evening.

Legislation

"The chief legislation which has been passed this year affecting our work as accountants has been: Further amendments to the Income Tax Act and the Business Profits War Tax Act and the act imposing a sales tax and luxury tax in addition to the former taxation. These all tend to increase the responsibilities of the profession, and call for increased vigilance in preparation and scrutiny of the financial statements of our clients."

(Continued on Page [illegible])

RAILWAY APPEAL NOT LIKELY TO SUCCEED

Government Refuses to Postpone Increase in Rates, Which Went Into Effect on Monday—Will Hear Appeals at Once

APPEAL may be made from any judgment of the Board of Railway Commissioners to the Governor-in-Council. Although the government has in the past always refrained from interfering, and in fact has rarely been appealed to, yet some of the opposers of increased railway rates have decided to try to secure a modification of the rate judgment announced last week. An effort was, in fact, made to have the advance postponed, but without success. In a statement issued on September 13 the government said:—

"Telegrams have been received from different parts of the country protesting against the judgment of the Board of Railway Commissioners granting a general increase in railway rates, and requesting that the action of the board should first be suspended and afterwards set aside by the government. Many of the wires received have been sent under misapprehension as to the position of the Board of Railway Commissioners and its action to the government. The wires, indeed, would indicate that a belief exists which, if not prevalent, has at least obtained in certain parts of the country, that the Board of Railway Commissioners is merely a department of the government service. This is not the case, and it is important that the right position be stated.

Railway Control Non-Political

"In 1903 parliament decided that the control of railways was to be removed from direct departmental and political interference and provision was made for a Board of Railway Commisioners. The board was subsequently constituted and has since discharged the statutory and judicial functions assigned to it in a manner undoubtedly, on the whole, in the public interest and to the general acceptance of the people. It has not been interfered with by this or any other government. Instead of being a mere governmental department, the board is, by statute, constituted a court, and has the rights, privileges and independence of a court. The act, however, provides for an appeal to the Governor-in-Council and reserves the right of the Governor-in-Council on such appeals to vary or rescind any order, rule or decision of the board. The practice that has grown up under this rule is well settled. The decisions of the board cannot lightly be interfered with. As a matter of fact, since the board commenced its operations, no judgment of the board has been set aside by the Governor-in-Council. In a case of the importance of the present it undoubtedly becomes the duty of the Governor-in-Council to go carefully into the whole of the issue, to hear the arguments that may be made, and, after becoming seized of the whole matter, to dispose of the appeal, having regard to the underlying principles of the Railway Act, the rights of shippers, the rights of the carriers, and the underlying national interests.

No Delay in Increase

"The question of a stay of the board's judgment has been as carefully considered as the very short time at the government's disposal rendered possible. The board's judgment goes into effect on Monday, the 15th inst. The government has had before it the complete judgment of the railway commission embodying references to the evidence and the reasons for judgment. This has been carefully studied. As against this there have been, and, of course, could be presented, only brief contentions by way of protest. The judgment finds that the relief granted is necessary and should be applied, and this after the hearing of evidence and arguments on both sides. A suspension means more or less indefinite postponement, and if the judgment is right, would render impossible the remedying of any injustice [illegible]. The judgment of the commissioners, which, it should be pointed out, is unanimous, being concurred in by all the commissioners who sat upon the case, further indicates that the objections now urged were taken into account, and considered that such objections went to the measure of relief that ought to be granted rather than to the claim that no increase should be made. The official judgment of the Inter-State Commerce Commission of the United States has, as well, been available for reference. This judgment, it may be noted, is now in force. A perusal of this judgment discloses that more general, and, in many cases, heavier increases have been granted to railways in that country. For example, on coal the Inter-State Commerce Commission has increased the rate 35 per cent. in western territory, and 40 per cent. in eastern territory. In Canada, the rates on coal are increased 10 cents per ton on all existing rates not exceeding 80 cents, and increased 15 cents per ton on all existing rates over 80 cents per ton and not exceeding $1.50 per ton; and 20 cents per ton on all existing rates over $1.50 per ton.

Less Than in United States

"It will be noted that the increase in Canada is very considerably the lower. Coal constitutes a large proportion of the total traffic of Canadian carriers. The rates on sand, gravel and crushed stone in the United States have been increased 40 per cent. for the eastern territory, 35 per cent. in the western. In Canada no increase whatever is allowed. On cordwood, slabs and mill refuse used for domestic fuel, the same increase has been granted in the United States, while in Canada the increase is held down to 10 per cent.

"The general increases allowed in American territory are reduced in the cost of milk movement, the increase allowed there by the Interstate Commerce Commission being 20 per cent. In Canada no increase whatever is allowed.

"Over and above this the increases in the United States are not limited as to time in the manner as to which increases in Canada are. The general increases of 35 per cent. in western territory and 40 per cent in eastern territory allowed by the Canadian board are reduced, under the judgment, to 30 per cent. and 35 per cent. effective January 1 next, and, in addition, the railway companies are bound to submit monthly statements so that their earnings may be checked and reductions made in rates, in case the rates allowed proved unnecessarily high.

"It should also be noted that the increase in passenger rates is also limited. In the American territory the increase is 20 per cent.; in Canada the increase is 20 per cent., but in Canada the increase is to be reduced to 10 per cent. effective January 1 next, and on July 1 next the increase is cancelled altogether. No limitations are made in the American order.

"The above references are necessary to be taken into account when the government is asked to take the responsibility for the confusion and possibly the injustice that may be done at this date by interfering with the commission's order to suspend its application. The whole subject can, however, be fully gone into on appeal. Every facility will be given to argue the merits of all contentions advanced and to revise the entire order. If it should appear to be a case where the appeal should be granted and the decision modified or reversed, there could, if deemed proper, be provision for rebates of rates charged beyond those ultimately fixed. The government, while decided that it could not justify now a suspension of the order, will facilitate in every way the early hearing of the appeal."

FIRE SUFFERERS TO BE COMPENSATED

Definite assurance that sufferers from bush fires in Manitoba will be compensated for the loss of stock, crops and effects sustained during the August fires was given on September 9 by J. H. Evans, deputy minister of agriculture. Plans for an immediate survey of fire losses among the settlements which were burned out during the August fire plague were launched by the department on the advice and [illegible]. Full information as to the [illegible] buildings and effects will be obtained, and on this information a definite plan will be formulated for the [illegible] of the sufferers.

TRADERS' FINANCE HAS PROMINENT DIRECTORATE

Will Furnish Discount Facilities to Automobile Dealers—Sun Life Appoints Manager for City of Winnipeg

(Special to *The Monetary Times*.)

Winnipeg, September 16th, 1920.

SPLENDID weather for threshing prevails throughout the west and good progress is everywhere being made. From the latest government information the crop of western Canada is estimated as follows: Wheat, 260,000,000 bushels; oats, 359,000,000 bushels; barley, 43,762,000 bushels; flax 10,817,000 bushels; many prominent financial men who have been over the west this fall both from eastern and western Canada are wonderfully impressed with what they have seen. As far as the eye can see the stooks of ripened grain extend, and it is left to the imagination to determine where the cultivated area terminates and its value in dollars and cents.

Automobile Financing Concern

The Traders' Finance Corporation, Limited, is the name of a new company just formed in Winnipeg, with a capitalization of three million dollars, half of which will be first preferred eight per cent. cumulative shares, and the balance common shares.

The chief function of the corporation will be to furnish discount banking facilities to dealers of approved credit in the automobile truck and tractor trade. It is felt that the demand for this financial service in Canada is relatively as great as in the United States, where similar institutions have been very successful. Companies to handle this class of business are also established in eastern Canada by leading financial men, and the Traders' Finance Corporation, Ltd., which is essentially a western institution, has been formed to develop this business in western Canada. A half million of stock has already been taken by the directors and their associates.

The board of directors comprise the following, and others are to be added: President, Hon. A. B. Hudson, K.C., formerly attorney general of Manitoba; vice-president, J. C. McGavin, president Canadian Bond and Mortgage Corporation, vice-president, Canadian General Securities, Ltd.; managing director, W. W. Evans, vice-president and general manager, Canadian and General Securities, Ltd., managing director, Canadian Bond and Mortgage Corporation; directors, Sir Douglas Cameron, president, Maple Leaf Milling Co., director, Manitoba Bridge and Iron Works; E. W. Kneeland, general manager, British American Elevator Co., director, Merchants Bank; R. T. Evans, assistant manager, British American Elevator Co., director, Port Arthur Elevator Co.; Andrew Kelly, president, Western Canada Flour Mills, director, Great-West Life and Western Grocers, Ltd.; A. R. Davidson, president, Davidson and McRae, vice-president, Saskatchewan Valley and Manitoba Land Co.

Dominion Bank Officials in West

General manager C. A. Bogert, of the Dominion Bank, accompanied by assistant general manager Frank L. Patton, of Winnipeg, vice-president A. W. Austin, W. W. Near, R. J. Christie, R. S. McLaughlin, directors, and B. Dawson, eastern inspector, are at present on a tour of inspection of western Canada.

J. C. G. Armitage and H. A. H. Baker, formerly in charge of the Equitable Life Assurance Society business in Winnipeg, are joining the staff of the Sun Life Assurance Co. organization in that city. As branch managers for Winnipeg, they will bring to the Sun Life the entire selling staff of the Equitable Life, Winnipeg office.

Colonization Association

The organization work of the Western Canada Colonization Association is now nearing completion. The plans which they propose to carry out for bringing desirable settlers to fertile western lands now awaiting cultivation will require a considerable amount of money. The directors have set this at $1,500,000 to be spent over a period of three years, and they have sought, and have been assured of active co-operation from eastern Canada. Nearly a million dollars has already been secured, and during the next few weeks an effort will be made both in the east and west to obtain the full amount of financial support.

To eastern business men almost as much as to those in the west the value of the proposed undertaking should be apparent. The west has become an enormous market for eastern manufacturers and wholesalers and it is still expanding; and anything that will facilitate the expansion of that market on safe, healthy lines is bound to prove beneficial to the east.

GOOD CROPS BEING GARNERED IN

Western Situation Continues Satisfactory—Ontario, Quebec and Maritime Conditions Good—Roots and Fruits Promise Well—Storm Damage in Niagara District

A FINAL estimate of the 1920 crop has been prepared by the Northwest Grain Dealers' Association, Winnipeg, showing the yield in the three prairie provinces as follows: Wheat, 14,026,000 acres at 15.2 bushels per acre, 213,245,000 bushels; oats, 10,973,500 acres at 32.8 bushels per acre, 359,000,000 bushels; barley, 2,108,000 acres at 23.5 bushels per acre, 49,538,000; rye, 237,500 acres at 16 bushels per acre, 4,400,000 bushels; flax, 1,181,000 acres at 7.1 bushels per acre, 8,385,000 bushels.

Reports indicate that less than 25 per cent. of the crop will be under three degrees, so that if favorable weather conditions continue until after threshing is completed, the crop as a whole should be above the average.

The above figures may be considered reliable, in view of the fact that they represent the combined judgment of those most closely in touch with crop conditions throughout the western provinces.

Crops Gathered In

Reports from branches of the Bank of Montreal to the head office, regarding crop conditions throughout the country, indicate that harvesting operations in the west are nearly completed. Saskatchewan has been delayed by rain, but threshing is now general in that province. In British Columbia a good average crop of grain is expected. Roots are in good condition, and yield will be good, while fruits are satisfactory.

In the province of Quebec harvesting operations are nearly completed in most districts, and indications point to a good yield. Root crop prospects continue excellent and potatoes are yielding well. Pastures are in need of rain. Conditions in Ontario continue favorable. Harvesting of grains is about finished and threshing is now general, while prospects are very encouraging for better than an average all-round yield. Apples are abundant and other fruits will yield over last year's crop. Recent rains have much improved the root crops and grass. Since this report was issued by the Bank of Montreal, terrific rains and winds in the Niagara district have done a great deal of damage. An estimate of the loss is not available yet.

Crops are being harvested in the Maritime provinces, and oats in particular give promise of a good yield. Root crops throughout the provinces continue to look well, and present indications are for a yield well up to average.

The report of the Saskatchewan Department of Agriculture to *The Monetary Times*, dated September [illegible], announces that harvesting operations are practically completed and that threshing is general. Rain, which was general in the province for about a week, delayed operations somewhat, but with the exception of two places, did no harm, but rather improved condition of pastures.

Some wheat has been shipped, the grade proving very satisfactory. Grain is yielding much better than was anticipated. Men for threshing are scarce, even at the high rate of wages that is being paid this fall.

DOMINION ASSOCIATION OF CHARTERED ACCOUNTANTS

(Continued from page 5)

Reports were received from constituent societies in Montreal, Ontario, Manitoba, British Columbia, Nova Scotia, Saskatchewan and Alberta. There was no one present representing New Brunswick. The report of the Montreal society referred to the incorporation at the last session of the legislature, of the "Accountants' Association." British Columbia extended an invitation to the Dominion Association to hold its 1921 convention in that province. Several of the provincial societies referred to the question of professional fees, steps having been taken to charge a higher scale; Alberta already has a new scale drafted, with the consent of practically all the members, and will endeavor to secure the approval of the lieutenant-governor-in-council.

Another subject on which some of the provincial societies had taken action during the year was the employment by the Dominion government of the Chicago firm of Griffenhagen and Company for the purpose of reorganizing the civil service. Letters of protest had been forwarded to the government, which had in reply pointed out that this firm had had experience in work of this kind in the United States, and was therefore better qualified for the purpose than any of the firms in Canada.

The uestion of the admission of Orientals had also come up in British Columbia during the year, and the other societies had been consulted as to whether this should be permitted. It was decided that there was no reason why the membership of the societies should be restricted to British subjects. The Chartered Accountants' Society in New Zealand had during the year has also asked the British Columbia Institute for reciprocity in membership privileges, but after examining the papers, etc., it had been decided not to extend membership reciprocity at present.

Address on Bankruptcy Act

G. T. Clarkson, of Toronto, addressed the meeting on the new Dominion Bankruptcy Act. "Accountants knew nothing about this act," he said, "until after its first reading. Committees were then formed, and about 50 amendments were asked for, almost all of them being adopted. This shows the importance of the service rendered by the accountants' committees.

"Under the terms of confederation, the Dominion government has control over insolvency and bankruptcy. Acts were passed, but later repealed, and there has been no Dominion law of this kind since 1880, apart from the Companies' Winding Up Act. The provinces accordingly passed assignment acts, which were held to be *intra vires* so long as there was no Dominion act of this kind. There was therefore, a variety of practice in the different provinces. The Dominion Winding Up Act itself is surrounded by formalities, and procedure under it is costly."

Mr Clarkson then gave a summary of the new act. The procedure, he pointed out, does not differ greatly from that under the provincial assignment acts. Building societies, loan companies, insurance companies, railways and banks are exempt from its provisions, these being covered by the Companies' Winding Up Act. Since the act was passed it has been found that there is no provision to give shareholders notice of creditors' meetings. A Bankruptcy Court, presided over by a judge of the Supreme Court, was created.

Under the assignment acts, said Mr. Clarkson, the provincial powers are in the hands of the creditors, and the rest in the hands of the inspectors. Under the Dominion Act this condition is reversed. Trustees are under the instructions of the inspectors. Security held by a creditor may be redeemed at a value set by the creditor, or at market value, instead of at a bonus of 10 per cent., as was the practice under the assignment acts. Claims for salaries and for rents are limited to three months. The fees of trustees and of their counsel, said the speaker, are limited to 5 per cent. of the receipts. This was quite satisfactory in most cases, and was usually more than was received, but it meant that there would be a class of estates, such as where the assets have been dissipated by fraud, which it would not pay a trustee to handle.

In conclusion, Mr. Clarkson said that the Bankruptcy Act will be a benefit in that a uniform procedure supersedes a variety of methods under the provincial assignment acts. Honest debtors will not be penalized by creditors, nor will a dishonest one be tempted to compound with his creditors. The procedure must be kept as simple as possible, and must not be surrounded by formalities which would tend to increase the expense.

Society of Cost Accountants

The inaugural meeting of the Society of Canadian Cost Accountants was held on Wednesday, many of the delegates to the chartered accountants' convention being present. The feature of the meeting was an address by J. Lee Nicholson, C.P.A., author of Nicholson's "Cost Accounting," and president of the National Society of Cost Accountants. Cost accounting, explained Mr. Nicholson, served to show where a profit was made by a firm and where a loss is sustained. It showed the cost of the production of an article, and it was from the results thus obtained that the price of the article was arrived at.

Cost Accounting Pays Well

"If a cost system is merely used to ascertain the cost it is not worth the money spent on it," he said, "but a properly conducted system is always a paying proposition. The profit made during six months, it has been proven in a number of cases, under a proper system, has been sufficient for the maintenance of the system for twenty-five years

"Three elements entered into the working of a cost system, and these are material, labor and overhead, and the second is, perhaps, the least troublesome. The big fault is the lack of appreciation that material represents money and is as valuable as the actual cash. The loss in material in manufacturing is due mainly to waste and defective work. Lately the introduction of by-products has done away with a lot of the loss in manufacturing. Some firms make more out of their by-products than they do out of their more established lines of goods. The question of saving material through by-products is a big one, but it is being considered by all large firms now.

"The cost of labor is more a human element than a mechanical one. From my experience I am a firm advocate of some sort of bonus system for the workers. Every human being is in need of an incentive, although these are sometimes different. There are all sorts of bonus plans, and the best, in my mind, is that of profit-sharing, which is growing rapidly throughout the United States. After deducting the working expenses and a definite percentage for the shareholders, the rest of the profit is divided equally by the workers on one hand and the shareholders on the other It has been very successful, and is the best effort of the present day to bring the workers and capital together. It shows that the capitalist is not trying to get it all. Every effort made towards profit-sharing with the workmen will save this and all countries from much future trouble between capital and labor."

ONTARIO INSTITUTE OF CHARTERED ACCOUNTANTS

At the annual meeting of the Ontario Institute of Chartered Accountants, which was held in Toronto on July 1, the following officers were elected:—President, R. J. Dilworth; first vice president Rutherford Williamson; 2nd vice-president, Arnold Morphy; secretary, T. Watson Sime. The executive council includes these and past presidents George Edwards, E. Gunn, A. C. Neff, and Bryan Pontifex, and also R. F. Burns, G. T. Clarkson, J. W. Eddis, F. G. Jewell, F. P. Higgins, G. M. Mulholland, and A. A. Crawley.

A BOUNTEOUS GRAIN HARVEST

WHEAT, wheat everywhere,—and not a car to move it nor a dollar to finance the sale. This at least is how it seems to the western farmer, and he is at least right in believing that the annual sale of the wheat crop is the biggest transaction in Canadian economic life. Two hundred and fifty million bushels at two dollars a bushel amount to five hundred millions of dollars, or almost half the savings deposits in Canadian banks. Unlike other lines of industry where production and sale are carried on continuously throughout the year, the wheat crop comes all at once, and the credit strain is on this account so much the greater. Moreover the farmer generally wants his money as soon as he delivers the grain, and as the resources of the dealer could not possibly make all these payments, the assistance of the banks is required. In the pre-war days the banks loaned up to ninety per cent. of the market value. Now, on account of the general scarcity of funds, and also of the inflated price of wheat, they are inclined to draw the line at seventy to eighty per cent.

The importance of the grain crop to Canada as a whole is difficult to over-estimate. It is the most important item in the field of production. This year Canada is peculiarly fortunate in having a large crop while wheat is scarce and high in the world's markets. The immense surplus for export will greatly increase our purchasing power, offset our adverse trade balance, and help the country through the period of uncertainty and depression before us

For the first time since the 1916 crop, wheat is thrown on the open market. Only if the British and other European governments exert buying pressure on the market will the Canadian government assume control. The 1917 and 1918 crops were handled by the Board of Grain Commissioners for Canada, the price being fixed. The 1919 crop was handled by the Canadian Wheat Board, which guaranteed a minimum price of $2.15 per bushel, in place of the 1918 fixed price of $2.28. The west, which had assumed that $2.15 was all that would be received for the 1919 crop and which had criticized the board for setting so low a figure, was agreeably surprised when the chairman announced last spring that at least 40 cents more would be paid.

This year, however, there is no control. The Canadian Wheat Board ceased operations at the end of August. The Winnipeg Grain Exchange, which had been closed down on May 1, 1917, and which operated only for seven days, from July 21 to 28, in 1919, was again opened on August 16. The course of the market is interesting. During the seven days of 1919 the price advanced from the fixed price of $2.24 to as high as $2.45. On August 16 it opened at $2.63, or just a little more than the farmers were certain to realize on their 1919 crop.

THE AUSTRALIAN WAR LOAN

DEPRESSION in the bond market is by no means peculiar to Canada. Liberty bonds in the United States are down to prices arranging from 84 to 97, which is an interesting commentary upon the enthusiasm and success with which the low interest war bonds were sold in the United States. The British war loans are also suffering depreciation, although the existence of a broad and conservative market demand there has kept prices up fairly well. In Canada the war issues, in spite of the recent drop, have probably the best record thus far. This record is not due to the support rendered by any controlling committee, but to the fact that the Canadian issues bear a high rate of interest and have tax exemption features which give them a preference in the market.

The wisdom of the former finance minister, Sir Thomas White, in floating the loans at rates of interest which would ensure their success, has been demonstrated Australia tried the other plan of making the bonds less attractive and relying on patriotism. The last public loan in Australia was scarcely a success, and a compulsory levy was threatened before the necessary amount was secured A new Australian loan has just been announced, and although the terms are very liberal, the warning is given that "if the required amount is not received, compulsion is to be brought into force against persons in a position to subscribe, who are not holders of bonds of previous loans." The terms of the loan are as follows:—

The amount of the loan is £25,000,000 and the rate of interest 6 per cent. The interest is subject to commonwealth income taxation, but is free of state taxation. The loan is for ten years and is repayable on December 15, 1930. Subscribers may pay in full upon application or by instalments of 10 per cent. upon application, 20 per cent. on October 1, 1920, 20 per cent. on November 1, 1920, 25 per cent. on December 6, 1920, and 25 per cent. on January 25, 1921. Subscribers have the privilege of converting at face value an equal amount of stock or bonds which they hold in previous war loans. As the earlier war loans were on the basis of 4½ per cent. free of taxation it is anticipated that many investors in the new loan will also convert bonds of the old loans in order to obtain the higher rate of interest.

Compulsion will hardly be resorted to, however, as a cable from Australia, dated September 15, states that the loan had by that date been already oversubscribed.

CO-OPERATION FROM THE FARM

IT will be a wonderful country when the farmers' program is realized. Then none will be for party but all will be for state, for why should they be for party when the state itself is a government of the people. The economic plan being worked out by the United Farmers of Ontario is exhaustive in its scope. It aims to include every line of business, from farming to finance. It will carry goods through every stage of production and place them at the door of the consumer without the intervention of the middleman. This profiteering middleman has not yet been found, but in any case the farmers want the job. There are to be no profits of distribution. The economic gain is to be distributed between producer and consumer.

Co-operative movements are very often successful at the start. Few of them survive this initial impetus. The workers in the scheme want wages and salaries. The investors want dividends. Customers are dissatisfied with the service, and turn to the private business for their goods. Not many years ago the co-operative movement in Saskatchewan was making phenomenal progress. The business became overstocked in the expectation that the whole province would buy from it. Saskatchewan is still a great province for individual enterprise, however, and the farmers of Ontario cannot expect, now or ever, to grasp the whole volume of business in the province. Co-operation is a movement not void of economic merit but it is one which fails to achieve all that is expected.

HOW A WORKS COUNCIL WORKS

INDUSTRIAL concerns are making an effort, sometimes sincere and sometimes only simulated, to introduce their employees into participation in control. Fair success has been the result. In a recent interview the superintendent of the International Harvester Works, Hamilton, which has one of these councils in operation, stated that it has been the means for frank, friendly conferences, participated in on an exact equality, between the management and the freely chosen representatives of the employees. In this manner each had been brought to realize the problems, the prejudices, the hopes and ambitions of the other. "Happily, we have come to believe that these problems may all be encompassed in the same program when squared by the group judgment of the fair-minded, forward-looking responsible persons who constitute our councils," he remarked. This view was supported by representatives of the employees.

In a score or more of Canadian organizations industrial councils exist with varying degrees of satisfaction. The idea is by no means new, dating probably as far back as the advent of trades unionism. In numerous places it has failed to arouse enthusiasm and in others it has collapsed entirely. The cause of failure may be summed up as lack of mutual confidence. In some works where there is a council, the company affairs are dominated by the officials, and the workers merely sit in the meetings. In others the representatives of the employees are selected by the management. Where representatives are elected by the employees themselves, and employee and employer alike feel confident of fair treatment to each other, the works council has a stabilizing effect and has much to recommend it.

* * *

Bank credits are now extremely tight. The financing of the wheat crop is the chief business for which funds must be conserved.

* * *

Toronto bond houses, by purchasing seats on the local stock exchange, recognize the fact that the most efficient method of dealing in active securities is through listing them.

* * *

This year's favorable crop conditions may never be repeated. It is a rare thing to have a bounteous harvest and a high price. The opportunity for real economic progress is unexcelled.

* * *

Canada is determined to maintain her reputation as a borrowing country. Our loans in the United States show that if one creditor nation, the United Kingdom, has failed us, we have been able to find another.

* * *

"If gasoline goes to fifty cents a gallon one result will be that there will be a lot of people buying gasoline at fifty cents a gallon," reasons the *New York Mail*. There will also be some who will wish they weren't.

* * *

Toronto's policy in raising assessments is sound and equitable. The rise in the value of real and improved property and of income is a development which should not be overlooked by assessment departments.

* * *

"The demand for increased rates from public utility corporations has become epidemic throughout Canada," says the *Grain Growers' Guide*. Did the *Guide* expect that the epidemic of higher prices for farm produce, for raw materials, for manufactured goods and for labor, would come alone?

* * *

Mayor Bonchard, of St. Hyacinthe, Que., speaking before the Union of Quebec Municipalities in Montreal last week, stated that if the building of houses were attended to by the municipalities, speculation would be eliminated. Is speculation, if indulged in by a town or city, none the less speculation?

* * *

Major J. C. Tolmie, M.P.P., for Windsor, Ont., suggests provincial ownership of telephones as the solution of the rate question. Public ownership of railways has not solved the railway question in the Dominion; in fact, it is the national system which is now in greatest need of increased rates.

* * *

The Soldiers' Civil Re-establishment Department dealt with 1,218,4[illegible]2 individual enquiries and problems, says a statement just emanating from that department. The number of men who received medical treatment is 49,369, clinical treatments totalled 122,2[illegible]5, and dental operations 84,576; [illegible] commenced vocational training and 28,273 graduated. These elaborate statistics at least explain what some of the large staff were doing.

Australia and New Zealand

Every effort is being put forth to foster and increase trade between Canada and Australasia. The correspondents of this Bank include the principal banks of both Australia and New Zealand, and on the Pacific coast of both Canada and the United States it has branches in all the principal sea-ports. With many years' experience gained in transacting a foreign business, its services are at the disposal of Canadian exporters and importers.

PERSONAL NOTES

H. B. Smith, president of the Collingwood Shipbuilding Company, Limited, and a director of the Canada Steamship Lines, has been made president of the Halifax Shipyards, Limited, succeeding Roy M. Wolvin, who has retired owing to the pressing duties of his position as president of the Dominion Steel Corporation. Mr. Smith was born in Owen Sound, Ont., in May, 1864, and in the earlier part of his business career practised law. In 1899 he retired from that profession and has since been engaged in extensive business operations. He is also president of the Steam Navigation Company of Canada, Limited, and vice-president of the Parry Sound Iron Company, Limited.

J. C. Saunders, formerly assistant deputy minister of finance, has been promoted to the position of deputy minister in succession to T. C. Boville, C.M.G., who has been superannuated. Before joining the finance department, Mr. Saunders was in the office of the mechanical superintendent of the Intercolonial Railway at Moncton, N.B. He relinquished that position in 1887 to go to Ottawa, and after holding various positions and acquiring a good general knowledge of the workings of the finance department was attached as clerk to the treasury board. Later on he became assistant to the chief accountant of the department, and soon after was made chief accountant and Dominion bookkeeper. In January, 1917, he was promoted by Sir Thomas White to the position of assistant deputy minister of finance in place of H. T. Ross, who resigned to become secretary of the Canadian Bankers' Association. He has held that position until his present promotion to deputy minister of finance, which has been given from the 1st of April, 1920, on which date the late deputy minister of finance, T. C. Boville, retired on superannuation.

Vere C. Brown, western superintendent of the Canadian Bank of Commerce, has resigned from that position to become executive manager of the National City Bank, of New York, to which position he was elected on September 14. Mr. Brown began his career as clerk with the Huron and Erie Loan and Savings Company, London, Ont., and was with that company from 1882 to 1889. In 1889 he joined the Canadian Bank of Commerce as clerk at the head office and in the same year was appointed assistant inspector. In 1903 he became inspector, and in 1907 chief inspector, which position he held until 1911, when he was appointed to the superintendency of the central western branches. Mr. Brown has for a number of years been one of the outstanding figures in western Canada, not only as the supervisor of an important banking institution but as a public-spirited and very able man who could seize upon the points of interest common to the bank and the farmer and could utilize them for the development of the country. During the period of his superintendency, which began in May, 1911, he had devoted himself with untiring energy to building up the western business of the Canadian Bank of Commerce upon a sound, substantial basis, and has directed an expansion of banking activity, which is indicated by the growth in the number of branches under his jurisdiction from 115, when he assumed office as superintendent, to 197, at the present time. The superintendency of the middle west has now been divided into two parts. C. W. Rowley, manager at Winnipeg, has been appointed superintendent for Manitoba and Saskatchewan, and J. B. Corbet, senior inspector of western branches, becomes superintendent for Alberta and the Peace River district. C. G. K. Nourse, of Calgary, succeeds Mr. Rowley as manager of the Winnipeg branch.

OBITUARIES

W. P. Tolmie, who had been deputy provincial treasurer for Manitoba for more than thirty years, died in Winnipeg on September 10. Mr. Tolmie was born in Smithville, Ont., in 1850.

Robert Moon, who for the past twenty years had been Toronto agent of the Dominion of Canada Guarantee, Accident and Insurance Company, died at his home, 62 Concord Ave., Toronto, on September 15, after a lingering illness.

John Macfarlane, who for many years has been identified with the paper trade in Canada, and who at the time of his retirement from active business in 1912 was president of the Canada Paper Co., Ltd., died in Montreal on September 6th.

Hon. S. N. Parent, ex-premier of the province of Quebec, died in Montreal on September 7th, after a long illness. He was born at Beauport, near Quebec, in 1855, was mayor of the city of Quebec in 1894, and occupied the civic chair until 1905. In 1897 he entered the provincial government of the Hon. F. G. Marchand as commissioner of lands, mines and forests. Upon the death of Mr. Marchand, in 1900, Mr. Parent was called upon to succeed him as premier of the province, which office he held until 1905, when he resigned, being succeeded by Sir Lomer Gouin.

NATIONAL REVENUE COMING IN FREELY

Large Increases Expected for Current Financial Year—Sales of Savings Certificates—May Have New Trade Agreement with France

(Special to *The Monetary Times.*)

Ottawa, September 16th, 1920.

SALES and luxury taxes are already taking a prominent place in the receipts of the finance department. Canada's total revenue for the month of August was $11,374,290, as against $5,251,801 for the corresponding month of last year. The increase in the amount of war tax wiped out the decrease of $198,915 in the total amounts received from excise and seizures, fines, methylated spirits and law stamps, and left a net increase in inland revenue for the month of $6,122,489. The total revenue for the fiscal year ending March 31 last was slightly over $58,900,000. A very conservative estimate, based on the August totals, places the total collections for the current year at approximately $115,000,000. However, it is expected that the total revenue for the fiscal year will be $150,000,000 or more.

The luxury and sales tax collections, it is stated, are expected to show a substantial increase in coming months. Some merchants have not yet made full returns, and it is expected that when the department's staff of auditors is placed in the field it will be able to assist the merchants in making their returns, and at the same time check up a great deal of laxity and carelessness.

For June, July and August of this year the war tax collections totalled $18,185,037, as against $3,973,287 for the corresponding three months of last year, an increase of $14,211,749. If the increase of last month is borne out during the balance of the fiscal year the total increase would approximate $75,000,000. The comparative statement for the month follows, the first figures being those for 1919, the second for 1920:

Excise, $3,557,968; $3,379,762; decrease, $178,205.
Excise seizures, $20,189; decrease, $10,925.
War tax, $1,629,731; $7,950,902; increase, $6,321,171.
War tax fines, $3,014; $1,275; decrease, $1,739.
Methylated spirits, $40,152; $32,158; decrease, $7,993.
Law stamps, $441; $390; decrease, $51.
Exchange premium, $5.58; $11.03; increase, $5.15.
Casual revenue, $228; increase, $228.
Totals, $5,251; $11,374,290.
Net increase over August, 1919, $6,122,489.

More From Income Tax

The income tax will, it is expected, yield $35,000,000 in the current fiscal year, compared with $20,000,000 in the fiscal year ended March 31 last. The growth is attributed to the higher rates of taxation and to improved organization for their collection. Assessments will be made on November 1 and payable later. Numerous prosecutions which have been instituted against delinquents have had a salutary effect. According to figures which were given before a committee of the house last session, income tax returns made by the farmers, especially in the east, were almost negligible. This year there is a much more general response, and those who have failed to make returns are to be got after. Simultaneously with the Income Tax Collection Act steps are being taken to see that proper returns are made from the sales' taxes. This week thirty expert auditors are being appointed and distributed over the country to check up the returns made, and, if necessary, to go into the books of firms or individuals. An increase of $120,000,000 in excess returns is indicated on the strength of the showing up to September 1, but with the measures which are being taken it is believed that this will be considerably bettered.

Savings Certificates Sold

Seven months' sales of the new form of savings certificates total two and a half million dollars. The certificates, which replace the war certificates, are issued in denominations of $5 and up, yield the investor 5½ per cent interest and are obtainable direct from banks and money order post-offices.

Decennial Census

Arrangements for the taking of the decennial census of Canada in June of next year are almost completed. In the collection of the information respecting the population of the Dominion more than 12,000 enumerators will be employed. The results of their labor will be compiled and published. The Census Department, upon the basis of the average increases in population in the past 20 years, estimates the number of the country's inhabitants at about eight and three-quarter millions. That method of computation, however, is not considered infallible, particularly with respect to the western provinces. At the last quinquennial census of the prairie provinces, Saskatchewan showed an increase much greater than the normal or than had been estimated by the Census Department.

France needs many products, such as building materials, foodstuffs, machinery and other goods, which Canada has to sell, but the exchange rate and unfavorable customs regulations are keeping down the volume of trade which would otherwise spring up, in the opinion of Hon. Dr. Philippe Roy, Canadian High Commissioner to France, who is spending a short time in Ottawa. It is expected that one of the questions which he will discuss with the government during his stay here will be the drawing up of a new trade convention between France and Canada to replace that which was cancelled on June 19 of this year. Dr. Roy expressed the opinion that with an improved exchange rate and a favorable trade treaty France would soon be buying Canadian goods to a greater measure than she had ever done before.

Another Canadian Trade Commissioner, W. M. Clark, of Milan, Italy, is in Canada at present, and expresses himself as hopeful of the outlook for Italy.

NEW BOOKLET BY ROYAL BANK

"Canada's Possibilities" is the title of a new booklet issued by the Royal Bank of Canada, for circulation in the United States. It gives information on Canadian trade and finance, and shows the prospects for development and progress.

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station for the week ended September 10th:—

Nipissing Mine, 481,411; Coniagas Mine, 151,000; Beaver Mine, 60,000; LaRose Mine, 83,902; Hudson Bay, 62,640; total, 838,853. The total since January 1st is 18,033,281 pounds or 9,016.6 tons.

CONSOLIDATING GRAND TRUNK PACIFIC AND CANADIAN NATIONAL

Further reorganization for the purpose of consolidating the Canadian National Railway System, to include the Grand Trunk Pacific Railway, is now taking place. Under authority issued by the Receiver of the Grand Trunk Pacific Railway the jurisdiction of the following officials of the Canadian National Railways has been extended to include the Grand Trunk Pacific: R. C. Vaughan, assistant to the president; A. J. Mitchell, vice-president in charge of accounts and finance; H. H. [illegible], vice-president, in charge of operating maintenance and construction; S. J. Hungerford, assistant vice-president, in charge of operating, maintenance and construction; A. C. Hayes, vice-president, in charge of traffic; Gerard Ruel, K.C., general counsel.

The management of the Grand Trunk Pacific Railway by the Receiver has, by order-in-council, been vested in the board of directors of the Canadian National Railways, and W. P. Hinton, heretofore vice-president and general manager of the former company, becomes consulting officer to the Receiver with headquarters at Winnipeg.

BANK BRANCH NOTES

The Merchants Bank of Canada has opened a branch at South Hill, Vancouver, B.C.

W. E. King, manager of the Lethbridge branch of the Bank of Nova Scotia, has been transferred to Calgary, where he will be manager of the west end branch. B. M. McLeod, who comes from Guelph, Ont., will succeed Mr. King.

F. W. Clarke, manager of the Merchants Bank in Athens, Ont., has been moved to Montreal, Que.

W. H. Pratt, manager of the Molsons Bank at Owen Sound, Ont., has been transferred to Waterloo, Ont. W. Wallace, who comes from Morrisburg, will succeed Mr. Pratt at Owen Sound.

T. M. Turnbull, manager of the Canadian Bank of Commerce in Edmonton, Alta., has been transferred to the head office of the bank in Toronto. W. P. Kirkpatrick, who has been manager at Saskatoon, will succeed him in the Edmonton branch.

COLONIAL LOAN PLAN IS APPROVED

At a special meeting of the shareholders of the Colonial Investment and Loan Company, held in Toronto on Tuesday, the plan of capital reduction described in these columns last week was approved. Half of the preferred stock, of which $2,455,010 is outstanding, will accordingly be redeemed. A. J. Jackson, president and general manager, said after the meeting that the company's general policy would not be changed by the course now being adopted, except that the amount of money available for loans would merely be reduced by the amount of the quick assets now being used in reduction of capital, but that the ordinary business of making loans would be continued. One result of the adoption of the course taken would be to give shareholders a chance to use their money in other ways, including investments that under present conditions would bring a higher yield.

WEEKLY BANK CLEARINGS

The following are the bank clearings for the week ended September 16, 1920, compared with the corresponding week last year:—

	Week ending Sept. 16, '20.	Week ending Sept. 18, '19.		Changes.

BRITISH COLUMBIA HEALTH INSURANCE REPORT

Recommends Sick Benefit When Wages are Under a Specified Amount—Basis for Automobile Insurance Rates Now Uniform

(Special to *The Monetary Times.*)

Vancouver, B.C., September 10, 1920.

THE monthly luncheon of the Vancouver Fire Insurance Agents' Association took place on August 31. The relation between board and non-board companies was discussed at some length and a committee appointed to bring in a recommendation.

A "Get-together" luncheon of all insurance men resident in the three cities on the coast took place on September 7. The gathering was addressed by H. H. Stevens, M.P., the subject being "Canada's Obligations." Mr. Stevens pointed out that the indebtedness of the Dominion, the provinces and municipalities and the corporations was appalling when mentioned in dollars, and it was the duty of everyone to think seriously upon the subject, and endeavor to arrange his affairs so that he might stand up under the heavy burden.

The British Columbia Health Insurance Commission has at length reported to the government. It recommends the inclusion of a measure of compensation for disability due to sickness in cases where wages are under a specified amount, the funds to come out of general revenue. It has been pointed out that the merit or otherwise of this plan will depend upon the amount of wages specified.

It is evident, however, from the finding of the commission, that the evidence did not warrant the foisting of health insurance as advocated by the chairman of the committee on the British Columbia taxpayers.

Automobile Insurance Rates

The new British Columbia manual of automobile rates, effective September 1, is in the hands of the automobile insurance companies. The same basis for making the rates were adopted as now prevails throughout the continent. Vancouver and New Westminster have practically the same rates as Toronto, with the exception that 5 per cent. discount is allowed off property damage if loss of use is not required. Vancouver Island and all the rest of the province, outside of Vancouver and New Westminster, takes the same rates as central Ontario district.

A discount of 10 per cent. is given on trucks listed as trucks, off the old rates, for all districts, while for other districts than Vancouver a discount of 10 per cent. is given off the old rates for public liability and property damage on all commercial cars. Public automobiles remain about the same. Manufacturers' and dealers' cars remain the same. In fire and theft for Vancouver district, the rate for cheaper cars has been increased according to the age, and for more expensive cars it has been reduced, while the very low rate of 25 cents for nearly all cars continues for districts outside of Vancouver. This also applies to commercial cars.

The executive of the British Columbia Automobile Underwriters' Association are now considering for the first time special fire and theft rates for fleets of ten cars or more.

There are now over sixty companies in the association, and as the association has reduced rates to the lowest limit consistent with safety, the non-board companies are not a serious menace.

The similarity of the manner in which a number of different fires in business blocks in the city has resulted in an investigation being made, with the result that the provincial fire warden, Mr. Thomas, is of the opinion that the conflagrations have been started by a maniac firebug. Unfortunately, in each case, there has been no fire alarm system, or if there was one, it was not operating. The last two fires were started in the refuse in a dry-goods box in the hallway;

By Order of the Board of Directors

A. D. LANGMUIR,
General Manager.

Toronto, August 31st, 1920.

UNION OF QUEBEC MUNICIPALITIES' CONVENTION

Municipalities Being Checked Up on Sinking Funds—Some Have Borrowed Several Times for Same Work—Keep Expenditure Within Income, Says Provincial Treasurer

THE 1920 convention of the Union of Municipalities in the Province of Quebec was held in Montreal, September 6 to 8, with Mayor Joseph Beaubien, of Outremont, presiding. Mayor R. Prieur, of Pointe-aux-Trembles, secretary of the union, presented a review of the work of the union during the past year. He stated that the union had, among other matters, approached the government on the subject of the extension of the term of rural mayors from two to three years, and that while no definite promise had been given the government had agreed to give the matter most favorable attention at the next session. Another question which had been taken up, he stated, was in regard to the secretary-treasurer of municipalities. The law as it now stands provides that such official must have lived in his municipality for at least a year, and must be resident therein during his term of office, and it frequently happened that eligible men under these conditions could not be secured, so it is sought to eliminate the stipulation that such residence be essential.

G. E. Marquis, head of the provincial bureau of statistics, discussed the exodus of population from country to city, and Oscar Morin, deputy minister of municipal affairs, pointed out that Canada had the unfortunate distinction of having the highest paid per capita fire loss of any country in the world, and advocated a widespread campaign of education on the subject, including talks to the children.

Mayor Beaubien spoke on "The Platform of the Union." He dealt at some length with the importance of efficiency in municipal administration, and the valuable work of the union in encouraging and developing honest and efficient management of public affairs by municipal authorities. Every municipality, he said, ought to be like a corporation of which each citizen is a shareholder. The task of the municipal official was to see that the municipality was developed so as to render the citizens' interest in the city or town or parish the most profitable possible.

Every effort should be made to make the property in the municipality render the biggest possible profit to its owners. The development of the municipality should always have in view the need for industries in the community. No effort should be omitted which would encourage industry, and allow the manufacturer every chance to make the utmost legitimate profit. The object of the union was the encouragement and development among municipal authorities the most efficient and public spirited administration of public affairs. It was particularly important at this time, when municipalities were invited to borrow extensively from the government, to give attention to the need for careful administration. If that borrowed money was not efficiently administered, it would simply represent a further addition to already overloaded taxation.

The Housing Question

Mayor Bouchard, of St. Hyacinthe, pointed out that no one wanted to invest private capital in housing. In his own city, no one could be induced to build houses for rent. St. Hyacinthe had already appointed a housing commission and prepared the site of the proposed new erections, but no money was yet forthcoming from the provincial government. Mayor Bouchard insisted that the federal, provincial and municipal governments should all share in the loss entailed by building working men's houses. One third of the loss should be borne by a loan from these governments at a low rate of interest. In Belgium, where this system was practised, the rate charged was [illegible] per cent. and a movement was on foot to reduce it to 2 per cent.

St. Hyacinthe was willing to bear its share of the cost on these terms. If all houses were built by the municipality direct or by a municipally appointed commission, speculation would be [illegible]. He disagreed with Mr. [illegible] when the latter said private enterprise could do the work more cheaply than a public body. Experience in St. Hyacinthe had shown that the municipality could do such work more cheaply than contractors. If public authorities did not start building, the landlords in the country would start to force the rents up, just as they had been doing in Montreal, Mayor Bouchard concluded.

Municipal Finances Improved

Describing the work of the provincial department of municipal affairs, Oscar Morin stated that progress has been made during the past year towards regularizing the financial position of the municipalities, this being the main object for the creation of the department. During the year 32 municipalities had their financial positions regularized, that is, did what was necessary according to law and financial safety by creating sinking funds. Mr. Morin hoped that the number would be tripled this year, and that before long all the municipalities would be in proper financial position as to sinking funds, and other financial steps which the law requires.

Some questions of a legal nature were asked by delegates, but Mr. Morin said that the department was prohibited from giving legal advice. One of these questions came from the representative of St. Claire, where, it was pointed out, there was doubt as to what was to be done in regard to taxation of vacant land, which the owners wish valued at farm land valuation, though not farming the land in all cases. Such lands had been previously sub-divided and placed on the market. The new general law in regard to the passage of money by-laws brought criticism from some delegates, notably those from Three Rivers, the complaint being that it was often impossible to secure a sufficiently heavy vote to have a by-law passed. The law requires that 10 per cent. of the proprietors must vote. Mr. Morin admitted that the main reason for such a law was because some municipalities passed by-laws without the proprietors having been informed of them, and various schemes were put through in this way. However, said he, the legislature had amende the law to make it less onerous last session, and was ready to hear suggestions from the union for further amendments What was wanted was a proper system of publicity so that the proprietors would be informed of what was to be done

Keep Expenditure Down

Hon. C. R. Mitchell, provincial treasurer, advised th municipalities to keep their expenditures within their income—a policy which had been carried out with excellen results in provincial affairs. The department of municipa affairs was doing good work in guiding the municipalities he said. Many of their measures, he added, had been criticized. For instance, the law requiring the deposit of the sinking funds with the provincial government had been criticized, but he was convinced that it was the proper way They had a provision by which they could allow a municipality to deposit its sinking fund elsewhere, if they believe the proposal of the municipality was safe for the citizens but the object of insisting on the sinking fund being deposited with the government was to see that, when the tim came to wipe off a debt, the money was there to wipe it of with. That would prevent the experience of money bein borrowed time after time to perform the same work. He ha seen instances in the province of Quebec where sums up t $50,000 and over had been borrowed to construct the sam sidewalk three or four times over again. Equally wise considerations had caused the legislature to pass laws makin it difficult to pass borrowing by-laws. A tendency to reckless borrowing had made it necessary to pass such a law As regards bonuses to industries, he had seen municipalitie competing with each other as to who could attract a ne industry by offering greater bonuses than the others. Ye the number of industries brought up on bonuses which succeeded was very few. Hence the law preventing the granting of bonuses.

ONTARIO MUNICIPAL ASSOCIATION CONVENTION

Municipalities Have Great Responsibility in Hydro-Electric Enterprise—University Training for all Officials Recommended

THE 22nd annual meeting of the Ontario Municipal Association was held in Toronto, September 3 to 4. Mayor T. L. Church, of Toronto, in welcoming the delegates, dealt with the enormous investment in the hydro-electric system. He said in part: "We have over $100,000,000 invested in the provincial light and power schemes, and there are those in and out of the legislature who are using dark schemes to destroy hydro power and hydro radials. The big problem to-day is transportation, and if we had proper transportation our population in Ontario would be from 5,000,000 to 6,000,000. The big interests are opposed to hydro radials, and they have got the ear of the government and are misrepresenting our case. The Board of Railway Commissioners does not represent the people and the time has come to let the government know the feeling of the people. The increase in express and freight rates should be postponed a year at least."

Officers Should be Trained

S. Baker, of London, in his presidential address, lamented the decentralization in municipal government which had reduced the councils to mere tax-levying bodies. He suggested that the association again urge the provincial government to appoint a commission to report upon the municipal system. He said: "The new municipal act must work out a system which will provide intelligent council-controlled expert administration. No person should be appointed clerk, treasurer, engineer or assessor unless he has secured university standing in a faculty of municipal affairs of one of the provincial or other universities. Most of the municipalities have to pay for the training of their employees, and sometimes the appointees have not received sufficient general education to enable them to develop as they should, to successfully and efficiently discharge the duties of the office."

He suggested that the association appoint a committee to report to the next session of the association on the creation of a purchasing commission along the lines of the purchasing department of the Hydro-Electric Commission, and he moved also that the executive committee appoint and employ a competent person to watch and report upon all legislation affecting municipalities coming before the provincial legislature, and to provide expert professional advice for municipalities for such general purposes as may be deemed expedient.

Ald. Carter, of Guelph, read a paper on "The Experience of Guelph City Government." In Guelph the aldermen are elected for one, two and three years, and the council elect the mayor. The city clerk acts as city manager, and has the hiring of the heads of departments.

"If the Dominion Railway Board are to be convinced as to the unreasonableness of the increased telephone charges, it is necessary for municipalities to unite in opposing the application," declared Francis Dagger, when explaining the new rates to the convention. "The measured service is a Bell invention," he said. "The independent telephone companies in the United States have not adopted it. There are under Ontario jurisdiction 630 independent telephone systems."

Assessments and Franchise

A resolution was passed urging that the Assessment Act be amended, so that only freeholders, tenants and farmers' sons should vote.

Following an address by Dr. J. W. S. McCullough, provincial officer of health, E. L. Auly, Frontenac County, criticized the appointment of health officers, whose salary the municipalities have to pay, but over whose actions they have no control. "There is enough evidence in Portland township to discharge the whole medical department," he said.

CHARGES FOR STORING GRAIN

The Board of Grain Commissioners for Canada heard applications in Winnipeg on August 30th for increases in the charges for elevating and storing straight grain by terminal elevator companies. The board heard the applications in the morning, and in the afternoon took up all the proposed changes in the rules covering the handling of grain. It was announced that consideration will be given to all the evidence submitted, and that a decision would be given with the least possible delay. The commissioners remained in the city several days looking over the grain situation.

LOANS TO SOLDIER SETTLERS

Up to the end of August the Soldier Settlement Board of Canada granted loans to 19,181 settlers actually on the land. The amount of loans approved by the board is $76,530,675 for the following purposes: To purchase land, $41,638,827; to remove encumbrances, $2,151,275; for permanent improvements, $8,705,462; for stock and equipment, $24,035,111.

Alberta has 5,554 settlers actually established; Saskatchewan, 4,628; Manitoba, 3,170; British Columbia, 2,867; Ontario, 1,359; Quebec, 418; New Brunswick, 456; Nova Scotia, 387; Prince Edward Island, 282. Applications for qualification certificates have been received from 56,352 returned soldiers, and 40,820 have been qualified. The total amount saved to soldier settlers on the purchase of equipment is $390,607. This represents the difference between ordinary price lists and special prices granted to soldier settlers.

Up to sixth of September, 7,760 returned men have received free Dominion lands through the Soldier Settlement Board. A statement by the Soldier Settlement Board also shows that 268 soldiers have purchased school lands of an area of 62,672 acres. The board secured an arrangement with the governments of the three prairie provinces by which these lands become available for soldier settlement.

GUARDIAN ASSURANCE CO.

The report of the Guardian Assurance Co., of which H. M. Lambert, of Montreal, is manager for Canada, shows continued success. Following a growth of over $168,000 in premium income in 1918, as compared with 1917, the net fire premium income in Canada of the Guardian for 1919 amounted to $1,433,698, an increase of approximately $100,000. With one exception, this was the largest fire premium income received in Canada during 1919 by any other company. The loss ratio was 45.44 per cent. The Guardian has been operating in the Dominion for the past fifty years, or for about half of its entire history of one hundred years.

The fire premiums after deducting reinsurances show a growth of $1,148,270 for the year 1919 over 1918, and amount to $5,110,615 as against $3,962,350. The amount absorbed by losses totalled $2,342,520, figuring a favorable loss ratio of 45.8[illegible] per cent. The expenses of management, including fire brigade charges and commission, amounted to $1,912,495, being [illegible]7.42 per cent. of the premiums. The company applied the very generous sum of $255,904 towards the depreciation of securities, which amount has been provided for out of the profits of the year in the fire department.

The accident, burglary and general assurance departments have also made most satisfactory progress for the year under review, the premiums receipts amounting to $1,[illegible]1,278, show an increase of nearly $400,000, as compared with 1918. Losses were somewhat higher, figuring at 46 per cent. of the premiums, as compared with 40.14 per cent. in 1918.

The Central Canada Loan and Savings Co. has declared the usual quarterly dividend of 2½ per cent., payable September 30.

Safety and Profit

are all-important considerations in the selection of a depository for
a business reserve,
a sinking fund,
a personal account.

The UNION TRUST COMPANY'S resources and its conservative management establish the element of safety.

Its method of adding 4% interest regularly to the account gives a maximum return on the sums involved

Why We Need More Money!

Last year our rates for service were increased by ten per cent.

That was the first general increase in telephone rates in over twenty-five years.

To-day the general level of commodity prices is three hundred and fifty per cent over what it was twenty-five years ago.

Our operating expenses in 1919 had increased 99 per cent over 1915, while gross revenue was only 49 per cent greater.

Wages absorbed over 56 per cent of our revenue last year, and our wage bill this year will be at least 35 per cent higher than in 1919.

It is apparent that if we are to continue to pay good wages, and so ensure good service, and at the same time pay such a return to investors as will attract new capital to enable us to extend our plant, we must earn more money!

We must accomplish both of these things, else service to our present patrons will suffer and new applicants for service cannot be accomodated!

Increased rates are the only source from which such further revenue can come!

THE BELL TELEPHONE COMPANY OF CANADA

BUILDING PERMITS DECLINE IN JULY

Total Shows a Falling Away of Two Per Cent. as Compared with Previous Month, but an Increase of Forty Per Cent. as Compared with a Year Ago

BUILDING permits issued in fifty-six cities showed a slight decline during July, 1920, as compared with preceding month, the total value falling from $13,316,041 in June to $13,025,560 in July, a decrease of $290,481, or slightly over 2 per cent. Prince Edward Island, New Brunswick, Quebec, Ontario and Manitoba registered decreases in this comparison, the decline of $2,208,203 reported in Quebec being the largest. In Nova Scotia, Saskatchewan, Alberta and British Columbia there were increases in the value of the permits issued, that of $1,219,880 in Saskatchewan being the most noteworthy.

The following table, compiled by the Department of Labor, gives the details:—

DEPARTMENT OF LABOUR FIGURES CITY	June 1920	July 1920	July 1919

WHOLESALE PRICES AGAIN DECLINE IN JULY

Chief Decreases for the Month in Grains, Vegetables, Fish, Fruits, Textiles and Lumber—Increases in Livestock and Meats, Butter and Eggs and Coal and Coke

THE prices movement in July was marked by decreases in many lines of materials and by seasonal changes in foods, some of which were upward and some downward. The chief change in retail prices was in potatoes which declined considerably after the end of June as the new crop came on the market.

In wholesale prices the index number was again lower, falling to 346.8 as compared with 349.3 for June, 356.6 for May, 249.9 for July, 1919, and 134.6 for July, 1914. The chief decreases for the month were in grains, fish, fruits and vegetables, textiles and lumber, with increases in livestock and meats, butter and eggs, sugar, coal and coke, some building materials and some chemicals.

The following table, compiled by the "Labour Gazette," gives index numbers of wholesale prices by groups of commodities for July, 1920, as compared with previous periods:—

DEPARTMENT OF LABOUR FIGURES	No. of Commodities	Index Numbers			
		*July 1920	*June 1920	*July 1919	July 1913

PUBLICATIONS RECEIVED

Insurance Institute of Toronto, Proceedings for 1919-20.—This annual publication gives the addresses delivered before the Institute during the year, including that of the president, H. W. Crossin. The syllabus of examinations, examination papers and results are also given, and an index of papers read before the meetings since 1899. C. Elvins, Imperial Life, Toronto, is secretary.

Dominion Mortgage and Investments Association, Year Book, 1920.—The activities of the provincial associations as well as of the Dominion Association are covered in this report, which includes the addresses given at the annual meetings, etc. A review of legislation as affecting the investment institutions is given in an appendix. John Appleton, Canada Life Building, Toronto, is secretary.

Canada Year Book, 1919.—The 1919 edition of the Canada Year Book is a volume of 697 pages, including the index; it is published and distributed by the Dominion Bureau of Statistics, at $1. A special feature of this year's edition is the illustrated history of the war, 1914-18, with appendices showing the number of rewards for gallantry and honorable service granted to members of the Canadian Expeditionary Force. The official statistics as a whole are now being reorganized, and the 1919 volume shows improvements in those relating to education, trade and commerce, transportation and communication and finance.

Wrigley's British Columbia Directory.—The 1920 edition, which has just been issued, comprises 1,262 pages, the first 70 pages containing an early history of the province, the personnel of the British Columbia government, together with a list of all officials of the various departments of the government, both at Victoria and throughout the province, with short articles giving the jurisdiction of the various departments, and indicating the great resources of the province; the names of all Dominion government officials throughout the province are also given in this section, and the book contains scenes and views throughout the province, and also maps covering all automobile routes in the province. The gazetteer portion of the book deals with 2,149 separate and distinct cities, towns, villages and settlements in the province of British Columbia. This is an increase of 107 places over the 1919 issue.

Annual Financial Review, 1920.—Houston's Standard Publications, Toronto. Each year the literature of Canadian finance grows in volume, and the Annual Financial Review shows the expansion of financial information commonly required by those who follow the stock market. This is the 20th volume of this useful book and the information it contains regarding companies listed at Montreal and Toronto is, as usual, of a complete and reliable character. Latest annual reports are summarized, and, in addition, a survey of the course of securities on the exchanges on which they are listed is given, usually, for the past ten years. As a work of reference, it takes a high place. This year its value is enhanced by the addition of quite a few companies not yet listed, such as some of the newer paper concerns, some promising industrials seldom heard of, as well as the first balance sheet of the British Empire Steel Corporation.

The Budget and Responsible Government.—By Frederick A. Cleveland and Arthur Eugene Buck. MacMillan Co. of Canada, Toronto. 406 pp.; $3.50. "The budget system for governments has had its fullest and most successful development in Great Britain, and it has squared with the whole structure of government in that country," says W. H. Taft, ex-president of the United States, in an introduction to this book. "When, therefore, we attempt to adapt the results there obtained to our own case we are somewhat embarrassed by the constitutional differences between the British governmental system and ours." This book is, as its sub-title indicates, "a description and interpretation of the struggle for responsible government in the United States, with special reference to recent changes in state constitutions and statute laws providing for administrative reorganization and budget reform." After giving the historical background, it deals with proposed plans and recent legal enactments for administrative reorganization in state governments.

The Case for Capitalism.—By Hartley Withers. Eveleigh, Nash and Co., London, Eng. 255 pp.; 7s. The author of this book is already well known through his work in financial journalism and as the author of several books. In this book he outlines what has been accomplished under capitalism, in what respects it has failed, and suggests some remedies. "Individual freedom," he says in the preface, "initiative and enterprise have been the life-blood of the Anglo-Saxon race, and have made it what it is, pre-eminent among the races of the world because its men and women can think and act for themselves. If we throw away this heritage because we think that regulation and regimentation will serve us better, we shall do a bad day's work for ourselves and for human progress. And yet this seems to be the object to which many earnest and sincere reformers are now trying to lead us, when they ask us to accept nationalism of industry, or its organization under guild monopolies, as a remedy for the evils which are evident in our economic system. If they succeed, life will cease to be an adventure and will become a drill; the tendency to variation which, as science teaches us, is the secret of development, will be killed or checked, and we shall be standardized like government boots.

"This book is written to show that the greater output of goods and services on which material progress depends cannot be expected with certainty under any form of socialism that has yet been proposed; that capitalism, though a certain amount of robbery goes on in its back-yard, does not itself rob anybody, but has wrought great benefits to all classes; and that, if improved and expanded as it may be without any sudden change in human nature such as other systems demand, it may earn for us the great material advance that is needed to provide us with a better, nobler and more beautiful world."

In the course of the book Mr. Withers discusses the function played by capital and labor in production. State socialism, which is the antithesis of private ownership, he defines and describes, drawing a picture of its operation. Guild socialism and the guild program he finds equally unsatisfactory as a basis for radical change.

Canadian Annual Review.—By J. Castell Hopkins, F.S.S., F.R.G.S. Canadian Annual Review, Ltd., Toronto. 955 pp., with index; $6. Prefatory to this, the 19th issue, the author says: "Ever since the Review was started in 1901, I have felt that Canada had entered the 20th century with a pending and inevitable evolution into empire and world politics, and each of these 19 volumes has had a specific space allotted to this development; to-day, Canada is one of a group of British nations belting the world with a power for peace and progress which will be effective in just the degree which their spirit of Imperial co-operation warrants and as it makes for permanence."

The Canadian Annual Review is a comprehensive record of political, economic, educational and social developments in and affecting Canada. The special features of the present volume are the sections dealing with Canada's place in the Treaty of Versailles and in creating the League of Nations, the history and analysis of the farmers' movement in Canada, the record of the Prince of Wales' tour, the industrial and labor situation, and Canadian educational interests.

NATIONAL EXHIBITION AGAIN A SUCCESS

Attendance at the Canadian National Exhibition, Tor [illegible], which closed on September 11, totalled 1,152,000, ar [illegible] of [illegible] for the [illegible] days during which it was open. [illegible] reached the record figure o [illegible]

To the Shareholders
of
International Petroleum Company, Limited

NOTICE is hereby given that a company has been incorporated under the laws of the Dominion of Canada under the name of International Petroleum Company, Limited, herein referred to as the New Company, and that an arrangement has been made whereby the New Company will issue to the Preference shareholders of the International Petroleum Company, Limited, (Old Company), one Preference share of $5.00 par value fully paid up and non-assessable and one share without nominal or par value of its Common stock fully paid up and non-assessable in exchange for each Preference share of the Old Company, *and to the Common shareholders of the Old Company two shares without nominal or par value of its Common stock fully paid up and non-assessable in exchange for each Common Share of the Old Company.*

The New Company proposes to issue 1,804,534 shares without nominal or par value fully paid up and non-assessable of the New Company in exchange for 1,575,000 shares, (being the whole of the outstanding stock), of the Tropical Oil Company, a company incorporated under the laws of the State of Delaware and holding concessions from the Government of the United States of Columbia. The delivery to the New Company of 90% of the outstanding stock of the Tropical Oil Company has been assured and in the event of the whole of such outstanding stock not being delivered then a pro rata reduction will be made in the number of shares in the New Gompany to be exchanged for the shares of the Tropical Oil Company delivered to it.

Holders of Bearer Share Warrants who surrender their warrants to the International Petroleum Company, Limited, (New Company) at 56 Church Street, Toronto, Canada, or to the Farmers' Loan & Trust Company, 16-22 William Street, New York City, U.S.A., between the 15th September, 1920 and the 30th September, 1920, inclusive *will receive in exchange therefor Bearer Share Warrants on the basis of two shares of the New Company for each share of the Old Company surrendered*, in accordance with the terms aforesaid.

No Warrants for "rights" will be issued and shareholders who fail to exchange their old shares for the new shares within the time limit and in the manner aforesaid will subject these rights to forfeiture.

The books of the Company will be closed from the 10th day of September, 1920, to the 30th day of September, 1920, inclusive, and no Bearer Share Warrants will be split during that period.

Holders of Bearer Share Warrants are recommended to send their Warrants by registered mail insured as the Company is not responsible for Share Warrants lost in transit and duplicate Share Warrants cannot be issued.

By Order of the Board,

J. R. CLARKE,

[illegible]

56 Church Street,
Toronto, Canada.
23rd August, 1920.

DEBENTURES FOR SALE

$2,300,232.13

CITY OF OTTAWA, ONTARIO

DEBENTURES FOR SALE

Sealed tenders addressed to the "Chairman of the Board of Control," and marked "Tenders for Debentures," will be received by the City of Ottawa up to 3 p.m., standard time, on Tuesday, the twenty-eighth day of September, 1920, for the purchase of Debentures of the following amounts and terms:—

$ 85,307.31	10 years
357,562.68	15 years
448,362.14	20 years
1,409,000.00	30 years
$2,300,232.13	

All Debentures bear interest at the rate of 6%, and are issued on the instalment plan. That is to say each issue is repaid in such annual amounts that the aggregate amounts paid on principal and interest each year are equal. Each Debenture is, however, for a definite amount payable at the end of some year with interest coupons attached payable semi-annually. Interest is payable 1st January and 1st July.

The Debentures are an obligation of the City at large, are issued in coupon form, with provision for registration of principal, bear date 1st July, 1920, and are in denominations of $1,000.00, $500.00, $100.00, and odd amounts.

The City will make these Bonds payable either in Canada alone or both in the United States and Canada, as may be decided.

Debentures will be paid at the branches of the Bank of Nova Scotia at Ottawa, Toronto and Montreal, and, if payable in the United States, at the National Bank of Commerce, New York.

Tenders will be received as follows: (1) Bonds payable as to principal and interest in Canada; (2) Bonds payable both in Canada and the United States.

All tenders must be on the official form.

Accrued interest from the 1st July, 1920, must be paid in addition to the price tendered.

Tenders specifying for Debentures other than those herein described, or containing conditions varying from the above, will not be considered.

Delivery of the Debentures will be made as soon as the Debentures are printed and signed, upon payment of the purchase money.

A certified cheque payable to the City Treasurer for the sum of $10,000.00 must accompany the tender.

The highest or any tender not necessarily accepted.

Full particulars, together with further conditions and official forms of tender, can be obtained on application to the City Treasurer, City Hall, Ottawa, Ont.

HAROLD FISHER,
Mayor

NATIONAL RAILWAY SERVICE ON PACIFIC

The Canadian National Railways have completed arrangements for the inauguration of a trans-Pacific service under the flag of the Canadian Government Merchant Marine, Ltd. The trans-Pacific service is the result of an engagement with Messrs. A. Holt and Co., of Liverpool, who will be represented in the Orient by Messrs. Butterfield and Swire.

ECONOMIC ASPECTS OF IMMIGRATION PROBLEM*

More Population Will be Beneficial to Canada, Provided Careful Selection is Made—Change in Dominion Government's Policy

By H. B. Kearns,
Union Bank, Alexandria, Ont.

IMMIGRATION is the crucial economic factor in the progress of the Dominion, and to this vital question our government should bend due energies if our great Dominion is to rise to the level of her destinies and take her place among the great nations of the world.

The reason for this is that "every financial responsibility that has been assumed for the development of Canada, whether in pledging public credit for railways, for civic expansion, or for industrial enterprises, has been assumed on the expectation of a greater increase of population than the natural increase." The risk in such a policy is well shown by the events of five years. The venom in the snake has come to the surface, and in all truth it must be admitted that among the worst snakes in the nest were those in whom much confidence was placed, as evidenced in the recent "revolution" in Winnipeg. It is this Bolshevism, in fact, that has brought the problem of Canadian immigration sharply to the fore. Consequently, the Department of Immigration and Colonization has adopted the principle of "quality rather than quantity."

The immigration policy which Canada is pursuing is easily explained and just as easily justified on economic grounds.

More Farmers Greatest Need

In the first place, there must be clear recognition that there are two requirements, producing classes and laboring classes. Canada must attend to the first before she can justify attention to the second. There are in this country unlimited production possibilities in the vast areas of unoccupied agricultural lands. Only a small percentage of this arable land is taken up. To extend the area of cultivation is the prime necessity. To make these lands productive it is necessary that there should be a great increase in the producing population working on the soil. When this is accomplished and not until then, will there be increased demand for industrial classes, whose support is mainly due to the producing population. Hence Canada's immigration policy is directed mainly towards the securing of prospective farmers and those who anticipate living by farm labour.

Before dealing with immigration to Canada from an economic or historical standpoint it may be well to study the latest statistics of our good agricultural lands, that we may have an idea as to the possibilities of Canada extending her producing element.

Plenty of Available Land

There are estimated to be 40,000,000 acres of land suitable for agriculture in the province of Quebec. Only 16,000,000 acres are occupied, and only one-half of this is under cultivation, or one-fifth of the total. The maritime provinces have 20,000,000 acres suitable for agriculture and 11,000,000 under cultivation. Ontario has 50,000,000 acres of agricultural lands, has 25,000,000 acres of it occupied and 14,000,000 cultivated. Manitoba has 40,000,000 acres of farm lands and raises crops on one-quarter of it. Saskatchewan (the greatest wheat producing province in the Empire) has 58,000,000 acres of land for farming; her settlers have taken up 30,000,000 but have only 11,000,000 acres under cultivation. Alberta, with the largest agricultural area of all the provinces, 82,000,000 acres, has assigned 20,000,000 acres, and of this 4,000,000 acres are under cultivation. British Columbia, with 25,000,000 acres of farm and fruit lands, has 5,000,000 acres occupied, but only one third of this is actually under cultivation. Thus it may be seen that the provinces are cultivating only three twentieths of their available [illegible].

The question, from the standpoint of density of population, may also be considered. Canada has fewer than two persons per square mile. What of England and Wales? Over 600 to the square mile! In the United Kingdom there are 375, in Austria 246, in Hungary 166, in Belgium 650, and in Germany 310, to the same area. Of course these figures refer to the period before the great war. The recent ravages of war will materially change them; but even with the necessary deductions the comparisons will remain striking.

Quality is Now Emphasized

These figures disclose that immigration is a matter of immediate interest to all Canada. A sane and healthy immigration policy is of vital importance from coast to coast. There is truth in Rudyard Kipling's statement that Canada's greatest need is to be supplied by pumping in the immigrants. Then, the vital question is where must she extend her supply pipes to obtain desirable immigration. There is no doubt that a great flood of immigrants could be precipitated by simply throwing the doors wide open, but it is believed that the policy of the Department of Immigration in insisting that Canadian citizenship is a privilege to be enjoyed only by those best qualified expresses the wish of the Canadian people, and is the surest, if not the most rapid form of nation-building.

Canada is receiving from sources which she regards as highly satisfactory—the British Isles and the United States. This double stream kneads quickly into Canadian national life. Each part of it is desired. Americans of the farmer class are immediately useful immigrants. They enter the country singularly well equipped. These men know good land when they see it. They come in with experience and often with a considerable amount of money gained where physical conditions strongly resemble those of their new country. They can afford to wait the short time that must pass before they can harvest their first crop—and they know from the beginning the difficulties to expect.

Some Canadians, by the way, are suspicious lest the enthusiasm of Americans for Canada may develop for annexation. To me this fear seems groundless. In general, the newcomers are far too busy with their private affairs to spare time for politics on the grand scale.

British vs. Foreign Immigration

The British are Canada's most desirable immigrants. This is incontestable, though far be it from us to disparage the excellent qualities of many of our foreign settlers. The Empire's task is to find within the Empire the proper places for all its peoples. This, until recently, she has failed to do. Statistics show us that at the beginning of the century only 20 per cent. of British emigration was going to British countries. In a score of years this proportion has risen to approximately 90 per cent., with Canada having become the chief hope of British statesmen in that regard. The need for strengthening the ties that bind Canada to the mother country is shown by the contrast that is drawn between the feeling of Englishmen in Canada and in Australia. In Australia, he finds the prevailing accent is that of London. He hears England freely spoken of as "home." He finds no large element of Republicans. In Canada a different spirit prevails. Loyalty is mixed with independence. Canada needs England, but she will not cease being Canada on any terms. Canada's chance, then, is to expand her immigration from Great Britain, which, owing to excessive pressure of population, means not Scotland or Ireland, but England.

Notwithstanding the expectations for the restrictions of immigration from the Orient, certain classes of immigrants, in particular British East Indians, were being induced to come to Canada under circumstances which necessitated our refusal of their admission. Experience has shown that immigrants [illegible] conditions are wholly unsuited to this country, and that their inability readily to adapt themselves to new surroundings inevitably brings upon them suffering and [illegible] such immigration allowed to reach any [illegible] it would result in a serious

disturbance to industrial and economic conditions in certain portions of the Dominion.

Such an effective restriction of immigration is desirable, therefore, not less in the interests of the East Indians themselves, than in the interests of Canadians. Moreover, the whole subject of Oriental immigration is one of first concern to Canada, and affecting, as it does, the relations of the Dominion with foreign powers, and the relations of our people with British subjects of India, involves considerations of the highest importance, not only to Canada, but to the Empire. Then, it is desirable that on this important question there should be as complete an exchange of views between the authorities of India and the governments of Great Britain and Canada as may be possible.

The Hindu immigrant presents a complicated problem by the fact that immigrants from India are fellow-British subjects. Will Canada as a loyal colony injure the power of the mother country by offending the Hindu, and thus deepen their hatred for the British? Canada tried to solve this problem by providing that the Hindus could not enter Canada unless they came direct from India, there being no direct steamship line to bring them; but in 1914 a body of some 350 sikhs tried to meet the issue by sailing direct from India to Vancouver in the Japanese steamer "Komagata Maru," led by Gurdit Singh. They arrived on May 23, but were forbidden to land. For several weeks they lived in their ship in the harbor. They tried several schemes to land but these were abandoned. On July 13 the Court of Appeal decided that they could not enter Canada. But this is not expected to be the last of the Hindu efforts to enter the Dominion. However, recent legislative enactments and regulations in force have partly offset the difficulties. The authorities of India have issued warnings whereby the natives have become informed of the risks involved in emigrating to Canada, and the actual conditions in so far as it is desirable that such should be known to persons about to sever their connections with one country for the purpose of taking up residence in another.

Many Defectives Admitted

In spite of strict immigration laws, the Department of Immigration has been unsuccessful in prohibiting large numbers of defective immigrants from invading our Dominion. If you are familiar with the results of the investigation by C. K. Clarke, M.D., Medical Director Canadian National Committee for Mental Hygiene, you will agree with me that the supply pipes should not have been allowed to tap streams reeking with insanity, crime and degeneracy. When an analysis was made of the criminality, prostitution, illegitimacy, poverty, etc., it was shown that if the defectives were carefuly eliminated these problems would be so simplified that crime and vice could no longer exist. When making an analysis of the figures at hand it became apparent at once that the inspection at the ports of debarkation had been a failure and numbers of children whose defects would have been detected by a capable tyro in psychiatry, have passed the so-called tests with success, and consequently the country has been forced to assume the maintenance of large numbers of people to whom no obligation is due.

However, "there has been a radical change in Canadian immigration," states Hon. J. A. Calder, in the March issue of the "Courier." So successful have been the immigration officials in their efforts to protect Canada from undesirable immigrants that in 1919, 20,708 persons seeking admission into the Dominion were turned back.

Total immigration to Canada for 1919 totalled 11[illegible], an increase of 67,[illegible] over 1918, or 1[illegible] per cent. Of these, [illegible] were British, 52,0[illegible] Americans and 8,318 from other countries. These figures harmonize with the views of Canadian immigration schemes, that is, to have the bulk of immigration from Great Britain and the United States. If we continue to pledge ourselves to such a policy, we might look forward to the time when Canada will be, as Lord Grey predicted, "Canada the centre of the Empire; the leader of Britannic Nations."

SASKATCHEWAN WATER SUPPLY

Seven million dollars is the minimum cost at which the southern part of the province can be supplied with water from the South Saskatchewan River. This is the estimate of the Saskatchewan Water Supply Co., and is based on a wood stave pipe line being used. If a concrete pipe line is adopted the cost will be eleven million dollars. Should it be found necessary to adopt this type of construction to make the scheme a success, it would be financially impracticable at the present time, according to Major A. J. McPherson, chairman of the commission. A steel pipe line would cost thirteen million dollars.

SASKATCHEWAN FARMERS FINANCED

About five hundred Saskatchewan farmers, who, owing to crop failure, were unable last year to meet their notes given for lumber and agricultural implements, or to pay the interest or principal falling due on their real estate mortgages, were protected by the provincial government. The government interceded with their creditors and secured extension of credit for them. This was made public recently by Edward Oliver, secretary of the bureau of statistics, of the Saskatchewan department of agriculture, who was designated by the government to handle this work.

TRUSTEES UNDER BANKRUPTCY ACT

The following have been appointed authorized trustees under the Bankruptcy Act: Nova Scotia, G. E. Faulkner, Halifax. Ontario, S. J. Fream, Toronto; J. M. Johnston, Cornwall; H. Rowlatt, Toronto; R. E. Burns, Kingston; P. W. Raymond, London; A. B. Lee, Woodstock. Quebec, J. O. Bonnier, Montreal; A. B. Brodie, Montreal; the Bankers' Trust Company, Montreal; A. Desmarteau, Montreal; T. Y. Foster, Montreal; H. M. Gardner, Montreal; F. R. Paquet, Montreal, and H. Bisson, Three Rivers. Saskatchewan, Executors and Administrators' Trust Company, Limited, Moose Jaw. Alberta, J. G. Edgar, Calgary. British Columbia, R. M. Ellis, Vancouver.

PLANS FOR BRITISH EMPIRE EXHIBITION

Preparations are being made for an exhibition to be held in London in 1923, to celebrate the achievements of the British Empire in the war. The proposal to hold an inter-imperial Exhibition in London was initiated by Lord Strathcona about a year before the war, on the outbreak of which the matter fell into abeyance. Since the cessation of hostilities, however, the scheme has been revived, and at a meeting held at the British Empire Club, under the auspices of the British Empire League, on the 20th May, 1919, attended by Ministers, High Commissioners and Agents-General of the Overseas Dominions, a unanimous resolution was passed in favor of holding in London, in the summer of 1921, a great exhibition of the manufactures and products of the Empire.

Since that time a [illegible] of preliminary work has been done, but [illegible] that an exhibition on the [illegible] before 1923. The project [illegible] of the Imperial government, who [illegible] to parliament a special [illegible] in the guarantee fund. [illegible] yet been definitely fixed, but the [illegible] is being carefully considered. The [illegible] being organized for profit; [illegible] at its close will be de[illegible]t. It will be financed by [illegible] banks on the security of [illegible] government have agreed, [illegible] to contribute £100,000.

LIMITATION OF SECURITY BOND

Amount Specified is Intended as a Protection to Bank, Not a Prohibition Against Advancing More

IN a recent case before the Supreme Court of Ontario the court had occasion to interpret a bond given by two men, Mills and Howell, to the Dime Savings Bank to guarantee payment of loans to a company which they were organizing, and also to determine the liability of the guarantors according to the terms of the bond. The bond was conditioned as follows: "Now, therefore, for value received, we, the undersigned, Lawrence C. Howell, of Galt, Ontario, and Thomas Mills, of Kingston, Ontario, hereby, jointly and severally, guarantee the payment of any and all sums of money which may at any time hereafter be owing and payable by Stearns-Knight Detroit Co. when organized to said bank, not exceeding six thousand dollars ($6,000) at any one time, upon notes, acceptances, endorsements, overdrafts to be made by said corporation when organized or upon any account whatsoever.

"Acceptances of this guarantee, notice of default, renewal or extension of time of payment of any part of said indebtedness, any releases thereof, addition thereto, or change or other form of security are hereby waived and agreed to.

"This guarantee is a continuing guarantee, covering all indebtedness of said Stearns-Knight Detroit Co. when organized to said bank, not exceeding six thousand dollars ($6,000) at any one time upon any account whatsoever until revoked by notice given to said bank."

Judgment of the Court

In their judgment their lordships say:—

"The first recital set out that the corporation 'wishes and expects to borrow . . . divers sums of money from time to time, not to exceed $6,000 at any one time, upon notes, endorsements, acceptances and any account whatever.'

"The second recital reads that the respondents agreed 'to loan to the said corporation, sums of money, from time to time as above stated, not exceeding $6,000 at any one time, upon notes, acceptances, endorsements, overdrafts, etc., made or endorsed or upon any account whatsoever provided that the payment of the said loans be guaranteed by the undersigned.'

"Two points are raised: first, that the recitals govern the operative parts of the bond, so that the appellants are not liable if at any time the respondents had advanced more than $6,000; and second, that the agreement between the respondents and the company contained in the guarantee, being the basis of the appellants' liability, could not be departed from, and if in fact more than $6,000 was, at any one time, due to the respondents, the bond was void.

"Both these objections amount really to the same thing, as each suggests that the bond, when properly construed, prevented the respondents from exceeding the limit of $6,000 at any one time.

Limitation of Bond

"In my opinion, the bond primarily contemplates direct advances to the company up to $6,000 to enable it to begin operations and finance them. It was, I think, contemplated that in the course of business customer's notes for purchased motors might be discounted by the company, and thus an addition to the $6,000 would be created. This would be natural, while a limitation of the advances upon the company's own notes or endorsements for plant or operating expenses, etc., might well be insisted on from motives of prudence. The real meaning of the guarantee seems to be expressed in the last paragraph of the bond, where it is said that the guarantee is to be a 'continuing guarantee covering all indebtedness (of the company) to said bank, not exceeding $6,000 at any one time upon any account whatsoever.'

I read this as meaning that the sureties were, notwithstanding renewals, extensions, additions or changes, to be liable 'on any account whatsoever' only to the extent of $6,000 at any time, and that when they chose to revoke by notice they could do so, their liability being then fixed by the limited amount. The limitation of $6,000 is intended as a protection to the bank, not a prohibition against advancing more than that amount."

SUIT REGARDING STEEL RAILS

A suit involving several million dollars, the point at issue being the value of steel rails which the Dominion government, under the authority of the War Measures Act, compelled the Dominion Iron and Steel Co. to roll during the war period for the use of Canadian railways, is being heard by the Exchequer Court of Canada, at a sitting which opened on September 7. The amount involved is $8,727,617, less cash already advanced to the extent of $5,500,000. This makes the actual amount in dispute upward of three and one-quarter millions with interest.

The amount of rails rolled under the government's order was something in excess of 100,000 tons, for which the company seeks payment at the rate of $75 per ton. As the government considered the price too high, provision was made by order-in-council for a reference of the dispute to the Exchequer Court. The rails were delivered under the government order to the Grand Trunk, Canadian Pacific and other roads. These railways have been made parties to the proceedings before the Exchequer Court, the purpose being to have the court declare that the railways must pay for the rails received the amount the court finds to be fair and reasonable.

WITHDRAWAL FROM JOINT ACCOUNT

Action of Helen Grannen, niece of the late Owen Shortill, of North Devon, N.B., in drawing $1,200 from their joint account at the Bank of Montreal, after the death of Shortill, is being contested in court by Frank Shortill, son of Owen Shortill, who inherits the whole estate under a will. The hearing was concluded on September 9, and Chief Justice Hazen reserved judgment. The late Owen Shortill in making his will about 1906 left all his property, personal and real, to his son, the plaintiff in the case. About six years ago the deceased and his niece opened a joint bank account at the Bank of Montreal, in Fredericton, and after the death of the deceased Miss Grannen drew out the deposit which amounted to about $1,200. The plaintiff claims that he was entitled to the money and brought action for the purpose of obtaining it.

DOMINION TRUST LIQUIDATION

On August 21 J. C. Gwynn, liquidator of the Dominion Trust Co., obtained the consent of the shareholders of the old company, the Dominion Trust Co., Ltd., to a settlement. The sum of $25,000 out of $26,000 already collected by Mr. Gwynn from shareholders of the old company is to be handed back, and the liquidation of the old company is to proceed voluntarily. Calls of $67,000 on shareholders of the old company and $35,000 on shareholders of the new company are to be paid.

A settlement was also made of the litigation between J. W. Oxley, one of the largest English creditors, and the liquidation. The settlements will clear the way and enable Mr. Gwynn to apply to the courts for leave to pay a dividend to the creditors and depositors of the Dominion Trust company out of the moneys he has realized.

Some useful "Notes on the Dominion Bankruptcy Act" have been published in the form of a 20-page pamphlet, by Salter and Arnold, Ltd., assignees and liquidators, of Winnipeg and Regina.

News of Industrial Development in Canada

Dominion Steel Building up European Market—Large Shipments of Plate Made to England for Distribution on the Continent—Opportunities for Building up Linen Industry Here are Good—Newfoundland Pulpwood Resources to be Developed—British and Norwegian Capitalists are Interested

SHIPMENTS of steel to England are now being made by the Dominion Iron and Steel Company, subsidiary of the Dominion Steel Corporation, according to an announcement from Sydney, N.S. Cargoes of plates manufactured at the recently erected mill at the local works have been shipped to London and Leith, via Montreal, for distribution on the continent. Birkenhead, one of the leading shipbuilding centres of the British Isles, has received a consignment, and an order has also been delivered at Glasgow, Scotland.

These shipments, it is stated, are not chance orders, but comprise large shipments of plates, and in some instances repeat orders have followed the initial order. The company hopes to continue exports of this kind for an indefinite period, because the demand for steel in Europe is so great, and as a result, the company has deemed it expedient to again operate the Bessemer plant. That department is now being prepared for business and will probably be in operation next month. While building up a European market, the company is not neglecting the home trade, large shipments having been made regularly to Halifax and Montreal, for shipbuilding purposes.

While in Montreal recently, Roy M. Wolvin, president of the Dominion Steel Corporation, made the statement that plenty of orders are ahead of the company. He said that the steel works at Sydney are at present very prosperously employed, and are working to full capacity. He referred to the production at the coal mines as disappointing.

Opportunities for Linen Industry

For the purpose of marketing six thousand tons of flax fibre and two hundred thousand bushels of fibre flax, R. J. Hutchinson, flax expert of the Dominion Government, is now in Europe. The flax crop in Canada is reported as being exceptional, and it is estimated that 30,000 acres of land were placed under cultivation this year, as compared with 18,000 in 1919.

A representative of the Brookfield Linen Company, Belfast, Ireland, has been investigating the possibilities of the linen industry in Canada, and it is intimated that the firm will commence to grow flax in Quebec, and if this is successful, build a spinning mill. The Federal Flax Co., Ltd., recently incorporated for $250,000 in Montreal, will grow fibre flax in Quebec and build a mill.

Develop Newfoundland Pulp Resources

Development of the large pulpwood resources of Newfoundland is about to be undertaken under grants to two pulp and paper companies made at the last session of the legislature, according to announcement from St John. One of these companies is British and the other Norwegian

The mills of the British concern will be located at Bonne Bay, halfway up the west coast. This port is the centre of the winter herring fishing activities. In its vicinity are large areas thickly wooded with spruce and fir, through which flow rivers which will afford good water power as well as facilities for floating logs. Bonavista Bay, on the east coast, is to be the site of the Norwegian company's mill. Codfishing at present is the great industry there. Backward from the bay runs a series of well wooded valleys, drained by rivers of good size.

At present the only pulp and paper mills on the island are at Grand Falls, in the interior, where the Anglo-Newfoundland Development Co. some years ago established an extensive plant which supplies the Northcliffe papers in England with most of their paper. Before the war capitalists were negotiating for other similar projects. The extensive timber holdings of the Reid-Newfoundland Co., obtained as part of their compensation from the government for opening up a large part of the colony with a railway line, also are expected to be utilized for pulp-making in the near future. Still another project in contemplation is the establishment of paper and pulp mills, saw mills and veneer mills for the manufacture of birch into boxes and barrels, at St. George's, on the west coast.

The company promoting the St. George's enterprise is composed of British and American capitalists, who control 1,500 square miles of timberland in that vicinity and 1,000 square miles bordering on Grand Lake, the largest body of water in the colony. The upper end of the lake has direct retail connection with St. George's.

Coast Trade Prospects Good

On his return from the Pacific coast, Hon. C. C. Ballantyne, minister of marine and fisheries for Canada, was optimistic as to the trade outlook of that part of the country.

Of the export trade from British Columbia, Mr. Ballantyne expressed the opinion that it is only in its infancy. The government, he said, are at present running ships from Vancouver to Australia and New Zealand, and also to the United Kingdom. These ships so far have had no difficulty in obtaining large cargoes both ways. The Canadian Government Merchant Marine, which is the operating company, will put on a line to India on November 1. They have also under consideration running ships from British Columbia ports to West Africa, to South America and the West Indies. The government, when all their ships under construction on the Pacific coast are completed, will have sixteen ships in commission of 120,000 net tonnage, and these ships will all be operated from British Columbia ports.

New Ford Factory in Montreal

A five million dollar automobile factory will shortly be established in Montreal by the Ford Co. Arrangements for that purpose are now being made.

The plant of the British-American Shipbuilding Co., Welland, Ont., will shortly be closed down permanently. The "Canadian Squatter," which is now being finished to the order of the Dominion government, will be completed by that time and will be towed to Montreal for assembly. The plant will be sold and the buildings and machinery will be removed. When the shipyard was working at full capacity, there were 570 men employed, but latterly there have been only 150 on the payroll.

The minister of lands for British Columbia announces that in order to encourage the establishment of more pulp mills in the province, the government may cut in half the timber license fees on areas better suited to pulp and paper than to lumbering. The section of Prince George is believed to be one that will benefit very largely from this concession. French and United States interests have been obtaining information with a view to establishing pulp mills in this area.

Good progress is reported by the Fort William Paper Co., Ltd., recently organized, whose new mill at Fort William is now under construction. The unit being built is a ground wood mill, with a capacity of 120 tons of groundwood per day. Later, the company will erect paper mills, installing at first a couple of machines to turn out 100 tons a day.

The Matane Lumber and Development Co., Quebec, Que., owned by O'Brien and Doheny, has sold all its assets, real and personal, to the Hammermill Paper Co., of Erie, Pennsylvania. The deal, which involves a price of several millions of dollars, was completed last week in Montreal. The timber

Miscellaneous Trade Notes

Construction on the new factory of the Imperial Steel and Wire Company has commenced at Collingwood, Ont. The new building will be much along the same line as that which was burned in May, 1919, only more extensive, and it is stated that the output of the new plant when completed will be 200 tons of wire products per day.

Plans for a big pulp mill on the Queen Charlotte Islands are being prepared by the Masset Timber Company, of Masset, B.C. The company's output of logs totals 10,000,000 feet per month.

Within two months Baldwin's Canadian Steel Corporation, now operating at Ashbridge's Bay, Toronto, hope to have eight mills in operation at their plant, according to Sir Charles Wright, who has just left for England after a visit here. He stated that the company had assurances of sufficient electrical power to run the eight mills, and had a further assurance from Sir Adam Beck that in another year there would be power enough to supply any extensions the Baldwins might make.

With a capitalization of $3,000,000, the Ruggles Motor Truck Company, Limited, has been incorporated. Property on Dundas Street, immediately east of the McCormick factory, London, Ont., has been purchased, and it is expected that tenders will be called for the new building within twenty days. The plans are now with the company's architects. As soon as possible the building will be commenced. In the meantime temporary quarters are being secured and manufacturing will start almost at once. Already the company has sufficient export orders on hand to keep the London factory running full time for one year.

Three assembling plants will be erected in Canada by the Ford Motor Company, involving an expenditure of about $5,000,000. Already a site has been selected for eastern Canada at Lancaster, N.B.

POST OFFICE SAVINGS BANKS

Deposits in the Post Office Savings Banks during April, 1920, totalled $537,316, as compared with $682,979 in the previous month. Withdrawals for the month amounted to $1,211,708, thereby reducing the balance to the credit of depositors from $31,605,594 at the end of March, to $30,940,461. The following is the statement:

LIFE INSURANCE SERVICE

THE ultimate success of a Life Insurance Company depends largely upon what its policyholders think of the service they receive. The Continental Life has long since passed this test, and earned a high reputation for paying claims promptly. 1920 will likely prove the best year in the Company's history. Write for booklet. **"Our Best Advertisers."** For Managers' positions in Ontario apply with references, stating experience, etc., to **S. S. WEAVER, Eastern Superintendent, at Head Office**

STRIDING AHEAD

These are wonderful days for life insurance salesmen, particularly North American Life men. Our representatives are placing unprecedented amounts of new business. All 1919 records are being smashed.

"Solid as the Continent" policies, coupled with splendid dividends and the great enthusiasm of all our representatives tell you why.

Get in line for success in underwriting. A North American Life contract is your opening. Write us for full particulars.

Address E. J. Harvey, Supervisor of Agencies

North American Life Assurance Company
"SOLID AS THE CONTINENT"
HOME OFFICE - TORONTO, ONT.

1870 —— OUR GOLDEN JUBILEE —— 1920
Co-Operative - Scientific - Successful

"How did the Mutual Life of Canada succeed in attaining its present impregnable position in the financial world?" It may be replied that the promoters of the Company did not organize it as a commercial undertaking, but that it might serve as a public benefactor giving "the largest amount of genuine life insurance for the least possible outlay." Unselfish devotion to the success of the enterprise supplied the place of capital. Although strictly co-operative or mutual, yet the Company has been built up on a scientific basis as an old line legal reserve life insurance company. The Mutual Life of Canada is a beneficent idea worked out on scientific lines—that is the secret of its popularity. The Mutual being essentially a company of policyholders, conducted by policyholders in the interests of policyholders, naturally became a great success.

BE A MUTUALIST!

The Mutual Life Assurance Co. of Canada

News of Municipal Finance

Toronto Assessment Increased More than Sixty Millions—Land Valuation Shows Largest Advance—Exemptions also Greater—London Treasurer Suggests Municipal Insurance Scheme for City—South Vancouver Tax Collections Improve

Milton, Ont.—The tax rate has been struck by the town council at 31 mills, which is 2 mills below last year's rate.

Hull, Que.—The assessed value for taxation in the municipality for the coming year is placed at $11,308,105, as compared with $9,641,127 previously, an increase of $1,666,978.

Vancouver, B.C.—A proposal to collect a personal property tax in the city and have the government discontinue the levying of that tax in the municipality, will be considered by the civic finance committee.

Winnipeg, Man.—Over 79 per cent. of civic business taxes have been collected to date this year, as compared with about 66 per cent. for the same period last year. The levy this year is $431,915, and of this amount $342,211 has been collected. Last year the levy was $376,436, and the amount collected was $234,617.

London, Ont.—In its fifth year of municipal operation, the London and Port Stanley Railway had a surplus of $23,186, after debentures were retired to the amount of $20,509, and $20,000 in rent had been paid to the city council, according to the annual statement issued by the city auditors. This result is considered satisfactory, in view of the wage advances during the year.

Gross earnings amounted to $582,651, as compared with $499,656 in the previous period. Operating expenses, however, advanced from $350,740 to $438,103.

South Vancouver, B.C.—Tax collections this year to the end of August amounted to $1,010,308, as compared with $500,233 for the same period in 1918. Included in the figure this year, are the provincial government's contribution to the upkeep of the schools and an amount paid in for the redemption of tax sale property, which must be paid out again to tax sale purchasers, so that the actual taxes and rates collected total $807,911, of which $625,395 is for current taxes. Since Commissioner Gillespie took charge of the affairs of the municipality in May, 1918, tax collections have shown great improvement, as illustrated by the above figures.

Alberta.—Some interesting figures, compiled by J. H. [illegible], deputy minister of municipal affairs for the province, show that the province has an area of 255,285 square miles, or an acreage of 163,382,400 acres or about 300 acres for every man, woman and child in province. Of this 85,147,816 acres were surveyed up to 1920. That part of the province is analysed by the Dominion authorities into the following parts: Timber license area, 1,352,100 acres; grazing leases, 2,902,400 acres; forest reserve and parks, 16,754,700 acres; reserve for forestry purposes, 1,677,500 acres; road allowances, 1,276,500 acres; water-covered lands, 2,285,000 acres, or a total of 26,249,200 acres taken up in this manner and leaving a net total of 58,898,616 acres for settlement.

Of the 58,898,616 acres that are left for settlement, the Hudson's Bay Co., the Irrigation Companies and railway companies control 16,192,861 acres. There are 27,610,416 acres included in the municipal districts and taxed by them, while 8,940,018 acres are taxed by the department of municipal affairs, being in the unorganized districts. This makes a total of 36,550,434 acres, and the Dominion government accounts for 15,000,000 acres held for homesteading. So when it can be estimated just what acreage is included in the cities, towns and village sites, a fair deduction can be made as to just what amount is actually held by the Hudson's Bay Co., the irrigation companies and the railway companies in the entire province.

Toronto, Ont.—An increase of $61,897,195 in the city's assessment for 1921 is shown in the unrevised statement which has just been made public. Total assessment of all eight wards amounts to $703,351,351, as compared with a valuation of $641,451,156 made last year. There was also a slight increase in exemptions. The unrevised statement shows the following results:—

	1920.	1921.	Increase.
Total assessment ...	$641,451,156	$703,351,351	$61,897,195
Land assessment	294,675,927	315,660,799	20,984,872
Building assessment .	263,563,880	253,665,093	17,101,213
Business assessment .	69,189,511	78,404,872	9,215,361
Income assessment ...	41,024,838	55,620,587	14,595,749
Exemption	92,916,595	98,271,202	5,654,607

The above statement will probably show some changes when revised, but not to any great extent. As in other Ontario cities, income assessment will be reduced, as a result of the legislation passed this year, raising the exemption allowance of heads of households from $1,700 to $2,000, and of single persons from $700 to $1,000, and a further exemption of $200 per head for dependent children under the age of eighteen. It is stated that this will not make a vast difference, as the assessors have already made the necessary allowances on income, except in the cases of children in three of the wards.

London, Ont.—On account of overcharges this year, owing to the fact that the city assessment was nearly completed before the recently enacted provincial amendment to the municipal income tax law went into effect, a rebate will have to be made next year to the citizens which were affected. Statements of taxes due were made out before the passing of the amendment, and to prevent delay in collection of taxes with consequent large interest bills for the city, the council instructed the assessment commissioner to carry on with his tax notices under the local assessment by-law for this year. This same method has been adopted by other municipalities, and will save considerable trouble and expense.

City Treasurer Bell is of the opinion that the city should seriously consider the question of adopting a municipal insurance plan. "Approximtely $10,000 yearly is paid out in premiums by the city," he said. "Now if the city were to set that same amount aside every year it would not be long until a large fund would result. The only difficulty lies in securing a substantial fund with which to commence the plan. This might be overcome by maintaining the insurance on the several buildings for a few years, and in addition setting aside a sum annually equal to the premiums. In this way a nucleus for the insurance fund could soon be realized, and then the outside insurance could be dropped entirely." Mr. Bell pointed out that the city might save considerable money by adopting this plan. In any event he advocates that it be considered at length to determine whether it should be adopted.

VANCOUVER FIRE PREVENTION

Seventeen apartment house agents were summoned in the Vancouver police court to answer the violations of the fire by-laws, says The Monetary Times' Vancouver correspondent. A number of them have been fined. Since the serious apartment house fire in which many of the occupants lost their lives, the authorities are determined to see that the fire by-laws are lived up to. Only the other day, when a business block was damaged by fire, the fire alarm for some reason, was not working.

The firemen of the city of Vancouver are to be insured against sickness and accident under a blanket policy, the premiums to be provided for them by the city, the same as in the case of the members of the police force. This plan appears to be somewhat unique, as some prominent publications in the states are asking for an explanation of the kind of insurance they have adopted that they may give it publicity.

Government and Municipal Bond Market

Saskatchewan to Float Three Million Loan—Tenders Now Being Called For—Ottawa Also Asking for Offers for $2,300,000 Securities—Five Ontario Municipalities Trying to Negotiate Local Loans—Regina Saves by "Over-the-Counter" Method, says City Treasurer

TWO new issues of importance are due to come on the bond market during the next two weeks, namely, Saskatchewan and Ottawa. The absorption of these securities should prove interesting inasmuch as it will be a good indication of the condition of the market and of the money situation as a whole.

Saskatchewan is asking for $3,000,000, and the bonds will be either payable in Canada only, or in both Canada and the United States, as the situation may warrant. It is most probable that the latter class of securities will be issued, as the purchaser will no doubt wish to dispose of large amounts across the line, if not all of the issue.

The province has made two loans this year, one of $3,500,000 in January, and one of $1,000,000 in May. They were both 6 per cent., and short-term issues, and were sold in the United States. In the case of the first loan the province paid about 5½ per cent. for its money, and about 5⅝ per cent. for the other.

Ottawa's last loan was made in July a year ago, when $865,694 five per cent. debentures of various maturities were disposed of. The securities were straight-term and were sold on a 5.34 per cent. basis. The city's credit is good and Ottawa debentures are included among the high-grade Ontario municipals, but it is not thought that the present loan will be negotiated under a 6½ per cent. basis.

Disposing of Debentures Locally

Five Ontario municipalities are now engaged in disposing of their debentures over the counter to local citizens. London is offering six per cent. securities in various denominations, the lowest being $100. Non-residents are also permitted to buy these debentures.

Guelph is also offering civic debentures to citizens. The amount is $16,000, and the interest rate is 6 per cent. The securities mature in twenty years.

Orillia is offering $67,000 of its bonds, guaranteed by the county of Simcoe, for local investment, at a price which will yield the purchaser 6⅛ per cent.

Hamilton, which has already disposed of some $285,000 debentures this year, is offering another block of $244,903 at par, yielding interest of 6 per cent. from July 15 last. The debentures mature in from two to twenty years, and are in denominations of $100, $500 and $1,000.

A decision to offer municipal debentures of the township of Gloucester to the taxpayers, in denominations of two, five and ten hundred dollar lots, was made by the Gloucester township council, at a meeting this week. The attempt to dispose of the bonds to the ratepayers of the township is more or less of an experiment, as the debentures formerly sold by the municipality were first advertised, and then disposed of in block by the tender route. It was felt by several of the members of the council that the residents of the township should be given an opportunity of buying the securities instead of having the township pay out money to financiers. The new step was taken only after sound financial advice had been secured.

Coming Offerings

The following is a list of debentures offered for sale, particulars of which are given in this or previous issues:—

Borrower	Amount	Rate %	Maturity	Tender closes
Saskatchewan	$3,000,000	6	optional	Sept. 21
Chicoutimi, Que.	110,000	5½	various	Sept. 27
Ottawa, Ont.	2,300,232	6	various	Sept. 28
Bexley Tp., Ont.	7,000	7	[illegible]	Oct. [illegible]
Minitonas R.M., Man.	50,000	6	30-instal.	Oct. 1
Glenwood, Man.	25,000	5½	30-instal.	Oct. [illegible]

Owen Sound, Ont.—The city will shortly issue $87,000 6½ per cent. debentures. The interest rate was formally 6 per cent., but, upon the authorization of the Ontario Railway and Municipal Board, was increased.

Minitonas R.M., Man.—Tenders will be received until October 1, 1920, for the purchase of $50,000 6 per cent. 30-instalment good roads debentures. Securities will be issued in denominations of not less than $100, and interest coupons are attached. John H. Cannon, Minitonas, Man.

Chicoutimi, Que.—Tenders will be received until September 27, 1920, for the purchase of the following debentures:—$8,900 5½ per cent., maturing from the first of May, 1921, to the first of May, 1929; $91,100 5½ per cent., maturing May, 1930. Principal and interest payable in Montreal and Quebec. Bonds in denominations of $100 and $500. O. Tremblay, clerk.

Etobicoke Township, Ont.—C. H. Burgess and Co., have purchased $17,361 6½ per cent. 5-instalment debentures at 98.07. Tenders received were:—

C. H. Burgess and Co.	98.07
Brent, Noxon and Co.	98.00
A. E. Ames and Co.	97.67

Ottawa, Ont.—Tenders will be received until September 28, 1920, for the purchase of $2,300,232 6 per cent. instalment debentures as follows:—$85,307.31 for ten years; $357,562.68 for fifteen years; $448,362.14 for twenty years; $1,409,000 for thirty years. The bonds will be made payable in Canada alone, or Canada and the United States, as may be decided. (For complete particulars see advertisement elsewhere in this issue).

Township of Toronto, Ont.—Wood, Gundy and Co. have purchased $37,000 6 per cent. 20-instalment school debentures at a price of 94.13. Other tenders were:—

A. E. Ames and Co.	94.092
Dominion Securities Corporation	94.09
United Financial Corporation, Ltd.	93.07
A. Jarvis and Co.	92.21
Brent, Noxon and Co.	91.27

Saskatchewan.—Tenders will be received until September 21, 1920, for the purchase of $3,000,000 6 per cent. bonds. The province asks that alternative bids be submitted as follows: On ten-year bonds, dated September 1 or October 1, 1920, at the option of the purchaser, the principal and interest to be payable in Regina, Toronto, Montreal and New York. On twenty-year debentures, dated optionally as in the other instance, with interest and principal payable in Canada only, at Regina, Toronto and Montreal.

Debenture Notes

Thorold, Ont.—Ratepayers have given assent to issue debentures for the laying out of a new park.

St. Mary's, Ont.—A by-law will be submitted to ratepayers on October 2, authorizing the borrowing of $16,000 for various local improvements.

Weyburn, Sask.—Ratepayers have approved of the issue of debentures to the amount of $45,000 for connecting of the new municipal hospital with the sewer system. A $5,000 school by-law has also been passed.

Colonsay, Sask.—The village will borrow, by way of debentures, the sum of $1,500, of which $700 is for the purpose of draining a slough and $800 for constructing sidewalks. Debentures are to be repayable in seven annual instalments and bear interest at the rate of 8 per cent.

Brantford, Ont.—With $[illegible]1,000 debentures already disposed of this year, the city has yet to sell three other blocks,

THE CHOICE
OF THE
SHREWD INVESTOR

The experienced purchaser selects Victory Loan Bonds as the most desirable investment in which his funds can be placed.

Government and Municipal Bonds

42 King St. West
TORONTO -:- CANADA

totalling $153,600, as follows.- $6,250 for street railway; schools, $11,500; $135,850 for water works. These debentures mature from one to twenty years, and will be sold to yield the investor 6 per cent.

Saskatchewan. The following villages have been authorized by the local government board to issue debentures: Mossbank, $3,000 10-years 8 per cent. instalment, for fire protection; Meota, $3,000 15-years 8 per cent. instalment, for payments on well drilling contract.

Gravenhurst, Ont.—The town is offering $5,000 6 per cent. 10-instalment debentures to local citizens.

Bond Sales

Toronto, Ont.—Authority has been given to the finance commissioner to issue debentures to the amount of $864,000 to cover expenditures by the Toronto Housing Commission. The money has already been expended.

Essex Border Utilities Commission, Ont.—Wood, Gundy and Co. have purchased the $117,615 6 per cent. 28-instalment debentures at 90.55 and interest, which is on about a 7 per cent. basis. A. E. Ames and Co. bid 87.13 and interest, while Brent, Noxon and Co. asked for an option at 90.

Regina, Sask.—While in Calgary recently, City Treasurer Snowball, of Regina, made the statement that the city has disposed of $167,000 debentures this year locally. He said that the securities had sold well at par to yield the investor 6 per cent., and all the purchases were voluntary. While he does not expect that the city will be able to dispose of more than $200,000 this year, he advocates keeping debentures for sale locally on hand all the time. The cost of selling the $167,000, he said, was not more than $800, including advertising in the local papers and other necessary details.

Saskatchewan.—The following is a list of debentures reported sold by the Local Government Board from August 19 to 25, 1920:—

Schools.—Molewood, $4,200, North Regina, $3,000, Batestown, $3,500, Waterman-Waterbury Mfg. Co., Regina; Naseby, $1,700, J. Matcham, Saskatoon; Colonsay, $3,000, Monarch Life Assurance, Winnipeg; Gray Valley, $1,750, M. Middlemiss, Wolseley; Darmody, $7,000, Nay and James, Regina; Khedive, $18,000, $7,000 to Mr. Rooney, Regina; Alingly, $600, L. Clark, Prince Albert.

Rural Telephones.—Parkberg, $2,100, T. P. Taylor, Regina; Logberg, $5,100, Harris, Read and Co., Regina; Goldeye, $1,400, W. L. McKinnon and Co., Regina; Guernsey, $6,800, Pirt and Pirt, Regina; Golden Acre, $11,000, Wood, Gundy and Co., Saskatoon; Guernsey, $200, Pirt and Pirt, Regina.

TORONTO BOND DEALERS JOIN STOCK EXCHANGE

Wood, Gundy and Co., and W. A. Mackenzie and Co., Toronto, bond dealers, have announced that they have bought seats on the Toronto Stock Exchange. Both firms state that no change of policy will be adopted, but it is probable that when necessary they will act in a stock brokerage capacity. The purchase of the seats were made through Playfair, Patterson and Co.

CANADIAN BUSINESS FAILURES

The number of failures in the Dominion as reported by R. G. Dun and Co. during the week ended September 10, 1920, in provinces, as compared with those of previous weeks and corresponding weeks of last year, are as follows:

Date.	Ont.	Que.	Man.	Alta.	Sask.	B.C.	N.S.	N.B.	P.E.I.	Total.	1919.
Sept. 10	[illegible]	8	0	1	0	0	0	0	0	14	[illegible]
Sept. 3	2	12	0	0	1	0	1	[illegible]	0	[illegible]	[illegible]
Aug. 27	9	16	1	0	1	2	1	1	[illegible]	[illegible]	[illegible]
Aug. 19	[illegible]	3	0	4	1	0	1	[illegible]	0	14	[illegible]

STOCKS OF RAW HIDES AND SKINS

Canadian packers, dealers, importers and tanners held the following stocks of raw hides and skins on July 1st, 1920, according to reports received from 225 firms by the Dominion Bureau of Statistics:—

	Unit.	Number.	Weight (lbs.).
Steer hides, unbranded....	Hides	82,910	4,225,392

Sheep skins (wool on)....	"	71,448	508,580
" " (pickled).....	Doz.	16,713	381,004

SASKATCHEWAN MUNICIPALITIES IN DIFFICULTY

Now that fairly satisfactory arrangements have been made with those Alberta municipalities, with the single exception of the town of Athabasca, which were in default on their bond interest, investors are faced with even more acute difficulties in Saskatchewan. Last year, it will be remembered, an arrangement was made with Prince Albert, Sask., whereby the interest burden of that city was lightened for some years, and made correspondingly heavy for later years. Several other towns in the province now wish to make a similar arrangement, the principal being Battleford, Humboldt and Canora. The situation as a whole has been discussed by the respective bondholders at meetings held during the past week, though no definite plan has as yet been reached.

RAILROAD EARNINGS

The following are the approximate gross earnings of Canada's transcontinental railways for the month of August:—

Canadian Pacific Railway

	1920.	1919.	Inc. or dec
August 7	$3,956,000	$3,442,000	+ $ 514,00
August 14	4,043,000	3,298,000	+ 745,00
August 21	3,895,000	3,374,000	+ 521,00
August 31	5,681,000	4,759,000	+ 922.00
Total	$17,575,000	$14,873,000	+ $2,707,00

Canadian National Railway

	1920.	1919.	Inc. or dec
August 7	$2,235,110	$1,846,508	+ $ 388,60

Trading Narrow and Price Movements Irregular on the Canadian Exchanges—Interest Centred Chiefly on Paper Issues—Quebec Railway also Strong—Announcement of New Railway Rates did not Have any Noticeable Effect on C.P.R., Here or in New York—St. Maurice Paper Securities to be Listed

IRREGULARITY marked dealings in New York during the week ended September 16, although the general sentiment was somewhat improved. It is the opinion of some brokers that from now on the market will begin to pick up, although the advance will be gradual, and trading is not yet expected to emerge from its narrow limits. In the meantime speculators are advised to go slowly. Call money was easy around seven per cent. The announcement of the new railway rates in Canada did not have any noticeable effect on C.P.R.

Trading on the Canadian exchanges for the week ended September 16, although heavier in volume than in previous weeks, was narrow, business being confined to certain issues. Price movements were irregular, following the lead of Wall Street to some extent, although some stocks were more greatly influenced from other quarters.

In Toronto net losses were prominent at the close and the gains were few. Paper issues were firm and the most active. C.P.R. was dealt in to a considerable extent, but only gained fractionally. In the banking section Dominion, Nova Scotia and Commerce were weak, while other issues were steady.

Interest in Montreal was centred chiefly around the paper issues, and a great part of the trading was in those stocks. Laurentide was active and strong as a result of the record report which was made public. Abitibi, Brompton and Spanish River closed firm, and dealings in those issues were substantial. The effect of the last report of the Quebec Railway on that company's securities, was favorable. On the surface the report does not give much room for enthusiasm, but careful analysis shows an improved position, and in the words of the president, "the next statement should show the turning of the corner."

The bond section was quiet, with prices holding firm. In Toronto Canada Bread was weak.

Capitalization Increases

As noted in these columns last week, the Canada Glue Co., Brantford, Ont., has been authorized to increase its capital stock from $250,000 to $1,000,000. The new stock will not be available to the public, but will be absorbed privately.

The Atlas Construction Co. has been authorized to increase its capital stock from $100,000 to $500,000, by the creation of 4,000 new shares of $100 each.

The following companies, registered under Ontario charters, have been authorized to increase their capital stock by the issue of new shares of $100 par value:

	Former capital stock	Increased to
Ingram and Bell, Ltd., Toronto	$150,000	$250,000
Burlington Steel Co., Ltd., Hamilton..	20,000	200,000
Imperial Varnish and Color Co., Toronto	200,000	500,000

Seven thousand shares of new stock of the Lake of the Woods Milling Co. will be called on the Montreal exchange immediately.

Supplementary letters patent have been issued to the Oakville Basket and Veneer Co., Ltd., Oakville, Ont., by the province of Ontario, authorizing it to change its name to the Oakville Wire Bound Box and Basket Co., Ltd., and to reorganize and increase the capital stock.

Capital reorganization will take place in the form of conversion of the 471 issued preference shares and the 29 unissued preference shares of a par value of $100 each, into common shares of the same par value.

The entire capital stock of $100,000 will then be increased to $500,000 by the creation of 4,000 new shares of $100 each.

A holding company, to be known as the Allen Theatres, Ltd., has been formed to control the Allen theatres throughout Canada, and on this organization an issue of preferred stock is to be offered for public subscription shortly by Housser, Wood and Co., Toronto.

St. Maurice Paper to be Listed

Application has been made by the St. Maurice Paper Co. to have its securities listed on the Montreal Stock Exchange, and action will be taken immediately by the Listing Committee. Recently the bond issue of the company was converted into common stock, which, as the company has no preferred issue, leaves the common the sole outstanding liability. The company pays a straight 8 per cent. dividend, which was augmented last May by a 5 per cent. cash bonus, after a previous distribution of a 30 per cent. stock bonus.

Approximately 60 per cent. of the outstanding shares of the company are owned by the Union Bag and Paper Co., an American enterprise, and are popular among Canadian traders in the New York market. The balance of the St. Maurice stock is presumed to be held largely by Canadians.

The total common stock of the company presently outstanding, inclusive of bond conversions, is $7,899,900. No preferred shares exist, and the bond issue has practically all been converted into common shares. The securities are on an 8 per cent. dividend basis, although the quarterly disbursement last May was augmented by a straight 5 per cent. cash bonus. The dividends are payable in United States funds.

BRITISH COLUMBIA HEALTH INSURANCE REPORT

(Continued from page [illegible])

in the last fire the box being removed from the spot where the janitor had put it to another part of the building.

When the firemen arrived at the Moore Printing Shop fire, they found the front door open. In the words of J. A. Thomas: "Everything points to the conclusion that a firebug is at work."

Would Tax Corporations More

Among other things said by H. H. Stevens, M.P., at the insurance men's luncheon this week regarding Canada's national debt, were the following:—

"My proposal is that Canada's debt should be paid largely from corporations operating under public franchise, and on the public domain—that their profits should be fixed by law; for instance, if the maximum profit was fixed at 10 per cent., and the actual profit was 40 per cent., the government would receive the extra 30 per cent. profit, either in money or in a share of the business."

He said that the government had reached the limit of taxation, and must seek other ways of liquidating their obligations. He gave his opinion that when the war bond issues fell due, they should be paid, and not left to future generations.

A Newspaper Devoted to Municipal Bonds

THERE is published in New York City a daily and weekly newspaper which has for over twenty-five years been devoted to municipal bonds. Bankers, bond dealers, investors and public officials consider it an authority in its field. Municipalities consider it the logical medium in which to announce bond offerings.

ANNUAL REPORT

OF

The Quebec Railway, Light, Heat and Power Co., Limited

FOR THE

Fiscal Year Ending 30th June, 1920

Submitted at the Annual Meeting held in Montreal, on the 14th September, 1920

To the Shareholders:—

Your Directors beg to submit the following report of the operations of your properties for the year ended 30th June, 1920, together with financial statement of Assets and Liabilities.

The Gross Earnings from Operation for the year were $2,372,034.69, as compared with $2,077,621.43, being an increase of

$294,413.26

The Operating and Maintenance Expenses were $1,769,563.41, as compared with $1,444,516.08, being an increase of

$325,047.33

leaving the Net Earnings from Operation $602,471.28, as compared with $633,105.35, being a decrease of

$30,634.07

After adding Miscellaneous Income and deducting Fixed Charges, taxes and depreciation for equipment placed out of service, there remains a deficit of

$44,703.75

The balance at credit of Surplus Account on 30th June, 1919, was $682,464.29, and after charging the deficit above mentioned together with an amount of $55,055.70 in connection with recent Privy Council judgment, there remains a balance of credit of Surplus Account at 30th June, 1920, of

$582,704.84

During the year nine (9) new P.A.Y.E. double truck latest type cars were added to the rolling stock of your City Street Railway Department the operation of which have given great satisfaction to the travelling public. One more car of the same type was placed in service during the current year's operations, completing order placed for ten cars.

The Lotbiniere & Megantic Railway Company, operating between Lyster, County of Megantic, and St. Jean Deschaillons, County of Lotbiniere, P.Q., and which connects with the Grand Trunk Railway at Lyster, and Canadian National Railways at Villeroy, was acquired by the Dominion Government. The operation of this line was taken over by the Canadian National Railways, effective 1st April, 1920.

Extensive alterations and improvements of the intake and the installation of new steel head gates at the main dam on the Montmorency River were carried out during the year, the results of which, when completed, will prove most satisfactory in the operations of the Power Division.

There was expended during the year on Capital Account an amount of $266,818.38, which amount includes the extension of the City Street Railway on Beauport Road to the City limits, also the nine (9) new double truck cars above referred to.

Statistical charts showing comparisons of the railway operations for previous years are attached to this report, which information will prove most interesting.

The accounts of the Company have been duly audited and certified to by Messrs. P. S. Ross & Sons, Chartered Accountants, Montreal.

Your Directors desire to express their appreciation of the efficient services rendered by the officials and staff of the Company.

Respectfully submitted on behalf of the Directors.

Corporation Finance

Laurentide Company Makes Big Strides after Reorganization—Earnings for Six Months Approached Those for Whole of Previous Year—Judgment Against Granby Company Stayed by Court of Appeal—Burt Common Dividend Increased—Canada Foundries Company Sells Buffalo Subsidiary

Canada Foundries and Forgings Co.—Arrangements have been completed for the sale of the Delaney Forge Co., the company's Buffalo subsidiary, at a price which will net the parent organization approximately $500,000. The Delaney Forge Co. was porchased by the Canadian company in the fall of 1917.

Quebec Railway, Light, Heat and Power Co.—The annual meeting of the company was held in Montreal on September 14, and the officers and directors were re-elected without change. Lorne C. Webster, president, expressed himself as satisfied with the year's operations, in view of the conditions which have prevailed, and spoke with optimism regarding the financial results in the current year.

Canadian Woollens, Ltd.—A quarterly dividend of 1¾ per cent., payable October 1 next, to shareholders of record, September 20, has been declared. The company has been organized a little over a year, and this is the first dividend to be declared on common. The above rate is equivalent to 5 per cent. per annum, and is considered conservative, in view of the last annual report, which showed 17 per cent. earned on common shares.

Western Power Co. of Canada, Ltd.—The company reports from Vancouver, B.C., operating revenue for the month of July, 1920, as $41,501, an increase of 9.6 per cent., compared with July, 1919, and net earnings of $25,644, an increase of 1.3 per cent., compared with July, 1919. There was included in operating expenses during the month of July, 1920, the sum of $1,685 for depreciation. For the twelve months ended July 31, 1920, the company shows operating revenues of $515,507, an increase of 12.4 per cent. over the same period in 1919, and net earnings of $309,282, an increase of 5.7 per cent., compared with same period in 1919, after making allowances for depreciation of $23,842.

Ogilvie Flour Mills Co., Ltd.—A 10 per cent. bonus has been declared by the directors for distribution in cash, in addition to the regular quarterly dividend of 5 per cent., and will be payable, together with the regular dividend, on October 1 next, to holders of record September 23. A bonus of [illegible] per cent. was declared about this time last year.

Marconi Wireless Telegraph Co. of Canada, Ltd.—As a result of changes effected in the organization, the company will henceforth be under Canadian control. The company now becomes affiliated with the Canadian General Electric Co., and Lieutenant-Colonel Hon. Frederick Nicholls, Sir William Mackenzie, and A. E. Dyment, all of whom are directors of the latter company, now have seats on the board of the Canadian Marconi Co.

McIntyre-Porcupine Mines, Ltd.—In the report for the year ended June 30, 1920, President J. P. Bickell makes the following remarks:—

"An operating profit of $1,051,404, and a non-operating profit of $228,828, making a total of $1,280,232, was earned during the year, as compared with $[illegible] for the previous year. Of this amount, $462,211 was appropriated as follows: Plant depreciation, $180,21[illegible]; written off securities to bring these to present market price, $25,000; expenditures for development work and interests acquired in adjoining properties, $204,127; amount set up for taxes accrued for the current year, $52,500, leaving a balance of $818,020 for transfer to surplus account. During the year three dividends of 5 per cent. each, aggregating $[illegible], were paid to shareholders."

Nipissing Mining Co.—During August, 1920, the value of the production of the mine was $2[illegible]8,919, as compared with $18[illegible],111 in July. During the month the low grade mill treated [illegible] tons, compared with 7,16[illegible] tons in the previous month. Shipments of bullion and residue reached the total of $701,981. This included 598,199 fine ounces of silver sent out from the refinery. July shipments were only $129,315. Nipissing's production so far this year has totalled $2,340,983, as compared with a total of $3,117,345 for last year.

F. N. Burt Co., Ltd.—Common stock of the company has been placed on a 10 per cent. basis by the declaration of a quarterly dividend of 2½ per cent. This is an increase over the 8 per cent. rate which has prevailed since April, 1919. A record of the company's dividend payments follows:—

The preference shares have received 7 per cent. per annum since the organization of the company in September, 1909, and the common shares received the first dividend on April 1, 1910, at the rate of 4 per cent. That rate was increased to 6 per cent. on January 1, 1911, and continued at the advanced rate until October 1, 1914. As a precautionary measure, at the commencement of the war it was reduced to 4 per cent. and remained at that rate until January 1, 1917, when it was restored to 6 per cent. On April 1, 1919, it was increased to 8 per cent. Preference shares may be converted into common stock at any time, and the directors have provided that preferred shares may be converted up to October 15 in order to rank for the increase in dividends.

Granby Consolidated Mining and Smelting Co.—Judgment of Justice Gregory, handed down on August 12 last, favoring the Esquimalt and Nanaimo Railway in the suit over the title to the Granby Company's coal lands near Cassidy, B.C., particulars of which were given in these columns recently, was ordered stayed by Justice Gallagher, of the Court of Appeal, in a decision given in Victoria recently, provided that the defendant appellants deposited security to the amount of $75,000.

It was further ordered that the defendant appellants should be allowed to mine coal from the lands affected by the decision in the Supreme Court, up to the amount of 100,000 tons; but that no amount beyond that should be mined on such lands without an order obtained from the Court of Appeal. It is probable that the appeal will come on for hearing at the next sitting at the highest court of the province, and that the venue will be Vancouver.

Howard Smith Paper Mills, Ltd.—President C. Howard Smith in a statement regarding the operations of the company, said:—

"We are filled up with orders, and all our plants are running to full capacity. So far as I can see, this condition will last for a long time. The earnings are entirely satisfactory, and the new machines that we have been putting in for the past eighteen months are now producing paper that will show a substantially beneficial effect on our earnings. We have had a great deal of export business offered us, but have made it a principle to look after the requirements of the Canadian market first. In certain lines, from our new machines, we have exported a considerable quantity.

"We have purchased extensive timber limits and are [illegible] our sulphite plant, so we will be able to cope with the situation in the near future. We are also putting in an electrolytic bleaching system and a 50-ton soda pulp plant for producing bleached soda pulp. Changes are being made at the Cornwall, Ont., plant with a view to making [illegible] papers that have heretofore never been made in Canada, and it is expected that enough will be produced to supply the Canadian market with these lines and have a surplus for export."

Canadian Locomotive Co.—Net profits for the year ended June 30, 1920, amounted to $278,553, compared with $[illegible] for the previous year. Commenting on the large [illegible] said:—

CONFIDENTIAL APPLICATIONS invited for Branch Manager at Winnipeg for English fire tariff company. Must have extensive Western connection. Territory, Manitoba, Saskatchewan and Alberta. Apply Box 3[illegible]5, *Monetary Times*, Toronto.

"The strike of last year extended into this year, completely cutting off our production for the first three months. This, together with the great difficulty in securing material—owing to the strike and embargoes on American railways—has affected our output for the past year very materially. However, we have at the present time sufficient contracts on hand to run us up to January 1, 1921, before which time undoubtedly further contracts will be closed."

There was a surplus of $1,366,794 brought forward from the previous year, however, so that the dividend position of the company was maintained. After allowing for interest on bonds and depreciation, etc., and adding interest on investments to the net profits, there was left $109,189, compared with $677,377 last year. Adding this to the balance brought forward, the total for distribution amounted to $1,475,983, as compared with $1,606,794 previously. Of this amount sinking fund took $15,000, which was the same as in 1919, preference dividends were paid to the amount of $105,000, also the same as last year, and $145,000 was distributed on common, as compared with $120,000 in 1919, leaving a balance to be carried forward of $1,210,983.

The liquid position of the company is not so strong as last year, current assets amounting to $2,630,189, compared with liabilities of the same category of $1,077,134. The figures last year were $2,298,130 and $633,754, respectively. Total assets are $8,238,192, as compared with $7,871,474.

Laurentide Co., Ltd.—A record showing for the six months ended June 30 last is shown in the statement of the company which will be presented to shareholders at the annual meeting next week. The figures represent the operations of the reorganized company, which took the place of the old company last January. The president in his report points out that the conditions peculiar to the pulp and paper industry rendered it advisable not to change the date of the end of the old fiscal year, so that the initial statement is for six months only. Figures show that total income for the six months amounted to $2,566,673, or but $389,305 less than the total for the whole of 1919, and almost up to the level of 1918.

After all deductions, including interest charges, depreciation and war tax provisions, there remained a balance applicable to the trebled capitalization of the company—which now amounts to $28,800,000—of $1,499,538, or equal to 5.2 per cent. for the half year. Allowing for earnings at the same rate during the latter half of the current calendar year, and without taking into consideration the enhanced prices the company is securing for its newsprint and other products, the percentage on the increased stock would be approximately 10½ per cent., or equivalent to 31½ per cent. on the old capitalization. This showing is made despite a generous allowance for depreciation and depletion, for which $482,986 was appropriated out of the earnings of the half-year, as compared with $505,395 for the full 1918-19 period, and $271,883 in the preceding twelve months. Reserve for business profits war tax also was increased by $40,000 to $280,000 for the six months.

Accounts and bills receivable are up by over $500,000, standing at $1,590,547, as against $1,0[illegible], due, presumably, to the increased business being done and the higher prices prevailing. Logs and logging supplies also more than doubled their figures in the year, being shown as $5,173,606, compared with $2,533,912 a year ago.

Among the important changes in the liabilities is an item of $2,812,8[illegible]9, representing advances from the company's bankers. A year ago there was no indebtedness of this nature shown, the changed position in this respect being due to the extensive additions and improvements already effected, or now under way, at the Grand 'Mere plant, where new paper-making machinery, also involving the expenditure of considerably in excess of $2,000,000, is being installed. Working capital of the company has been considerably [illegible], as will be seen from the following figures:

	June 30, 1920	June 30, 1919
Current assets	$1[illegible],431,228	$7,2[illegible]
Current liabilities	[illegible],761	1,88[illegible]
Working capital	$953,467	[illegible],670

RECENT FIRES

Allen Glove Manufacuring Co. and Thirteen Dwellings in Montreal, Que., Damaged with Loss of $200,000—Sawmill of Brooks, Bidlake and Whitall Co., Powell River, B.C., Destroyed with Loss of $115,000

Chambers of Commerce of the British Empire

Problems of Empire Trade Being Discussed at Ninth Congress, Which Opened in Toronto Last Friday—Will Tour Ontario Next Week—Many Resolutions Being Considered—Proposals to Stabilize Exchange Within Empire

"THIS great assemblage is the culmination of the hopes and ambitions of the Toronto Board of Trade for many years, and the realization of these gives to our organization, its members and its officers the deepest gratification," said C. Marriott, president of the Toronto Board of Trade, in welcoming the delegates to the ninth congress of Chambers of Commerce of the British Empire. The congress opened in Toronto on September 17th, where it remained until today, September 24th. The remainder of this week will be spent in St. Catharines and Niagara Falls, and next week the delegates will visit Brantford, London, Windsor, Guelph and North Bay. The following week they will go to Copper Cliff, Espanola, Sault Ste. Marie, Cobalt, New Liskeard, Haileybury, Timmins and Iroquois Falls, returning by way of Ottawa and Montreal.

The delegates came from all parts of the empire, and number about ninety. Other Canadian cities and towns are represented to the number of about 100 delegates. Rt. Hon. Lord Desborough is president of the congress.

Review of Previous Meetings

The first congress was held in London in 1886, on the invitation of the London Chamber, at the Colonial and Indian Exhibition of that year, and thereafter, more or less, triennially until 1912. In two instances during this period they were convened in the overseas Dominions, viz., at Montreal (Canada) in 1903 and at Sydney (New South Wales) in 1909 in view of a decision that they should be held alternately in London and in the Dominions. The last congress having been held in London, it was decided to accept the invitation of the Toronto Board of Trade for the succeeding congress, to take place in Toronto in 1915. Owing to the war this invitation was held in suspense until circumstances were more favorable, and after many delays and changes in arrangements it was definitely convened for September 18th, 1920. Lord Desborough, who was president of the congress in 1912 and who again occupies the same position this year, as president of the British Imperial Council of Commerce, and thus has been in close touch with the business of both congresses. By this and other means continuity of purpose has been ensured.

These congresses have been invariably thrown open to any chamber of commerce or board of trade which may be willing to send delegates but the representation prior to 1912 was not strictly confined to such bodies. After the Sydney congress of 1909, however, it was considered desirable to limit representation to chambers of commerce and boards of trade or associations thereof while preserving the franchise on the broadest lines, and in [illegible] it was resolved to form a permanent bureau for future congresses, called the British Imperial Council of Commerce, by which the 1912 congress was arranged. New rules were [illegible] in November, 1913, under which the congresses [illegible], which differ in the main from those of the British Imperial Council of Commerce and are kept separate [illegible]. There is, however, this similarity between the constitutions of the council and the congress—both are comprised of representatives elected by individual chambers of commerce, boards of trade and associations thereof; but, as it happens, the membership is not precisely the same, as certain bodies which have participated in the congresses have not thought fit to subscribe to the council also. There are, however, 116 bodies affiliated with the council.

Extensive Program

In a summary of the work of the congress, written in anticipation of this year's meeting, Charles E. Musgrove, honorary secretary of the ninth congress, says:—

"During the period 1913-1920 the British Imperial Council of Commerce has had steadily in view its main purpose, viz., to keep alive the work of the congresses between one meeting and another by carrying out the resolutions passed and preparing for the next occasion when the congress meets. In addition, the British Imperial Council of Commerce has initiated several matters of importance, more particularly relating to war conditions, by convening, besides its annual meetings, certain business conferences, notably in 1916, when valuable discusisons on economic topics, including imperial preference, were initiated, bearing upon post-war conditions, which, however, to some extent, lost their practical value owing to the war being protracted until November 11th, 1918. There was still great uncertainty in regard to the economic position until peace with Germany was signed in 1919, as it was not possible to deal with post-war conditions in anything like a comprehensive form. Large schemes of economic reconstruction, both on the part of the government and of business men, have been held in abeyance by adverse conditions which were not merely inter-imperial, but world-wide in their manifestations. Even now it cannot be said that there is anything like an assured basis for progressive development on strictly imperial lines owing to adverse circumstances existing all over the world, but the way is clearer for the consideration of many problems which press for solution and for the reconsideration of many of the old ideals under altered conditions.

"It is hardly necessary, and would, indeed, be impossible, within reasonable limits, to describe in detail the results which have attended the meetings of the congress since 1886, but as one who has been connected with them from the first in conjunction with his predecessor (Mr Kenric B. Murray), the writer can affirm that many of the measures advocated have ultimately materialized, sometimes in a modified form due to altered circumstances. There is no doubt whatever that, looking at the subjects considered, even at imperial conferences, the governments represented have been inspired from the same sources as the chambers of commerce, aided by public opinion. Some of the old questions of the past are still with us, retarded in their solution by war conditions. Others, old and new, are ripe for treatment and only need the powerful help of governments to be settled. All that any congress can do is to affirm its views and take steps to secure effect being given to them in the proper quarter, bearing in mind that the thought of to-day may become the act of tomorrow. Measured by this standard, a congress of chambers of commerce compares favorably with any other."

Toronto Sessions

In speaking at the opening meeting on September 17, Mr. Marriott, president of the Toronto Board of Trade, said:—

"After such a titanic and terrific war it was inevitable that commerce and industry together with all great public services throughout the empire should be disorganized. In fact, so widespread had been the changes that the work of reconstruction had been delayed, perhaps not unduly delayed, for the making of a new world. In the making of this new world time should be taken to lay the foundations deep in righteousness and honor and justice and unselfishness. The business of the empire should be carried on for the benefit of all the people who are its co-operative shareholders. We approach the opening of the congress to-morrow with great anticipations and high hopes, believing that its deliberations will result in important benefits to the wellbeing of trade and commerce through the empire."

Lieut. Governor Lionel H. Clarke spoke on behalf of the province, and mayor T. L. Church on behalf of the city. Sir James W. Woods, chairman of the Toronto Board of Trade general congress committee, expressed the opinion that no-one now questioned the wisdom of postponing the meeting which had been planned for 1915. Many conclusions which might have been reached then would have had to be revised now, he pointed out. The purpose of the Congress, as he understood it, was to see that all efforts are made to the end that every dollar's worth of goods imported by any part of the empire shall, if possible, be got within the empire. In the case of Canada, he had to confess, there was room for improvement. In the past twelve months Canada imported from the United States goods to the amount of $802,102,187, or about $100 per head of population. Canada bought from the United States five dollars' worth of goods for every dollar's worth purchased from Britain, and nearly twice as much as the United States bought from Canada. From the motherland Canada bought only one-quarter of what Britain purchased here. He believed the preferential tariff had been a great influence in stimulating trade with Britain.

"But I believe," continued Sir James, "much more would be accomplished by arousing a real empire spirit for the purposes and demands of peace, as we had it in connection with the war." It was to awaken such a spirit that he was glad to see the Congress come to Toronto. He wondered why some of the spirit that was quickened in August, 1914, could not be aroused in connection with imperial commerce. "If the Bolshevist can scatter his seed broadcast and produce a crop of disciples of his peculiar brand of world salvation, surely the Congress will devise some means of propaganda that will achieve results."

Replies on behalf of the delegates were made by Lord Desborough, president of the congress; by Stanley Machin, chairman of the organizing committee, and President of the London, Eng., Chamber of Commerce; by A. J. Hobson, [illegible] lord mayor of Sheffield, and president of the Association of British Chambers of Commerce, and by Thomas Mackenzie, former premier of New Zealand. Lord Desborough stated that he had already been through Canada on more than one occasion, and each time is impressed with the progress made. Mr. Machin said:—"As we stood together in war, so may we stand together in peace. We are here on this great commercial mission to meet in this city representatives from almost every important part of the empire, to discuss questions of the greatest commercial importance, and I feel that we at this time should act in the sentiment of the words of our greatest colonial secretary, Joseph Chamberlain, and think imperially." Mr. Hobson emphasized the fact that Canada was to have her own minister at Washington, and Lloyd George had announced that there would be a meeting once a year of the Imperial War Committee, at which the overseas premiers would be present or send their personally accredited representatives. The congress would endeavor to do something to assist in the work of reconstruction. It was not proceeding as rapidly as one would like. Europe was in a sad and miserable state. The fires of war had not yet been put out, and until they were entirely extinguished, and until the nations have been restored to stable conditions, with regard for honesty and a desire to carry out their obligations, present conditions would likely continue to prevail.

Empire Currency and Exchange

The most striking proposal considered at the Toronto meetings was that made by John F. Darling, who moved the following resolution: "That the home government be asked to call an imperial conference on the stabilization of our inter-empire exchanges by the co-operation of the home government with the governments of the Dominion of India."

Mr. Darling said in part: "Each portion of the empire is anxious to get back to gold parity, and this can be done by co-operation of the units of the empire. The only basis for this is the pound sterling, but before this is adopted as an instrument we must make sure it is on a sure and sound basis. This is impossible because there is not enough gold to go around. The proposal is that the self-liquidating bills of exchange should be made the basis for further alterations in exchange. London will always be the centre of such bills, no matter what happens. These bills for goods bought should be for only three months, and there is no necessity for altering the nomenclature of the various monetary systems in the empire.

"A basis for currency may conform to past theory, but if it is neither practical nor workable for us under the changed economic conditions caused by the war's upheaval, we must endeavour to find some other basis. This is surely the case in regard to gold and silver. Their sources of supply are uncertain and subject to great changes; on the other side, the demands for currency or as a basis for credit have to contend with the demands for the arts and the insatiable demands of the east.

"Why should we not follow the lead of the United States and introduce bills of exchange as a currency basis to improve somewhat on the federal reserve system? It is necessary to distinguish between the bill created on pure credit and that drawn against a movement of goods from one country to another. The former we eliminate, and even in the latter it is desirable to limit the time the bill has to run to three months and to avoid renewals.

"But within these limits a currency system based upon bills of exchange is really based upon a mass of different commodities in course of movement at current prices, and, in the majority of cases, actually sold so that the bill can be easily met at maturity.

Canada's Peculiar Difficulties

Sir Edmund Walker, in seconding this resolution, said: "I want to make a frank statement as to the difficulties in this regard. In Canada the currency is the dollar, based on the old Spanish dollar. We used to have two kinds of dollars here. Our financial affairs are rooted with the people to the south of us—the United States. We are involved in the entire trade of North America, with New York as our financial centre. We could not do business with the States if we had an English currency. Such an object as Mr. Darling has outlined is a worthy one, but you must recognize our difficulties."

An Imperial Banking System

The proposal carried almost unanimously. Another proposal of Mr. Darling's, to the effect that an imperial bank and clearing system should be created, was also discussed. Mr. Darling explained that this would completely secure the stabilization of all inter-empire exchanges. It would be necessary to constitute a common custodian of funds of 12 [illegible], for bank amalgamations have been carried so far an the branch bank system so greatly developed, that there are now only some 125 separate banks in the whole of the British Empire. The Bank of England, already acting as custodian for many other banks, could act in this capacity.

One of the functions of the empire bank would be to issue cable transfers to its banking clients at par between the central office and any other office, and the figures of each office would be wired weekly to the central office and incorporated in the weekly balance sheet issued by the empire bank. He emphasized the point that cable transfers from one branch of the empire bank to another branch would have no effect upon the aggregate of bankers' balances with the central office in London, the level of the pool always remaining the same.

Dominions could be given representation on the directorate, and the bank would then become a truly imperial bank, and notes would in reality become imperial notes, acceptable at par any place in the empire.

The notes of this bank are now almost entirely backed by gold, pound for pound. Acting as an imperial clearing house, with the short-term bill of exchange the common basis of currency value, this condition would still obtain, and thus a comparatively simple system of machinery for the stabilization of inter-empire is secured. There would be some slight difference between buying and selling pounds sterling as between one part of the empire and another, sufficient to compensate the banks for handling the business, but as the banks could always obtain cable transfers at par backwards and forwards from the empire bank, exchange fluctuations would in effect be eliminated. The rate of interest would also tend to equality the empire over on the same security, which would be a further aid to production.

The Canadian dollar, said Mr. Darling, is now related neither to the American dollar nor the British pound sterling. It stands pretty much alone, but under the proposed system it would have a very definite relation to the standard employed throughout the empire.

WILL NOT ACCEPT UNGUARANTEED BONDS

Dominion Government Defers to Right of Province to Control Matters Relating to Municipal Affairs

(Special to *The Monetary Times.*)

Ottawa, September 23, 1920.

PENDING the outcome of the Ontario government's investigation into the hydro-radial situation, the Dominion government will not take advantage of the offer of bonds which are an obligation of the municipalities alone, in return for its radial lines in Ontario. When the question was brought up here, it was deferred till the return of Hon. J. D. Reid, minister of railways, from the west. Dr. Reid has left on a trip to Europe and it is now intimated that the hydro bond proposition remains in abeyance, and moreover, that nothing will be done in the matter till the commission investigating the radial scheme shall have made its report. Without taking sides on the merits of the radial discussion the government is understood to have come to the conclusion that it would be well to wait and ascertain the attitude of the provincial government to the radial project before agreeing to accept municipal bonds not guaranteed by the province. One reason cited is that the province is really the guardian of the municipalities and framer of the laws defining municipal powers and governing their activities.

The opinion is expressed that an awkward situation might arise if the Dominion government should accept municipal bonds over the head of the province, which has the power to define, enlarge or restrict municipal borrowing powers. It is very doubtful, therefore, that the electric lines of the Canadian National system will pass to the Hydro Commission unless the condition is such as will meet with the approval of the Dominion and provincial governments and the directorate of the Canadian National Railways, who are understood to have a considerable say in the matter. Nearly $7,000,000 is the purchase price quoted by the government for the sale of the electric roads in question. The price asked for the Toronto Suburban is $2,628,000, for the Niagara, St. Catharines and Toronto $3,544,000, and for the Toronto Eastern $706,000.

Canadian Trade Mission Finished

The Canadian Trade Mission is preparing to close up in November after administering 157 millions of credits abroad, of which about 65 millions have been taken up. Credits of 25 millions each were extended to Greece, France, Belgium and Roumania. Roumania was the only country that availed itself of a full assortment of Canadian goods. It has absorbed $20,185,676, Greece $7,111,300, France $5,900,000 and Belgium $1,772,263. Italy has taken up 6 millions for meats. Of the timber credit of 50 millions, 26 millions has so far been absorbed.

Preliminaries of the Grand Trunk arbitration commenced on Monday with an inspection of the physical assets. Sir Walter Cassels, ex-president W. H. Taft and Sir Thomas White, who compose the board, will go from Montreal to Chicago first, and afterwards, it is intimated, over the G.T.P. to the coast. The date for commencing the court proceedings in the arbitration has not been decided, but it will probably be early in November. The arbitration will take several months. It will determine the value of the common stock of the company, and much evidence on the subject will be introduced. Just as the arbitration board is starting out from Montreal westward, the directors of the Canadian National will leave Montreal to inspect the eastern lines of the system.

Settlement With German Creditors

More than $2,000,000 received from Canadian firms and individuals in payment of debts owing to Germans at the beginning of the war is now lying in the bank to the credit of the custodian of enemy debts. The money has been collected by the custodian, the secretary of state, in accordance with the arrangement made in the treaty of Versailles for the settlement of debts between citizens of the signatory nations. Under the treaty direct settlements of pre-war obligations between citizens of allied countries and German nationals is forbidden and provision is made for the establishment of a system of clearing houses. Canada has a local clearing house of which the secretary of state is head. That clearing house communicates with the German clearing house through a central clearing house in England.

Many Canadian firms, too, it is stated, are now anxious to close up accounts with Germans and readily pay accounts owing to the latter into the clearing house. The custodian had disposed of the assets of some companies which were wholly owned by Germans and which were liquidated. From one of these, located in Montreal, $200,000. Included in the property to be dealt with is 143,000 shares of Canadian Pacific Railway stock, which stood in the name of the Deutscher Bank.

Won't Send for Russian Gold

Agents of the Soviet government of Russia have made requests that Russian gold, shipped to Canada to pay for goods, will be guaranteed from any other claims against the Russian government. They are asking that any gold sent to Canada to pay for goods purchased in the Dominion will not be devoted to any other purposes. The Dominion government, however, it is understood, is declining to give any such guarantee or to be involved in any way in the shipment of Russian gold. Opening up of trade relations between Canada and Russia are therefore at an impasse. The position taken by the Dominion government is that if any individual Canadian wishes to trade with the Soviet or any other government in Russia he may do so, but at his own risk. There is no embargo on the exportation of Canadian goods to Russia, but the exporter will have to make his own arrangements for payment as no credit will be furnished by the Dominion government

LITTLE RECOVERY IN WESTERN BUSINESS

Keen Interest in West as Investment Field Indicated by Number of Visitors—Winnipeg Selling Hydro Bonds

(Special to *The Monetary Times.*)

Winnipeg, Man., September 23, 1920.

THE weather in Manitoba this week is rather unfavorable for threshing, but a good deal is already done.

The sale, locally, of Hydro Electric bonds has started. The city light and power department has placed one and a-half million six per cent. debentures on the market and these are being well taken up. The first day thirty thousand was subscribed for.

Business Not Good

Wholesale trade in the west is reported only fair. Orders from country towns are commencing to come in, wholesalers say, but spasmodically and "as required." Retail trade in Winnipeg and big cities is "fair" and there are many sales in clothing, boots and shoes, and like lines. Calgary and Edmonton reports wholesale business good. Merchants who had cancelled during midsummer have since reordered which bears out reports of better business in country towns, although threshing is far from completed and farmers busy. Farmers, of course, have very heavy liabilities to banks, to merchants, etc., on 1919 commitments, for which it will take a large part of this year's proceeds to liquidate, but the outlook is generally excellent. Collections are improving with proceeds of crop coming in.

Crops Evenly Distributed

J. W. W. Stewart, managing director of the Monarch Life Assurance Co., has just completed a fall tour through western Canada and reports that business conditions generally throughout the west have assumed a real healthy state. The somewhat even distribution of good crops, though of low acreage in many districts, is the cause of general gratification. High prices for grain quite overcome the low yield. Mr. Stewart says:—

"In British Columbia there is fair mining activiy outside of gold mining. The cost of operating the latter at the present time runs the cost of producing the standard metal very high. Lumber for export is fairly active, dependent, of course, upon the ships. The mills which produce for home consumption will continue quiet pending the movement of the prairie crops. The fish business is moderately active, while demand remains good for well packed product. Tourist traffic is heavy. The imperial press and other important excursions are looked upon as forerunners of considerable activity at the coast and a substantial increase in population is looked for. The housing problem seems quite as difficult as in any other part of Canada, in spite of the fact that a large number of moderate sized homes are being erected in the [illegible] district. A large population is anticipated from the prairies. It is common talk that if the railway companies, the government, Vancouver and Victoria would co-operate by installing certain winter playgrounds with a couple of good swimming tanks, one on the mainland and one on the island, that a large amount of Californian winter tourist traffic would be diverted to the coast where the cost would be much less than by going south.

"The Dominion government is spending five million dollars on wharfage and the minister of marine stated publicly that the government planned to spend another ten million dollars on Vancouver shipping facilities. [illegible] a line of steamships would ply between [illegible] and Vancouver. A large steel and smelting project, involving very heavy expenditure in British Columbia, is now under way. Copper mines and concentrators are quite active, running three shifts daily. Industrial and labor [illegible] are more moderate. Many ex-military men are making their homes in British Columbia. The three transcontinental railways have splendid facilities for looking after the public. Most tourists are not aware of the excellence of the Kettle Valley Railway through Southern British Columbia, or of the beautiful trip from Cranbrook to Golden, via the Windermere and Columbia Valley route. One of the most beautiful holiday places in British Columbia, is Lake Windermere.

"A most optimistic feeling has come over Alberta, particularly since the definite assurance of reasonable crops. As soon as the actual movement of the grain in reasonable quantities is started, commercial activities will be satisfactory in the towns and cities.

"In Saskatchewan, the general feeling is most cheerful. Saskatchewan has been in need of some real money on a large scale and the people should have their desires well gratified this year.

Many Visitors in West

"I met the president and general manager and western manager of one of Canada's largest trust companies. These gentlemen traversed a part of Manitoba, Saskatchewan and Alberta by motor. They are very conservative gentlemen and will no doubt be making their own public statement, but they expressed great satisfaction with what they had seen and learned throughout their trip.

"Another group of eastern financial gentlemen have just completed their survey of the west, extending over a period of several weeks, and have gone back to Ontario feeling greatly pleased with western conditions.

"In addition to the distinguished visitors from Great Britain and her colonies who have thoroughly traversed the west, several hundreds of American bankers, business men and farmers from the United States have in groups personally witnessed the real harvesting operations on the prairies, and it is only reasonable to assume that very beneficial results will follow the visitation of these prominent and influential persons.

"With other financial concerns, the Monarch Life is enjoying a good share of this year's prosperity. Death losses have dropped 50 per cent. lower than last year during the same period and the business shows a fair increase over the same period in 1919."

DOMINION CHARTERED ACCOUNTANTS' ASSOCIATION

The annual meeting of the Dominion Association of Chartered Accountants, held in Toronto last week, was the 18th annual meeting of this association since its foundation and the eleventh since "confederation" in 1910 when it became the central body of the provincial institutes—all members of the provincial institutes resident in Canada being, *ipso facto*, members of the Dominion association. At this convention the scope of membership was proposed to be enlarged and the by laws amended by which members of the provincial institutes, resident out of Canada should also be members of the Dominion association. A by-law amendment to this effect will be circulated to provincial institutes for their approval.

The total registration at the convention was 117—of whom 80 were members of the Ontario institute, 35 from the other seven provincial institutes and two American accountants. The annual convention is held alternatively in each province; last year in Manitoba, next year in British Columbia and the following year in Nova Scotia. The membership is now 770, an increase of one hundred and twenty-five per cent. in the last 10 years.

R. J. Dilworth, as president of the Ontario institute, gave the opening address of welcome and throughout the convention acted the part of the genial host to the "visiting brethren." Organization was under Bryan Pontifex, chairman of the general committee, with Osler Wade in charge of the automobile arrangements, Major Robert Shiell in charge of the banquet, J. P. [illegible], hotel reservations committee, R. [illegible], publicity and whips committee and F. G. [illegible], registration committee.

The next convention will be held at Vancouver under the presidency of Geo. E. Winter, past president of the British Columbia Institute, with H. D. Creighton, of Halifax, N.S., as vice-president, in September of 1921.

PROTECTION NOW ON THE DEFENSIVE

THE tariff commission which commenced its sessions last week in Winnipeg has already received, and no doubt will continue to receive, evidence which is merely a reiteration of views which are already well known to the reading public. There is probably not a single issue which has received so much space in the press as the tariff; scarcely one of our leading dailies can be picked up which does not contain something about it, and every grade of opinion from high tariff to free trade is represented.

So far as general tariff policy is concerned, this is an issue which can be settled, and has always been settled, only at the polls. Any effort to take the tariff out of politics, if it is genuine, overlooks the fact that the relative economic prosperity of town and city as against country is absolutely bound up in the maintenance of the tariff wall, and the chief aim of political activity now seems to be to secure economic gain. The opinions aired before the present tariff commission and scattered broadcast through the medium of the press can scarcely affect the viewpoint of any who have come to a conclusion on the subject. It may, however, emphasize the dilemma of the present government; it might even impress some with the fact that the tariff is a non-political issue.

There is one thing certain in the present situation, and this is that the protectionists are distinctly on the defensive. The movement, which commenced in the formation of the "national policy" over forty years ago, and which reached its zenith shortly afterwards, now has its back to the wall. In the large number of manufacturing plants established and prospering in this country the protectionists have an argument which ensures against any drastic reduction in import duties. The present issue, however, is not between absolute free trade on the one hand as against protection on the other. Whatever a free trade party may advocate in opposition, the most it could put into effect if returned to power would be a substantial reduction. As is now being emphasized, manufactures in Canada, with the hundreds of millions of dollars invested, and the hundreds of thousands of workers deriving their livelihood therefrom, is absolutely dependent on the tariff. As a means of checking the too rapid movement from town, country to city, however, the tariff reduction movement is one which can effect a great benefit to the country as a whole.

THE BONDS OF EMPIRE

EMPIRES of old were held together by material forces—forces imposed by the central power. The British empire has outgrown this stage, for it is now nearly one hundred and fifty years since the American colonies broke the chains with which the British government endeavored to bind them to the homeland. It is immaterial forces which now maintain the unity of the empire; common race, customs and political ideals are proving themselves the most potent reasons for political association.

Speaking before the Congress of Chambers of Commerce of the British Empire, on Tuesday last, Premier Drury of Ontario warned against any attempt to forcibly hold the empire together. The congress is on record in favor of imperial preference, but Mr. Drury was not afraid to stand by his belief in free trade. Empire preference will be practicable only so long as it springs from a native desire to favor commerce with the United Kingdom and the other colonies. Preference itself assumes a protective tariff, and the movement towards tariff reduction may overtake the preferences already granted.

The congress has not been without its jarring notes. Canada is unquestionably loyal—there never was a time of greater appreciation of the high ideals for which the empire stands—but Canada has a part to play in world commerce which necessitates a view of the political world beyond. Sir Edmund Walker emphasized the fact that Canadian transactions must in the main be cleared in New York, which has by natural growth become the financial centre of this continent, and that any attempt to divert the flow to London could not be favored here. Premier Drury outlined a high political ideal in which Canada, and more especially Ontario as its central province, would harmonize the two great branches of the Anglo-Saxon race. The British empire may be a federation of partners, but it cannot be a self-sufficing league of nations. The congress does well to favor imperial preference. The self-governing colonies will continue to frame their fiscal policies on economic grounds, tempered by such concessions as spring from an [illegible] desire to strengthen the bonds—not the chains—of empire.

ANOTHER BANKER GOES TO UNITED STATES

THE appointment of Vere C. Brown to the committee of executive managers of the National City Bank of New York is still another tribute to the Canadian banking system and to the grade of training this country can give. A large number of Canadians have gone to the United States after a brief experience in Canada, but the appointment of Mr. Brown directly to one of the highest positions in the gift of this enormous institution is a recognition of the fact that those who have made good in the Canadian field are fit to take a leading place in the financial centres of the world.

The National City Bank is the largest banking institution in America, its total resources exceeding $1,000,000,000. It has 56 foreign branches in England, Belgium, Spain, Italy, South Africa, South America and the West Indies; and, through its ownership of the International Banking Corporation, a further 29 branches in India, China, Japan, the Philippines, Java, Straits Settlements, etc. Its board of directors has 24 members, including many names continentally known, such as James A. Stillman (president), William Rockefeller, J. Ogden Armour, Cyrus H. McCormick, Henry A. C. Taylor, etc. The administration of the bank is organized in thirteen divisions, principally geographical, the general management being in the hands of the president and a small committee of executive managers, of which latter Mr. Brown is made a member.

KNOWLEDGE OF COSTS IS ESSENTIAL

THE organization in Toronto last week of a "Costs Accountants' Association of Canada" is a recognition of the growing value of this comparatively recent business operation. The new association will include not only chartered accountants but also all those accountants who are interested in the estimating of manufacturing and selling costs. A similar organization already exists in the United States.

Some references to this class of work are contained in a recent issue of the [illegible] Magazine. It is termed [illegible] the new science of cost accounting, and some interesting illustrations are given of the serious mistakes which some of the larger manufacturing concerns have made in past years owing to the fact that they were not in possession of [illegible] information regarding their own manufacturing costs. It is told of one large United States firm that it was not until the war broke out that it learned that all its profits had been made from its foreign business and that its domestic transactions were being carried on at a loss. Having lost its foreign trade as a result of the war, it was necessary for it either to reorganize its domestic business at once so that it would yield a profit or wind up its affairs. In the business world, there were always some [illegible] methods of manufacturing and selling costs, but in the great majority of cases they were done with a sufficient [illegible] of exactness, and as a result there was considerable [illegible] corporations and companies [illegible] to decide whether they were making money or otherwise, and the history of failures proved that in the majority of cases they were losing.

The price of motor cars is coming down. On the other hand the price of gasoline has gone up, and those who bought automobiles at high prices are caught both ways.

* * * * *

The 1920 Leipzig fair was a failure, due to lack of buyers. There is no shortage of goods in Europe, though in some parts there may be a shortage of money to pay for them.

* * * *

The price of C.P.R. stock has failed to respond to the increase in railway rates. Perhaps this good news had been more than offset by the harrowing story which the railroads told the Board of Railway Commissioners.

* * * * *

"All public men in Canada are protectionists in office" is the apt remark of *Paid Tip* in commenting upon the premiership of Sir Robert Borden. Even a farmers' government would find it difficult to break the rule.

* * * *

Already the price of wheat, like that of most other raw materials, is coming down. Wheat for December delivery sold at $2.32 in Chicago on Tuesday, Canadian shipments being responsible for a substantial decline.

* * * *

Ford Motor Car Company of Canada shares fell thirty points on the Detroit market when the announcement of a reduction in the selling price of cars was made. This is a direct result of a slackening in demand, and forebodes a reduction in the profits of industry.

* * * *

In a special article on housing, the New York *World* says that Canada has accomplished something in solving the housing problem. This will be news to Canadians, but there is no doubt as much truth in it as in the reported success of government housing schemes in Great Britain.

* * *

The fact that a bond is not readily convertible into cash, points out the *Manitoba Free Press*, may sometimes be an advantage, as the owner will not find it so easy to turn it into money to be spent extravagantly. We know of some bonds which possess this virtue to the nth degree; in fact, some issues which have been placed upon the market during the past year can scarcely ever be repaid.

* *

The writing down of security valuations to new market levels is disheartening to the institutional and private investor. It wipes out a substantial part of profits and of savings. It is only by this process of writing down, however, that a company's financial position can be certainly known, and those which make full provision for such depreciation will reap a corresponding benefit as values recover.

* * * *

"I remember saying in 1916 that Germany had revealed itself in such a way that we wanted no more truck or trade with it, but I do not think we can say that in 1920," said Sir James Woods in addressing the Empire Chamber of Commerce in Toronto on September 17. Did Sir James in 1916 really believe that there would be no more trade with Germany, or was he not rather taking advantage of the [illegible] of the time?

"The [illegible] situation has continued, during the period [illegible] September 17, to evidence in a substantial measure [illegible] become apparent a month ago," [illegible] National Bank of Commerce, New York, in its letter [illegible]. "There has not, it is true, been any easing [illegible] have increased in response to [illegible] been no relaxation in commercial [illegible] in this situation can be expected [illegible] of the crop-moving season. [illegible] Nevertheless, substantial progress has been made [illegible] difficulties in the credit situa-

International Trade

In the transaction of foreign business, knowledge and experience count for much. The experience gained by this Bank at its own offices in such centres of international trade as the following:

London, Eng. Mexico City
New York San Francisco

is available for extension of Canadian trade abroad. In addition it maintains a Foreign Department specially equipped to handle all foreign exchange transactions.

BANK OF COMMERCE SUPERINTENDENTS

C. W. ROWLEY

Upon the retirement of Vere C. Brown as superintendent of the middle west for the Canadian Bank of Commerce, a new policy has been adopted. Hitherto the superintendency for the middle west has been at Winnipeg and has covered Manitoba, Saskatchewan and Alberta. Under the new arrangement, however, this superintendency will be divided into two parts, with one branch at Winnipeg, to cover the provinces of Manitoba and Saskatchewan, and one at Calgary to cover Alberta and the Peace River branches, so that now there are two superintendencies instead of one. Under this arrangement the business of the bank in the west will be conducted more efficiently. C. W. Rowley has been appointed as superintendent of the Manitoba and Saskatchewan branches, while J. B. Corbet has been appointed superintendent of the Alberta and Peace River branches. Mr. Rowley's banking career has been confined entirely to the west. From 1892 to 1902 he was accountant at Winnipeg, afterwards for a short time at Vancouver, and from there he went to Calgary to open a branch in that city. Since 1911 he has been manager of the main branch at Winnipeg. Mr. Corbet entered the bank's service at New Westminster in 1901, and in 1903 was brought to Toronto. From that date until 1911 he was attached to the head office staff, after which he became assistant inspector at Winnipeg, and for the past three years has been senior inspector of the bank's western business, with headquarters at Winnipeg.

J. B. CORBET

OBITUARY

HON. ROBERT BEAVEN, former premier of British Columbia, for nearly twenty years a leading figure in the political life of the province, and at one time mayor of Victoria, died at his home in that city on September 18, at the age of 81 years.

PERSONAL NOTES

W. G. FRISBY, principal of the York Street School, Toronto, has been appointed secretary of the Mothers' Pension Board of Ontario.

E. L. PEASE, vice-president and general manager of the Royal Bank of Canada, is touring the maritime provinces in company with other officials of the bank.

J. A. CAMPBELL, formerly British Columbia manager of the Equitable Life Assurance Society, has become Vancouver manager of the Sovereign Life Assurance Company, of Winnipeg.

COLIN CAMERON has resigned from the directorate of the Canada Foundries and Forgings Company. Mr. Cameron was formerly a partner in the late firm of Thornton, Davidson and Company Montreal.

J. E. COOMBS, who has been manager of the Sterling Bank of Canada, Adelaide St., Toronto, for the past few years, has resigned, and is going to New York to take up a position with the Guaranty Trust Company, of that city.

JAMES E. REILLY, who has been secretary of the Alberta Board of Public Utility Commissioners since that organization was created in 1915, has resigned to accept a position with the Gregory Tire and Rubber Company, of Vancouver.

G. S. LAING, chartered accountant, of Winnipeg, Man., who for the past two years has been engaged by the Board of Grain Supervisors as internal auditor has completed this work and has opened an office at 805 Union Trust Building, Winnipeg, Man.

NAPOLEON LAVOIE, general manager of the La Banque Nationale, left for New York on September 14, from where he will sale for Europe. While in Europe, Mr. Lavoie will visit the Banque Nationale in Paris, and will also study general commercial and finance relations between France and Canada.

HOWARD E. BLIGH, for some years inspector for Manitoba, Saskatchewan and Alberta, of the Western Assurance Company of Toronto, with headquarters at Calgary, has relinquished his connection with that company and has been appointed manager of the insurance department of the Northern Securities, Limited, Vancouver.

A. E. HOLT, manager of the Royal Trust Company, Montreal, has retired from that position owing to ill-health. H. B. Mackenzie, formerly general manager of the Bank of British North America and at present one of the assistant general managers of the Bank of Montreal, will, it is understood, be appointed general manager of the Royal Trust Company, having supervision of the head office here and the branches throughout Canada. The board of directors has elected Mr. Holt as a member of the board in order to retain his connection with the institution and to take advantage of his long experience, he having been its first employee.

J. H. C. LAWRENCE, who is well known in Winnipeg financial circles, has been appointed manager of the Canada Permanent Trust Company, succeeding Mr. G. F. Harris. Mr. Lawrence has been with the firm since 1896 in various capacities both in the east and the west. The company is an offshoot of the Canada Permanent Mortgage Corporation whose headquarters are at Toronto, and the formation of the trust company was undertaken to work hand-in-hand with the parent company, doing general trust company business.

W. W. STRATTON has been elected to a seat in the Toronto Stock Exchange. Mr. Stratton has just formed a partnership with P. W. Campbell under the name of Campbell, Stratton and Company, and will carry on a general business as stock brokers and bond dealers, as successors to the firm of A. E. Dyment and Company. Mr. Dyment is giving up his seat on the local exchange in order to devote his time more particularly to other financial interests. The new partners, [illegible] have been engaged in [illegible] work in Toronto and Montreal.

THE STERLING BANK

GRAIN YIELD FAR AHEAD OF LAST YEAR

Latest Estimates Indicate This—Western Farmers Had to Contend with Many Trying Situations, but Have Come Through Successfully

THERE will be a total grain yield of 664,162,000 bushels in the three prairie provinces, according to the latest estimate of the Manitoba "Free Press," this figure being divided among five cereals as follows: Wheat, 248,745,000 bushels; oats, 352,109,000 bushels; barley, 47,561,000 bushels; flax, 7,152,000 bushels; rye, 8,912,000 bushels. In compiling the estimate the figures for acreages are the revised figures of the Dominion government, issued in July last. The acreages for barley and flax are probably too small, but with that exception the figures would appear to be satisfactory.

Commenting on the situation, the "Free Press" says:—

"The crop of 1920 in the prairie provinces has passed through many vicissitudes. The spring was exceptionally late and cold, and in many large areas no seeding was done until after May 1st. Large sections of all three provinces were threatened with destruction by grasshoppers, and, while the final loss from this plague has been small, it was only organized co-operation and a stiff fight that produced this result, and the cost of fighting the grasshoppers was no light burden. Other big areas suffered from a variety of cutworm that works under ground and for which no remedy has so far been found.

"Over large districts in southern Alberta and Saskatchewan and more restricted districts in Manitoba there was heavy loss from drifting and blowing of soil. Some fields were seeded at least three times and were finally lost. From the middle of June until the first few days of July there was a period so dry that for a time it seemed as if the disaster of 1919 was to be repeated. When rains came and growth was suddenly lush and heavy, rust became a menace, especially along our southern borders, and has certainly taken a very considerable toll of the wheat in both Manitoba and Saskatchewan. Alberta, more particularly southern Alberta, being immune. There has been hail damage in some sections, though the general hail damage of the three provinces is not large. The gophers have taken their toll, and due, no doubt, to the late spring and the dry period in June, weeds have been difficult to cope with and have smothered a certain percentage of the crop. Though the seeding was one of the latest on record, the harvest was an early one, the excessive heat and dryness bringing crop too fast for fullest development of the berry. Between two excessively hot periods in August, to wit: August 21st and 22nd, there was from 1 to 8 degrees of frost over very considerable areas, more especially in central Saskatchewan, the extreme north and the extreme south of all the provinces escaping and the chief damage being done to late oats and barley. In the entire growing period of the crop there has never been even one soaking rain that covered the wheat belt from the eastern boundary of the province of Manitoba to the Rockies and from the international boundary to the crop line in the north. In spite of these many drawbacks the west has harvested and to a considerable extent thrashed the satisfactory total of 248,745,000 bushels of wheat, much of which will grade high and weigh over 60 pounds to the measured bushel."

Total Preliminary Estimate

Yields and conditions of field crops in the whole of Canada, as compiled from the returns of crop correspondents at the end of August to the Dominion Bureau of Statistics, are summarized as follows:—

The first reports made by crop correspondents on the average yields per acre of wheat, oats, barley, rye and flaxseed show that for the whole of Canada the yields per acre are for spring wheat 16½ bushels, as compared with 9½ bushels last year and with 16½ bushels, the decennial average for the period 1910-19; for oats, 35½ bushels, compared with 26¼ bushels last year and 33¼ bushels, the ten-year average; for barley, 25½ bushels, compared with 21¼ bushels last year and 25¾ bushels, the ten-year average; for rye 17¾ bushels, compared with 13½ bushels last year and 18 bushels, the ten-year average; and for flaxseed, 9¼ bushels, compared with 5 bushels last year and 9.40 bushels, the ten-year average. These figures indicate, therefore, that for wheat the yield is just equal to the decennial average; that for oats the yield is 2¼ bushels above average; that for barley and rye it is ¼ bushel below average, and that for flax it is practically equal to the average. Applying the averages for 1920 to the latest estimates of areas sown (these areas being shortly subject to final revision), we get as the preliminary estimate for the whole of Canada total yields as follows: Wheat, 289,498,000 bushels, as against 193,260,400 bushels last year; oats, 556,719,000 bushels, as against 394,387,000 bushels; barley, 64,257,000 bushels, as against 56,389,400 bushels; rye, 12,915,000 bushels, as against 10,207,400 bushels, and flaxseed, 11,090,000 bushels, as against 5,472,800 bushels.

Yields of the Prairie Provinces

The following is the preliminary estimate of total production in the three prairie provinces (Manitoba, Saskatchewan and Alberta), the corresponding totals for 1919 being given within brackets: Wheat, 260,157,000 bushels (165,544,300); oats, 359,289,000 bushels (235,580,000); barley, 43,762,000 bushels (36,682,400); rye, 9,820,000 bushels (7,262,400), and flaxseed, 10,817,000 bushels (5,232,300). By provinces the estimated yields are: Manitoba—Wheat, 40,305,000 bushels (40,975,300); oats, 61,328,000 bushels (57,698,000); barley, 19,895,000 bushels (17,149,400); rye, 4,349,000 bushels (4,089,400); flaxseed, 605,000 bushels (520,300). Saskatchewan—Wheat, 136,880,000 bushels (89,994,000); oats, 173,003,000 bushels (112,157,000); barley, 11,640,000 bushels (8,971,000); rye, 3,535,000 bushels (2,000,000); flaxseed, 9,288,000 bushels (4,490,000). Alberta—Wheat, 82,972,000 bushels (34,575,000; oats, 124,958,000 bushels (65,725,000); barley, 12,227,000 bushels (10,562,000); rye, 1,936,000 bushels (1,173,000); flaxseed, 924,000 bushels (222,000).

Late-Sown Field and Fodder Crops

The average condition on August 31st of late-sown field and fodder crops, expressed numerically in percentages of the average yield per acre for the ten years, 1910-19, was reported as follows, the figures within brackets representing in the order given the condition on July 31st, 1920, and on August 31st, 1919: Peas, 96 (102, 87); beans, 99 (103, 93); buckwheat, 90 (101, 95); mixed grains, 104 (105, 87); corn for husking, 98 (95, 89); potatoes, 102 (104, 91); turnips, mangolds, etc., 97 (95, 99); fodder corn, 100 (98, 97); sugar beets, 96 (99, 83); pasture, 92 (89, August 31st, 1919).

Ontario Yields are Greater

A comparison for Ontario is contained in a bulletin just issued by the provincial department of agriculture, as follows:—

Following are some of the figures for the two years: Fall wheat, 1920, acreage, 762,371; production, 18,274,468; average per acre, 24; 1919, acreage, 619,494; production 15,051,703; average per acre, 24.3.

Spring wheat, 1920, acreage, 267,367; production, 4,717,938; average, 17.6; 1919, acreage, 361,150; production, 5,646,544; average, 15.6.

Barley, 1920, acreage, 484,328; production, 16,353,689; average, 33.8; 1919, acreage, 569,185; production 13,133,757; average, 23.1.

Oats, 1920, acreage, 2,880,053; production, 128,006,264; average, 44.4; 1919, acreage, 2,674,341; production, 78,388,018; average, 29.3.

Peas, 1920, acreage, 109,187; production, 2,249,283; average, 20.6, 1919, acreage, 127,253; production, 1,816,517; average, 14.3.

Beans, 1920, acreage, 22,744; production, 369,159; average, 16.2; 1919, acreage, 22,920; production, 288,480; average, 12.6.

Hay and clover, not including alfalfa, 1920, acreage, 3,-[illegible],749; production, 4,1[illegible],094 tons; average, 1.26 tons; 1919, acreage, [illegible],508,266; production, 5,588,804 tons; average, 1.59 tons.

PROBLEMS OF EMPLOYMENT DISCUSSED

American Association of Public Employment Offices—Control Over Immigration Suggested

THE eighth annual meeting of the American Association of Public Employment Offices was held in Ottawa, September 20 to 22. Bryce M. Stewart, director of the Canadian Employment Service, is president this year. The program was divided into five divisions, as follows: Unemployment and organization of employment; employment and education; the placement of the physically handicapped; the harvest labor problem; and employment office administration and technique. Several addresses were given under each division. The Canadians who read papers were: Gilbert E. Jackson, associate professor of economics, University of Toronto; G. Frank Beer, Toronto; W. C. Clark, associate professor of economics, Queen's University, Kingston; J. W. Macmillan, professor of sociology, Victoria College, Toronto; R. A. Rigg, Dominion superintendent of western offices, employment service of Canada; J. M. Wyatt, juvenile employment specialist, employment service of Canada; T. Norman Dean, statistician, Ontario Workmen's Compensation Board.

Might Direct Immigration

J. W. Macmillan, Toronto, spoke on "The Public Employment Service and the Immigrant." He said in part:—

"It is manifest that there would be great advantage in getting into touch with would be immigrants in their own lands. Those who are destined to be rejected at the port of entry would be saved the wearisome and costly journey, and their disappointment greatly mitigated. And the false ideas inculcated by mercenary agents, or the fairy tales of hearsay, might be corrected in time. Most of all, the immigrant might be connected with a job before he buys his ticket. And those for whom jobs were waiting might be assured of entrance, while others were delayed or refused. Indeed, the problem of the limitation and selection of immigrants might thus be solved, as only those were admitted who were manifestly needed and for whom a place was waiting.

"I suggest a special department in connection with the public employment bureaus, charged with the distribution and protection of immigrants. This department would cooperate with the immigration authorities. Employment offices would require to be opened at the ports of entry and the centres of population where immigrants normally gather and from which they scatter.

"Under present conditions the skill of the immigrant is negated by his person. The determining factors of his first choice of work are the occupations of his family or relatives, the orders on the book of the employment agent or banker to whom he comes, and the help of chance acquaintances. His aptitude, training, experience and qualities other than physical have little influence upon the decision.

"Our immigration policies, so far, have been halted at the point of admission of the immigrant. They should, hereafter, attend and guide him until he becomes a citizen. Citizenship—that is the real port of entry to a nation's life. That is the place where the state should say 'Godspeed.'"

Canadian Re-elected President

At the closing session it was decided to meet at Buffalo, N.Y., next year, and also to change the name of their organization. In future it will be known as the International Association of Public Employment Services. The constitution was amended to allow this.

Bryce M. Stewart, Labor Department, Ottawa, was again elected president of the association. Other officers elected were: First vice-president, A. W. Holbrook, Dayton, Ohio; second vice president, J. Danderdale, Boston, Mass.; third vice-president, A. Sullivan, Chicago; secretary, Richard A. Glynn, New York; executive—J. D. Densmore, Washington, D.C., immediate past president and director-general United States Employment Service; Miss Marion Findlay, Toronto; Robert Peters, Harrisburg, Pa.; Thomas Malloy, Regina, Sask.

BANK BRANCH NOTES

THE Imperial Bank of Canada have opened a branch at the northwest corner of Annette St. and Runnymede Rd., Toronto.

The temporary branch of the Bank of Montreal, in the Canadian Pacific Railway Co. hotel at Banff, Alta., has been closed for this season.

The Bank of Montreal has obtained permission to erect a brick and stone building on Cherry St., Toronto, at a cost of $30,000.

R. M. Campbell, manager of the Merchants Bank at Minburn, Alta., has been transferred to their branch at Galahad, Alta. Mr. McMillan, who has been manager of the bank at Galahad, has been transferred to Minburn.

Mr. Thomas, the new manager of the Brockville branch of the Merchant's Bank, has arrived from Lancaster, Ont.

EXCHANGE QUOTATIONS

Messrs. Glazebrook and Cronyn, exchange and bond brokers, Toronto, report local exchange rates to *The Monetary Times* as follows:—

	Buyers.	Sellers.	Counter.

TORONTO GENERAL TRUSTS CORPORATION

Established in 1882, was the first trust company in Canada. It is absolutely free from affiliation with other financial concerns—a trust company confining itself to the business of executor, trustee or agent and eliminating from its transactions everything of a speculative character. The total value of estates, etc., under its administration now exceeds One Hundred Million Dollars, one half of which has accumulated during the last seven years. All investments made by this Corporation are restricted to "Trustee Securities" as authorized by law. The Toronto General Trusts Corporation solicits the appointment of Executor and Trustee of your Will, offering these advantages combined with years of experience in estate management.

CANADIAN LIFE PAYMENTS IN 1919

List of Payments of $10,000 and Over—Policies of Late John Lennox, of Hamilton, are Second in List—Payments by Cities

ACCORDING to a compilation of "The Insurance Press," New York, $1,813,500,000 was paid to life insurance policyholders in 1919 in the United States and Canada. The total is made up as follows:—

Death claims, matured endowments and annuities	$ 672,686,000
Payments for premium savings (dividends to policyholders) and for lapsed, surrendered and purchased policies . . .	291,696,000
Total	$ 964,382,000
Commuted value of insurance claims awarded by the Bureau of War Risk Insurance from December 31, 1918, to December 31	879,118,000
Grand total	$1,843,500,000

The largest amount of insurance on a single life paid in 1919 was carried by the late Henry C. Frick, of New York City and Pittsburgh. The next largest amount was $334,000 on the life of John Lennox, of Hamilton, Ont. Both of these sums are modest compared with reports in preceding years.

Large Payments in Canada

The payments of $10,000 and over in Canada were as follows:—

Calgary.—Ralph D. Shartz, $10,000; William B. Waters, $10,000.

Vancouver.—Frank N. Torites, $10,000.

Victoria.—Robert P. Rithet, $16,474.

Winnipeg.—Name not given, $13,816; Thomas A. Anderson, $10,082.

Bourget, Ont.—Arthur A. Bourque, $10,797.

Hamilton.—John Lennox, $334,000; name not given, $15,122; Lawrence B. Johnston, $12,002.

London.—George Robinson, $64,031.

Toronto.—William Hyslop, $65,000; Thomas W. Watkins, $20,000; William Carter, $14,659; Fred. E. Fuerst, $14,659; H. R. Emery, $10,240; J. J. Fallett, $10,111; George E. Dies, $10,000; John D. Ivey, $10,000.

Charlottetown.—R. C. A. Grant, $10,068.

West Cape, P.E.I.—Ames McWilliams, $12,957

Montreal.—Alphonse Felix Mercier, $30,000; name not given, $21,105; name not given, $16,877; name not given, $16,877, name not given, $16,877; name not given, $16,724; P. Lamarre, $15,052, Louis I. DeGuise, $15,000, Joseph A. Duport, $10,000, Joseph D. R. Forget, $10,000; Charles L. Sh[illegible]wald, $10,000; Colin M. McC[illegible]g, $10,000.

Quebec.—Jean F. Lavelle, $10,750; Gustavus G. Stuart, $10,000.

St. Barthelemy, Que.—Louis J. Plante, $12,009

St. Hyacinthe, Que.—Herbert Tchalifoux, $12,0[illegible]

St. Jerome, Que.—J. Camille Le Moyne de M[illegible], $10,000.

Westmount, Que.—William Kelly, $20,04[illegible]; [illegible] H. Ball, $13,000; Albert H. Dalrymple, $12,000.

Regina.—Name not given, $10,000.

Carcross, Yukon.—James M[illegible], $100,[illegible]

Totals for Cities

The totals for the cities and large towns of the Dominion and Newfoundland were as follows:—

ALBERTA

Edmonton, $169,000; Calgary, $167,000; Lethbridge, $[illegible] 000; High River, $26,000; Wainwright, $24,000; Brooks, $1[illegible]000; Provost, $15,000; Crossfield, $14,000; Rimbey, $14,000; Cardston, $13,000; Drumheller, $13,000; Cereal, $12,000; Morinville, $12,000; Oyen, $12,000; Raley, $12,000; Sedgewick, $12,000; Seven Persons, $12,000; Spirit River, $12,000.

American Companies to Write Fire Insurance Here

Licenses Have Been Issued for That Purpose—Eaton Company Receives Authorization to Transact Life Business — Extension of Scope Granted to Other Companies—Unlicensed Insurance for British Columbia Meeting With No Resistance

FIVE insurance companies which had not previously been writing business in Canada received Dominion licenses during the past month. The T. Eaton Co. Life Insurance Company has been authorized to transact in Canada the business of life insurance. P. S. McLean has been appointed chief agent, with head office at Toronto. Authorization was also given to the Canada Security Assurance Company, to transact the business of fire, hail and automobile insurance. J. B. Laidlaw is chief agent, with office at Toronto. The Northwestern Mutual Fire Association, which formerly held license restricting its business to British Columbia, may now write fire and automobile insurance (excluding insurance against loss by bodily injury to the person) in Canada.

Three United States companies have obtained the necessary authorization to write business in this country, and C. L. Clark, of Winnipeg, Man., has been appointed to act as chief agent. The three companies, which will all transact fire insurance, are as follows: Hardware Dealers' Mutual Fire Insurance Company of Wisconsin; Retail Hardware Mutual Fire Insurance Company; Minnesota Implement Mutual Fire Insurance Company.

The Sterling Fire Ins. Co., of Indiana, U.S.A., has been authorized to transact in Canada the business of fire and tornado insurance. P. A. McCallum, Toronto, has been appointed chief agent for the Dominion.

Other Licenses Issued

Two companies which are already operating under a Dominion license have had their powers extended. The National Benefit Assurance Co., Ltd., has been authorized to transact the business of accident and sickness insurance, in addition to fire insurance for which it is already licensed. In addition to classes which the Great American Insurance Co. is already licensed for, the company may transact the business of inland transportation insurance. The Traders General Insurance Association, Ltd., has also had its scope extended, and will write automobile insurance in addition to fire insurance.

The Union Assurance Society, Ltd., which is already transacting throughout the province of Quebec the business of fire and inland transportation insurance, has had its license amended to include automobile insurance. Last month the Hartford Accident and Indemnity Co. obtained a Dominion license to transact accident, automobile, burglary, guarantee, livestock, plate glass and sickness insurance in Canada. The company has also obtained a separate provincial license to transact the same classes of business in the province of Quebec. H. A. Fromings, Montreal, is to be the chief agent for the province.

British Columbia Business

License has been issued to the Pacific Marine Insurance Co. to transact in the province of British Columbia the business of fire, automobile and inland transportation insurance. Head office of the company is to be at Vancouver, and L. H. Wright is attorney for the company. The Eagle Star and British Dominions Insurance Co. has also been licensed to write automobile insurance in the province. Loewen and Harvey are the attorneys.

The Columbia Insurance Co., which was licensed last month to transact in the province the business of fire insurance, has obtained the necessary authorization to write inland transportation and automobile insurance. Authorization has also been given to the American Central Insurance Co. to write in the province the business of automobile, explosion and tornado insurance. D. W. Campbell, Vancouver, is attorney for the company.

Notice is given that the British Crown Assurance Corp., Ltd., has been licensed to transact in British Columbia the business of fire and automobile insurance. The head office is at Vancouver, and A. S. Matthew is the attorney for the company. This company has acquired the rights and property of the old British Crown Assurance Corp., Ltd., which was incorporated in the United Kingdom, and operating under a provincial license, but which has ceased to carry on business.

Companies unlicensed by the federal or British Columbia governments are said to be doing a brisk business in British Columbia, *The Monetary Times* understands. In the case of one company, definite information has been received, that in spite of warnings from high places, they are continuing to write automobile business at reduced rates in defiance of British Columbia and federal laws, but up to the present time no one is prepared to take the initiative to make a definite charge to the proper authorities.

Insurance Notes

The Maryland Assurance Corporation, with head office at Montreal, has ceased to write accident and sickness insurance in the province, and all its business in force has been reinsured by the Maryland Casualty Company, which also has its office in Montreal.

The Continental Insurance Company of New York and the Fidelity Fire Underwriters of New York recently established a joint brokerage department at 17 St. John Street, Montreal, in charge of Mr. Harry Hall. This new department, in addition to the French brokerage office operated by the Continental Insurance Company under the direction of J. W. Provost, will act as a measure of enlarged service to agents and brokers and give prompt attention to the handling of business located anywhere in Canada.

A. A. Fairbairn, from the western department at Chicago, of the Firemen's Insurance Co., of Newark, N.J., has been appointed chief agent for Canada, not only for the Firemen's, but for the Girard Fire and Marine Insurance Co. His office will be in the Lewis Bldg., St. John St., Montreal.

The Mills Insurance, Ltd., Vancouver, have been appointed general agents for British Columbia for the National Insurance Co. of Hartford, transferring this account from Leslie H. Wright and Co. The occasion for the change is the fact that the Pacific Marine Insurance Co., of which Leslie Wright is the executive head, has entered the fire insurance business in Canada and will push the fire business of his company. The offices of the Mills Co. are at 102 Pender St.

BRITISH CANNOT INVEST HERE

Because of the present adverse rate of exchange there is little prospect of investment funds from England finding their way out to Canada, is the opinion of William Toole, who has returned from a four months' visit to the United Kingdom. There are prospects of a very desirable class of emigrants coming out from the British Isles to Canada, particularly to the west. From reliable sources Mr. Toole learned that over fifty per cent. of this English emigration is settling in Alberta. "The old country people are very anxious for reliable information, statistics and continuous reports of the development that is taking place in Alberta," he said. "I would emphasize that too much care cannot be exercised in the accuracy of information sent out. We have nothing to be ashamed of, and we must stick to the actual truth."

Why Individuals Don't Become Famous as Executors:

How many individuals do you know who have made business reputations purely as trustees? Not many.

How many trust companies do you know whose reputations for business efficiency have grown solely through their services in positions of trust? Quite a number in Canada alone.

The reasons are two. Few people act as executors often enough to learn how to manage estates efficiently. The company is managing various estates from day to day. This means that to any new business the company brings a skill and organization developed through years of experience.

If you will send us your address we shall be glad to mail to you our booklets telling why it is a duty for every man to make a will, and why trust companies make the best executors.

Imports Show Further Falling Away in August

Exports Increased Approximately Seven Millions—Favorable Movement Which Started in July will Likely Continue—Increase in Fibres and Textiles Notable Among the Imports — Wood and Paper Still Canada's Major Industry

A CONTINUANCE of the improvement which started in July is shown in the August trade statement. Imports show a further falling away of about $3,000,000 for the month, while exports increased $7,000,000. The grand total of Canadian trade for the month was $238,085,409, as compared with $202,235,978 for the same month last year. This showing, however, is not as good as it first appears, inasmuch as imports represent the bulk of the total this year, while last year exports were in that position. For the five months ended August, 1920, Canada has piled up an unfavorable balance of $132,428,000, while for the same five months in 1919 the country had to its credit the sum of approximately $128,514,000. During the last two months, however, there has been a tendency to reduce the imports and increase the exports. It is thought that this movement will increase in the latter part of the year and that at the end of the period the Dominion will be in a better trade position than it has been for some months past.

Notable among the increases in imports for August were: Fibres and textiles, iron and steel, non-metallic minerals and agricultural and vegetable products. The only account to show a decline was animal and animal products. Under exports there were large decreases in agricultural, vegetable and animal products, while there was a small decline in fibres and textiles. These decreases were offset to some extent by advances in other products.

The following statement, prepared by the Department of Customs, gives the details:—

DOMINION REVENUE INCREASED LARGELY IN AUGUST

Due To Taxes Imposed Under Last Budget—Ordinary Expenditure Also Advanced—Net Debt up Twenty Millions

LARGE increases are shown in ordinary revenue and expenditure in the Dominion government's financial statement for August, 1920. The large advance in revenue of approximately $51,000,000 for the first five months of the fiscal year is due chiefly to the taxes imposed under the last budget.

For the first time ordinary expenditure is shown in detail. Principal increases for the five months are in interest on public debt, soldiers land settlement, pensions and miscellaneous revenue. Interest on public debt includes the first payment on the last Victory loan, which explains the heavy advance over last year.

DOMINION GOVERNMENT SAVINGS BANKS

Deposits in the Dominion Government Savings Banks for July, 1920, were about $30,000 below the June figure, but withdrawals were not so heavy, showing a decrease of about $14,000. The balance to the credit of the depositors at the end of the month, was therefore reduced from $10,680,84 to $10,661,200. The following are the figures:—

GRAND TRUNK TELEGRAPH SERVICE

The jurisdiction of Geo. D. Perry, general manager o the Great Northwestern Telegraph Co., has been extende over the telegraph lines of the Grand Trunk Pacific Rail [illegible] headquarters at Toronto, according to an announce [illegible] made by D. B. Hanna, president of the Canadian Na [illegible] Railways. The announcement follows the decision o the government to place the management of the Grand Trun [illegible] under the control of the board of directors of th Canadian National Railways.

We heard a man say:

"Let the Telephone Company use the profits they made in prosperous years, if they need money to build more plant."

That's exactly what we have done!

Shareholders of the Bell Telephone Company of Canada have been paid only a moderate return on the par value of their stock—no more!

We have made no distributions of bonus stock, no 'melons' have ever been cut; no distribution ever been made of surplus earnings. Every share of stock has brought us its par value, or better.

For forty years we have consistently used all surplus earnings, all idle reserves to buy more telephone plant. Every dollar has gone back into the business to extend it and serve new subscribers.

What has this policy meant to the public?

The Board of Railway Commissioners at our last rate investigation found that if we had not pursued this honorable course of turning all surplus earnings back into the business we would have had to provide in the year 1918 alone an additional $908,000 out of revenue to pay interest on the plant so secured. This, of course, would have meant higher rates to subscribers.

The fact is, we need millions of new money just because our funds have always been at work, keeping down our bond and stock issues, and ensuring low rates to our subscribers!

Tariff Commission Hears Evidence in West

Manufacturers Re-Affirm Position in Favor of Protection — Council of Agriculture Would Have Revenue Tariff Only—Attitude of Farm Implement Manufacturers Explained Evidence Heard at Winnipeg and Vancouver Sessions

SINCE its sittings commenced in Winnipeg on September 14th, the Tariff Commission, composed of Sir Henry Drayton, Hon. G. D. Robertson and Hon. J. A. Calder, has already heard perhaps the most authoritative statements from both sides. The Canadian Council of Agriculture and the Canadian Manufacturers' Association lost no time in presenting their respective cases; and it is evident that much care was given to their preparation. Outside of these statements, perhaps the most notable was one presented on September 18th by Thomas Findlay, general manager of the Massey-Harris Company, on behalf of farm implement manufacturers. Individuals also gave evidence, most of it favorable to protection, and in Vancouver, where the commission arrived on September 20th, the evidence was almost entirely in favor of a substantial tariff.

The Winnipeg hearings were on September 14, 15, and 16; sessions were then held in Medicine Hat on September 17; in Vancouver on September 20 and 21; and in Victoria on September 22 and 23. The itinerary for the coming week is as follows:- Vancouver, September 24 and 25; Vernon, B.C., September 27; Nelson, B.C., September 30 and October 1.

In pointing out the purpose and scope of the inquiry, Sir Henry Drayton agreed that Canada's fiscal policies, while insuring the necessary revenues, should be applied in a manner least burdensome to the public. At the same time, he wanted all parties to understand, when presenting their claims or suggestions, that Canada must meet her financial obligations brought about by the war. Any bodies or organizations interested in the tariff would have an opportunity to advance their arguments for or against a reduced tariff, but the minister of finance made it evident that he is much more interested in proofs than in generalities. The United Farmers of the west will have much more to say about the tariff, as detailed statements will be put in later to show what they believe will be the effect of a continued protective tariff.

Manufacturers' Association Statement

Summed up briefly, the Canadian Manufacturers' Association made it plain that they feel that, while a tariff revision is long overdue, they must still have protection from foreign industry, and they are reaffirming their advocacy of a policy of adequate protection for Canadian industry. The objects of the protective system, which they insist upon, are to diminish as far as possible the importation of goods from foreign markets which could be produced at home; to facilitate the importation of raw materials for manufacturing processes; to encourage the exportation of Canadian goods, and to make Canada self-contained by developing and encouraging, within her boundaries, all legitimate activities that will give occupation to Canadian citizens. Conditions which would make for the development of Canada, it was insisted through a series of speeches, could be attained only by the application of an adequate tariff, the term "adequate" being defined by the particular measure of protection which each industry may require to put it upon a fighting footing with its competitors in the United States, Japan and other exporting nations. The general statement of the C.M.A. was presented by John S. McKinnon, of Toronto, president of the association.

Farmers Ask for Revenue Tariff

On the other hand, the contention of the organized farmers of the Dominion, as presented by Norman Lambert, secretary of the Canadian Council of Agriculture, was that agriculture is Canada's basic industry, and that for many years it has not been justly considered and dealt with by federal legislation. Mr. Lambert's statement, which had previously been endorsed by the council, emphasized that the farmers of Canada are not asking for any drastic legislation which would tend to unsettle and injure Canadian industry, but it did take the position that a national policy based upon the principles of protection is wrong. The suggestion accordingly was that any tariff which the commission may leave in force should aim at reducing the customs to a strictly revenue basis. That is the big point of conflict between the opposing forces. The United Farmers ask for a tariff which will be strictly revenue-producing. The C.M.A., representing the industries of Canada, declare that a tariff, levied for revenue only, is entirely wrong, and that the aim of any tariff should be to protect industries. The further attitude of the United Farmers, as expressed during the day, was that production in Canada has been forced into uneconomic channels by the application of protective duties, and that, as a result, the development of vast supplies of natural wealth has been retarded, and Canada has been held back from the attainment of her fruitful destiny. Having advocated that tariff should be revenue-producing only, and not protective of industries, and realizing that such a system of tariff would fall short of producing the big slice which the customs duties are expected to contribute to the Dominion's annual expenditures, the United Farmers put forward the proposal, planned to make up the deficiency, that the federal government should immediately call a conference of the treasurers of all the provinces and the large municipalities with a view to dividing up the fields of taxation so that no one of them should be harvested too freely, so that there should be as little overlapping as possible, and so that there should accordingly be an adequate division of taxation.

There was also a repetition of the farmers' taxation platform, which has been advanced before, covering the personal income tax, the inheritance tax and the graduated tax on business, the charge in this connection being that the administration of the federal income tax has not been efficient since it was introduced some five years ago. The farmers, it was emphasized, are in favor of the direct method of taxation, as opposed to the indirect method represented by the customs tariff, and they are prepared to pay their share of the direct tax if the government chooses to lean upon it more strongly. As proof of that, Mr. Lambert made the suggestion that the forms sent out to the farmers could be improved, and he insisted that the direct tax, properly applied, should yield a revenue of at least $200,000,000 yearly. This rigid enforcement of the income tax would tend to make up for the falling off in revenue which would result from tariff reduction.

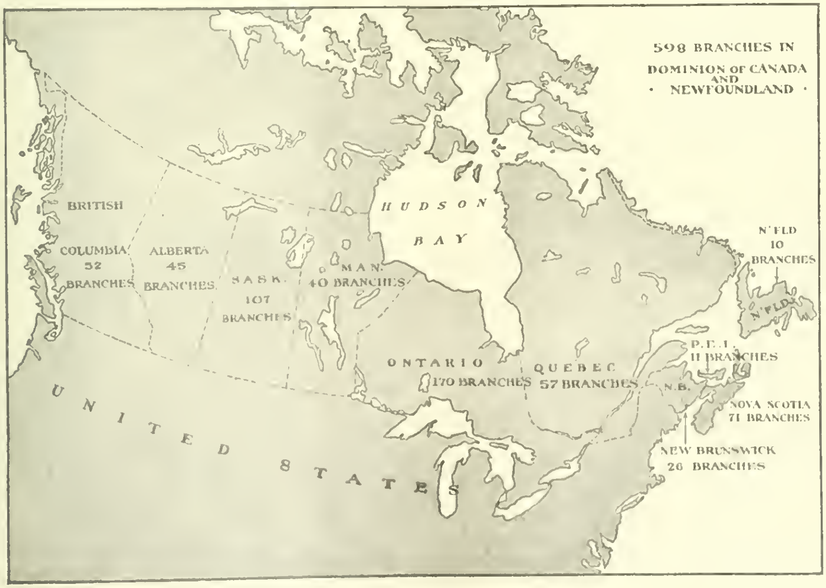
Statement of Implement Manufacturers

Thomas Findlay, president of the Massey-Harris Company, spoke on behalf of the manufacturers of farm implements. He made it plain that they are absolutely opposed to free trade in implements. Their opposition to the free trade policy, he declared, was not actuated by selfish considerations, but was based rather upon the effect which such a step would have upon other industries and the way in which it might result in driving Canadian workmen to the United States. As far back as August of 1917, Mr. Findlay stated, the Massey-Harris directors went on record with a resolution, hitherto unpublished, to the effect that "given free materials, machinery and all other articles entering into the manufacture of our goods and the operation of our plants, we would be as well off with free agricultural implements." This resolution had been adopted after careful investigation of the effects of free trade upon the Massey-Harris Company, and the directors had been satisfied that owing to their peculiar position of [illegible] business about half domestic and half foreign, [illegible] make as much money under the grain growers' [illegible] at present."

THE ROYAL BANK
OF CANADA

Capital and Reserves
$38,000,000

Total Resources
$585,000,000



Collections handled upon favorable terms

But in spite of the fact that in 1917 the company felt they could make as much money under free trade as under protection, they had kept their views quiet in order that free trade might not work a hardship upon the great bulk of the other implement companies in the Dominion, the most of whom had no foreign trade, and work a hardship also upon other manufacturers supplying them with materials, and more particularly because of its possible effect upon the welfare of their own workmen. To-day, Mr. Findlay continued, given no consideration other than that of money-making, his company would be quite prepared to have the tariff taken off implements, if at the same time it were taken off everything that entered into the cost of producing them. Even when the company started, the same money could have reaped the same success in the United States, but, since there was a tariff protecting the industry, it had permitted those interested in the business to enjoy the great privilege of living in Canada.

"I am not suggesting that free trade would immediately drive our company out of Canada," Mr. Findlay continued, "but it must be perfectly clear to any thinking person that under free trade the requirements of western Canada in implements would ultimately be supplied by factories in the middle western states, where they would be close to their raw material and closer to their market than in Ontario."

Mr. Findlay accordingly protested most vigorously on behalf of the company's employees against "a policy which a few years hence may impose upon them either the necessity of giving up their occupation or being forced to emigrate with the industry to the United States."

In taking up in a general way the application of the tariff on farm implements to the cost of producing crops, Mr. Findlay gave detailed figures to show that the tariff adds practically one cent per bushel to the cost of harvesting grain, and that cent, he did not imagine, would result in driving many farmers out of the west. It occurred to him that a little education for the farmer in looking after his machinery might save a whole lot more than the tariff costs him, and, accordingly, his suggestion was that the Canadian Council of Agriculture, instead of attacking the tariff, should educate the farmer on implement preservation. At the same time, Mr. Findlay wanted to clear up some points which have been the subject of controversy. He gave the assurance that Canadian farm implements are not sold abroad cheaper than in Canada, and he submitted detailed figures to back up the point. He also insisted that misleading comparisons have been made regarding Canadian and American prices of farm machinery. The average difference in price, he declared, is not as great as the average difference in freight which the American farmer has to pay on his implements, and which the Canadian farmer escapes. In response to an inquiry from Sir Henry Drayton, Mr. Findlay declared that Canadian industry has been misrepresented in the charge that they fix their prices on American prices, plus tariff. Prices, he assured, are regulated by cost alone, and every time the opportunity comes the Canadian farmer gets the benefit of possible reductions.

Plea for Wool Industry

As chairman of the Prairie division of the C.M.A., D. [illegible] Dyson made a plea for the retention of the tariff in order that the western wool industry, recently established, might have a chance to live. The west, he recalled, has started the manufacturing of clothing, but the spinning of yarn and the weaving of cloth have yet to come. Give the industry protection, and the result will be the development and [illegible] of the textile industry for the benefit of the sheep raisers and the farmers of the west, but knock off the tariff, and away goes the industry. At the same time, away goes the benefits which the stockmen would get from the industry. But wool was only an illustration, for there are scores of other industries which the west is beginning to develop. Mr. Dyson's general plea was for a tariff which would permit the [illegible] but flourishing industries, west of the Great lakes, to keep on flourishing and bringing prosperity to [illegible] [illegible] Already there are 4,118 factories between Ontario and the coast, and the experience of the world had taught them that agriculture and industry must prosper hand in hand. If they are to prosper, keep the tariff as a protection.

An appeal on behalf of the fertilizer industry of Ontario came from A. C. Hornberger, representative of the Canadian fertilizer industries. This speaker showed how the nations which have perished have gone down because of military conquest or because of the exhaustion of the soil. The latter is the danger which faces Canada, though the fertilizer companies are doing their best to avert the disaster. But they cannot do it without a tariff to protect them from the United States industries. There are seven Ontario industries interested, three of which are in Toronto.

Representing the textile manufacturers of Canada, Robert A. Pringle, K.C., of Ottawa, explained how the cotton industry must have a protective tariff or be brought face to face with cheap competition. No country, he declared, wanted to face Japan industrially in view of labor conditions there. Japan has lots of hands and low wages, hence cheap cotton for export, and the only way to save the Canadian workmen is to keep the tariff up. With her labor conditions, Japan is going so strong that she can even import her raw cotton and compete in the United States market, duty and all.

Protection Favored at Coast

In Vancouver, J. W. Berry, of Langley Prairie, spoke on behalf of the Fraser Valley Milk Producers' Association, telling the Commission that protection is essential to dairying in the province. He stated that the farmers of Washington could produce milk more cheaply than the British Columbia farmers could. In British Columbia alfalfa, bran, shorts, oil-cake and other fodders have to be imported from the United States, paying a duty as they came.

Mr. Berry admitted that the association controlled the milk situation in Vancouver, and dictated the price received for its surplus milk sold to condensers. Ninety per cent. of the milk produced in the Fraser Valley was controlled by the association, and forty per cent. of this was distributed under one central control in Vancouver. The price set for milk sold to the condensers was slightly above that paid by the United States factories. If the $17\frac{1}{2}$ per cent. protection on milk and milk products were removed Washington producers would be able during the "flush season" of production to flood in their milk to the condensers at lower prices than those asked by the milk producers of the Fraser Valley. That would mean lower prices for the producer in British Columbia, and in order to recoup himself for losses he would have to ask a higher price than is obtained now during the winter season when there would be no foreign milk coming in. The consumer would, therefore, not benefit in the long run.

Wholesale dry goods merchants of Vancouver also declared their belief to-day that the protective feature of the tariff must be maintained. H. A. Stone wanted the commission and the public to take special note that the wholesalers, who were bound to keep close touch with the markets of the world, knew that for [illegible] years, and particularly at the present time, "we have been and are still able to purchase and to supply to the consumer articles of wool, cotton, silk and other materials of Canadian manufacture at considerably lower prices than similar goods could or can be obtained from Great Britain, the United States or any foreign country." Without protection the industries giving such prices would not have existed, and therefore because of protection Mr. Stone argued that lower prices were enjoyed here.

J. J. [illegible], representing the Clayburn Brick Manufacturing Company, asked that a duty should be levied on all brick entering the country instead of on certain classes, as at present. The object in asking this was that the fire brick industries of Nova Scotia and British Columbia might be able to offset the advantages of the short haul to the United States industry and get the business of central Canada.

INCOME ASSESSMENT OF OIL AND GAS COMPANY

Supreme Court of Canada Upholds Judgment of Ontario Court, That Capital Expenditure is Not Deductible

RECENTLY the Supreme Court of Canada affirmed the decision of the Supreme Court of Ontario in the case of Union Natural Gas Co. vs. Corporation of Dover holding that "expenditure on the sinking of new wells or the deepening of existing wells is expenditure on capital account and is not deductible from earnings for the purpose of arriving at the 'income' of a mine or mineral work, assessable under the Assessment Act of Ontario."

In *The Monetary Times* of July 16 appeared a statement of the facts of the case and of the judgment of Chief Justice Meredith of Ontario. The following is the pertinent parts of the judgment in the appeal in that case of Davies, C. J., and Anglin, J., of the Supreme Court of Canada:—

Two Wells in Operation

"The expression 'mine or mineral work' is not defined in the statute, and what it may include must, I think, in every case depend on the circumstances. In the case at bar there is no evidence to enable us to determine whether each of the two wells assessed is in itself, or forms part of, a distinct mine or mineral working, or whether the two wells assessed are parts of the same 'mine or mineral working.'

"I agree with the view of Chief Justice Meredith of Ontario, that expenditure on the sinking of new wells or the deepening of existing wells, whether productive or dry, is expenditure on capital account and is not deductible from earnings for the purpose of arriving at the 'income' of the mine or mineral work assessable under sub-sec. 6 of sec. 40 of the Revised Statutes of 1914, ch. 195.

"I am quite unable to appreciate the grounds on which the appellant contends that an adverse difference between receipts and expenditures in one year (the latter in this case including capital outlay) should be taken into account and deducted from earnings of a succeeding year in order to arrive at the 'income' for the latter year. The definition of 'income' in sec. 2 (2) as 'the annual profit or gain derived (inter alia) from any business' in my opinion excludes any such deduction.

"I would, therefore, dismiss the appeal."

DID BUSINESS BEFORE CAPITAL PAID IN

The Chambre Commerciale des Cultivateurs, Ltd., and the Chambre des Cultivateurs, Ltd., were held to have forfeited all their powers and privileges and were accordingly dissolved, in a judgment rendered in the Superior Court at Montreal on September 14. The court's decision was based on proof that both companies commenced operations before ten per cent. of their authorized capital had been subscribed and paid for.

The evidence adduced at the hearing showed that appeals were made to a number of farmers for money, and many answered affirmatively, either sending money or notes payable. Complaints were made to the provincial government of the companies' proceedings, and inquiry established that all their transactions were illegal. Justice Surveyer said that the companies in question did not appear to have done anything but solicit subscriptions and distribute the product without any benefit to the shareholders. In both cases, His Lordship said, the attorney-general of the province was exercising a duty as well as a right when he intervened. The fact that both companies had gone into liquidation since the actions were entered, His Lordship added, was not any defence to the complaints and therefore the actions were maintained, with costs, and the companies powers were held to have been legally forfeited.

DISTRIBUTION OF INSURANCE MONEY

Whether the law at the time a will is made, at the time the testator became insane, or at the time he died, should govern the disposition of his property was the main point in a case respecting the estate of the late John J. Mellon, on which the Alberta Supreme Court gave judgment on September 8. The case originated in an application made by the executors of the estate for advice in respect to the distribution of two policies of life insurance on the life of the deceased, and His Lordship was called upon to decide the knotty problem as to whether the proceeds should be disposed of according to the law as it stood on August 27, 1908, the date of the will; on March 24, 1914, when the testator became insane, or on March 4, 1918, when the testator died in a sanitarium at Guelph, Ontario.

According to the evidence given, the Confederation Life Association, on June 3, 1887, issued a $1,000 policy on the life of John J. Mellon in favor of himself, and on May 5, 1897, the insured executed a declaration in which he appointed his wife, Amelia Mellon, and daughter, Amelia Elizabeth Mellon, now Amelia Elizabeth McCrum, beneficiaries under the policy. His wife predeceased him, and the insurance company paid the policy to his daughter, the surviving preferred beneficiary. The Grand Orange Lodge of North America also issued a policy on Mellon's life for $1,000, payable to himself, and the proceeds were paid into court pursuant to an order by Mr. Justice Scott and the issuer released from any further liability.

Mr. Justice Simmons ruled that the payment of the Confederation Life policy to the daughter, as the sole surviving preferred beneficiary, was quite in accordance with the law, but gave it as his opinion that the will failed in manner to control the disposition of the Grand Orange Lodge policy in the result that the proceeds of the policy should be divided between the four surviving children in equal shares, and in the event that any of these are not 21 years of age the monies are to be paid to the official guardian for their benefit and use.

LESS TIME LOST IN AUGUST

Loss of time on account of industrial disputes was considerably less during August than during July, or August, 1919. During the month there occurred twenty-three strikes involving 4,812 workers and resulting in the loss of 79,482 working days. In July there were 49 strikes involving 6,734 workers and 80,221 working days. In August, 1919, there were 46 strikes affecting 24,511 workers, and causing a time loss of 365,062 days. Eight strikes were terminated during August, leaving fifteen strikes, affecting only 744 workmen, unsettled at the end of the month.

Industrial employment throughout Canada showed a slightly downward tendency during the month. This was partly due to the movement of unskilled labor from industrial centres to the harvest fields. Employment was well maintained in the food group of industries, the flour mills being already active with the new crop, and busy conditions continued to prevail in the pulp and paper manufacturing group.

The metals and machinery industries were hampered to some extent by lack of coal and steel and the shoe and clothing industries were slack. The number of workers engaged in railway operation remained unchanged, but activity in railway construction was affected by the call of the harvest fields. Coal mining operations were less active than usual, more particularly in Nova Scotia.

Graham, Sanson and Company, Toronto, investment bankers, announce the opening of an office at 37 James St. S., Hamilton, Ont., in charge of J. L. Corwin.

News of Industrial Development in Canada

New Pulp Enterprise to Exploit Labrador Timber—Another Paper Mill For Quebec—Spanish River to Increase Newsprint Output—Successful Fur Season in the Far North—Alberta Wool to Be Graded in Toronto—Aerial Transportation Company to Operate in Canada

WITH the passing of each week comes the announcement of some new development in the pulp and paper field. So rapid has been the progress of this industry during the past year or more, that some investment houses have confined themselves almost entirely to the financing of new developments of this kind. Trade figures also reflect the extent of its growth. Practically all provinces have the natural resources for the advancement of such an industry, but some are handicapped in regard to transportation.

Some provinces are offering special inducements to encourage capitalists to develop the pulp and paper industry more rapidly. For instance, in British Columbia, the minister of lands announces that in order to encourage the establishment of more pulp and paper mills in the province, the government may cut in half the timber license fees on areas better suited to pulp and paper than lumbering. "Any companies, whether British, Canadian or American which have a proposition to develop pulp and paper enterprises in New Brunswick will receive every encouragement from the government," says Premier Foster of that province.

Possibilities for the pulp and paper industry in the west are good, but those provinces have not yet been exploited to any great extent, owing to transportation difficulties. Pulp resources in northeastern Manitoba will constitute a large source of future supply, according to the inspector of Dominion forest reserves, who recently made a survey. He reports that a good quality of spruce is found which would make excellent pulp, but there is no outlet at the present time for the finished product.

The principal announcement this week is of a new enterprise to develop Labrador timber. A new company has been organized, known as the Southern Labrador Pulp and Paper Co., in which American capital has been enlisted with the idea of installing a 400-ton pulp mill, with four saw mill units of 50,000 ft. per day capacity, to exploit the Labrador timber reserve. The scheme provides for the location of the pulp mill on the Alexis River, with a power developed from the falls of the Gilbert River. James Munro, president of the Canadian Cordage Co., is a member of the new company.

Lake St. John Pulp Operations

A company under the name of the Lake St. John Pulp and Paper Co., Ltd., was recently incorporated, with head office at Montreal, Que., and a capital of $1,000,000. A mill is to be located at the south of the Metabetchouan River on the main line of the Canadian Northern Railway, bordering on Lake St. John. The company has its own water powers on this river, where some 22,000 h.p. can easily be developed, and also has contracted for additional power with the Military Electric Co., of St. Jerome, Que., which will be furnished at once if required, while the company is developing its own power.

The capacity of the mill will be 50 tons of ground wood pulp per day at the commencement of operations, which will be within the next two or three months. By the fall of 1921 it is expected that the capacity will be doubled. There is abundance of spruce and other woods within easy distance of the mill, and contracts for two years' supply have already been placed.

The company's timber and pulpwood lands consist of 171¾ square miles on the Metabetchouan River and other small streams near Lake St. John, Que. An option is also held on ten square miles of timber near St. Andre, Que., bordering on a small river running into the Metabetchouan. Large quantities of spruce pulpwood can be had from the farmers and settlers around Lake St. John at reasonable prices, and contracts are now being entered into with these farmers to supply wood for a number of years to come. They are anxious to do this, so as to get a mill built on Lake St. John, and the company will be enabled to leave its own limit untouched, if desired, for years to come.

Spanish River to Increase Output

Negotiations are now being conducted by the Spanish River Pulp and Paper Co. to further increase the newsprint output of the company, in order to cope with the rapidly expanding demand for paper of this class on outside markets. At the present time the three plants of the Spanish River organization, situated at Espanola, Sault Ste. Marie and Sturgeon Falls, Ontario, are turning out a daily average of some 675 tons, which, with installation of new machinery now in process of completion, will be increased to 725 tons by the end of the current calendar year. So insistent has been the increased demand for newsprint that the directors of the company have decided to further augment production, and tenders for new paper-making machinery have already been called for calculated to increase the output of paper to 1,000 tons daily. Builders of the necessary machinery are already figuring on the specifications, and definite orders for the new equipment will probably be placed in the near future.

In addition to the extensions at the three manufacturing plants of the Spanish River enterprise, it is proposed to further increase the easily-available water-power developments, the cost of which is estimated at a conservative figure.

Another Large Fur Pack

About $1,500,000 of raw furs have passed through Edmonton, Alta., from the far north for market to date this season. Recently about a million dollars' worth was shipped through by the Hudson's Bay and Northern Trading Companies. Another lot left the city last week, completing the major part of the 1920 catch received and shipped through Edmonton. This last consignment was the final instalment of the Lamson and Hubbard pack and was sent to New York for sale to manufacturers and jobbers in that market without waiting for the winter sales.

The total pack of the Lamson and Hubbard firm this year is reported at the local office of the company, which is the head office for Canada, to be of a market value of about $535,000. A portion of the pack has already been sold, and the balance now going forward will finish out the year's total.

J. H. Bryan, the Edmonton manager of the company, reports the same conditions that other traders have done. With a good fur catch and high prices, the Indians and Eskimos all the way from McMurray to Fort McPherson have been more than well-to-do and there has been considerable cash buying. Lower prices will prevail this coming season, however, and because of the somewhat uncertain conditions in the outside fur market, there will be less cash trading and more of the old time bartering. The company's boats, including the new "Distributor," were all in service during the season, says Mr. Bryan.

Alberta Wool Plentiful

Shipment of the seventh carload of wool by the Alberta Provincial Sheep Breeders' Association last week brings the total for the year 1920 to date up to 148,931 pounds. Shipments of wool have been of all sizes, and have come from all over northern Alberta and from some points of British Columbia, and were consigned to the association for sale.

The Canadian Co-operative Wool Growers, Ltd., Toronto, has taken all the wool and graded it, this being the

first year since 1915—the date of the first co-operative wool sale in Edmonton—when the wool had not been graded locally. To date, over 3,000,000 lb. have been shipped by the four western provinces to the Toronto association for grading and sale.

Sales are proving very satisfactory, in view of the present market conditions, over 2,000,000 lb. having been sold at prices ranging from 24½ cents to 60 cents, depending on grade and condition. Of this amount, over 700,000 pounds have been sold to Canadian manufacturers.

New Steamship Arrangement

Announcement of a new joint steamship arrangement on the Pacific has been made by the Canadian National Railways. This joint arrangement will provide, it is felt by the management of Canadian National Railways, an excellent medium for the expansion of Canadian trade in the far east. The official statement follows:—

"A very important arrangement has been concluded between Messrs. A. Holt and Co., Liverpool, and Canadian Government Merchant Marine, Ltd., and the Canadian National Railways, under which a joint steamship service is established between Vancouver and the Orient, each steamship interests having a like number of steamers for joint service.

"Under the arrangement made the Canadian Government Merchant Marine, Ltd., and the Canadian National Railways will be represented in the Orient by Messrs. Butterfield and Swire, the present agents for the Holt interests, thus securing the advantage of a very old and strongly established organization. On the other hand, the interests of Holts will secure the support of the Canadian National Railways in the development for the benefit of the steamers in the joint service."

Miscellaneous Trade Notes

Tilbury, Ont., ratepayers have endorsed a by-law to guarantee the bonds of the Tilbury Auto Truck Body Co. for $20,000 and give the company a fixed assessment of $10,000 yearly. The company agrees to erect a factory to cost not less than $10,000 when fully equipped with machinery and to employ an average of fifty persons.

Representatives of the Service Truck Company have closed an option on a portion of the Frank Estate, London, Ont. The site is located near the London and Port Stanley Railway and adjoining Thomson Avenue. It is likely that the company will start building operations shortly. The factory will employ over 700 men when completed.

As a result of negotiations between Frank A. Dudley, president of the United Hotels Company of America, and a large group of transport and industrial interests in Montreal, that city is now assured of a 1,000-roomed hotel. It is to be constructed by the Mount Royal Hotel Company, Ltd., of Montreal, with a total capital of $10,000,000, and is to be built on the site of the old high school, now a military barracks, which occupies the entire block bounded by Peel Burnside and Metcalfe Streets, just above St. Catherine Street.

The United Drug Co. of Toronto have announced the purchase of the Boot's Pure Drug Co. of Great Britain. The Boot's Co. are manufacturers and operate a chain of 627 stores in England and Scotland. As a result of this new addition to the United Drug Co.'s organization, a [illegible] 000,000 corporation to be known as Liggett's International, Ltd., has been formed, in which are consolidated the Boot's Co., the United Drug Co.'s Canadian concern, the United Drug Co.'s retail stores and the Louis K. Liggett Co. The purpose of the new organization, according to the general manager, J. W. McCoubrey, is to provide a better vehicle for foreign expansion.

Plans have been completed to form an Aerial Transportation Co., to operate in the United States and Canada, by a combination of English, Canadian and United States [illegible]. The new company is capitalized at $10,000,000 and will commence its operations with twenty machines. The type of machines to be used is the Handley Page bombing machines, with two or four engines, [illegible] to 1,500 horse-power and with a carrying capacity of from 16 to 24 passengers, including baggage. The machines will be able to make non-stop flights of 420 miles, but may increase this distance to 600 miles, this increase depending on load and wind velocity.

Reports from Sault Ste. Marie, Ont., are to the effect that the Algoma Steel Corporation is now operating at full capacity, and has sufficient orders booked to last to the end of the year. More orders could be taken to carry the plant into next year, but owing to uncertainties of costs the officials of the company do not seem anxious to make contracts for 1921.

NEW INCORPORATIONS

Community Loan and Investments Company of Canada, Winnipeg, Man., $1,500,000—Langlow, Ltd., Cobourg, Ont., $500,000

1870 —— OUR GOLDEN JUBILEE —— 1920

Co-Operative - Scientific - Successful

"How did the Mutual Life of Canada succeed in attaining its present impregnable position in the financial world?" It may be replied that the promoters of the Company did not organize it as a commercial undertaking, but that it might serve as a public benefactor giving "the largest amount of genuine life insurance for the least possible outlay." Unselfish devotion to the success of the enterprise supplied the place of capital. Although strictly co-operative or mutual, yet the Company has been built up on a scientific basis as an old line legal reserve life insurance company. The Mutual Life of Canada is a beneficent idea worked out on scientific lines—that is the secret of its popularity. The Mutual being essentially a company of policyholders, conducted by policyholders in the interests of policyholders, naturally became a great success.

BE A MUTUALIST!

The Mutual Life Assurance Co. of Canada

LIFE INSURANCE SERVICE

THE ultimate success of a Life Insurance Company depends largely upon what its policyholders think of the service they receive. The Continental Life has long since passed this test and earned a high reputation for paying claims promptly. 1920 will likely prove the best year in the Company's history. Write for booklet, **"Our Best Advertisers."** For Manager's positions in Ontario apply with references, stating experience, etc., to **S. S. WEAVER, Eastern Superintendent, at Head Office**

News of Municipal Finance

Edmonton's Finances Must Be Attended to in Order to Avoid Crisis, Says Local Citizen — Seventy-Four Per Cent. of Toronto's 1920 Taxes Collected — Windsor's Sinking Fund In Good Order — Calgary and Lethbridge Retiring Debentures Out of Sinking Fund — Gloucester Township Wishes to Undertake Municipal Banking Scheme

Township of Gloucester, Ont.—Providing there is nothing in the municipal act to the contrary, the township may undertake to operate a co-operative banking system. The idea is to have deposits made as in a regular bank and allow interest upon the amount of deposit. Expert advice is being secured to ascertain if the municipality has the authority to establish such a bank.

Hamilton, Ont.—Figures given out by Assessment Commissioner MacLeod, show the assessment to be $127,642,060, an increase of $31,419,240 over last year. This does not include Homeside, recently annexed, which has an assessment of $2,509,980. The tax rate, it is expected, will be dropped next year to 30 mills, at which rate the revenue would be increased by $550,000.

Fort William, Ont.—According to the latest statement issued by the city, the debenture debt is $6,229,363.67, made up as follows: Street railway, $1,317,000; waterworks, $1,128,549.87; electric light, $301,753.05; telephone, $390,000; general, $1,909,060.75; school, $883,000. Of the above total there is no part of the principal or interest in arrears, and a sinking fund of $2,413,440.60 has been provided.

Lauzon, Que.—According to the new assessment roll, the taxable value of property in the municipality is equal to $1,654,625, and the total non-taxable property $6,403,200. Under the non-taxable, the following properties are included: Federal government, $4,211,000; provincial government, $1,000; various companies, $112,200; religious institutions, $504,000; exempted from taxation, $1,502,000; municipal properties, $33,000.

Lethbridge, Alta.—The city has purchased back from a Toronto dealer $50,000 4½ per cent. of its own debentures maturing June 1, 1921, at a price to yield 7 per cent. By this deal the city will profit to the extent of about $900. The city had $23,000 available in its sinking fund and $10,000 on account of treasury bills C and D, and the balance of the money was obtained from unexpended debenture funds, after allowing for sufficient in unexpended debenture funds to take care of any work at present contemplated.

Calgary, Alta.—The city is following the example of Toronto and buying back its own bonds, with funds available from its sinking fund. Recently City Treasurer Mercer purchased 10,600 pounds sterling of Calgary bonds of 1930 and 1932 maturities, on a basis to yield 7¾ per cent. The city is also considering the purchase of another 4,000 pounds sterling of 1932 maturity on the same basis. After taking these two amounts into consideration there is still a considerable sum available in the sinking fund for reinvestment.

Windsor, Ont.—That the sinking fund of the city is correctly set forth is the statement made by the special auditors, after further investigation. These auditors recently made the statement that there was a shortage of about $12,97[illegible] in the city's sinking fund, but following action by F. J. Holton, city auditor, have withdrawn that statement.

In explanation of its report the special auditors claim that they submitted a tentative finding based upon activities up to that time, but that upon finishing the work it was found that the sinking fund assets of the city as set forth in the books are correct.

Toronto, Ont.—Commenting on the city's financial standing, and the manner in which financial statements are submitted, the Toronto Bureau of Municipal Research in a recent bulletin says:—

"It is doubtful whether any other Canadian city has, in four years, made greater advances in financial administration than has Toronto. However, there still remains much to be done. For example, the departmental estimates are still unstandardized so that it is impossible to tell, from the city's budget, total proposed expenditures for each department and departmental function, analyzed according to objects of expenditure, or things bought, such as personal services (salaries and wages), contractual services, heat, light and power, supplies other than light, heat and power, upkeep of structures and equipment.

"Standardization would enable the ordinary, garden variety of citizen to make some very vital comparisons which are now impossible. For example, the bureau's analysis of the budget shows that while the assessment has increased 14 per cent. and the total expenditure 80 per cent. since 1915, the debt charges have increased 52 per cent. and salaries and wages 196 per cent. Are these not illuminating facts? These and many others will be readily available when a standard classification of accounts is adopted for the city."

Finance Commissioner Geo. H. Ross reports that to date, taxes have been collected to the amount of $15,641,964, or 73.6½ per cent., of the 1920 taxes, representing an increase over last year of $1,009,083. The total amount of taxes due to the city this year is $21,242,951, as compared with $19,462,297 last year.

Edmonton, Alta.—At a recent meeting of citizens, Jos. Adair delivered an address on "The City and Its Problems." These he declared were moral, sanitary and financial. With regard to the first two he had very little to say, being of the opinion that Edmonton had very little to fear from that end.

"The great problem of Edmonton," he said, "of which all other problems were mere phases, was a problem of dollars and cents. It was the problem of how a community of 60,000 people could honorably discharge burdens created for a population of 150,000 or 200,000 people. To run Edmonton for 1920 required the vast sum of $4,350,000—a sum greater by about $700,000 to that ever demanded before. This increase had been made by school board and city council in spite of the fact that the greatest collection made for a current year's expense since the war was 68½ per cent. or less than 70 cents for every dollar required.

"Elections in Edmonton had been run on purely class and personal lines. Every diversion conceivable from the real issue had been raised. Sometimes it was whether a man was an international trades unionist or not; sometimes whether he belonged to the same lodge as the voter; whether he was a member of that organization or this. At no time had the real issue been given the proper prominence, and that issue was that Edmonton had a debt of a general, local improvement, utility, school board and temporary character that exceeded $30,000,000, exclusive of sinking fund provided; that it was necessary to raise $4,000,000 to pay all charges of the city as presently administered; that for 60,000 people to meet such charges involved a per capita rate of $70; that Edmonton had too few direct taxpayers to bear such a rate; and that something must immediately be done to meet a coming financial crisis."

Government and Municipal Bond Market

Province of Saskatchewan Disposes of $3,000,000 Securities at a Good Price—Bonds Will Be Sold Here — Edmonton Sells Two Millions of Notes to Portland Investment House — Winnipeg is Offering $1,500,000 Hydro Bonds Locally

CONTRARY to general expectations, the province of Saskatchewan bonds purchased this week will not be disposed of in the United States. When the province called for tenders, alternative offers were asked for, and it was generally anticipated that the 10-year securities, payable in both Canada and the United States, would be sold, and that accordingly would be disposed of across the line, or at least a large part. This did not prove to be the case, however.

The price received for the 20-year bonds, payable in Canada only, which was on a basis of slightly less than 6½ per cent., is considered a good one, and it is evident that the provincial treasurer, notwithstanding the fact that a higher bid on the 10-year basis was rejected, closed a highly satisfactory deal. Although the province will lose slightly at present, it will profit in the long run, taking into consideration the payment of interest and principal in New York, with Canadian money at a discount there.

Bidding was very keen, particularly from the American end. Had these bonds been offered across the line, they would have no doubt found a ready market.

Local Selling Gaining Momentum

Still more municipalities are trying the "over-the-counter" method of selling debentures. Previously only small blocks have been disposed of in this manner, but now the city of Winnipeg is offering to local citizens $1,500,000 6 per cent., 30 year hydro-electric bonds at 96.63, to yield the investor 6¼ per cent This is a large issue, and its absorption should prove interesting.

Campbellford, Ont., has $7,000 6 per cent. 30 year school debentures for sale and expects to dispose of them locally.

Debentures to the amount of $25,000, under the War Memorial Health Centre by-law, will be put on the local market by Saanich, B.C. The securities bear interest at the rate of 5½ per cent., mature in 10 years, and are in denominations of $100.

Coming Offerings

The following is a list of debentures offered for sale, particulars of which are given in this or previous issues:

Borrower.	Amount.	Rate %.	Maturity.	Tenders close.
Saugeen Tp., Ont.	8,000	6	10 instal.	Sept. 25

Assiniboia R.M., Man	277,925	6	20 instal	Oct. 5

Saugeen Township, Ont.—Tenders will be received until September 25, 1920, for the purchase of $8,000 6 per cent. 10 instalment debentures. F. W. Elliott, Port Elgin, Ont.

York Township, Ont.—Tenders will be received until October 1, 1920, for the purchase of $185,280.54 6 per cent. 10 instalment debentures. The proceeds of the issue will be used for local improvements, water mains and sewers, etc.

Eastview, Ont.—Tenders will be received until September 30, 1920, for the purchase of $10,122 6 per cent. 20-year debentures, dated September 1, 1920. Interest is payable [illegible]. All other information may be obtained from the secretary-treasurer of the town.

Chatham, N.B.—Offers are being asked for $38,000 6 per cent. serial school refunding debentures, maturing $1,000 for 38 years. Interest is payable semi-annually on March 1 and September 1. The securities are issued under a special act of legislature.

Assiniboia R.M., Man.—Tenders will be received until Oct. 5, 1920, for the purchase of $277,925 6 per cent. 20-year instalment debentures, the proceeds of which are to be used for water mains and sewers. (For further particulars see advertisement elsewhere in this issue).

Temiscaming, Que.—The municipality of the second division of the county of Temiscaming will receive until October 1, 1920, sealed tenders for $24,500 6 per cent. debentures, which are dated May 1, 1920, are redeemable in Canada on May 1, 1945, at the Bank of Hochelaga, Amos, Que., and are in denominations of $500. A. Grenier, Amos, Que.

Sherbrooke, Que.—Tenders will be received until October 4, 1920, for the purchase of the following debentures: $150,000 5 per cent., maturing August 1, 1925; $242,500 5 per cent., maturing June 1, 1925. Interest is payable semi-annually, and principal and interest are payable in the province of Quebec. E. C. Gatien, secretary-treasurer.

Amos, Que.—Tenders will be received until October 4, 1920, for the purchase of $55,000 6 per cent. instalment debentures, maturing from August 1, 1921, to August 1, 1940. Debentures will be issued in denominations of $100 and $500, dated August 1, 1920, and are payable at Quebec, Montreal or Amos at the Banque Nationale. Proceeds of the issue will be used for consolidating the floating debt, improving the fire protection and constructing sewers and sidewalks. C. A. Lafrance, secretary-treasurer.

Bond Sales

Saskatchewan.—The province has sold to Wood, Gundy and Company $3,000,000 6 per cent. 20-year bonds, payable in Canada only, at 94.68, which is on about a 6.47 per cent. basis. Bids were asked on 10-year bonds, payable in both Canada and the United States, and 20-year bonds, payable in Canada only, and, although one of the bids under the 10-year term was higher, the province considered it advisable to accept the offer of Wood, Gundy and Co. under the 20-year term. Bidding was keen, as will be seen from the following figures:—

	10-year term. Payable in Can. and U.S.	20-year term Payable in Canada only.
Wood, Gundy and Co.	96.21	94.68
A. E. Ames and Dominion Securities Corporation	96.831	94.631
Harris, Forbes and Co., National City Co., and Drake Ballard and Co., of Minneapolis	95.52	....
Seattle National Bank and Blythe, Witter and Co., San Francisco	94.61	....
[illegible] Corporation, Ltd., [illegible] and Earles, Seattle, and Glenn and Miller, San Francisco	94.288	....
W. A. Mackenzie and Co. and R. A. Daly and Co.	91.21	*91.03
[illegible], Peters and Co., San Francisco, E. H. Rollins and Sons, [illegible] and Reed and Goodwin, New York	93.32	....
[illegible]	92.32	....

RSC
INVESTMENT-SERVICE

In Great Demand

In this month's *Investment Items* we mentioned that we would send a copy of the Canadian Pulp and Paper Review to any business man or investor who inquired for it.

The result is a strikingly active demand for it, indicating a wide interest in Canadian pulp and paper securities.

We are glad of this, because the more investors who read the Review, the greater will be the appreciation of the industry's basic strength and national importance.

While the edition lasts we will send out copies free to those who write enclosing this advertisement.

Particulars on request

W. A. MACKENZIE & CO.
Government and Municipal Bonds
42 King St. West
TORONTO -:- CANADA

In addition to the above bids two companies offered to take $1,500,000 of the 10-year and $1,500,000 of the 20-year maturities. The offers under this plan were:—

A. E. Ames and Co. and Dominion Securities Corporation	95.86
Wood, Gundy and Co.	95.57

Wells Dickey Company, of Minneapolis, bid 96.82 for the 10 year issue, but the offer was submitted too late for consideration.

Sarnia, Ont.—The Dominion Securities Corporation, Toronto, have been awarded $128,000 6 per cent. 20-year instalment hydro-electric bonds at 93.493, which is on about a 6⅝ per cent. basis. Tenders received were as follows:—

Dominion Securities Corporation	93.493
Wood, Gundy and Company	93.13
A. E. Ames and Company	92.68
R. C. Matthews and Company	91.60
W. A. Mackenzie and Company	91.11

Charlottenburgh Township, Ont.—A. E. Ames and Company, who, on September 3rd, purchased $35,000 5½ per cent. 20-instalment debentures, on September 16th purchased an additional $60,000 under the same terms.

Alberta.—Wells Dickey Company, of Minneapolis, have purchased $750,000 6 per cent. 5-year bonds of the University of Alberta. The sale was made by private tender at a price of 99.25 and accrued interest. It is the intention of the university board, which issued the bonds and controlled the sale, to use the proceeds for the erection of the new medical building now under way. The Minneapolis investment house which bought the bonds has been doing a mortgage business in the Canadian west for some time past, but this is the first time it has entered the Alberta bond field.

Edmonton, Alta.—Morris Brothers, of Portland, Ore., have purchased, through W. Ross Alger and Company, $2,075,000 6 per cent. short-term notes of the city at 97.29 and interest. The offer, which was submitted by W. Ross Alger and Company, reads as follows:—

"Relative to the $2,075,000 notes maturing January 1st, 1921, which you wish to refund by a new issue covering same, we, on behalf of Messrs. Morris Brothers, Incorporated, of Portland, Oregon, beg to submit for your consideration the following proposition for the above amount of 6 per cent. notes, dated September 1st, 1920, and maturing as follows: $825,000, two years after date; $750,000, three years after date; $500,000, four years after date.

"Both principal and interest to be payable in the United States gold coin or its equivalent at Edmonton, Toronto or Montreal, Canada, or New York City, America, said bonds to be delivered in Portland, Oregon, accompanied by a legal opinion satisfactory to Messrs. Morris Brothers.

"We will pay 97.20 and interest. This offer is made with the basis of exchange at 12 per cent. on the understanding that should the rate be higher or lower than this said figure that you would be allowed the profit or take the loss accordingly. It is also to be understood that the city agrees to sell no other issues of Edmonton bonds to other parties before the first of January next without consent of Morris Brothers."

The finance committee recommended the deal, following which the city council passed a by-law authorizing the sale under the above terms.

Prince George, B.C.—The National Bond Corporation of Vancouver, B.C., purchased $35,000 6 per cent. bonds on September 18, and has sold them to United States investors.

RURAL MUNICIPALITY OF ASSINIBOIA

DEBENTURES FOR SALE

Sealed tenders marked, "Tenders for Debentures," will be received by the undersigned up to 12 o'clock noon on Tuesday, the 5th day of October, A.D. 1920, for the purchase of 6 per cent. Twenty year Debentures amounting to $[illegible].

These Debentures are issued under By-laws Nos. 1164 to 1167 and 1169 to 1171, and are for the purpose of [illegible] Water Mains and constructing Sewers in the thickly settled portions of the Municipality.

The Debentures are repayable in equal annual instalments both of principal and interest.

For further particulars apply to the undersigned.

The highest or any tender not necessarily accepted.

By Order of the Council.

FRANK NESS,
Secretary-Treasurer.
Rural Municipality of Assiniboia.
Kirkfield Park P.O., Man., Sept. [illegible]

DEBENTURES FOR SALE

$2,300,232.13

CITY OF OTTAWA, ONTARIO

DEBENTURES FOR SALE

Sealed tenders addressed to the "Chairman of the Board of Control," and marked "Tenders for Debentures," will be received by the City of Ottawa up to 3 p.m., standard time, on Tuesday, the twenty-eighth day of September, 1920, for the purchase of Debentures of the following amounts and terms:—

$ 85,307.31	10 years
357,562.68	15 years
448,362.14	20 years
1,409,000.00	30 years
$2,300,232.13	

All Debentures bear interest at the rate of 6%, and are issued on the instalment plan. That is to say each issue is repaid in such annual amounts that the aggregate amounts paid on principal and interest each year are equal. Each Debenture is, however, for a definite amount payable at the end of some year with interest coupons attached payable semi-annually. Interest is payable 1st January and 1st July.

The Debentures are an obligation of the City at large, are issued in coupon form, with provision for registration of principal, bear date 1st July, 1920, and are in denominations of $1,000.00, $500.00, $100.00, and odd amounts.

The City will make these Bonds payable either in Canada alone or both in the United States and Canada, as may be decided.

Debentures will be paid at the branches of the Bank of Nova Scotia at Ottawa, Toronto and Montreal, and, if payable in the United States, at the National Bank of Commerce, New York.

Tenders will be received as follows: (1) Bonds payable as to principal and interest in Canada; (2) Bonds payable both in Canada and the United States.

All tenders must be on the official form.

Accrued interest from the 1st July, 1920, must be paid in addition to the price tendered.

Tenders specifying for Debentures other than those herein described, or containing conditions varying from the above, will not be considered.

Delivery of the Debentures will be made as soon as the Debentures are printed and signed, upon payment of the purchase money.

A certified cheque payable to the City Treasurer for the sum of $10,000.00 must accompany the tender.

The highest or any tender not necessarily accepted.

Full particulars, together with further conditions and official forms of tender, may be obtained on application to the City Treasurer, City Hall, Ottawa, Ont.

HAROLD FISHER,
Mayor.

Corporation Securities Market

Trading Heavy on Canadian Exchanges Notwithstanding Tight Money—Papers Were Buoyant But Reaction Set In at the Close—Allan Theatres Offering New Shares—Another Pulp and Paper Issue — Wabasso Common Stock to be Readjusted

CONSTRUCTIVE, rather than adverse, was the effect of the explosion on the New York market. Attacks by bears were not carried out, traders feeling that such an action would be contributing to whatever unsettlement might result. For the greater part of the week stocks moved upward, but at the close reaction set in, chiefly in industrials. The passing of the Central leather dividend, reduction in Ford car prices and reports of cancellations of steel orders by automobile manufacturers, were the principal factors in this reaction. "All these combine to emphasize the readjustment through which business is passing," state A. A. Housman and Co. in their market letter.

After a week of activity and buoyancy, Canadian stocks tended to become weaker, and at the close on September 22, all but a few issues sought lower levels. Interest was chiefly centred on papers, but was not entirely confined to that section. The most interesting situation in the market was the heavy trading in face of tight money. It is quite certain that banks are not yet ready to assist the market to any appreciable extent, but there is no doubt that there were plenty of funds to finance operations. Several theories as to this source of supply were advanced, but a satisfactory solution to the problem was not found.

A decline in the price of Dominion Steel here caused considerable comment, and especially in view of the fact that British Empire Steel was lower in New York. A director of Dominion Steel, however, stated that there was no special significance attached to this movement, and that the depression was really a matter of neglect, as there was no reason for the change.

Allen Theatres, Ltd.

Housser, Wood and Co., Toronto, and Edward Brown and Co., Winnipeg, are offering $2,500,000 8 per cent. preferred cumulative shares of Allen Theatres, Ltd., at par ($100), with a bonus of half share of no par value common stock. Common stock bonus will be adjusted to even amount by purchase or sale of fractional share at the rate of $40 per share. Application for this new stock may also be made at any branch of the Merchants Bank or the Canadian Bank of Commerce. Preferred shares are preferred both as to assets and dividends and are redeemable on three months' notice at $110 and accrued dividend at the option of the company.

Allen Theatres, Ltd., has been formed to acquire the entire assets of Jule and J. J. Allen, controlling one of the largest chains of motion picture theatres in the world, operated for the most part in Canada, with extensions in the United States and England. In return for their total properties and goodwill in the business, the Allens have accepted stock in the new company, and will continue in the management and control. The policy of building new theatres by local financing, whereby the majority of shares in local companies are retained by the Allens, will be continued, thereby continually adding to the equities owned by the holding company without impairment of capital.

Assets acquired by Allen Theatres, Ltd., consist of ownership or control and goodwill of all the theatres and film exchanges which, after giving effect to the present financing, amount to over $7,500,000, or over three times the amount of the preferred stock to be issued or outstanding.

Lake St. John Paper Stock

Offering is being made of $1,000,000 8 per cent. cumulative non participating preferred stock of the Lake St. John Pulp and Paper, Ltd., at par, with a bonus of two shares of common stock for every three preferred shares purchased. The Lake St. John Co. was recently incorporated with a capital of $4,000,000, of which one-half is preferred and the other common, and all shares are of a par value of $100. The balance of the stock will be issued on the basis of one common share with every three preferred. After dividends have been paid for two years on the preferred, those shares will automatically become common stock, so as to participate in the increased dividends which will be paid on the common.

Particulars of the company's operations, etc., are given elsewhere in this issue.

Capital Increases and Readjustments

The Purity Flour Mills, Ltd., incorporated under the laws of Canada, has been authorized to increase its capital stock from the sum of $100,000 to $500,000 by the issue of 4,000 new shares of $100 each.

Authorization has been given to the Boston Cattle Co., Ltd., which is registered under a Dominion charter, to increase its capitalization from 10,000 common shares of no par value to 13,000 shares of no par value, and from 3,600 cumulative preference shares of the par value of $100 each to 5,100 cumulative preference shares of the par value of $100 each, provided, however, that the company shall carry on its business with a capital of $575,000.

In accordance with the Companies Act of Saskatchewan, the Quaker Oats Co. has been authorized to increase its capital of $30,000,000, divided into 300,000 shares of $100 each, to $50,000,000, divided into 500,000 shares of $100.

The Wabasso Cotton Co., Ltd., has been authorized under supplementary letters patent issued at Ottawa, to convert the 7,500 common shares of its authorized capital stock into 15,000 shares of no nominal or par value, and also amending the supplementary letters patent issued to the company on June 12, 1912, by converting the 10,000 common shares of the par value of $100 each thedeby created into 20,000 shares of no nominal or par value, provided that the amount of capital with which the company will carry on business shall be $1,750,000.

New Issue

$3,000,000

Government of the

Province of Saskatchewan

Twenty-year 6% Gold Bonds

Dated October 1st, 1920 **Due October 1st, 1940**

Interest payable 1st October and 1st April.

Principal and Interest payable at the Union Bank of Canada,
Regina, Toronto or Montreal.

Denominations: $1,000 and $500.

These Bonds are a direct and primary obligation of the Province of Saskatchewan, and are payable from its general revenue.

Legal Opinion: Malone, Malone & Long.

Financial Statement

Approximate Assessed Value of all Property within Province	$1,500,000,000
Total Funded Debt (including present issue)	37,946,404
Less—Sinking Fund, Telephone System Debentures, Grain Elevator Debentures, Municipal Loans, etc..	17,204,168
Net Debenture Debt	20,742,236
Railway Guarantees	32,270,072
Less—Bonds in connection with Railways now owned and operated by Dominion Government	28,582,012
Net Railway Guarantees	3,688,060
Annual Dominion Government Subsidy	1,680,077
Provincial Assets	106,344,094

Area: 251,700 square miles.

Population 1911 census 492,432. Population present estimate 744,000

Saskatchewan is best known as a grain growing Province it having produced during the year 1919, 97,933,000 bushels of wheat, and 117,316,000 bushels of oats. The estimate for 1920 places these figures at 136,880,000 bushels of wheat and 173,003,000 bushels of oats, this being the greatest production of any Province in Canada

The finances of the Province are in excellent condition, the net debenture debt being less than $27 per capita, and the lowest of any Province in Western Canada

Price: 96.62 and Interest
Yielding 6.30%

Orders may be telephoned or telegraphed at our expense, and delivery made to purchaser's local bank free of expense to him

Interim certificates will be issued pending delivery of definitive bonds.

Bell Telephone Case Presented at Ottawa Canada Bread Has Good Year—Net Profits of Interprovincial Brick Company Increased—Encouraging Outlook for Canadian Locomotive

Canada Foundries and Forgings Co.—A circular was issued by the president on September 21 in regard to the sale of the Delaney Forge and Iron Co., the company's Buffalo subsidiary, reading as follows:—

"The directors have no hesitation in recommending ratification of the by law authorizing sale of the stock of Delaney Forge and Iron Co., which has been held by your company since 1917. The investment has been a profitable one for your company, but in the opinion of the directors, the time has now arrived when the funds represented by this investment can be more advantageously employed in developing the company's Canadian enterprises. The price received for the Delaney stock is a favorable one, and will show a good advance on the original cost."

Canada Bread Co.—Figures of operations during the year ended June 30, 1920, indicate that the company enjoyed a successful year. President Mark Bredin in his report points out that last year was a banner one in regard to the volume of business.

Manufacturing profits amounted to $293,881, which is an increase of $117,280 over the item shown as manufacturing profit and other income in 1919. Interest from investments is set down at $16,237 compared with $19,944 a year ago. Balance July 1, 1919, was $103,419, as against a net balance, after payment of business profits war tax for 1915-16-17, of $113,706 on July 1, 1918. Charges against these items for the period include depreciation on plant of $50,000; depreciation on war bonds, $10,214; profit tax 1918, $13,828; leaving a balance carried forward as at June 30, 1920, of $172,295, compared with balance on June 30, 1919, of $103,419.

Other principal items compare as follows:—

	1920.	1919.
Preferred dividends	$ 87,500	$ 87,500
Depreciation on plants	50,000	......
Depreciation on war bonds	10,214	...
Bond purchase	12,500	...
Depreciation and bond purchase	......	50,000
Bond interest	67,199	67,989
Ingredients and supplies	198,097	131,250
Total assets	5,973,727	5,534,418

Interprovincial Brick Co. of Canada, Ltd.—At the annual meeting of the company in Toronto last week, the financial statement for the year ended June 30 last, was presented to shareholders. Net sales during the year amounted to $179,486 against $95,462 in 1919. Net profits were $36,972 as against $11,169. Net earnings in the year were at the rate of 24 per cent. on $150,000 common stock before providing for special write off, and after this was taken into consideration were equal to 16 per cent earned. The common stock was raised to $200,000 through an issue of $50,000 at the end of the fiscal year. In all $39,584 in dividends was paid, which sum includes $29,581 accumulated dividends from September 30, 1914, to December 31, 1918. This payment tended to reduce profit and loss balance which stood at $13,651 at the year end against $20,269 in the previous year.

The balance sheet shows the company to be in stronger condition financially, the following being the principal comparisons:—

	1920	1919
Total assets	$ 285,621	$ [illegible]
Cash	1,587	[illegible]
Inventories	66,761	[illegible]
Property, etc.	253,299	[illegible]
Investments	50,000	[illegible]
Accounts payable	12,153	[illegible]
Tax reserve	5,149	1,100

Canadian Locomotive Co., Ltd.—The annual meeting of shareholders of the company was held at Kingston, Ont., on September 16, when a by-law was passed, and the following board of directors elected: A. Jarvis, Robert Hobson, Warren Y. Soper, John L. Whiting, James Carruthers, M. J. Haney and F. G. Wallace.

At a subsequent meeting of the board of directors, the executive officers for the coming year were appointed: F. G. Wallace, president; John L. Whiting, vice-president; A. Jarvis, chairman of the board; J. H. Birkett, treasurer. Wm. Harty, Jr., and Wm. Casey were elected to the board—Mr. Casey as one of the vice-presidents and Mr. Harty as secretary.

The company, at the present time, is working to full capacity, with sufficient orders on hand to run it for several months, and as the Canadian railroads will require all the motive power they can procure for several years to come, the future outlook for the company is most encouraging.

Quebec Railway, Light, Heat and Power Co., Ltd.—Shareholders are now in receipt of the detailed report of the company's operations during the year ended June 30, 1920. The report, which has been covered largely in these columns previously, shows that gross earnings increased nearly $300,000 during the year, but owing to high operating expenses net earnings were slightly reduced. The balance at the credit of the surplus account was $582,705, as compared with $682,461 at the end of the previous year.

The balance sheet, which has been given in these columns previously, shows the company to be in a stronger financial position. Total assets are now $24,736,033, while last year the figure was $24,555,029. Cash on hand and in the bank is reduced, but bills and accounts receivable are higher. Inventories also show an increase, while bills and accounts payable show a reduction.

Besides containing figures of the company's financial standing, the report, which is in pamphlet form, is profusely illustrated with interesting views of the company's property, and comprehensive charts of operations.

Bell Telephone Company.—The hearing of the company's application for increased rates was commenced in Ottawa on September 21 before the Dominion Board of Railway Commissioners. Glyn Osler, K.C., in opening the case for the company, declared the reason for the increase in rates was the heavy advance in the cost of labor and material. H stated that the company is not earning any dividends, no earning interest on its bonds, and in addition the earning are not sufficient to provide for depreciation of the plant.

C. F. Sise, vice-president and general manager of th company, was the principal witness, and he submitte evidence showing that the service of the company was belo par, and that in order to bring the service up to the righ standard, new capital is required. In order to obtain thi new capital investors must be assured of a reasonable return, and this could not be under present circumstances, because of insufficient earnings. It was stated that no investo will take the risk of not getting dividends or not havin their interest paid. In the meantime the company is gettin this out of the surplus. Mr. Sise declared that the earning of the company has declined from 5.6 in 1915 to 3.8 in 1919 A further statement was handed in showing the result o one year's operation based on actual results for the month of May, June and July, 1920, which showed a net operatin loss of $[illegible]. The revenue was $16,601,835, and expense $[illegible].

At the conclusion of the hearing at Ottawa, sitting will be conducted in Toronto and Montreal. The company' case will be thoroughly investigated first, and then othe evidence, either for or against the increased rates, will b heard by the board at a later date.

RECENT FIRES

Business Section of Brockville Damaged, Loss $200,000—Eight Military Huts at Barriefield Destroyed Loss $100,000

Allanburg, Ont.—September 17—Barn of [illegible] together with the crop, was destroyed by fire. The loss is $19,000.

Barriefield, Ont.—September 18—Eight military huts were destroyed by fire. The loss is said to be about $100,000 partly covered by insurance.

Beaverton, Ont.—September 15—Foundry of Smith Brothers damaged by fire. The loss is estimated at $1,000, covered by insurance.

Brockville, Ont.—September 21—The business section, near the corner of King and John Streets, was damaged by fire. The loss is estimated at $200,000.

Chester, N.S.—September 18—Plant of the Hawboldt Gas Engine Co. was damaged by fire. The Sanford tannery and two barns were also destroyed. The loss to the gas engine company will amount to $57,000.

Halifax, N.S.—September 14—Fire started in Halifax Furnishing Company's store, 82 Gottingen Street, doing damage to the extent of $25,000, and then spread south to the Crown Cafe and the produce store of W. J. Mont, their losses being estimated at $7,000.

Hillhurst, Que.—September 17—Barns of J. Lee Alexander at Maplehurst Farm were destroyed by fire. The fire was caused by lightning. The loss is estimated at $30,000, partly covered by insurance.

Liverpool, N.S.—September 17—Plant of the Southern Salvage Co. was damaged by fire. The loss is estimated at $20,000.

Milford, Ont.—September 14—St. Phillip's Anglican church damaged by fire. The fire was caused by lightning.

Ottawa, Ont.—The main building of the Producers Dairy, Ltd., corner of Kent and Cooper Streets, was damaged by fire. The loss is estimated at $5,000.

Starbuck, Man.—September 12—Barns on the farm of Mrs. Downey, five miles south of the town, were destroyed by fire.

Stratford, Ont.—Sepember 15—Barn of Messrs. Michael and John Goerling, a few miles north of Stratford, was struck by lightning and destroyed.

Windsor, Ont.—September 15—Plant of the [illegible] Roofing Co., McDougall Street, was damaged by fire.

Winnipeg, Man.—September 17—Owl Metal Co., 211 Gallagher Avenue, was damaged by fire. The loss is estimated at $12,000, with $9,200 insurance carried in the Canadian Securities Assurance and Newark Fire Insurance Co.

ADDITIONAL INFORMATION CONCERNING FIRES

Brigden, Ont.—August 30—Frame building and contents of newspaper printing plant belonging to N. J. [illegible] was damaged by fire. The fire is believed to have been caused by short-circuit in Hydro wiring in implement building. The loss is $1,950 with insurance of $800 in the Western Insurance Co.

Gatineau Point, Que.—September [illegible]—The business section of this town was damaged by fire. A theatre, [illegible], restaurant and blacksmith shop were completely destroyed, a poolroom and a barber shop were badly damaged. The cause of the fire is not known. The total loss on buildings and contents was $26,100, with insurance of $7,300.

Guelph, Ont.—September [illegible]—Nelson [illegible] store was damaged by fire. The loss was [illegible] with insurance of $12,[illegible].

Manitoba.—The fire chief's report for July, 1920, shows that during the month there were 118 fires, with a loss of [illegible]. These fires throughout the province were caused by [illegible] smokers and carelessness with [illegible] the fires. There were three fatalities caused by fires during the month.

[illegible] Vancouver, B.C.—August 26—Fish and chip r- [illegible] at 74 Lonsdale Avenue was damaged by fire. S- [illegible] other buildings were slightly damaged. The total da [illegible] $4,955, with insurance of $7,000. The cause ws [illegible] short circuit in the electric range.

Movement of Canadian Grain Crops

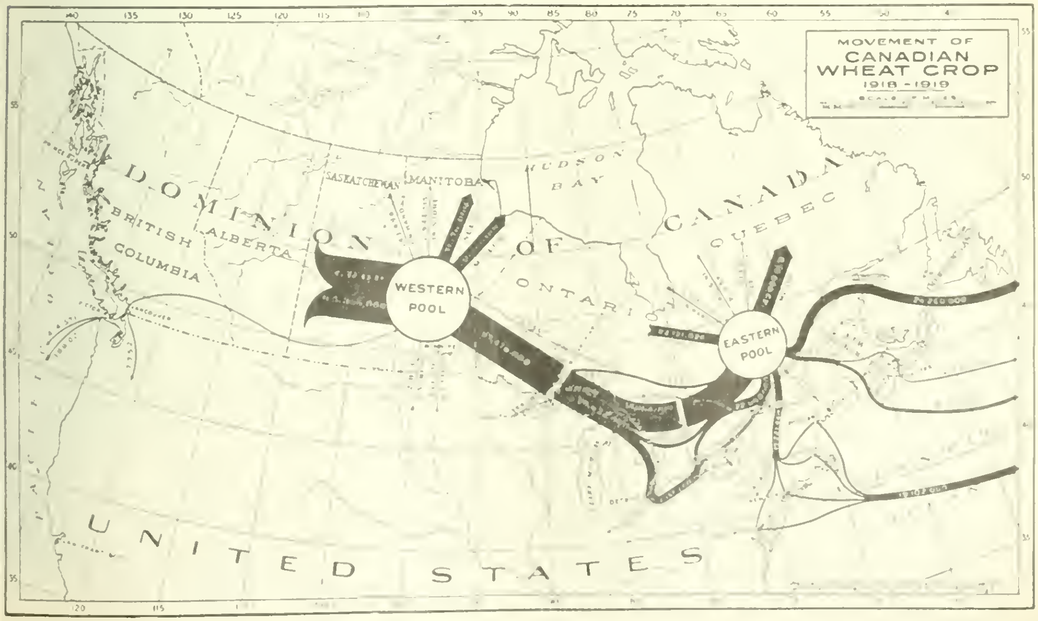
Increased Proportion of 1919 Crop was Shipped Through Canada—Most of Wheat is Milled in Canada, and East Gets Greater Part of This Business—Shipments of Wheat, Oats and Barley Crops

At least 250,000,000 bushels of wheat, and possibly 300,000,000, or more than in the record year 1915, are now being harvested in the Canadian west. A small part of it is already moving this way, and by the end of the present month the movement will be well under way. The carrying of the grain crop from west to east is one of the big problems in Canadian industry, a problem which is accentuated by the fact that a large proportion of the carriers must go back empty, and the grain must therefore bear the expense of a two-way trip.

The bulk of the grain crop comes down the great lakes. Some of it is milled in eastern Canada, and some goes overseas by various routes. Last year an increased proportion went through Canadian channels, according to a report of the Dominion Bureau of Statistics on the Grain Trade of Canada. This report gives very thorough statistics of grain production and transportation, many of the figures having been compiled by the Board of Grain Commissioners. The grain movement is illustrated in the accompanying drawings. The expedient has been adopted of showing a pool for the western inspection division and another pool for the eastern inspection division, and showing the principal streams into and out of each of these pools for the year, also the movements through the chief grain centres of the country.

Mostly Milled in Canada

The western pool, of course, is fed chiefly by the crop in the western division. This was computed for the crop year under discussion to be 165,354,324 bushels. There also was on hand at the beginning of the year, in accordance with the closest calculations available, some 543,498 bushels. The only other stream entering this pool is the small amount of 390,834 bushels, of which 338,081 bushels entered from Australia via Vancouver, B.C.; the balance of 2,813 bushels were imported from United States. 321,760 bushels of this amount were reshipped to Great Britain and other countries; 92,811 bushels of Canadian wheat were also exported over seas while 7,752 bushels were exported direct by rail to



United States. This makes a total flow into this pool during the year of 166,288,656 bushels. Of this, 126,472,238 bushels were used commercially, that is, shipped out of the division or milled within the division. Of this, 30,000,000 bushels were ground in the west. The balance sheet of wheat in statement No. 39, shows the destination of the quantity shipped out of this pool, and the map shows the movements east distinguishing between what went to the terminals at Fort William and Port Arthur and what was shipped all rail to the east. In addition to this amount disposed of commercially, it is estimated that 31,175,861 bushels were used for seed and that 2,914,515 bushels were held over in store to the next crop year.

253,607 bushels are shown as going straight through to the east by rail, either destined to the eastern division or to the eastern part of the United States. It has been impossible, at this stage of the flow, to distinguish between what was reshipped from the eastern pool and what was shipped through eastern Canada to United States; consequently, this has all been shown as going into the eastern pool, and the shipments by rail through the eastern division into the United States have all been shown as shipments out of the eastern pool. The largest shipment out the west went by way of the terminals, Fort William and Port Arthur. 97,476,240 bushels passed into the public and private terminal elevators at Fort William and Port Arthur during the crop year.

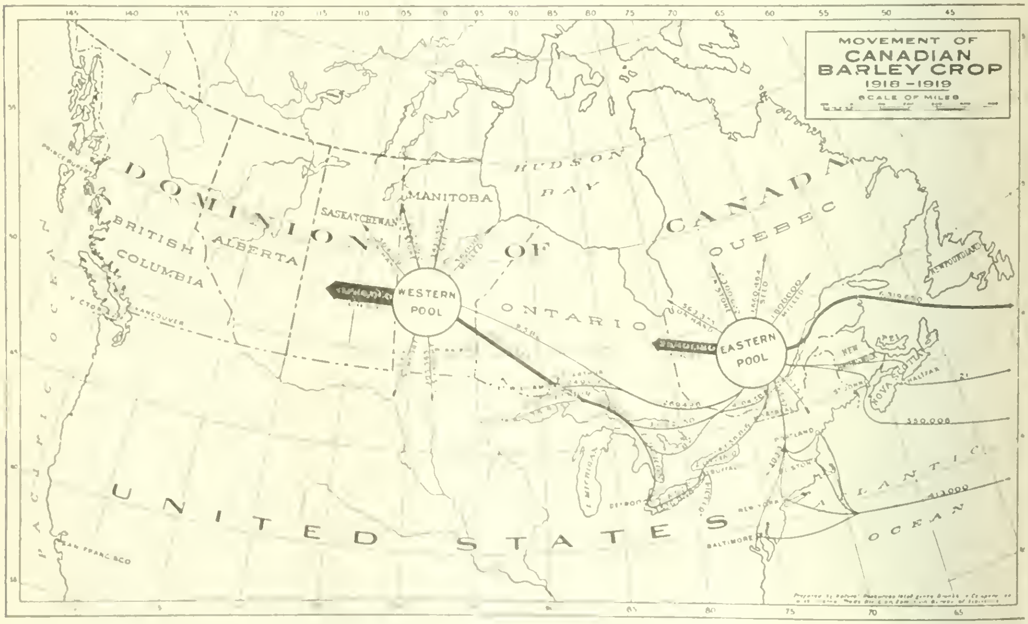
No attempt has been made to show the quantities on hand at these terminals beginning with the end of the crop year as distinguished from the quantity on hand in the division as a whole, on the map. Consequently, the streams shown as shipments from the terminals do not exactly agree in amount to the quantity shown as received at these terminals. 5,077,110 bushels were shipped eastward from these cities by rail and, being joined to the rail shipments from the far west, make the total rail shipments east of [illegible] [illegible]0,717 bushels. The water shipments from the terminals are known to a high degree of exactness, and amount for this year to 90,431,782 bushels. In addition to this [illegible]

bushels of Canadian wheat were shipped eastward by wate from Duluth. Of these total lake shipments, 55,063,87 bushels entered the bay port elevators and, owing to the ba port elevators being more thoroughly cleared of their sup plies at the beginning of the year than at the end, 54,828,23 bushels were forwarded thence by rail. 9,946,811 bushe from the lake stream were received at Goderich and fo warded thence by rail; 20,246,806 bushels were taken fro this lake stream at Port Colborne, of which 11,186,54 bushels were shown as forwarded by rail into the easter pool. However, to be exact, a large part of this was mille in the city of Port Colbòrne. It being impossible to sho the amount milled at each centre, this has been shown a going into the eastern pool, and the figures are shown i one total. Of this wheat received at Port Colborne, 9,809,75 bushels were forwarded down through Lake Ontario, th large part of which was received at the Kingston elevato being forwarded thence again to Montreal.

Some 988,286 bushels were shipped from Fort Willia and Port Arthur to Duluth-Superior, 623,669 bushels went t Canadian ports from these aforesaid ports. Of the move ment down the lakes to United States ports, some 2,797,03 bushels were received at Buffalo, Detroit received 121,67 bushels, Duluth-Superior 988,286 bushels, Port Huron 58,00 bushels. The smaller streams have not been shown on th map.

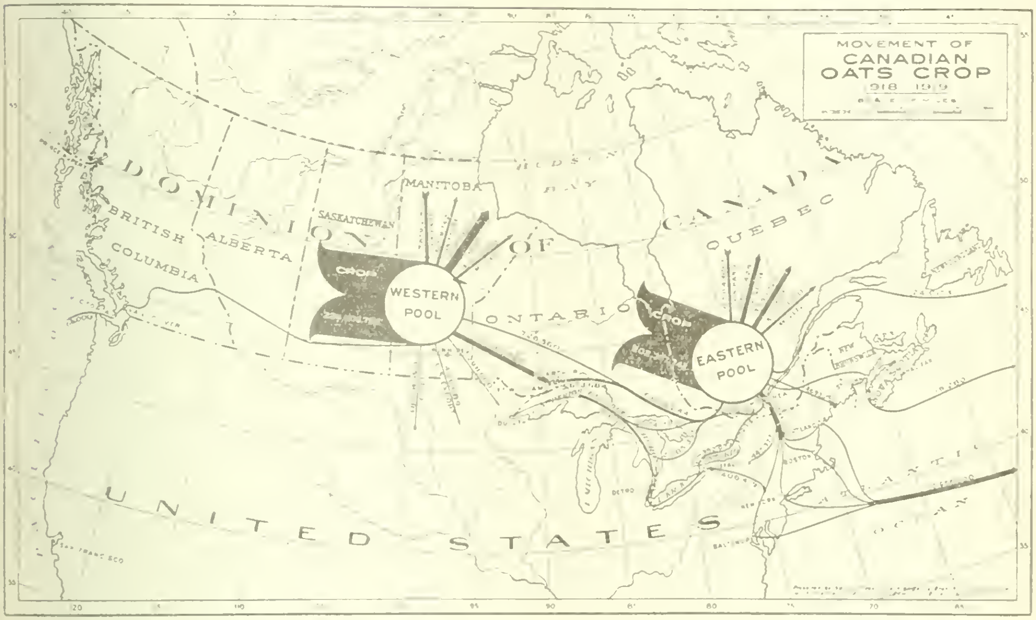
The Eastern Crop

The eastern pool received during the year not only t crop that was estimated at 23,721,026 bushels, but also th shipments from the west, amounting in all to 91,777,41 bushels. The route by which the various parts of this strea entered have already been sketched, excepting that in add tion it is necessary to explain the offshoot from the ma [illegible] stream of 22,008,127 bushels in Montreal. Th [illegible] plus the [illegible]809,778 bushels shipped down the S Lawrence by water, was received in the public elevato situated in the city of Montreal. This, being such a larg stream, has been shown separately before it enters the mai eastern pool. In addition to the crops and the receipts fro



the west, the map shows 1,777,120 bushels as received into the pool for the year from the quantity on hand at the end of the previous year. There also was a small importation from the United States into this division, amounting to 27,110 bushels.

The movements out of this year's eastern pool included 2,049,974 bushels carried over in store into the following year, 2,221,478 bushels used for seed in the division, 49,000,000 milled, 24,259,759 bushels shipped out for export from the St. Lawrence ports, 2,284,538 shipped out by way of Halifax, and 8,747,114 shipped out by way of St. John. The deductions from the Customs reports show that 19,037,331 bushels were shipped out via the United States to other countries. In addition there was a small amount of 184,109 bushels cleared for United States consumption, making the total shipments by rail from the east into the United States 19,221,440 bushels.



Two main streams are shown as going into the United States. Of these 2,797,057 bushels went by way of Buffalo and 1,167,959 bushels via other United States lake ports, and 19,037,331 bushels moved by rail from the eastern pool, while 184,109 bushels were cleared for consumption in the United States from the shipments from the east, and 1,964,996 bushels from the shipments to lake ports, including Duluth. Thus 19,102,080 bushels were cleared for export to other countries via the United States from the eastern pool. No attempt has been made to show by what ports this wheat moved out of the United States, the map indicating merely that it went via United States Atlantic ports. So far as our export is concerned, it is correct to conclude that this was exported into other countries by way of United States ports.

Movement Through United States

This very light movement of 19,102,080 bushels of wheat through United States ports as compared with some 45,302,931 bushels via Canadian ports including Vancouver speaks volumes for the future of the Canadian channel of export trade. No doubt the threatened United States embargo in Canadian wheat has something to do with this large movement via Canadian ports. However, when the depth of the Welland Canal has increased so the large boats can come down as far as Kingston, larger movements via these ports may be looked for in the future.

Movement of Oats Crop

The oats crop in the western division was computed for the crop year under discussion to be 224,004,778 bushels. There also was on hand at the beginning of the year, in accordance with the closest calculations available, some 7,679,214 bushels. The only other stream entering this pool is the small amount of 11,100 bushels entering from the United States. This makes a total flow into this pool during the year of 231,695,072 bushels. Of this, only 17,070,147 bushels were used commercially, that is, shipped out of the division or milled within the division. Of this, 4,000,000 bushels are estimated to have been ground in the west. The balance sheet of oats in statement No. 39 shows the destination of the quantity shipped out of this pool and the map shows the movements east distinguishing between what went to the terminals at Fort William and Port Arthur and what was shipped all rail to the east. In addition to this amount disposed of commercially, it is estimated that 23,899,110 bushels were used for seed and that 6,719,712 bushels were held over in store to the next crop year.

Seven hundred and twenty-six thousand five hundred and sixty bushels are shown as going straight through to the east by rail, either destined to the eastern division or to the east of the United States. It has been impossible, at this stage of the flow, to distinguish between what was reshipped from the eastern pool and what was shipped through eastern Canada to United States, consequently, this has all been shown as going into the eastern pool, and the shipments by rail through the eastern division into the United States have all been shown as shipments out of the eastern pool. The largest shipment out of the west went by way of the terminals, Fort William and Port Arthur. 12,869,928 bushels are reported to have passed into the public and private terminal elevators at Fort William and Port Arthur during the crop year. No attempt has been made to show the quantities on hand at these terminals beginning with the end of the crop year as distinguished from the quantity on hand in the division as a whole, on the map. Consequently, the streams shown as shipments from the terminals do not exactly agree in amount to the quantity shown as received at these terminals. 5,873,684 bushels were shipped eastward from these cities by rail and, being joined to the rail shipments from the far west, make the total rail shipments east of 6,600,244 bushels. The water shipments from the terminals are known to a high degree of exactness and amounted for this year to 6,582,906 bushels. In addition to this, 298,000 bushels were shipped eastward by water from Duluth of Canadian oats. Of these total lake shipments 1,805,771 bushels entered the bay port elevators and, owing to the bay port elevators being more thoroughly cleared of their supplies at the beginning of the year than at the end, 1,741,786 bushels were forwarded thence by rail. 2,005,357 bushels from the lake stream were received at Goderich and forwarded thence by rail. 352,935 bushels were taken from this port stream at Port Colborne. Of the oats received at Port Colborne, 1,223,512 bushels were forwarded down through Lake Ontario, part of which was received at the Kingston elevator and forwarded thence again to Montreal. A small amount of oats moved down the lakes to United States ports, Buffalo being the only port to receive anything, viz., 1,406,419.

RAILROAD EARNINGS

The following are the approximate gross earnings of Canada's transcontinental railways for the first three weeks in September:—

Canadian Pacific Railway.

	1920.	1919.	Inc or dec.
Sept. 7	$3,991,000	$3,599,000	+ $ 392,000
Sept. 14	4,258,000	3,763,000	+ 495,000
Sept 21	4,605,000	3,893,000	+ 712,000

Canadian National Railway.

Sept 7	$1,968,001	$1,759,160	+ $ 208,842
Sept. 14	2,372,906	2,069,675	+ 303,231
Sept. 21	2,292,907	2,085,089	+ 207,818

Grand Trunk Railway

Sept [illegible]	$2,17[illegible],270	$1,949,914	+ $ [illegible]
Sept 14	2,680,720	2,178,855	+ 501,865
Sept 21	2,187,400	2,172,615	— 20,841

CURRENT LOANS AND DEPOSITS INCREASE EVENLY

Advance bank returns for August, 1920, show that current loans advanced approximately $8,000,000, while notice deposits increased by the same figure. Demand deposits increased by less than $1,000,000. The following are the principal figures:—

	August 1920.	Change from July 1920.
Reserve fund	$ 130,182,[illegible]	[illegible]

A detailed review of the statement will be given in these columns next week.

WILL RECOMMEND GOVERNMENT FIRE INSURANCE

Revelstoke, B.C., Has Far-Reaching Proposal—American Company May Insure Standing Timber—Seizure of Motor Cars

(Special to *The Monetary Times.*)

Vancouver, B.C., Sept. 24th, 1920.

THE municipality of Revelstoke is to recommend to the convention of municipalities, to be held at Nelson on the 6th, 7th and 8th of October, that the British Columbia government take over the fire insurance of the province, and the statement is made in connection with the recommendation that it will save the ratepayers of British Columbia approximately $2,000,000 a year after allowing the provincial government a yearly surplus of $1,000,000. It is safe to say that this recommendation will be very strongly opposed, not only by insurance companies, but by ratepayers, and that, even if it should carry, the British Columbia government would hesitate to assume such a tremendous financial risk under present monetary conditions in the province.

May Insure Against Forest Fires

An American company who wish their name withheld for the present are considering the question of embarking in the timber insurance business in British Columbia. Only those limits near the centres of population will be insured.

A great deal of standing timber was destroyed by fire in British Columbia during the last dry spell, and it cost the government nearly $200,000 to fight these fires.

Veterans' Insurance Scheme

The government life insurance scheme for returned soldiers is proving attractive on the coast. Since the few days forms have been available, 600 applications for insurance have been forwarded to Ottawa. The pension board office is handling the applications and dispensing information. No word has been received as to what department will collect premiums and dispense funds after death.

Seizure Risk

In New Westminster an automobile has been confiscated because it carried liquor contrary to the Prohibition Act. This is the first case on record in British Columbia where a car has been seized for this reason on the public streets, although many have been confiscated for booze running on the border.

In fact, so common did it become that the insurance companies were asked to make a rate for seized cars similar to the rate made by American companies, for the reason that these cars were sometimes stolen and converted into liquor carriers and the owner was then in no way to blame, and at other times the owner was only guilty of carrying enough liquor for his own immediate use.

On inquiry from the insurance department of the Dominion government, however, it was ascertained that this form of insurance would not be recognized by the government as legitimate and the rate was never struck.

BOND DEALERS BUY EXCHANGE SEATS

Within the past two weeks, five Toronto bond houses have purchased seats on the stock exchange. Only four of the names of the purchasers are known definitely, and they are: Wood, Gundy and Co., W. A. Mackenzie and Co., R. A. Daly and Co., and Turner, Spragge and Co. The name of the fifth company has been rumoured as R. C. Matthews and Co., but that company has not confirmed that fact yet. When these transfers are completed, they will be represented on the stock exchange by: W. F. Wilder for Wood, Gundy and Co., A. [illegible] Mackenzie for W. A. Mackenzie and Co., R. A. Daly for R. A. Daly and Co., and A. C. Turner for Turner, Spragge and Co.

Corporation Finance 46

THE COST OF FIRE INSURANCE

LAST year the fire insurance companies paid to policyholders in Canada slightly over 41 per cent. of the total premiums collected. Since 1869 the ratio paid back has averaged a little over 58 per cent. These figures lead from time to time to an inquiry as to where the remainder of the premiums go. Only a few days ago the *Regina Post*, which is always a ready champion of the cause of the west against the corporations of the east, published figures showing that the loss ratio in the west has been lower than in the east during the past four years. In a contribution to this week's issue of *The Monetary Times*, "Layman," writing from many years of experience in fire insurance in the maritime provinces, takes the view that the margin between premiums and loss payments is too large.

There are unquestionably many ways in which fire insurance business does not operate in the public interest. What business is there, in fact, however useful it may be, which does not clash in some instances with the public welfare? It is freely admitted that the payment of agents by means of a commission on premiums encourages over-insurance, and the writing of risks which are not good risks. Public investigations into the causes of fires reveal only too often the complicity of an agent, innocent as such complicity may be, in a conspiracy to defraud the fire insurance companies. Our correspondent does not suggest a remedy, however. In his general purview of the fire insurance business, moreover, he overlooks the fact that any kind of insurance, supposing all dishonesty removed, is one in which the careful and the fortunate, by prolonging their life and by guarding their health and property, pay for the mistakes and the misfortunes of the rest. This is a part of the contract which is fundamental.

The case is not one against the fire insurance companies, but rather against the circumstances under which fire insurance is transacted. If there is any "profiteering" in the fire insurance business, certainly the shareholders have not seen the result. Canadian companies operating under Dominion license paid their shareholders in 1919 only $723,886 upon a paid up capital of $12,937,307, or considerably less than 6 per cent. This is a return below the current rate of interest in the money market to-day, but is partly compensated for by the fact that as a result of an especially favorable year substantial additions to surplus were made. 1919 was, in fact, one of the best in the history of Canadian fire insurance, the loss ratio of 41.67 per cent. being the lowest in fifty years, with the single exception of 1902, when it was 39.26. A ratio exceeding 60 per cent. and even 70 per cent. was common until about 1908, and the average of 58.19 for the whole fifty-one years since 1869 has been the result of lower figures since 1908. It is to the wide margin between, comprising the expenses of doing business, that attention must be directed. A considerable part of this goes to the agents, the rest to office expenses, cost of inspections, taxes, etc.

It is the duty of fire insurance companies, working in co-operation with the governments, to endeavor to narrow this margin, and pass the benefit on to the public by lowering rates. Some effective work is already being done by the governments in reducing the fire losses themselves, and it is important to remember that the cost of this work is born by the companies, and that they have taken an active part in it. A reduction in overhead expenses may be brought about by amalgamations, but the amount to be saved in this way cannot be large. The work of inspection and classification of risks is essential, and it must be born in mind that this work also helps to remove fire hazards. Serious attention should be given to the method of securing business through agents, with a view to eliminating over insurance. These and other aspects of the business should have the careful attention of the conference of provincial superintendents, at which the fire insurances companies will be represented, which is to be held in Winnipeg next week.

THE THREATENED MINERS' STRIKE

THE words, says Premier Drury of Ontario, [illegible] to action. Perhaps they are the feeble echoes of the great war; perhaps they are [illegible] prompted to satisfy [illegible] to the gigantic disorder [illegible] from Europe. This week it is the coal miners of Great Britain who occupy the stage. The [illegible] in the United Kingdom, and [illegible] continent to [illegible] with [illegible] complacency. The mother country has handled such difficulties with success, and without [illegible] committing itself to any new principle of economic life. There is no formula for industrial crises, nor has the League of Nations' [illegible] provided a remedial principle.

It has become apparent, nevertheless, that the public will come out on top. The coal miners wanted an increase in wages coupled with a reduction in price, a combination which is in violation of economic law. The British government has ceased to subsidize industry, and will scarcely resume the policy by bonusing coal production. The workers in an industry have no more right to absolute control than have the capitalists. All essential industries which have outgrown the competitive stage must be operated by the public or under its control. Even in Italy, which is so close to the seat of Bolshevist movement, the attempt to segregate the country into its economic units has failed. The British coal miners, finding that the public was behind the government in its opposition, agreed to suspend their threatened strike on September 24th.

The coal owners, it is known, are anxious to have an agreement with the miners, and there is so much difference between the recent output of coal and the amount mined in normal times that it is considered there should be little difficulty in agreeing on a scale that will enable the miners to get the increase they desire. Suspension of the strike is recognized as being a great victory for the government. The miners have been forced to drop both of their demands, first to have the right to control the profits and prices of the industry; secondly, to obtain a rise on the ground of the high cost of living, and they have been induced to accept the government's contention that output could be considerably increased if the miners and mine owners would co-operate with each other. The miners gave way because they realized that obstinacy would jeopardize their own organization. The plain statement of the government's position and the [illegible] analysis of the miners' contentions by Sir Robert Horne and Lloyd George in a series of interviews, published in all the newspapers, created a division in the ranks of the miners themselves.

RENTALS AND REALTY VALUES

HOUSES are [illegible]

[illegible]

rent rise is an effect of readjustment. Government housing schemes have failed to supply the shortage. The value of such property must continue to be determined by the cost of replacement, for that is the cost at which new properties must be placed upon the market, and investment in property must yield a return comparable with that obtainable in other fields.

THE GROWTH OF THE CLERICAL MACHINE

FOR many years [illegible] production has been carried on as a process in which the individual workman plays an insignificant part; he is a part of the machine which is essential because [illegible] has not been able entirely to eliminate the human element, an element which [illegible] and [illegible]. With the growth of large corporations during the past [illegible] years the same tendency in the clerical end of [illegible] is more and more making itself felt. Here, too, a great machine has been created. In this machine the human factor is still essential, but the part which the individual plays [illegible] because the method of [illegible] the machine [illegible] from the design of the machine itself.

The construction of the modern office grows constantly more like the construction of the factory. Work has been standardized. Long rows of desks of uniform design and equipment now occupy the offices of our large commercial and financial institutions. With the increasing division of labor each operation becomes more simple. The field in which each member of the staff operates is narrower. As in the case of mechanical production, however, the growth of the machine has meant that the comprehensive plan which somewhere underlies the whole is a new product of modern economic life. Detailed operations may be simplified, but the vision of the organization as a whole must remain.

Communism in Italy has been given up, because [illegible] day no longer [illegible].

* * *

The price reductions which come from increased production are the best, for the producer is compensated by the fact that he has more to sell.

* * *

The banks still continue to open numerous branches in Canada. Confidence in the future expansion of the Dominion is not affected by temporary depression.

* * *

Better flour at a lower price is now being turned out by the Canadian mills. This country's record for superior [illegible] products should be preserved.

* * *

W. F. O'Connor, K.C., formerly a member of the Board of Commerce, [illegible] the income tax levied by [illegible] of Ottawa. [illegible] way of [illegible]

* * *

[illegible] United States [illegible]. What is even more surprising [illegible] that they should be [illegible]

* * *

[illegible] the wife of [illegible] to hold a [illegible] sympathizers are [illegible]

* * *

[illegible] for more [illegible] the public will [illegible] of the "[illegible]" as it [illegible]

PERSONAL NOTES

R. F. Hayward, manager of the Western Power Company of Canada, Vancouver, has resigned his position with that company to become manager of the Santiago Light, Tramway and Power Company, which is owned by the Pearson interests of England.

Bryce B. Hunter has been appointed additional representative of the North British and Mercantile Insurance Company, at Toronto. Mr. Hunter will take into association, from the first of January next, J. D. Rowell, who has represented the company for many years as inspector for Ontario.

H. B. Mackenzie has been appointed manager of the Royal Trust Company, Montreal, to succeed A. E. Holt, who has retired owing to ill-health. Mr. Mackenzie's banking career dates back as far as 1884, when he was in the service of the Canadian Bank of Commerce at Brantford, Ont. In 1887 he joined the Bank of British North America, and saw service with that institution at Brantford, St. John, N.B., and Montreal. After serving in various other capacities for some years, Mr. Mackenzie was appointed superintendent of central branches at Winnipeg, Man., in 1907. In 1909 he was appointed general manager of the bank, which position he held until the institution was absorbed by the Bank of Montreal, when he was appointed one of the assistant managers of the latter bank.

F. W. Molson, prominent in Montreal financial circles, has been elected to the directorate of the Montreal Trust Company. Mr. Molson is a member of the directorates of many important institutions, including the Molsons Bank, the Bell Telephone Company, the National Trust Company, Montreal Cotton, the Montreal City and District Savings Bank, and the Canada Paper Company.

H. J. Kerr, who for the past twenty-one years has been in the service of the Commercial Union Assurance Company, Limited, in England, during which period he has had considerable field and office experience, has been appointed assistant manager for Canada, and has now entered upon his new duties with office at Montreal.

Sir George Bury has officially severed his connection as president and managing director of the Whalen Pulp and Paper Company, Vancouver, B.C. It is expected that the new president and managing director will be elected in the near future at a meeting of the board to be held either in New York or in eastern Canada.

J. C. G. Armytage and **H. A. H. Baker**, for a number of years connected with the Equitable Life Assurance Society, have been appointed Winnipeg branch managers for the Sun Life Assurance Company. Mr. Armytage has been general agent of the Equitable Life in Winnipeg for the past fifteen years, while Mr. Baker entered the insurance business in 1907, and for the past six years has been with the Equitable.

M. Snow has been appointed manager and secretary of the Northwest Grain Dealers' Association, of Winnipeg, in place of F. O. Fowler, who has resigned. Mr. Snow came to Canada from Scotland in the year 1880, and during his forty years' residence there he has seen the west grow from incredibly small beginnings to its present high state of development.

J. Wilson, manager of the Union Bank of Canada for London, England, is at present in Canada on a tour of inspection with other directors. Before leaving for England he will make several calls in the United States. When in Winnipeg last week, regarding the British conditions, Mr. Wilson said: "In general the situation is healthy but quiet." He pointed out that in order to prevent the holding of foodstuffs in warehouses the banks were ordered by the government not to advance money on the value of these foodstuffs, with the result that holders were forced to sell their products as soon as they received them, and in this way they could not wait for higher prices.

TWEED HEADS NEW LIFE COMPANY

S. C. Tweed

Waterloo, Ont., will be the headquarters of the Ontario Equitable Life and Accident Insurance Company, which has just been organized under provincial charter, with an authorized capital of $2,000,000. Life, accident and health insurance will be written. In selecting the name, regard was had for the fact that the Equitable Life Insurance Company had just withdrawn from this country. Many of the Equitable agents will be on the field force of the new company.

The general manager of the Ontario Equitable Life and Accident Insurance Company will be S. C. Tweed, who retires from the position of superintendent of agencies of the Mutual Life of Canada, his resignation taking effect to-day (Oct. 1). Mr. Tweed has had a life-long experience in the insurance field. He started as a stenographer with the Metropolitan Life in one of its Canadian offices. He served also for a number of years with the Equitable and later took the superintendency of the Mutual, in which position he has met with marked success.

OBITUARIES

[illegible] A. Parker, who for many years had been treasurer of the township of Arthur, Ont., died at his home at Kenilworth on September 28th.

Thomas Kirby, who has been retired from business for some time, died in Montreal on September 23rd. Mr. Kirby was a well-known banker, being at one time manager of the Merchants Bank of Canada at Ottawa.

THE STERLING BANK
OF CANADA

The personal service policy of the Sterling Bank has grown from a realization of the fact that our own expansion is closely related to that of our clients. Accordingly, the efforts of every officer of the Bank are directed toward one end *the growth of our clients' business.*

THE
EXCHANGE RATE

1—What Controls It?

FIFTY-SIX years ago, after the Civil War, the United States dollar was quoted in Toronto at forty cents. To-day that dollar is quoted here at one hundred and ten cents, or more, while the Canadian dollar has an exchange value of only about ninety cents in the United States.

On every side the questions are asked, "What is the meaning of 'Exchange'?" "Why is our money at a discount?" and "When will the Canadian dollar again be worth its face value?"

Many false impressions are held as to the cause of these fluctuations.

In the following series of advertisements, which will be published in this paper each week, we shall try to make clear the factors controlling the rise and fall in value of the dollar

DEPRECIATION IN CURRENCIES RECOGNIZED

New Ruling of Customs Department Now Being Enforced—Still Uncertainty About Determining Current Rate

(Special to The Monetary Times.)

Ottawa, Sept. 30, 1920.

PROVISION for valuing European currencies at current rates rather than at par of exchange is contained in an order of the customs department, signed by R. R. Farrow, commissioner of customs. This order is dated July 22, 1920, but was distributed just a few days ago. It relates to section [illegible] of the Customs Act. Sterling invoices are still to be valued at par, according to this order, but it is understood that the current rate is shortly to be applied to imports from the United Kingdom also. The order reads:

Currency of Exporting Country

"(1) When the value of any currency has been proclaimed by the Governor in Council, subject to the provisions of Paragraph 2 hereof, collectors of customs are to compute the value for duty according to the rate so ordered and proclaimed from time to time. The fair market value of the goods when sold for home consumption in the principal markets of the country of export, at the date of export, should always be shown in terms of the standard coins of the currency of the country of export, whether this standard be gold or silver, and regardless of whether transactions in specie actually take place or not. If payments of specie have been suspended and the business of the country of export is carried on in paper currency, the home market value of the goods exported may be shown in terms of the paper currency, provided the value of the paper currency in relation to the standard coins be also shown. The governing value of the goods for duty purposes is the home market value in the terms of the standard currency of the country of export.

Compare with Canadian Dollar

"(2) Whenever (a) the value of the currency has not been proclaimed, or whenever, (b) though proclaimed, there is no fixed standard value (and it is to be noted that where a currency is based on silver or on any other standard than gold there can be no fixed value in relation to the currency of Canada), there shall be attached to the invoice of the goods imported the certificate of some Consul resident in such place or country showing the true value of the currency in which said invoice is made out at the time when and in the place or country where such certificate is given as compared with the standard dollar of Canada.

"(3) Whenever from any cause the value of any such currency, referred to in paragraph 2 above, sections (a) or (b), has become depreciated, there shall be attached to the invoice of the goods imported the certificate of some Consul resident in such place or country, showing the extent of such depreciation, and in such cases wherever the value of the depreciated currency is dependent upon the rate of exchange on London, it shall be optional with the importer, with the consent of the collector, to compute the value for duty at the rate of exchange certified by the bank through which the draft is drawn, as current at the time and place when and whence the goods were exported to Canada.

"(4) By Section 9 of the Currency Act, 1910, it is provided that the British sovereign shall pass current and be legal tender in Canada for four dollars eighty-six and two-thirds of a cent of the currency of Canada."

Stamps for Luxury Tax

Collection of the sales and luxury taxes by means of stamps instead of by the present method will be inaugurated November 1. The necessary arrangements have been made and the stamps manufactured. A special perforating machine for cancelling the stamps will be furnished free to the dealers. Last month $5,000,000 revenue was derived from the luxury tax, but this is not regarded as the probable maximum.

In some cases investigation has shown that the law is not being complied with through ingnorance of its provisions. In others there have been deliberate evasion, and prosecutions in several score of cases are being initiated. The full penalty will be asked to the end that the effect be salutary. Inland Revenue officers, by visiting stores and making purchases, have detected many cases of evasion. A staff of thirty expert auditors, distributed over the different Inland Revenue divisions, has just been appointed to check up and see that the Treasury is getting the revenue it is entitled to.

Appeals Against Railway Decision

Ten appeals have been entered to the government against the award of the Railway Commission in the railway rates case. The hearing before the Cabinet commenced yesterday. The grounds upon which variation of the judgment is sought are practically the same, and one appeal for all is really adequate. It is anticipated that the cases will be consolidated so that the proceedings may be abbreviated as far as is possible. The most vigorous objections come from the west, though various organizations in the east are also protesting. The government has power to reverse or vary the finding of the commission, but it has never been done. The fact that [illegible] Minister of Railways, has already announced a change by modifying the award, and the further fact that the new tariffs are now in operation, create considerable doubt as to whether anything will be done till the new rates have had a trial.

Huge American Capital Here

That American capital is coming into Canada at the rate of two hundred millions a year is an opinion entertained in official circles in the light of information secured. The money is not being applied to industry alone, though much of it goes there, but as well to Canadian securities, general, provincial, municipal and railway. The fact that ninety dollars of United States money is the equivalent of one hundred of Canadian is a big factor in inducing the influx of investment.

According to a statement submitted to a recent gathering here, out of some $2[illegible],000,000 invested in the Canadian pulp and paper industry, now in process of great expansion, 50 per cent., or thereabouts, is American. Efforts are being made to induce British capital to become interested in this industry, but the great obstacle is not the unwilling attitude of the British investor, but the adversity of existing exchange conditions. A recent financial statement issued in New York placed at $[illegible] the amount of Canadian bonds in the United States in a variety of securities. This was exclusive of what is invested in Canadian war bonds.

INTER-PROVINCIAL INSURANCE CONFERENCE

At the conference of Provincial Superintendents of Insurance, to be held at Winnipeg next week, the following addresses will be given:—"The Work of the National Convention of Commissioners of Insurance (U.S.)," by a commissioner; "Regulation by License of Insurance Agents, Brokers and Adjusters," by V. Evan Gray; "Legislation Governing Solvency of Fraternal Societies," by Dr. F. [illegible]; "Hail Insurance," by W. M. Seller; "Uniform Statutory Conditions for Accident and Sickness Policies," by A. E. Fisher; "Model Fire Policy Act," by Charles Heath; "Farmers' Mutual Fire Insurance," by A. E. Kempton; "Reciprocal or Inter-insurance Exchanges," by Charles M. Howell; "Standard Conditions for Automobile Insurance Policies," by John P. [illegible]; "Taxation of Insurance Companies," by [illegible]; "Uniform Beneficiary Law for Life Contracts," by H. J. Sims; "Unlicensed Insurance," by A. E. Fisher; "Uniform Forms for Insurance Company Returns," by [illegible]. There will also be a discussion on "[illegible] of Provincial Insurance Companies for Inter-provincial Business."

BANK BRANCH NOTES

Five New Branches Announced This Week—Twenty-six in Month of August—Many New Buildings Planned

The following is a list of branches of Canadian banks which have been opened recently:—

Echo Bay, Ont.	Canadian Bank of Commerce
Toronto, College and Dovercourt	Bank of Toronto.
Dorenlee, Alta.	Imperial Bank of Canada
Toronto, Queen and Close Sts.	Royal Bank of Canada.
Canora, Sask.	Dominion Bank of Canada.

The Mikado, Sask., office of the Bank of Montreal, formerly a sub-agency to Verigin, will be established as a branch of the bank, giving daily service.

The Canadian Bank of Commerce has purchased the property at the south-east intersection of Norfolk and Kept Streets, Simcoe, Ont.

The erection of a new Bank of Nova Scotia Building at the corner of Pitt and Charlotte Streets, Sydney, N.S., has been authorized. The building is to cost $58,000.

Walter G. Lynch, late manager of the Canadian Bank of Commerce at Medicine Hat, Alta., has been transferred to Windsor, Ont., succeeding A. E. Taylor, who leaves for Toronto to become assistant general supervisor.

G. H. Stevens, manager of the Royal Bank of Canada, at New Westminster, B.C., has been promoted to the position of assistant manager of the head office of the bank at Montreal.

Twenty-Six Branches in August

Twenty-six branches were opened and three closed during the month of August. The following new branches have not already been mentioned in *The Monetary Times*:—St. Saveur, Que., Montreal; Montreal, Place Viger, Royal; Halifax, Royal; Bay Bulls, Newfoundland, Royal; Patricia, Alta., Royal; Stroud, Ont., Standard; Glencairn, Ont., Toronto; Honeywood, Ont., Toronto.

The following three branches were closed:—Fort William, Imperial; Lenore, Man., Nova Scotia; Alcomdale, Alta., Union.

The branches opened were distributed among the following banks:—Royal, 9; Toronto, 4; Sterling, 4; Montreal, [illegible]; Commerce, 2, Hamilton, Home, Imperial and Standard, 1 each.

New Buildings Planned

Royal Bank of Canada has let a contract for erection of a building at Bridgewater, N.S., costing $20,000.

General contract for erection of branch bank for Royal Bank of Canada at Erskine, Alta., has been let.

Erection of branch bank at Morinville, Alta., is contemplated by Royal Bank of Canada.

General contract for erection of a $250,000 bank for Merchants Bank of Canada at Regina, Sask., has been let.

Bank of Hamilton has let contract for erection of bank at Tuxford, Sask. Estimated cost, $15,000.

A. D. Leitch, assistant manager at the main branch of the Standard Bank at Vancouver, B.C., has been appointed manager of the main branch of the bank at Regina. Mr. Leitch is succeeded by J. C. Hutchison, who has been accountant at the Vancouver branch.

L. Varley has been appointed acting manager of the Bank of Montreal, at Girvin, Sask.; L. S. Shatner appointed manager of the Bank of Montreal at Kimberley, B.C.; and A. H. Barker appointed acting manager of the Bank of Montreal at Terrace, B.C.

C. H. St. John, manager of the Standard Bank at Lomond, Alta., has been appointed manager of the south side branch at Lethbridge, succeeding G. F. Bletcher, who has been manager of the branch at Lethbridge.

CANADIAN BUSINESS FAILURES

The number of failures in the Dominion as reported by R. G. Dun and Co. during the week ended September 24, 1920, in provinces, as compared with those of previous weeks, and corresponding weeks of last year, are as follows:—

THE

TORONTO GENERAL TRUSTS CORPORATION

Established in 1882, was the first trust company in Canada. It is absolutely free from affiliation with other financial concerns—a trust company confining itself to the business of executor, trustee or agent and eliminating from its transactions everything of a speculative character. The total value of estates, etc., under its administration now exceeds One Hundred Million Dollars, one half of which has accumulated during the last seven years. All investments made by this Corporation are restricted to "Trustee Securities" as authorized by law. The Toronto General Trusts Corporation solicits the appointment of Executor and Trustee of your Will, offering these advantages combined with years of experience in estate management.

Protectionist Sentiment Not Lacking in West

Evidence in British Columbia Favours Tariff—Lumber and Fruit Associations Oppose Open Door—United Farmers Not Free Traders at Coast—Vancouver Island Believes Tariff Essential to its Prosperity

JUDGING by evidence given during the past ten days before the Tariff Commission in British Columbia, that province is not at all in sympathy with tariff reduction. The commission sat in Victoria on September 22nd and 23rd, in Vancouver on the 24th and 25th, and in Vernon on the 27th. September 30th and October 1st are to be spent in Nelson, the 4th and 5th in Calgary, and the 6th and 7th in Edmonton. The strongest free trade arguments will, it is expected, be presented in the two last-mentioned cities, and in Saskatchewan and Manitoba in the following week.

Victoria a Centre of Industry

Vancouver Island, as represented at Victoria, is strongly in favor of the present tariff. Its reasons are the present prosperity of the island, the industries of which represent a capital investment of $500,000,000, with annual production of $200,000,000, an annual payroll of $25,600,000, and 21,000 employees. Competition from the Orient was one of the main grounds for objecting to any tariff reduction.

E. S. Woodward, representing the local Trades and Labor Council, was practically the only opponent. He urged the removal of the tariff and the substitution of a land tax. The speaker said any tariff bore heaviest on those least able to bear it. He said a family man with twelve children was penalized. He had to pay twelve times as much toward the tariff as the man with one child. Woodward, however, explained that his views were not those of the Trades and Labor Council. He was speaking as an individual. Queries disclosed the fact that labor unions in Vancouver Island support this protective tariff principle.

A. C. Flumerfelt appeared as a citizen purely, he said. He thought it his patriotic duty to testify in favor of the protective tariff principle. Through a quarter of a century he had watched the development of the industries on the coast. A constant struggle with the ever present menace of Yankee competition, and the cheap labor products of the Orient. He had no interest in protection other than as a citizen. He had no factory products to protect, but he knew free trade or a mere revenue tariff spelled disaster to all, manufacturer and labor alike. He could not understand how farmers of the prairies could justify their free trade heresies. Protected industries, he asserted, supply freight to keep transportation routes busy when farm products are not being shipped. If it were not so, the cost of freight on farm products would be prohibitive. A farm of 320 acres, he said, supplied annual transportation revenue in freight and passenger rates of $750 in Canada. He added that farmers' cattle bring a better price in the Canadian west than the western Yankee Granger receives.

J. C. Pendray, for the paint and oil industries, submitted figures showing that these products sold cheaper in Canada than similar products of Yankee factories [illegible] in the United States. W. F. H. Thompson said it would be dangerous for Canada to have free trade unless it was reciprocal with the United States, and even then he [illegible] believe Canadian capital would invest in factories [illegible] its exports into the United States [illegible] ment in that direction might be [illegible] by the United States government.

Protection for Lumber Urged

The lumber industry presented a strong case for protection in Vancouver on September 24. J. McCormack, [illegible] president of the British Columbia Lumber and Shingle Manufacturers' Association, [illegible] that the [illegible] of the industry, having water transportation, could [illegible] of the world [illegible] claimed that protection was absolutely essential on th ground that only 30 per cent. of the standing timber coul be sold in foreign markets because the demand hitherto ha been chiefly for what is known as "merchantable timber,' capable of being worked over by foreign mills for the needs of their respective markets. If the foreign demand were t increase beyond the 30 per cent. of the present productio it could not be met unless the domestic demand also increased to take up the 70 per cent. surplus unsalable at present in foreign markets. Of that surplus 55 per cent. was common lumber not considered good enough for the foreig market. It was not feasible to send the finished kiln-drie product to Australia or other markets, because in the holds of ships it would absorb moisture and break up. To run th business economically there must be a market for all grades produced.

The advisability of meeting the Australian government more than halfway in securing a preferential tariff arrangement by which their products would have an advantage over foreign goods was strongly advised. Twenty-six thousan of the 101,000 wage-earners included in the British Columbia Workmen's Compensation Act gain their livelihood directly from the wood manufacturing industries of British Columbia, earning more than $31,000,000, or more than a quarter of the whole. Of this amount $1,200,000 goes to workers in box factories, sash and door factories, planing mills and wood working industries. The balance was divided as follows in 1919 among the workers: Logging, $12,635,910; sawmilling, $9,764,419; shingle mills, $2,522,730; logging railways, $1,722,620, and paper mills, $3,163,335. This total would be increased 10 per cent. if clerical staff, travellers and others were included. Of the nine hundred billion feet of standing timber in Canada Mr. McCormack estimated 40 per cent. to be in British Columbia. Of the four and a half billion feet sawmill cut last year, 36 per cent. was produced by British Columbia.

Seventy per cent. of the product entering into ordinary construction was not protected. With this advantage United States mills had sent into the four western provinces an amount increasing from one hundred and fourteen million feet in 1910 to three hundred million feet in 1912. In answer to Sir Henry Drayton he admitted that last year this had dwindled down to twenty-seven million feet, but he feared that what happened in the three years mentioned might occur again if a period of depression took place in the United States markets.

Farmers Suggest Permanent Board

The United Farmers of British Columbia appeared before the commission, their views being in substance as follows:—

(1) That free trade and protection offer an interminable case for comparison on both sides. (2) That it is impossible for anyone who takes the trouble to study both sides to [illegible] a good case for either. (3) That the injection of the tariff into the political field is a lamentable but apparently necessary evil, owing to the facility it offers for [illegible] the appeal to self interest. (4) That [illegible] of the privileges accorded by either which, [illegible] principles, causes most controversy. (5) That in countries which have a large surplus of food products for export the producer or farmer is naturally [illegible] all his surplus products. (6) That in [illegible] a large quantity of food products, [illegible] produced in the importing country, the farmer is naturally a protectionist. (7) That, in [illegible] between such countries as Great

Britain and Canada on the general principle is possible or profitable. (8) That whatever changes are made in the tariff affect the revenue of the country, and that any reduction in the revenue must be made up from other sources.

The United Farmers are in sympathy with and fully endorse the resolution as passed by the Fruit Growers' Executive on August 17, which is as follows:—

"That it is the opinion of this executive that, as a protection against the resumption of dumping of foreign fruits on the Canadian market at less than cost of production, which we consider as certain to recur, the retention of a sufficient duty on fruit be suggested at the coming hearing before the Tariff Commission, and that Messrs. Laidman and Winslow be requested to represent the fruit-growers before the commission.

"That among the fruit growers, the Okanagan producers depend almost entirely on apples as the major portion of their revenue.

"Recognizing the foregoing facts, and taking into account the tariff already imposed upon certain agricultural products, also recognizing that the tariff affects the whole country, and is a matter of continual controversy and prejudice to the detriment of the people as a whole;

"Also that it is inconsistent to demand protection in the particular commodity in which a community or association is interested in producing, and free trade in machinery, etc., necessary to such production;

"Therefore, the United Farmers of British Columbia recommend that a Tariff Board be appointed similar to the Railway Board, and that the farmers be represented thereon.

"With a view to meeting any possible reduction in revenue which may arise from the revision of the tariff, the United Farmers of British Columbia further recommend that the Tariff Commission consider the possibility of raising revenue from the protected manufacturing industries by imposing on such industries a pro rata tax on their net profits, equal to the amount of protection afforded, as the United Farmers of British Columbia consider that in granting protection to any industries the people of Canada 'ipso facto' become partners in that industry."

Fruit Growers Want Protection

The attitude of the British Columbia Fruit Growers' Association was outlined at Vernon by R. M. Winslow, formerly provincial horticulturist, and W. F. Laidman, a fruit grower. The growers want the western Canada market maintained as their special preserve in order that with the constant encouragement of a large market at stable prices the rapidly developing industry may not be discouraged as it would be if the lower grade apples of Oregon and Washington could be sold in years of over-production at below cost, as happened from 1910 to 1914, because over-production in the northwestern states demoralized their markets, and brought about bankruptcy conditions.

United States apples, stone fruits and berries were dumped on the Canadian market, and the prairies, not educated to see the difference, would not pay more for No. 1 British Columbia apples than the "C" grade of Washington growers. The British Columbia acreage and production were reduced at a time when their logical market was expanding. When the Dominion government raised the duty on apples early in 1916 from 13 1-3 cents to 30 cents a box production began to mount; since then the huge acreage in the northwestern states had been reduced to less than one third, the farmers turning mainly to the growing of alfalfa, dairying and mixed farming.

Æmilius Jarvis and Co., investment bankers and stock brokers, Toronto, has been organized into a private company, to be known as Æmilius Jarvis and Co., Ltd., incorporated under the Ontario statutes. The officers of the new corporation, comprised of men who have been associated with the former firm for some time, are as follows:—President, Æmilius Jarvis; vice-president, Æmilius Jarvis, Jr.; general manager, H. G. Pepall; secretary-treasurer, D. F. M. S[illegible]

DOMINION GOVERNMENT SAVINGS BANKS

Deposits in the Dominion Government Savings Banks for the month of August, 1920, amounted to $145,393, as against $182,622 in the previous month. Withdrawals were $198,885, being some $3,000 lower than in July. The following are the figures:—

Burning the Nation's Wealth!

Every hour of the day and night THE TORCH OF CARELESSNESS brings destruction to somebody's property in Ontario.

The Work of Fire Prevention should appeal to every Banker, Merchant, and Manufacturer who wishes to preserve the continuity and non-interference of his business.

The average fire loss for the last three years in Ontario is over One Million Dollars a Month. AS A CONTRIBUTOR to the payment of this enormous sum, have you tried to STOP IT?

Special effort should be made during FIRE PREVENTION WEEK, October 9, to remove all Fire Hazards and take every possible precaution to Prevent Fire.

CLEAN UP

accumulations of waste material, rubbish, boxes, and conditions that create disorder.

The high cost of fires accelerates the high cost of living.

Fire Prevention is inexpensive.

THE COST OF FIRE INSURANCE

Some Defects in the Business Which are Inequitable to the Honest Insurer—Method of Paying Agents Increases Risks

By "LAYMAN"

IN Canada, in 1919, the fire insurance premiums paid by the insured were $39,914,398. In the same year the insured received $16,642,172 in payments for losses. They paid $23,272,226 in premiums more than they received in return. But that was the result in a year more than ordinarily favorable to the companies. Let us take a wider view, covering fifty years.

In the years 1869 to 1919, inclusive, the total of premiums paid to the fire insurance companies by the insured was the large sum of $322,669,245, and the total payments to the insured for fire losses were $190,034,775. The total excess of premiums over payments for losses was $132,634,470, making an average of $2,652,689 per annum.

In the forty-one years, 1878-1918, inclusive, 58.56 per cent. of the fire premiums were paid for losses. Let the above-stated facts serve for my text, and also for a reason why so many honest persons whose property is insured are inquiring into the cost of fire insurance. They want to know just what they are paying for, and why. They realize that their money goes to pay for very many losses caused by criminal insured persons and for many more losses caused by more or less criminal carelessness.

My own experience and observation in city and country, residing for terms of years each in St. John, Ottawa, Moncton and Charlottetown, greatly impressed upon me the gravity of the moral risk in fire insurance and the tremendous importance of carefulness and watchfulness in preventing fires in the home, the store and the factory. Once in my younger years, while living in a prosperous farming section of New Brunswick, where I knew almost everybody, I took on an agency for a sound fire insurance company, and during three years secured a goodly number of risks. In one small community of some thirty or forty farmers, all of approximately equal possessions and very thrifty and careful, I met a "prospect." He listened to my story of the great dangers from fire and lightning and then asked me a few questions. Did I think that he and his neighbors ought to insure their farm buildings, paying an average of about $10 each yearly? Yes. It followed that they ought to have been insured long ago—from the beginning, in fact. Well, yes. All these farms were settled over eighty years ago. Would I kindly figure up just what they would have paid had all been insured? Somewhat reluctantly I made the calculation. "A big sum to pay," he said, and added, "I am an old man now, but speaking from what I personally know and what I learned from my father, there has not been a house or a barn burned in this settlement in eighty years!" Such was the fact.

Honesty Was Not Rewarded

I gave up my fire insurance agency. The general agent wrote me, and later came to see me, urging me to continue. "Why," said he, "you have made a record. In all your risks we have not had a loss in three years." I told him why that was. I insured only careful and honest people, eliminating the moral risk. How great are the risks from carelessness and dishonesty in fire insurance we shall never know, but they are enormous. Of course, no company willingly pays such losses, but there is often the strongest ground for suspicion, coupled with the greatest difficulty in obtaining proof of the secret crime.

My grandfather, my father, myself, or any one of my grandfather's numerous tribe, so far as I have been able to learn, never lost a building by fire, although I have carried fire insurance for fifty years past. Many of them, like myself, have long been paying for fire insurance. The courteous reader will, I trust, pardon these personal and somewhat egotistical references, but they seem necessary in order to show why many persons have reached the conclusion that under the present system, the honest careful insured, especially in cases where their properties are isolated, do not get value for the money they pay in premiums. I am fully satisfied that they do not get half their money back, although something should be allowed for the greater sense of security they enjoy.

From the standpoint of the insured, the business of fire insurance as now carried on is needlessly expensive. The competition of scores of companies and the eagerness to secure new business leads to the insuring and continuance of many risks that should not be written. The payment of agents and solicitors by commission on the business secured ought to be abolished. This applies to both fire and life insurance. While the great majority of such agents and employees may be admitted to be honest, there are too many exceptions where, under temptation, one agent or company will take a very doubtful risk refused by another, or where a soliciting agent acts in collusion with a dishonest applicant in order to pocket a commission. For the losses incurred in the manifold transactions of this sort honest insured persons have to pay to the tune of millions of dollars.

There has been a tremendous propaganda carried on by scores of insurance companies and by an army of their agents in personal canvass, by the dissemination of advertising literature in leaflets and through the serial press to induce everybody to insure their property and their lives, with the result that at the close of the year 1919 property was covered against loss from fire to the amount of $4,523,514,841 and human lives in Canada were insured to the extent of $2,187,833,396. The propaganda to which I refer which has produced such astounding results has been from the first almost entirely one-sided, simply because most of the insurance journals decline to publish anything unfavorable in regard to the subject that is written from the viewpoint of the insured. Most of the leading daily newspapers are in the same box, as, I presume, because the insurance companies are very liberal advertisers and patrons.

Surely the time has come to terminate such narrowness and let both sides be heard. I believe that fair public discussion, pro and con, by both insurers and insured would be found to be healthful and profitable to all concerned, and that it is the one thing most required to bring about much-needed reforms. I write this letter, fully cognizant of my own inability to do justice to the subject, and in the hope that among the millions of insured persons some others much better informed and more capable may follow it up.

MOTOR UNION INSURANCE COMPANY

A very good year was experienced in 1919 by the Motor Union Insurance Co. At the annual meeting held in London, Eng., on July 14, the chairman, C. H. Dodd, pointed out that in this, the first post-war year, premiums had risen from £134,847 in 1918 to £423,346 in 1919. That was a large increase, he said, but the account was in a very satisfactory condition, and from it they had been able to transfer £31,414 to the credit of the profit and loss. The personal accident and employers' liability accounts showed figures that were generally satisfactory. With regard to the general insurance account, which represented, chiefly, the motor insurances in which the company specialised, and which had been the backbone of the business since its commencement, that account followed the course which had been fully expected. Premiums have risen from £227,878 for 1918 to £468,833 for 1919. That very large increase was due to the fact that motoring had become general again directly the armistice was signed, but, unfortunately, though not unexpectedly, instead of a profit to transfer to the profit and loss account there was a loss of £49,178. That loss had been fully anticipated by the directors, because it was quite obvious that former premiums were absolutely inadequate to meet the increased cost of repairs and the general additional expenses of post war conditions. Since the 1st January the premiums had been raised by 20 per cent., and in April they were raised by a further 10 per cent., and on this latter basis it was hoped that the accounts, next year, would show a fair and reasonable profit on that business.

THE FINANCING OF IRRIGATION SCHEMES

Alberta Government has Pursued Safe Course in Refusing Provincial Guarantee—Lands are Privately Owned, and Owners Would Benefit

By Angus Lyell

IRRIGATION is becoming quite a live issue in Alberta, especially in the southern part of the province. This is due to the essential need of irrigation in several large districts and the difficulty of financing rural projects without government guarantee. Damage is often caused by violent windstorms, in addition to lack of moisture, and in some parts there is now a new slogan: "irrigate or emigrate."

At the last session of the legislature, measures were passed which would enable the residents of the dry districts to form local irrigation boards to plan irrigation schemes. One such scheme—the Lethbridge Northern District—was authorized, and the legislature agreed to help the venture by providing a sum equal to two years' interest on the bonds sold. This was done to help finance the project during the period of construction. But the management now find that it will be difficult, if not impossible, to dispose of the debentures except at a heavy discount; and Premier Stewart adheres to his decision that the province cannot guarantee the issue. Hence, the agitation which is making the question of irrigation a more or less live issue.

Private Irrigation Works

That there is need for irrigation in several districts cannot be questioned. Crop failures for three years in succession, due to lack of moisture, are ample proof. And that irrigation is feasible in certain areas has been proven. Over 600,000 acres are being irrigated by the Canadian Pacific Railway Company between Calgary and Medicine Hat, while north-east of Lethbridge the Canada Land and Irrigation Company has works in course of construction which will irrigate about 200,000 acres. Then there are several small projects having a total area of about 150,000 acres. If the schemes contemplated materialize, there should soon be an irrigable area of over 1,500,000 acres in southern Alberta, as estimated by George G. Anderson, an irrigation engineer, in an address given recently at the fourteenth annual convention of the Western Canada Irrigation Association held in Lethbridge.

Concerns such as the Canadian Pacific Railway Company and the Canada Land and Irrigation Company, owning large tracts of land and having capital available, can proceed with any schemes which appear feasible; because by irrigating the land they increase its value, in some cases from twenty or thirty to one hundred and fifty dollars an acre. Such development is a profitable enterprise. It is part of the business of these companies.

Financing in Settled Districts

But it is different in the case of settled districts, where there are a number of small landowners. The need of irrigation there is greater, but the problem is how can it be financed? The solution of the Alberta government is the formation of a number of [illegible] cooperative companies by the residents of the [illegible] districts. In other words, the legislature tells the farmers to find [illegible] plan their own irrigation works, and do their own [illegible] subject to certain restrictions and some [illegible] during the construction period to help pay the interest. The Lethbridge Northern District, which is well managed, has proceeded along these lines and is now almost [illegible] its ability to market its debentures [illegible].

That there should be a demand on the legislature to guarantee the bonds is but natural. But is Premier Stewart [illegible]? If the legislature guarantees the bonds of one irrigation district it will have to do the [illegible] of all others which may be formed. [illegible] districts, the average rainfall is but [illegible] and the area where irrigation may be claimed is vast. The whole project might, and likely would, be beyond the resources of the province.

Land Owners Will Benefit

It is all very well to tell us that had there been irrigation in the Lethbridge Northern District last year, the yield would have exceeded seven million dollars, as compared to practically nothing, and that the value of the land would have increased from about thirty to one hundred and fifty dollars an acre. Who would have benefitted most by this? Why, the owners of the land—the farmers themselves. If title to the land was vested in the province, then the legislature might fairly and profitably embark on approved irrigation schemes, because the people as a whole would benefit thereby. But with private ownership in land the case is entirely different; and, I think, Premier Stewart is quite right in the stand he has taken. It would just be as equitable for a man to open a law office and to expend what capital he had while waiting for a practice and then, when he found he could not develop a paying clientele, for him to make a demand on the legislature for compensation, as for the farmers in certain districts to demand the province to guarantee their irrigation bonds. If there is responsibility for the settling of the land, it rests on the Dominion government. Experts at the time advised against settlement in certain dry areas.

The important thing at present is to test the Lethbridge Northern District project. If this can be developed successfully, it will be much easier to handle others. Capital is required. How best can this be obtained? Much attention was given at the recent convention in Lethbridge of the Western Canada Irrigation Association to the feasibility of irrigation in certain areas, to soil drifting and its prevention, to the history and progress of irrigation in the province, and to the estimated cost of, and results to be obtained from the Lethbridge Northern District scheme; but on the matter of financing it was pretty much a case of holding up one's hands unless the provincial or Dominion government came to the rescue. I think it would have been useful to have had one or two financial experts, practical men and not university lecturers, give their views on how such undertakings could best be financed without government aid. We are not yet mere communal children.

GOVERNMENT CURRENCY

Dominion notes outstanding at August 31, 1920, amounted to $29[illegible],086,026, as compared with $293,541,399 at the end of the previous month. Gold held for the redemption of these notes totalled $9[illegible],183,75[illegible], as compared with $95,510,-[illegible] at the end of July. The complete statement of all government currency, as at the end of August last, follows:—

Cost of Banking Operations in Canada

Like the Merchant, Bank Must Have Stock in Trade—Outstanding Checks, Which is a Loan to Public, Offsets Circulation — Other Elements in Banking Costs

By A. B. BARKER

A RECENT article on rural credit associations in Manitoba, in the *Grain Growers' Guide*, stated, very temperately, the farmers' arguments for lower than market rates on loans to them through these associations. These are, shortly, that the loans are safe, and that the margin between the 3 per cent. paid by the banks for deposits, and the rate of 6 per cent. on loans asked by the farmers, should be sufficient to give a fair profit. The banks' side of the matter was ignored entirely, and no credit was given them for the great services rendered through the network of branches, all over the western provinces, and the fact that many of these branches do not return a profit over expenses, for the first couple of years. The desire for lower rates is natural, but in pressing for the reduction, it is only fair to look at the other side of the argument.

Most of the misunderstanding comes from a lack of appreciation of the functions of a bank. True, a bank charter gives privileges, but it can hardly be denied that these privileges are fully earned, through the services rendered to the community.

A Loan Without Interest

In reality, a bank is a merchant in credit. It does not manufacture it, except to the extent of its circulation up to the amount of its paid up capital, and this, of course, is a loan from the public to the banks, the only direct expense being the cost of the notes. It is not generally understood, however, that the banks provide a standing loan to the public, through the cheques on other banks, held by them over night. In December, the notes in circulation were, roughly, $232,000,000. Against this the deposit in the gold reserve was $125,000,000, leaving $117,000,000, which may be considered free circulation. Against this liability a reserve must be carried of about 25 per cent., so that the actual free circulation is about $95,000,000. On the same date the amount of cheques on other banks, according to the government return, was $145,000,000. This is as much a loan by the banks, as the circulation is a loan by the public, and is more than an offset to the circulation.

As a merchant, the bank buys credit from its depositors, and sells it to its borrowers. Like other merchants, it must carry on its shelves stock in trade, and while this stock is on the shelves it returns no profit, but it must be held in order to do business. In the case of the bank this stock in trade is called the cash reserve. In some countries, notably the United States, this cash reserve must equal [illegible] to [illegible] per cent. of the deposits, according to the locality, by law. This is the minimum, and when it gets down to this figure the bankers get nervous. In Canada no legal reserve is required, but an adequate amount of cash must be held none the less. In the December return already referred to, the current liabilities of the Canadian banks amounted to:—

Due to Dominion government	$ 2[illegible]4,[illegible]00,000
Due to provincial government	19,[illegible]
Due to public on demand	70[illegible],[illegible]00,000
Due to public after notice	1,1[illegible],[illegible]00,000
Due to public abroad	27[illegible],[illegible]00,000
Due to banks in Great Britain	[illegible]
Due to banks elsewhere	[illegible],900,000
Bills payable	6,[illegible]00,000
Circulation	2[illegible]2,[illegible]00,000
	$2,6[illegible]

The deposits payable on notice are, in practice, payable on demand, so that all these liabilities may be considered payable on demand.

Quick Assets Over Fifty Per Cent.

The total assets of the banks were $2,967,000,000, but, the immediately available assets, the stock in trade, were as follows:—

Specie	$ 80,000,000	
Dominion notes	172,900,000	
Circulation redemption fund	5,900,000	
Gold reserve	125,800,000	
Notes, other banks	36,100,000	
Cheques, other banks	145,500,000	
Balance due other banks	6,500,000	
Balance due banks in Great Britain	18,300,000	
Balance due elsewhere	60,800,000	
		$ 651,800,000
Dominion government securities	$149,800,000	
Municipal	225,200,000	
Victory bonds	55,000,000	
Call loans, Canada	125,900,000	
Call loans elsewhere	172,200,000	
		758,100,000
		$1,409,900,000

Of this total of quick assets $651,800,000, or 25 per cent. of the demand liabilities, is in cash, practically, and yields no return. $758,100,000, or 29 per cent. of the demand liabilities, is in securities, or in loans on call, which as a rule do not yield the same return, as if invested in business paper with a longer currency. The necessity of keeping this stock on the shelves, as it were, materially cuts down the percentage of deposits which a bank may safely use in loans, so that in estimating the returns obtainable by a bank from the deposits full allowance must be made for this cash reserve.

Turn-Over Must Be Quick

The analogy between the bank and the merchant may be carried farther. If a merchant is to do business successfully, it is essential that he keep his stock moving. The quicker his turnover the greater his profit, and the larger number of customers he can serve. If he sells to slow-paying customers his turnover is reduced to that extent, and he cannot serve as many customers, for the reason that he will be unable to purchase goods. The bank is in exactly the same position. It must have a quick turnover in order to take care of its [illegible], and provide for its customers' requirements. If its resources become tied up in long-winded loans its customers suffer, and to the extent of its tie-ups its business is [illegible]. These may be absolutely safe, but, by [illegible] their [illegible], the bank's turnover decreases, and to the extent of these [illegible] the bank must refuse new business from [illegible] its supplies of credit. It must keep its resources in such shape that any demands for repayment of [illegible] be met on demand.

In considering applications for loans, therefore, something more than safety is essential, and in fixing the rates [illegible] must [illegible] account, whether the repayment of the loan is to be at a near or distant date.

Corporations [illegible] fixed forms of security are [illegible] way. Their obligations are

strictly on time, with definite dates of maturity, and their loans are made accordingly. When these companies accept deposits, the funds so obtained are not suitable for mortgage loans, but are used chiefly in loans on bonds, and securities, which can be quickly realized on in case of need.

WORKMEN'S COMPENSATION IN BRITISH COLUMBIA

Board Paid Back $95.21 For Each $100 Collected—Surplus is Now $1,233,111

IN its report covering operations in 1919, the British Columbia Workmen's Compensation Board says:—

"Over 500 new names were added to the list of employers during 1919. A marked increase in the industrial activity of the province is shown by the fact that, although the rates and assessments were less than in either of the preceding years, the amount collected by the board was 18 per cent. greater than during the second year. The amount paid on account of claims was also proportionately greater.

"Notwithstanding the increased volume of business, the percentage of expense charged to employers was only 4.781 per cent. of the amount collected from them, being slightly less than the ratio of expense during either of the previous years. Of every $100 collected from the employer, $95.21 goes directly to the workmen or their dependents without any expense whatever to them. This is only possible by reason of the act providing for the administration of the accident fund by a board appointed for that purpose and to the exclusion of all intermediaries who might otherwise desire to make a profit out of the misery and distress of injured workmen.

"It was again not necessary to charge the full basic rate of assessment in any of the classes, and in no class was a higher rate charged during the past year than one-half of the basic rate.

"In a considerable number of classes it was found sufficient to collect the basic rate on only one-quarter of each employer's payroll. Among the industries from which this low rate was collected may be mentioned all work of municipalities, machine shops, foundries and iron working generally, shipbuilding, all work of general construction, fishing and canning, and the manufacture of explosives.

Compensation to Government Employees

"By reason of legislation passed in 1918 provision was made for the payment of compensation to men injured in the various departments of Dominion government work. Three classes were created during 1919, as follows: Class 17—Retail deliveries. Class 18—The Great Northern Railway Co. and its subsidiary companies were transferred from Class 8 and now constitute this class. Class 19—Dominion government employees.

"The effect of class division is that all industries in that particular class carry only the losses that occur in that class. If the accidents are reduced in number and severity in a class, there is automatically a lessening on the drain on the funds in that particular class. The fewer accidents there are in a class the lower the cost to the employers therein.

"After three years' operation of the act the reserves amount to $1,233,111.11. This amount includes an item of $15,000 per year (now amounting to $45,000) which has been set aside as a catastrophe reserve to protect against a possible catastrophe that may occur and which may not be attributable to or be a proper charge against any single class of industry.

"The amount of the whole reserve may be expected to [illegible] yearly until such time as the expiration of pensions occur as frequently as pensions are awarded. The investments [illegible] as long term bonds as are available for purchase. The funds of the reserve have to date been invested at a rate to yield an average of 5.8[illegible] per cent.

"It is estimated that during the year 110,000 workmen were covered, with a payroll of $130,000,000.

Condition of Funds

"The condition of the several class funds as at December 31st, 1919, covering the three years of operation in which the act has been in force, shows that there are altogether 19 classes contributing to the various funds. The total amount received from employers for the three years was $3,393,723, of which there was paid back to the various class funds $11,431. The amount paid out was $1,740,919, and the reserve, being the present value of pensions, amounted to $1,481,989, leaving a credit balance to the various class funds of $160,283.

"Of these classes the lumbering and logging industries contributed the most, receiving $919,[illegible]3, paying out $612,082, and placing to reserve $377,623. Building and construction, including shipbuilding, came second. $479,692 was received from employers, $256,518 was paid out and $141,954 was placed to reserve. Coal mining is in third place, with $468,431 received from employers, $205,482 paid out in claims and $274,519 placed to reserve for pensions account.

"The operations for the year ending December 31st, 1919, show that, for the 19 classes of industry under which the Workmen's Compensation is grouped, balance as at the end of the previous year was $206,716. The amount received from employers for 1919 was $1,356,643. The compensation paid out was $769,012. The amount transferred to reserve account was $634,065, leaving a balance to the various class funds of $160,283. The lumber industry still lead the list with $439,557 received from employers, paying out in compensation $277,945 and transferring to reserve $204,230. Building and construction, including shipbuilding, continued in second place with $213,434 received from employers, paying out $126,093 for compensation and transferring to reserve account $62,838. The Canadian Pacific Railway and Consolidated Mining and Smelting Co. group surplanted the coal mining group for third place with $142,553 received from employers, $50,797 paid out in compensation and $140,633 transferred to reserve account."

Receipts and Expenditures

A summary of the financial statement is as follows:—

Receipts:—		
Cash on hand, Jan. 1	$	230,574
Collections in 1919		1,690,300
Total	$	1,920,874
Disbursements:—		
Current compensation	$	689,924
Refunds		8,381
Reserve (pensions and payments)		240,774
Reserve (value of pensions)		461,294
Expense		70,705
Balance to credit		160,685
Total	$	1,920,874

GRANBY TOWN JUDGMENT

In giving judgment on August 24th in favor of the Esquimalt and Nanaimo Railway Co. of Vancouver Island in a settlers' rights suit, entitled Esquimalt and Nanaimo Railway vs. Wilson and [illegible] Justice Gregory finds that the Granby Mining Co. loses its title to the property on which it built the town of Cassidy a few years ago. The Granby Co. has made improvements there of close to $1,500,000. The case will be carried finally to the Privy Council in London. The Granby Co. is carrying on mining operations at Cassidy, which is a prosperous and growing mining centre. Work will continue, it is understood, until the disposal of the case by the Privy Council.

DOMINION IRON AND STEEL ACTION

Sixty-five Dollars per Ton Set by Government for Steel Rails not Considered Sufficient by Company

THREE million dollars is involved in the claim of the Dominion Iron and Steel Co. against the Dominion government, now being considered by the Exchequer Court. The case began before this court on September 7, and this week evidence is being taken in Sydney. The action is taken in connection with steel railways which the company had contracted to manufacture for the government.

The point at issue was the price the company should be paid for 116,000 tons of rails rolled and delivered subsequent to April, 1918, by the steel company, the rails being furnished in connection with an order in council passed by the government under the authority of the War Measures Act, enjoining the company to supply at least one hundred thousand of tons of order that railways might be put in a position to operate to full capacity during the period of the war. The cause of difference as to value of the rails, it developed at the hearing, was that the government contract was issued the Dominion Iron and Steel Co. had in hand large orders from the Imperial Munitions Board for shell steel and the manufacture of this had to be practically discontinued with the result that 99,000 tons were not delivered. On behalf of the company it was stated that for this steel the company would have received about eighty dollars per ton, but cost of production would have exceeded the cost of making rails by from 3 to 5 dollars per ton. The company suggested in view of these facts that it should receive 75 dollars per ton for the rails. The war trade board took the view that $65 would be a proper price, when it was offered by Hon. J. D. Reid, Minister of Railways, and in accordance with the terms of the original order in council reference was made to the exchequer court. The amount actually in dispute therefor is $10 per ton on 116,000 tons at $1,160,000. Of nearly eight million claimed by the company for the rails, some $5,000,000 has already been paid by the government.

The foregoing facts were brought out in the course of the examination of controller Cameron, of the Dominion Iron and Steel Co., by Mr. Wallace Nesbitt, K.C., chief counsel for the company. In reply to a question by the court, Mr. Nesbitt stated that it was the desire of the company to be placed in as a good a position as it would have been had it been permitted to proceed with the contracts with the Imperial Munitions Board and other contracts of the same kind which would have been undertaken. Letters were produced to show that the Imperial Munitions Board were anxious to have its contracts completed and to place others, and that it had been suggested that an upward revision of prices would be made for additional orders.

JUDGMENT AGAINST ROYAL BANK

A judgment of great importance to outside companies licensed to do business in British Columbia was rendered by Justice Murphy on September 14 in the case of the Royal Bank vs. the National Fire Insurance Co. Under a judgment against a man named Stewart, a shareholder in the defendant company, the sheriff on behalf of the bank seized Stewart's stock. The company is not registered and has no share register in British Columbia. The bank was suing the company to compel registration of the shares in the bank's name to make effective the seizure.

The action is dismissed, his lordship holding that as the process in question could legally be carried out without the knowledge of the shareholder every step in the process must be carried out with the utmost technical regard for the law. His lordship found that there had been a flaw in the service and on that account gave judgment against the plaintiff.

RAILROAD RATES IN NEWFOUNDLAND

The Newfoundland Railway Commission has made its first recommendations in the reconstructive program of the operation of the railway, which includes the following:—

Instructions to conductors to refuse to accept passes from anyone in future; M.P.'s, members of legislative council, judges, magistrates, merchants, ex-M.P.'s, and clergymen, all without distinction, will have to pay railroad travelling fares, and in the future, it is proposed to construct a coastal terminus for the south coast traffic at Argentina. The terminus will also be used as a winter shipping port for the Anglo-Newfoundland Development Co., and Alexander Bay Pulp Co. The company will ship 2,000 carloads of paper from December to May that hitherto has been stored each winter at Grand Falls, thus tying up a large amount of money as well as causing congestion at Grand Falls, and the railroad commission will increase the railroad earnings to $150,000 by this arrangement, and thus aid in making the road self-supporting.

The work of building the three miles of railroad will start immediately, and the terminal pier or breast-work will be ready for shipping by January.

The railroad commission has recommended an increase in passenger and freight rates and it is probable an increase of one cent per mile will be added to first-class railway fares. Six locomotives of the most modern type have been ordered by the commission and are due in this country in January. Material for fifty flat and fifty box cars is being provided, and the whole lot will be ready by next spring.

INSURANCE IN MANITOBA

The superintendent of insurance for the province of Manitoba has issued his report covering the business transaction of the year 1919. A summary of the premiums and losses under the various classes of business in the province follows:—

REGISTERED COMPANIES.

	Premiums.	Losses.
Automobile	$ 294,001	$ 118,955
Burglary	14,200	7,433
Employers' Liability	402,045	152,298
Fire	3,483,496	951,847
Guarantee	175,007	64,474
Hail	305,820	85,413

News of Industrial Development in Canada

Calgary Flour Mills Now Running at Full Capacity as Wheat is Coming In—Laurentide Timber Supply Has Been Greatly Increased—Ontario Government Will Not Grant Original Proposals of Backus Interests—Unique Industrial Development Scheme by Twin Cities

ACCORDING to advices from Calgary, Alta., several of the larger flour mills there are now running at full capacity. The wheat has just begun to come into the mills and for the next few months they will be kept running at full blast. This applies to most of the milling concerns in the city, while the majority of the mills in the country towns of the province have already been operating for some days. One large mill in the south country, the Macleod Flouring Mill, is still idle, but only because the company is waiting for machinery repairs before starting the fall work. Wheat is coming in in great quantities, and as soon as the mechanical shortages are made up fall operations will be resumed. The mills this year are turning out a better grade of flour than they have done for several seasons, although the price is decidedly less owing to the decreased price of wheat. Although flour has gone down approximately 70 to 80 cents per bushel, this decrease would have been considerably more had the old "government standard" of the past few years been maintained. Owing to the removal of certain government restrictions, however, the grade of flour turned out has been raised, with the result that the price is very little different to that which has prevailed in the past. Wheat, which has been coming in very slowly for the past week or so, is now being delivered at the mills in large quantities, and it is expected that a sufficient supply will be obtained to keep all the mills in the province busy until Christmas at least.

It is reported that shorts are at a premium just now, and that there is practically a famine in that kind of feed. Shorts are the second by-product of the milling industry, the first being the bran that is rendered by the ordinary flour milling process. Owing to the great scarcity of feed during the past winter, and the light grain crop that was reaped in the province, all the available supplies of shorts were eagerly bought up, and at the present time it is said to be practically impossible to obtain them, even at the price of $[illegible] per ton, a record figure in the West.

Laurentide Prospects Excellent

At the annual meeting of the Laurentide Co., Ltd., in Montreal last week, some interesting information regarding the development of the company was given out by Geo. Chahoon, Jr., the president. The two new paper making machines, upon which construction work was begun some months ago, Mr. Chahoon stated, are now reaching the stage of complete installation, and it was anticipated that both would be in operation by the turn of the year. The output of newsprint would be increased by 150 tons daily, or approximately 50,000 tons per annum, he said, which additional supply was to be taken by The New York Times under a five-year contract favorable to the company.

It was further stated that the company during the past year had acquired here and there small parcels of timber lands, the supply of wood from which would be sufficient to meet the demands of the enterprise for the increased capacity of the next ten or twelve years, without touching the old limits. The policy of acquiring fresh limits, he said, had been pursued for some years past, so that at the present time Laurentide has a greater supply of wood available than it had some ten or fifteen years ago.

In reply to a question by one of the shareholders of the company, the president stated that the company's water powers on the St. Maurice River had been more than doubled in potentiality, while the reforestation scheme adopted some years ago was developing along satisfactory lines. Laurentide, he said, was the first paper company to study scientifically the replenishing of its limits, and had gone further in this respect than any similar industrial on the continent.

Hon. E. C. Drury, premier of Ontario, announced on Sept. 24 that the provincial government would not grant the original proposals of the Backus interests, of Minneapolis, to obtain extensive pulp and power concessions in the Lake of the Woods District. These proposals were endorsed by the town of Kenora, Ont., which would greatly benefit by the operations of the Backus people in that district. Albert C. Troy, office manager of the St. George Pulp and Paper Co., of St. George, N.B., stated on Sept. 25 that the negotiations had been completed and the transfer of the control of the company had been made to the New York World newspaper. He said that the plant would be continued in operation as usual, but that there was a possibility of a change in the management in the near future.

The Matane Lumber and Development Railway has sold all its assets, real and personal, to an American company, the Hammermill Paper Co., of Erie, Pa. The deal, which involves several millions of dollars, includes the acquisition of timber lands, mill site, river improvements, etc., lying on the rivers Matane and Cap Chat, Quebec province, on the south shore of the St. Lawrence, comprising an area of 133,000 acres. The company will commence its fall and winter operations on the new property immediately.

Improve Dominion Collieries

Extensions and improvements to the properties of the Dominion Coal Co. Ltd., of Glace Bay, N.S., involving the expenditure of approximately $6,000,000, have been authorized by the directors, and work has already commenced.

Some $2,000,000 will be expended on new machinery and equipment at all the collieries in Nova Scotia, while $600,000 has been voted for expenditure on renewing and replacing existing machinery. In addition, large amounts will be spent in sinking new shafts and extending the old ones. The expenditure of $125,000 on electric safety lamps for all the mines has also been authorized.

Revillon's Fur Shipment

Another half million dollars has been added to the 1920 fur pack shipped out of Edmonton, Alta., representing the season's operations of the Revillon Freres Company. The entire output from that company's territory in the Peace River country and British Columbia has now been received, repacked and graded, and shipped to New York, where the pelts from the north will be made up in Revillons' own manufactory.

The year's catch is reported by J. Keith, the Edmonton manager of the firm, as fully up to the average in quality. Rats were in the majority, with mink, marten, and ermine plentiful, but fox and lynx scarce. Revillons are now operating ten posts in Alberta, the farthest north being at Fort Vermilion, and three British Columbia posts also report to Edmonton as the receiving station for both provinces. Next winter's operations by this firm, as by others working out of Edmonton, will likely be on the basis of less cash buying and more barter-trading, because of the uncertain conditions obtaining in the market for trade, another result of which will be lower prices paid to the trappers.

Ford Company Not Building

W. R. Campbell, secretary of the Ford Motor Co. of Canada, Ltd., advises The Monetary Times that the company has no plans for the erection of any branch plants in the

Temple Bldg, TORONTO

Dominion at the present time, in spite of the rumors to the contrary.

The Excelsior Electric Dairy Machinery Co., of Toronto, has been in communication with the Quebec Board of Trade in regard to inducements for the establishment of a new plant in that city. The company has decided to leave Toronto and would require a lot of land of about 25,000 square feet.

As a result of the heavy grain crops throughout the district, a new elevator with a capacity of 100,000 bushels is being erected at Coaldale, Alta. This will be one of the largest elevators in the prairie provinces.

The New Westminster, B.C., Board of Trade, after considerable discussion in regular meeting recently, finally decided to join the Associated Board of Trades. The general opinion prevailing was that it would be good business to be linked up with the larger organization for matters coming within the scope of the association, and also to associate actively with the Fraser Valley boards of trade.

The St. Thomas, Ont., Board of Trade, with the approval of the city council, is about to close a satisfactory arrangement with a large American company to locate a branch factory in St. Thomas. The company is asking for comparatively reasonable concessions, the board states, and for these, if conceded, a big staff of expert mechanics will be employed.

Two Industries for Hamilton

C. W. Kirkpatrick, industrial commissioner, Hamilton, Ont., has announced that arrangements have been completed for the opening of two more industries in the city in the factory building at 80 Murray Street West. Canadian Meltskin Company, Ltd., and the Don-o-Lac Company of Canada, Ltd., will occupy this space jointly, the latter in the manufacture of shellacs, enamels and paints, while the former company is engaged in the manufacture of power-plant products and boiler-room supplies. The head offices of both companies are in Rochester, N.Y.

There is a big demand in Italy for Canadian agricultural machinery, according to the Canadian Trade Commissioner for Italy, who was at Ottawa recently. A recent estimate of Italian requirements made by the ministry of agriculture includes 30,000 ploughs, 20,000 seeders, 9,000 mowers and 1,500 threshers.

Twin Cities' Development Scheme

A municipal industrial development scheme that is rather unique, in that two cities are a party to develop one area for industrial purposes, is that now nearing completion by the cities of Port Arthur and Fort William, the Canadian cities at the head of Lake Superior. For many years these localities have been expanding in opposite directions, leaving a very fine area of about five hundred acres undeveloped between the two cities. Two rivers, which require very little attention to fit them for terminals, flow through the property. In addition there are 4,000 feet of lake frontage developed and protected by breakwater as part of the national government's $20,000,000 expenditure in making a national harbor. This privately owned area is within the boundary of Port Arthur, and the general scheme provides for joint purchase by the two cities, both to share equally in the cost of development and in the revenue.

Development plans provide for a coordination of navigation and railway terminals with industrial property, the whole area to be a neutral zone, belonging to neither city, and to be administered by a harbor commission which will sublet the actual requirements of incoming industries on long leases on the basis of actual land values with periodical revaluations. The part of the scheme that is so unique as to be almost without precedent is that these two cities, which heretofore have been bidding against each other for industries and extending costly utility services, will unite to place industries in a location that will permit labor to be drawn from both within fifteen minutes' street car ride to any portion of either, and must serve to bring the cities closer together by [illegible] their industrial development and civic growth and [illegible] expenditure thereby.

NEW INCORPORATIONS

Three Rivers Pulp and Paper Co., Ltd., $4,100,000—Gillespie Grain Co., Ltd., $1,500,000—North Country Exploration and Mining Co., Ltd., $1,000,000

The following is a list of companies recently incorporated under Dominion and provincial laws, with the head office and the authorized capital:—

Ottawa, Ont.—F. H. Plant, Ltd., $50,000.

London, Ont.—Kingsmill's, Ltd., $250,000.

Ottawa, Ont.—H. G. Langford, Ltd., $50,000.

Amherst, N.S.—Traders of Canada, Ltd., $100,000.

Sydenham, Ont.—Sydenham Dairy Co., Ltd., $7,000.

Rockwood, Ont.—Guarantee Batteries, Ltd., $300,000.

Meaford, Ont.—Doran Oil and Gas Co., Ltd., $100,000.

Niagara Falls, Ont.—Ellicott Mining Co., Ltd., $250,000.

Courtenay, B.C.—G. A. Fletcher Music Co., Ltd., $10,000.

Stratford, Ont.—McLagan Phonograph Corporation, Ltd., $300,000.

Parkhill, Ont.—West Williams Oil and Gas Co., Ltd., $40,000.

Sherbrooke, Que.—General Business and Loan Co., $75,000.

Montmagny, Que.—Specialties Medicales Francaises, Ltd., $20,000.

New Westminster, B.C.—Gregg, Ralston Hockley, Ltd., $24,000.

Vernon, B.C.—Okanagan Farmers' Milling Co., Ltd., $50,000.

St. Catharines, Ont.—Niagara District Grapegrowers, $500,000.

St. Paschal, Que.—La Cie. de Lainage de Saint Paschal, Ltd., $49,000.

Owen Sound, Ont.—Owen Sound Golf and Country Club, Ltd., $100,000.

Hamilton, Ont.—Davis Bros., Ltd., $200,000; Hamilton Soaps, Ltd., $100,000.

Calgary, Alta.—Frank Hill Cattle Co., Ltd., $150,000; Stevens-Bardacke Grain Co., Ltd., $25,000.

Vancouver, B.C.—Federal Finance Co., Ltd., $100,000; Moose Group Mining Co., Ltd., $100,000; C. J. Keller, Ltd., $10,000.

Edmonton, Alta.—Polar Snow Manufacturing Co., Ltd., $30,000; Standard Clothing Co., Ltd., $25,000; Federal Importing Co., Ltd., $20,000; Art Music Co., Ltd., $10,000; Beaver Lake Ranching Co., Ltd., $100,000; Etter and McDougall Lumber Co., Ltd., $20,000; Anthony Lumber Co., Ltd., $30,000; Gillespie Grain Co., Ltd., $1,500,000.

Toronto, Ont.—Challenger Gold Mining Co., Ltd., $110,000; Automatic Timers, Ltd., $40,000; Northern Pulpwoods and Transport Co., Ltd., $500,000; Westman and Baker, Ltd., $100,000; C. A. Extract Co., Ltd., $50,000; Resistol Chemical Corporation, Ltd., $100,000; Canadian Casey Cobalt Co., Ltd., $245,000; Dominion Electric Supply Co., Ltd., $40,000.

Montreal, Que.—[illegible], Ltd., $50,000; Laboratories Poulenac Freres du Canada, Ltd., $200,000; North Country Exploration and Mining Co., Ltd., $1,000,000; Wessex Properties, Ltd., $500,000; Magnolia Metal Co. of Canada, Ltd., $100,000; Rowat [illegible], Ltd., $50,000; Gulf of St. Lawrence Shipping Co., Ltd., $100,000; Caplin Waist and Dress Co., Ltd., $50,000; Pike Motor and Yacht Co., Ltd., $200,000; Three Rivers Pulp and Paper Co., Ltd., $4,100,000; Hodgson, Frere, Ltd., $100,000; Frank J. McKeeman, Ltd., $20,000; Chinese Republican Club, $2,500; Investments and Transactions Incorporated, $5,000; [illegible] and Lefebvre, Ltd., $19,900; Eaux Minerales Naturelles de L'Epiphanie, Ltd., $20,000; [illegible] Co., Ltd., $20,000; Libraire Pepin, Ltd., $40,000.

Action [illegible] from the C.P.R. totalling [illegible] the Supreme Court at Calgary, Alta., by the Royal Trust Co., executors of the estate of the late Dr. Chambers, of Calgary, who was killed in the wreck at [illegible].

1870 —— OUR GOLDEN JUBILEE —— 1920

Co-Operative - Scientific - Successful

"How did the Mutual Life of Canada succeed in attaining its present impregnable position in the financial world?" It may be replied that the promoters of the Company did not organize it as a commercial undertaking, but that it might serve as a public benefactor giving "the largest amount of genuine life insurance for the least possible outlay." Unselfish devotion to the success of the enterprise supplied the place of capital. Although strictly co-operative or mutual, yet the Company has been built up on a scientific basis as an old line legal reserve life insurance company. The Mutual Life of Canada is a beneficent idea worked out on scientific lines—that is the secret of its popularity. The Mutual being essentially a company of policyholders, conducted by policyholders in the interests of policyholders, naturally became a great success.

BE A MUTUALIST!

The Mutual Life Assurance Co. of Canada

Waterloo Ontario

Hume Cronyn, M.P., President Charles Ruby, General Manager.

LIFE INSURANCE SERVICE

THE ultimate success of a Life Insurance Company depends largely upon what its policyholders think of the service they receive. The Continental Life has long since passed this test, and earned a high reputation for paying claims promptly. 1920 will likely prove the best year in the Company's history. Write for booklet. **"Our Best Advertisers."** For Manager's positions in Ontario, apply with references, stating experience, etc., to **S. S. WEAVER, Eastern Superintendent, at Head Office**

News of Municipal Finance

Many Alberta Municipalities will Hold Tax Sales This Fall—Niagara Falls Balance Sheet Shows City's Finances are in Healthy Condition—Regina's Utility Deficits Now Being Seriously Considered—Edmonton's Tax Collections Ahead of Last Year—Calgary Conducting Campaign to Collect Tax Arrears

Quebec, Que.—That the city may apply to the legislature at its next session for power to municipalize fire insurance has been intimated by Ald. P. Bertrand, chairman of the fire committee.

Stratford, Ont.—According to the city assessor's figures for 1921, land valuation in the municipality is placed at $3,861,660, an increase of $375,510 over the previous year. The value of buildings is placed at $9,967,640, an advance of $1,761,835.

Manitoba.—Following a meeting of reeves and councillors with J. H. Evans, deputy minister of agriculture for the province, it was stated that municipalities in the burned areas will share with the provincial government half of the expenditure arising from the bush fires this year.

Calgary, Alta.—City Assessor Wallace is conducting a campaign to bring in all back taxes possible before the tax sale. Up to the present his efforts have met with good results, and, judging from the amounts received, he states that the total before the tax sale should reach about $100,000.

Toronto, Ont.—According to the monthly statement of the finance commissioner to the city council, the city has lost $226,917 on account of repayment of loans and interest coupons in New York this year. The largest amount was in the repayment of a short-term loan of $1,500,000, and another, $500,000, consisting principally of interest coupons. There are still about $2,000,000 maturing obligations this year. Commissioner Ross says there is no hope of offsetting the loss experienced on New York maturities in the repayment of those maturing in Britain.

West Vancouver, B.C.—A statement of receipts and expenditures for the eight months ended August 31st last shows that tax arrears, dating back as far as 1917, have been collected to the extent of $18,959, while the interest on these arrears totalled $1,851. Current taxes of $69,318, or 70 per cent. of the total levy, were collected. Of these receipts the sum of $70,000 was used for repayment of bank loans, $8,195 for sinking fund account and the balance for other purposes. The cash in bank at August 31st amounted to $2,116.

Regina, Sask.—The combined deficits of the street railway and electric light departments at the end of August last reached a sum of $94,552, as revealed in the city auditor's report. Of this amount, the street railway is responsible for $40,882 and the electric light department $53,670.

After allowing credits for surplus made by the waterworks department and property sales to the street railway department, a net deficit of the combined utilities of $79,213 still remains, as compared with a net deficit of $64,202 at the end of July, an increase of loss in one month of $15,012.

Ald. Barton, at a recent meeting of the city council, referred to the financial position of the utilities as serious, and the situation is now under special consideration.

Winnipeg, Man.—H. C. Thompson, city treasurer, in a letter to the civic finance committee last week, pointed out that capital expenditures totalling $4,323,000 were in sight, made up as follows: Local improvements, $[illegible]69,000; waterworks extensions, $[illegible]0,000; water services and meters, $1[illegible],000; nurses' home, $400,000; hospital, $279,000; hydro electric, $1,[illegible]00,000; school board (1920), $750,000; Maryland Street bridge, $300,000; Greater Winnipeg Water District, $750,000; total, $4,82[illegible],000; less debentures issued and sold, By-law [illegible] (estimated), $4,[illegible],000.

"In view of the fact that the money market is in a very unsettled condition, I would impress upon your committee the necessity of avoiding any capital expenditure that can possibly be delayed," said Mr. Thompson in his communication.

Edmonton, Alta.—A comparative summary of tax collections for the period ending August 31st, 1920 and 1919, has been prepared by Comptroller Mitchell. The following figures give the results and show that there is a considerable balance in favor of this year:—

1920.	Arrears.	Current.
General	$657,753	$2,047,174
Business	20,152	104,678
Income	15,848	126,983
Total	$69[illegible],754	$2,278,836
Grand total, 1920		$2,972,590
1919.	**Arrears.**	**Current.**
General	$582,586	$1,085,221
Business	15,697	55,067
Income	30,305	77,575
Total	$628,590	$1,217,863
Grand total, 1919		$1,846,453

Niagara Falls, Ont.—At the end of December, 1919, the balance sheet of the municipality showed excess assets over liabilities of $755,185. The debenture debt of the city was $909,961, which is approximately $79.10 per capita, while loans from the bank stood at $308,748, making the total indebtedness at the end of the year $1,218,709. Property and permanent assets totalled $1,655,612, while permanent improvements were put down as $234,756. Current assets, including uncollected general taxes of $63,524 for 1919 and other uncollected taxes and interest, amounted to $83,526.

The statement of receipts and expenditures shows total tax collections as $307,600. Other items under receipts were: Debentures issued and sold, $67,862; bank loans for construction account, $234,200; bank loans for current account, $308,785. Under disbursements the principal items were: General management, $185,836; schools, $104,731; repayment of loans and debentures, $149,246.

Alberta.—There are seventeen towns and cities which will have to sell property for the accumulation of several years' arrears of taxes, and millions of dollars' worth of property, that is, based on assessment and not actual valuations, will fall into the hands of these municipalities. These cities and towns are: Calgary, Edmonton, Lethbridge, Medicine Hat, Red Deer, Bassano, Edson, St. Paul de Metis, Grouard, Peace River, Grand Prairie, Wetaskiwin, Coronation, Youngstown, Macleod and Taber.

The problem confronting all these towns and cities is what to do with the property after they get it for taxes, and what they will do to provide funds to take the place of the assessed valuations represented by these properties on which they have hitherto been basing their levies and mill rates. The obvious solution, of course, is to place the lands which come into possession of the municipalities in their sinking funds as an asset and hold them until they appreciate somewhat to the value at which they originally were assessed.

The tax sales, however, do not embrace cities and towns only. Villages and municipal districts also are affected through the sales of school lands for taxes and of lands on which the wild lands taxes have not been paid. The town, village and municipal districts which will have to hold these sales under the Tax Recovery Act number some thirty, among the important ones being Stavely, Innisfail, Claresholm and Lacombe. The sales which will be put on by the Department of Municipal Affairs will be held in November, most of them for the first half of the month. Calgary is planning its tax sale for some time in late October, and Edmonton will hold its tax sale on November 9th.

Government and Municipal Bond Market

Ottawa Ventures on Exchange and Sells Securities Payable in the United States on a 6.30 Per Cent. Basis, which is a Little Better than Saskatchewan Government—Ontario is Coming on the Market with Three Millions of Notes—Local Selling Still Continues in Favor

THE principal event in the bond market this week was the sale of $2,500,000 6 per cent. instalment bonds to the United Financial Corporation, Ltd., at a price which cost the city about 6.30 per cent. Unlike the province of Saskatchewan, the city decided to take a chance on the exchange and sell securities payable in America, and consequently received a little better price. The bonds, which are payable in both Canada and the United States, will be disposed of across the line.

Included in the issues which are coming on the market within the next week or so is that of Ontario. The province is offering $3,000,000 6 per cent. three year bonds, the proceeds of which are to be used to retire some treasury notes during the next two months. It is understood that the province has some $5,000,000 maturing obligations to meet this fall, $2,000,000 on November 15th and $3,000,000 on December 1st, so that it is probable that there will be some additional financing, although nothing has yet been said of this.

Home Financing Continues in Favor

That home financing is gaining favor is evident by the number of municipalities which are now selling their bonds locally. Ontario municipalities are the ones chiefly engaged in this method of financing, and up to the present their efforts have been attended with a certain amount of success. Owen Sound has just announced that it has completely disposed of its issue of $88,000 6½ per cent. debentures to local investors, and that more could have been sold. Hamilton also announces that the sale of $241,000 debentures is going well. With the disposal of this block the city will have sold about $500,000 to local purchasers.

Two Ontario townships expect to dispose of their securities to the inhabitants of the community. Gloucester is one, and is now offering $30,863 in various denominations. Stamford is the other, and T. R. Stokes, township treasurer, announces that the following debentures are now available to the investing public of Niagara Falls and Stamford at 98: $18,225 6 per cent. 20-years, proceeds to be used for sidewalks, and $3,710 6 per cent. 20 years, the proceeds of which are to be used for sewers and water mains.

There is a limit to such financing, however. Up to the present nearly all of the issues have not been very large, and have been made by the municipalities to tide them over until the market becomes more normal. It is improbable that such a method will be continued, that is, to any great extent, although those municipalities which have been particularly successful will no doubt try again.

At the time it was suggested that Toronto [illegible] to local [illegible] to finance the purchase of the street railway, one local dealer stated that only about a half or three-quarters of a million could be disposed of in this manner, that is, within a reasonable time. The [illegible] of that remark remains to be seen after Winnipeg has entered the local market. If a western city such as Winnipeg sells amounts of $1,000,000 in a reasonable length of time, then it is possible that Toronto could dispose of an amount at least three or four times as large.

It is [illegible] Winnipeg [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] of the bonds. It must be remembered, however, that if the province of Alberta has only been able to [illegible] about $800,000 out of $1,000,000 in the past two months so, that a western municipality would not be able to do much better. Farmers are now reported to be buying Alberta "baby" bonds quite briskly as the result of the good harvest, and this, of course, will also be a point in favor of Winnipeg's campaign.

Coming Offerings

The following is a list of debentures offered for sale, particulars of which are given in this or previous issues:—

Borrower.	Amount.	Rate.	Maturity.	Tenders close.
Glenwood, Man.	$ [illegible],000	[illegible]	[illegible]0-instal.	Oct. 4
Temiscaming, Que.	24,700	6	25-years	Oct. 4
Sherbrooke, Que.	[illegible]92,500	5	5-years	Oct. 4
Amos, Que.	57,000	6	20-instal.	Oct. 4
Chatham, N.B.	[illegible]8,000	6	[illegible]8-year ser.	no date set
York Twp., Ont.	185,280.[illegible]	6	10-instal.	Oct. 4
Assiniboia R.M., Man.	277,925	6	20-instal.	Oct. 5
East Angus, Que.	50,000	6	20-instal.	Oct. 5
Ste. Anne de Chicoutime, Que.	27,000	5½	10 years	Oct. 11
Ontario	3,000,000	6	3-years	Oct. 7
Kentville, N.S.	30,[illegible]00	6	....	Oct. 18

Sainte Anne de Chicoutimi, Que.—Sealed tenders are being asked by the village until October 11th, 1920, for the purchase of $27,000 5½ per cent. 10 year debentures. P. Gauthier, secretary-treasurer.

East Angus, Que.—Tenders are being asked until October 5th, 1920, for the purchase of $50,000 6 per cent. 20-instalment debentures, interest payable half-yearly, commencing November 15th, 1920. J. A. Girard, secretary-treasurer.

Kentville, N.S.—Tenders will be received until October 18th, 1920, for the purchase of the following 6 per cent. refunding debentures: $[illegible],000 for waterworks, $2,500 for schools, $1,[illegible]00 for exhibition grounds, $2,[illegible]00 for fire department. (See advertisement elsewhere in this issue.)

Mimico, Ont.—The town will issue debentures amounting to $15,000 to pay off the town's share of the cost of the Hamilton Highway.

Debenture Notes

Whitby, Ont.—The town will borrow $12,000 for sewer construction.

Newmarket, Ont.—A by-law to devote $20,000 for additional equipment for the waterworks has been passed.

Tilbury, Ont.—Ratepayers have endorsed a by-law to guarantee the bonds of the Tilbury Auto Truck Co., to the amount of $20,000.

Chilliwack, B.C.—A money by-law authorizing the borrowing of $[illegible],000 [illegible] will be placed before the ratepayers for consideration.

St. John, N.B.—Bond issues to the amount of $3,275 for [illegible] and other improvements have been approved by the common council.

Napanee, Ont.—Ratepayers will vote on a by-law in the near future for the purchase of public works owned by the Napanee Water Works Co. at a price of $70,000.

Dominion, N.S.—[illegible] have given their approval of the borrowing of the following amounts: $27,000 for school purposes, [illegible] for [illegible], $7,000 for repairs to [illegible].

Fort William, Ont.—On October [illegible], 1920, ratepayers will be asked to vote on a by-law authorizing the issue of debentures to the amount of $[illegible] for road purposes in connection with the [illegible] Pulp and Paper Co.'s new power plant.

6.30%
for Twenty Years

Twenty years of freedom from investment care is offered to purchasers of Province of Saskatchewan 6% Gold Bonds.

During this period, an interest return of 6.30% is assured, while to collect this interest, coupons need only be clipped and cashed once every six months.

Saskatchewan ranks as one of Canada's wealthiest Provinces. The value of her wheat and oat crop alone this year is estimated at approximately $400,000,000.

We offer, in $500 and $1,000 denominations, Province of Saskatchewan 6% Gold Bonds at 96.62 and interest, yielding 6.30%.

Government and Municipal Bonds

42 King St. West

TORONTO -:- CANADA

Alberta.—A rather unique deal was put through recently when the Hong Kong and Shanghai Banking Corporation, of China, acting for a client, sent a draft to the provincial government for $500, in return for which it wants Alberta savings certificates for a like amount. This is the first time that savings certificates of the province have crossed the province.

Winnipeg, Man.—Expenditure of more than $1,000,000 on hydro-electric developments in rural Manitoba may be undertaken under the government hydro-electric policy in 1921 if the legislature next session authorizes continuation of this policy to the extent of applications already received. Announcement to this effect has been made by J. M. Leamy, Provincial Power Commissioner.

Three Rivers, Que.—Tenders are being received until October 11th, 1920, for the purchase of $700,000 6 per cent. 10-year debentures. Interest is payable semi-annually, and both interest and principal are payable in Canada only at the Bank of Hochelaga at Three Rivers, Montreal or Quebec. Every tender must be accompanied by a certified cheque equal to one per cent. of the total amount of the issue. Debentures are dated November 2nd, 1920. A. Nobert, treasurer.

Windsor, Ont.—The $376,518 5½ and 6 per cent. debentures, maturing in 10 and 20 instalments, which were purchased by A. E. Ames and Company in July at 95.631, have been turned back upon the city because one of the issues had not been passed upon by the people, and was not, therefore, acceptable to the Ontario Municipal and Railway Board. These debentures, together with $125,000, issued under the municipal housing scheme, will again be placed upon the market.

Toronto, Ont.—The city council has given third and final reading to a by-law authorizing the expenditure of $1,270,000 for the extension of Teraulay Street. In addition, four other debenture by-laws have been passed by the council as follows: $1,058,000 for public school buildings and sites; $864,000 for the Toronto Housing Commission, in lieu of another by-law for $1,019,000, $155,000 for the purpose of enlarging high schools; $776,000 for public school enlargements and to make up a shortage in previous issues.

Essex Border Utilities, Ont.—A. E. Ames and Co. have purchased from the commission $117,615 6 per cent. 28-instalment debentures. When the commission called for tenders a short time ago three offers were received, and the highest, which was from Wood, Gundy and Co., was accepted. Owing to some legal difference, however, Wood, Gundy and Co. could not take the bonds and private arrangements were then made with A. E. Ames and Co., who are now offering the bonds on about a 7 per cent. basis.

Saskatchewan.—The following is a list of debentures reported sold from August 21st to September 10th, 1920:—

Schools.—Cupar, $27,000, Ardath, $36,500, Harris, Read and Co. Peveril, $1,250; Nay and James. Clunie, $1,200, Morton, $2,000, Onward, $1,000; C. M. Gripton, Niagara, Ont. Odessa, $7,000; Regina P.S. Sinking Fund. Moorland, $1,000; Alex Murray, Bethune. Westerlund, $5,000, South Valley, $5,000, Galloway, $4,000, Summer, $4,000, Corn Valley, Waterman Waterbury Manufacturing Co. Coolidge, $4,000; C. N. Beedy, Birch Hills. Ellsridghill, $6,500; H. J. Birkett and Co., Toronto, Ont.

Telephones.—Whitewood, $10,000, Carlton, $15,000 Garnock, $6,000, Harris, $2,200, Brightholme, $21,000, Good Luck, $58,000, Vawn, $2,000, Sturgis, $23,000, Wolverton, $19,000, Longbank, $4,000; W. L. McKinnon and Co. Alpha, $4,800, Gartmore Zora, $12,400, Arran, $55,000; Grayson Northern, $6,000, Larkhill, $8,200, Harris, Read and Co. St. Leonards, $1,300; Strathcona, $4,200; R. O. Berwick and Co. Odessa, $6,500; Pirt and Pirt. Greenfield, $11,425, Vergin, $10,250, Wood, Gundy and Co. South Bethune, $1,000, J. H. Peel. Readlyn, $10,200, C. F. Williams.

Saskatchewan.—The following is a list of authorizations granted by the Local Government Board from September 11th to 17th, 1920:—

Schools.—Belleau, $2,700 10-years 8 per cent. instalment; Anderson, $700 1-years 8 per cent. instalment; French, $5,000 10-years 8 per cent. annuity; Quill Lake, $16,000 8 per cent. 20 years annuity; Robert, $5,000 8 per cent. 15-years annuity; Oakshela, $4,000 8 per cent. 10 years instalment; Nokomis, $12,000 8 per cent. 15-years annuity.

Rural Telephones.—15-years, 8 per cent. annuity: Bertdale, $6,300; Earl Grey Sylvan, $12,000; Heavylands, $400; Pilger, $21,300; Stenen, $27,900; Baljennie, $7,500; Dunleath, $7,300; Hony, $1,700.

Villages.—Loreburn, $2,600 8 per cent. 10-years instalment, for village well; Summerbury, $2,500 8 per cent. 10-years instalment, for rink.

Bond Sales

Trenton, Ont.—Wood, Gundy and Company have purchased $12,000 6½ per cent. 20-instalment bonds at a price which is on a basis of about 6¾ per cent.

Edmonton, Alta.—City Treasurer Barnhouse advises *The Monetary Times* that the city recently sold to W. Ross Alger and Co. $121,000 6 per cent. 2-year notes, which are secured against hypothecated long-term debentures.

Saskatchewan.—The following is a list of sales reported by the Local Government Board from September 11th to 17th, 1920:—

School Districts.—Cresswell, $600; C. M. Gripton, St. Catharines, Ont. Coppice Hill, $3,600; A. B. Smith, Moosomin. Memorial, $1,600, Victory Hill, $4,000, Thatch Creek, $5,600; Waterman-Waterbury Manufacturing Co., Regina. Peach View, $6,050, West Luseland, $4,500; Nay and James, Regina. Lac Vert, $900; local purchasers. Arbor Hill, $600; C. H. Inkster, Bressaylor.

Rural Telephones.—Silver Lake, $6,200, LeRoss, $19,400; W. L. McKinnon and Co., Regina. Zorra MacNutt, $1,900; R. O. Berwick, Regina. Luton, $950, Dubuc Northern, $2,500; N. Norman. Iron Springs, $9,200; Quill City, $7,700; T. W. Brown, Saskatoon.

Town of Whitewood, $3,000; local purchasers.

Municipality of Chester, $9,500; International Loan Co. of Winnipeg, at par.

Ottawa, Ont.—The city this week awarded $2,300,232 6 per cent. instalment debentures, maturing from 10 to 30 years, to the United Financial Corporation, Ltd., and syndicate, at a price of 97.29, or at a cost to the city of about 6.30 per cent. for its money. Tenders received on the issue were as follows:—

Corporation Securities Market

Canadian Stock Markets Weak—Largely Influenced by Wall Street and Falling Prices in the United States—Merger Stocks Strengthen Upon the Announcement that Stock of the Consolidation Has Been Underwritten in England—Four New Listings in Montreal and Toronto

PRICE reductions by some manufacturers in the United States were responsible for a very weak stock market in New York during the week ended September 29, at least as far as the industrial section of the exchange was concerned. General business readjustment is now in progress throughout the country and further cuts in prices of commodities are certain. This will mean, for the time at least, reduced earnings, and consequently lower profits, although it is probable that cuts in prices will result in an increased volume of trading. Runs on Boston savings were considered purely local in their significance, and did not affect the stock market to any extent. It was stated by the officials that the position of a few trust companies in Boston is not typical of the general banking situation in the country.

Canadian stocks were largely influenced by Wall Street and the market, both in Montreal and Toronto, was weak. Declines in papers were especially notable. A feature of the market in both cities was the strength in the "merger" issues. For some time, Dominion Steel and Canada Steamships particularly had shown a weakening tendency. This, of course, brought out several rumours, which were far from favorably influencing those issues. Upon the official announcement that the stock of the British Empire Steel Corporation had been underwritten in London, and that satisfactory progress was being made, however, all issues connected with the consolidation, particularly the two mentioned, displayed remarkable activity and strength. Gains in this section also helped to improve the general sentiment.

The banking section was weak, while prices of bonds also fell away. In Toronto Rio Janeiro was down 6 points.

British Empire Steel Shares

According to cable advices received by Sir Henry Pellatt, a director of the Dominion Steel Corporation, at Toronto, Hon. Col. Grant Morden, now in England, stated that the issue of £5,000,000 8 per cent. preferred stock of the British Empire Steel Corporation, which had been offered in Britain, had been underwritten by important British financial interests. It was further stated that the transfer of the securities in connection with the merger will take place as of November 1. It was explained by Sir Henry that for the present the money raised through the sale of the stock mentioned would be left in England, and arrangements had been made with the corporation's bankers in this country to advance money necessary for development of the subsidiary on the security of the funds overseas. It was expected that this arrangement would last until perhaps some time next year, when the position of exchange would permit the remittance of the funds to Canada.

New Shares Listed

A block of $700,000 common stock of the Lake of the Woods Milling Co., Ltd., was listed on the Toronto Stock Exchange this week and traded for the first time. This stock was issued as a result of a decision of directors, for allotment to shareholders on the basis of one share of new stock for every four already held of old stock, and was in the form of a special dividend.

As a result of the reorganization of the capitalization of the Wabasso Cotton Co., particulars of which were given in these columns last week, [illegible] shares of no nominal or par value will be listed on the Montreal Stock Exchange immediately. Holders of the old stock have received two new shares of no par value for each common share of $100 each.

Common and preferred shares of the Abitibi Power and Paper Co., Ltd., were admitted to the Toronto Stock Exchange for the first time this week. These securities have been dealt in formerly in the unlisted department, which has been the experience with other securities of the exchange, [illegible] should be transferred to the listed section. The Abitibi Co. has $1,000,000 preferred stock outstanding and [illegible]0,000 shares of no par value common, the plan adopted at the annual meeting in April last.

An issue of [illegible] additional Canadian General Electric common stock, which was authorized by the directors in December last, was listed on the Toronto Exchange this week. The paid-up common stock of the Canadian General is now $8,000,000, and the preferred $2,000,000.

New Stock Issues

Mauson Motors, Ltd., Toronto, Ont., are offering 8 per cent., cumulative preferred stock (par value of $10), at par, with a bonus of 30 per cent. of common stock (par value also $10). The authorized capital of the company is $1,500,000.

The Provincial Bond and Security Co., Toronto, are offering common shares of the [illegible] Tire and Rubber Co., Ltd. (par value $10), at par with a bonus of 30 per cent.

The King Beach Co., Mission City, B.C., which was incorporated in May, 1913, and successfully carried on business since that date, recently went into voluntary liquidation recently, and was re-incorporated for the purpose of reorganization, under the name of the King Beach Mfg. Co., with an authorized capital of $400,000. The stock of the old company was mostly held by English investors under the name of the Anglo-British Columbia Packing Co., Ltd., of London, Eng., and some other local people. Under the new organization there will be no offering of stock to the public, and whatever is issued will be absorbed privately.

INSURANCE LEGISLATION AT COAST FORECASTED

Attorney General Farris Addresses Vancouver Insurance Men—Recognizes Value and Promises Hearing

(Special to *The Monetary Times*.)

Vancouver, Sept. 24, 1920.

THE Hon. J. W. De B. Farris, attorney general of British Columbia, spoke upon the question of life insurance legislation before the Life Underwriters' Association of Vancouver at their get-together luncheon to-day. He opened his address with the suggestion that the legislators who were obliged to live in Victoria did not get the "Life Current" to the same extent that they would if they were stationed in the commercial metropolis of Vancouver, and in this connection he spoke of the psychological influence brought to bear upon him by the insurance men who adopted the plan of inviting him to come to Vancouver and investigate the insurance situation for himself, that he might be prepared in the event of possible future legislative measures being introduced by the insurance fraternity. He thought theirs was a better plan than that which, say, the lawyers would likely adopt, who were in the habit of compiling a great mass of facts and figures and coming with them to Victoria for the purpose of placing them before his Department, to be considered by them first-handed without any previous investigation on their part.

New Legislation

He had been advertised to speak on "Future Legislation." No politician would care to do that. He could only express his personal views. However, he could go into details more or less on the legislation the government had passed. They had found by the investigation in the Insurance Department that insurance was being placed on the lives of infants at law—that is, persons under 21 years of age—which was not legal in this province. It was, however, in other provinces. It was decided to pass legislation granting legal sanction to contracts already in force for this form of insurance, and to make it legal hereafter to insure persons from 16 to 21, or for such persons to insure their own lives, the premiums not being limited in amount.

So far as children were concerned, legislation was passed making it legal for parents to insure the lives of children from 1 to 2 years of age, limiting the amount of insurance to $32.00, and so on up by a sliding scale until 16 years of age was reached. For instance, the maximum amount of insurance for children of 9 to 10 years of age was $260. Before this legislation was passed, insurance companies had placed no restrictions on the amount. Away back in 1774 insurance was looked upon as so much gambling, and while in subsequent years a man was allowed to insure his own life, he was not legally permitted to insure another man's life. A father could not insure a child, a husband a wife, or a wife a husband. These ideas, however, in this enlightened age are not universally accepted as sound, although in this province, so far as beneficiaries were concerned, if a father placed insurance on his life for the benefit of his family group—his wife and children—he could not change his beneficiaries in the policy of his own accord, nor could the insurance policy be used for liquidating business obligations, although he could change the amount of benefit to be received by the different beneficiaries after his death.

These beneficiary laws again vary in each province, and although they had in this province the machinery and the desire to conform to the laws of other provinces, they could only legislate for themselves. They had, in fact, fallen in line with the suggestion that there be an annual central convention of lawyers from all the provinces whose duty it would be to look into laws which are dissimilar in the various provinces and submit drafts of new laws on various subjects which shall be uniform in all the provinces. Legislation has been passed empowering British Columbia to appoint commissioners to this convention, and Mr. J. N. Ellis, Mr. Courtenay and Mr Pineo were the government's choice. In fact, Mr. Courtenay and Mr Ellis were now in Ottawa upon this very service.

"A word to the wise was sufficient" that central conference is the place to submit suggestions for Life Insurance Legislation. Any suggestion made to him by the Insurance men would be carefully considered by his department, and if it was thought advisable, would be placed before this Central Conference, whose sole object was to labor for the general good of the Province as a whole so far as her laws were concerned.

Licensing Insurance Agents

The primary object of all legislation was to do the greatest good for the greatest number. This must be considered in taking up the question of licensing agents. "Of course," the attorney general remarked jocularly, "we know that all you wish is to pay us a big fat fee so that we may have another source of revenue, and of course the government is out to touch everybody as heavily and as frequently as possible." But there was another side of the question, he said, in continuing—Was it to be for the common good? They had this same question up with different associations.

The real estate men came to them with an act all drawn up to suit themselves. They submitted it to him, to the premier, and it afterwards was up in caucus, and it then came before the House and was turned down cold. This suggested legislation required the government to submit every applicant who wished to sell real estate to an examination as to his competency, and there were so many questions that an applicant would be obliged to answer correctly and on his honor, that one wag suggested that one of the questions be: 'Are you a member of a regularly constituted Liberal Association?' However, as the real estate men seriously wished to have agents licensed, the government passed a law requiring every man who sold real estate to secure a license from the government, the price of the license being $10.00, but that is not all. The government appointed commissioners in different centres in the province whose duty it was to investigate any charge of fraud or misrepresentation, and if the representations of the commissioner are such as to warrant it on investigation, the government suspends or cancels the license of the erring real estate agent.

Now, the life insurance agents may be assured if they wish to be licensed and protected in other ways, if their wishes were reasonable and for the common good; then let them come to Victoria and meet them around the table. He would not promise them anything. He could not do that, but he could give them his personal views. He believed that if they required an applicant who desired to become an insurance agent to pass a stiff examination before a government board, it would place them in a false and invidious position, but on the other hand some simple examination, so far as life insurance is concerned, might be arranged. The applicant should know the nature of the business in which he is to engage and to understand the kind of insurance he is offering his prospect.

Bell Telephone Case Concluded Temporarily—Canadian Pacific Net Earnings Again Lower in August—Gross Increased Seventeen Per Cent., but Operating Expenses Advanced More Than Double That Rate—Montreal Tramways Revenue Not Sufficient to Meet Requirements

Canada Foundries and Forgings Co.—At a meeting of the shareholders of the company in Brockville, Ont., on September 28, approval was given to the directors' decision to sell the Buffalo subsidiary of the company, the Delaney Iron and [illegible] Co., Inc. Provision is made for the bargain to be finally completed and the transfers made within the next [illegible] days.

Canada Bread Company.—At the annual meeting of the company in Toronto on September 28, D. O. Ellis, of Toronto, and A. A. Ryley, of Winnipeg, were added to the board of directors, and H. C. Tomlin and George Weston retired. President Mark Bredin was in the chair. No action was taken regarding dividend on the common stock, the shareholders being informed that the company's financial effort would be concentrated in the near future, on the construction of a fine new plant costing $500,000 on its Danforth [illegible] property. It was considered that the position of the company had shown good progress, business now being carried on in Hamilton, as well as Montreal, Winnipeg, and Toronto. Last year was the best in the company's history, and an even better one in volume was expected this year. Mark Bredin was re-elected president, and W. T. Bredin was chosen vice-president.

Canadian Pacific Railway.—The monthly earnings statement of the company issued this week showed that gross earnings during the month of August increased by upward of 17 per cent., but working expenses advanced by over [illegible] per cent. in the period, leaving the net figure lower by $1,[illegible] than in August of last year, a decline of over 11 per cent. As in the previous month's statement, the expenses include provision for the estimated increase under the new wage award.

The ratio of working expenses to gross earnings in August was upward of 88 per cent., as compared with approximately [illegible] per cent. during the corresponding period in 1919. The gross figures for the month constitute a record in the history of the road as do the expenses.

The figures for the month follow: Gross earnings, $1[illegible]; net profits, $2,200,81[illegible]; net decrease, $1,[illegible].

Gross earnings for eight months, $127,428,116; net profits, [illegible]; net decrease, $[illegible],865.

Port Arthur Shipbuilding Co., Ltd.—For the year ended June 30, 1920, net earnings of the company amounted to $[illegible], as against $[illegible] in the previous year. The report indicates a curtailing of operations, following the busy period of shipbuilding during the war.

The Port Arthur Company was considered as one of the corporations to enter the British Empire Steel Corporation when the merger was first proposed early in the summer, but was afterwards withdrawn from the negotiations.

Gross profits for the year were $[illegible], compared with $[illegible]. General and administrative expenses showed a [illegible] at $[illegible], as against $[illegible]. Other income was $[illegible], compared with $[illegible]. The sum of $[illegible] was allowed for depreciation of plant, buildings, bond interest and miscellaneous charges, as against $[illegible] last year. The assets of the company are slightly [illegible] at $[illegible], as against $[illegible].

Marconi Wireless Telegraph Co. of Canada, Ltd.—[illegible] of the affiliation of the company with the Canadian General Electric Co. have now been announced. Directors of the new organization are as follows: Hon. Sir Frederic Nicholls, president; Senator G. Marconi, A. E. Dyment and R[illegible], vice-presidents; and the following directors: Sir William Mackenzie, Godfrey C. Isaacs, G. M. Bosworth, C. Greenshields, K.C., and A. H. Morse, managing director.

Plans involved in the reorganization call for the increase in the authorized capital of the company to provide additional working capital, and the acquisition of valuable wireless patents controlled by the Canadian General Electric Co. Among the patents involved are the Alexanderson alternator, the manufacture of the Fleming valve and the Alexanderson multiple aerial.

A merger was effected in the United States some months ago between the American Marconi Co. and the wireless interests of the General Electric Co. of America, the merger interests being incorporated under the name Radio Corporation of America. As a result, the Radio Corporation at once became the strongest [illegible] of its constituents, financially and otherwise, since it gained control of essential wireless patents.

The various Marconi [illegible] in the British Empire elsewhere than in Canada became entitled to the use of all the wireless patents owned and controlled by the General Electric Co. of America. Canada was not included in this operation because of the fact that the Canadian equipments of the wireless patents of the General Electric Co. of America were owned in Canada by the Canadian General Electric Co., Ltd., which is not under control of the American organization.

The merger of the Marconi Co. and Canadian General Electric will naturally overcome this serious difficulty.

Bell Telephone Company.—The hearing of the company's application for increased rates which commenced in Ottawa on September [illegible], before the Dominion Board of Railway Commissioners, was concluded on September 2[illegible]. Glyn Osler, counsel for the company, in closing the case stated that he might have to call one or two more witnesses when the next hearing took place, but, generally speaking, the company had finished.

During the [illegible] witnesses had appeared for the company, including C. F. Sise, vice-president and general manager, and L. W. [illegible], of the Royal Securities Corporation. The basis of the company's argument was that the corporation is [illegible], but is not making money on its investment, and is therefore not making provision for depreciation and reserves. Figures were submitted to [illegible] this contention. The increase in rates sought is conservatively estimated to bring in revenue of $1,500,000, enabling the company to pay an 8 per cent. dividend, and make other necessary provisions.

At the [illegible] of the hearing, H. G. Atwater, rate engineer of the American Telegraph and Telephone Company, with offices in New York, was called as a witness to testify to the method followed in arriving at the proposed new rates. In answer to questions by F. B. Proctor, counsel for the city of Ottawa, Mr. Atwater said that he could not [illegible] whether the adoption of the "measured" system [illegible] would restrict users of telephones [illegible]. He did not think it would in any way [illegible]. It was suggested by counsel opposing the application that an expert should be brought from the United States, where the "measured" system is used, to explain its operation to the board. It was important to know how it worked. [illegible], counsel for the Ottawa Board of Trade, contended that it would result in deterioration of the service, which should be taken into consideration when fixing rates. [illegible] than in counting messages no charge was made if the one asked for was busy. It was only [illegible] that counted.

No definite decision was made regarding the date when the hearing would be resumed, but it will probably take place in Toronto at the beginning of November. Following that there will be hearings in Hamilton and Montreal, and then finally at Ottawa.

Montreal Tramways Company.—According to the ninth annual statement of the company, which was submitted to shareholders this week, gross earnings of the company for the first twelve-monthly period under the new contract with the Tramways Commission amounted to $10,782,170, compared with $11,572,210 in the interval between February 10, 1918, and June 30, 1919. Gross revenue for the year amounted to $2,375,579, which with the deduction of interest charges on bonds and debentures, together with other expenses, aggregating $1,923,071, left net income at $452,508. During the year three quarterly dividends were distributed among shareholders, involving $290.550, bringing the surplus for the twelve months to $161,958. This, added to the balance carried forward from the previous period, brought total surplus to $1,201,775. Out of the latter amount were paid three deferred quarterly dividend instalments, amounting to $255,600 and a donation of $5,000 to the widow of the late D. S. Robertson, one of the officers of the company. Total surplus was thus reduced to $941,175, at which level it stood as at the end of June last.

The directors point out that from the coming into force of the contract with the Tramways Commission under which the system is now operated—February 10, 1918, to June 30, 1920—the revenue has not been sufficient to meet requirements by $1,728,811, of which $1,192,094 is payable to the city of Montreal when received, and $223,546 which should be placed to the credit of contingent reserve fund. These are only payable after all prior charges. These amounts have not been brought into the statement of assets and liabilities. Under the terms of the contract the company has to provide from its own funds a guarantee fund amounting to $500,000 in amounts of not less than $100.000 per year. $200,000 is now on deposit with a trust company under this provision.

Principal items of the balance sheet compare as follows:—

	1920.	1919.
Accounts payable	$ 1,069,461	$ 1,115,361
Accrued interest	239,242	243,605

Total assets	44,769,193	44,678,404
Total liabilities	43,828,018	43,638,587

DEBENTURES FOR SALE

RURAL MUNICIPALITY OF ASSINIBOIA

DEBENTURES FOR SALE

Sealed tenders marked, "Tenders for Debentures," will be received by the undersigned up to 12 o'clock noon on Tuesday, the 5th day of October, A.D. 1920, for the purchase of 6 per cent. Twenty-year Debentures amounting to $277,925.

These Debentures are issued under By-laws Nos. 1464 to 1467 and 1469 to 1474, and are for the purpose of laying Water Mains and constructing Sewers in the thickly-settled portions of the Municipality.

The Debentures are repayable in equal annual instalments both of principal and interest.

For further particulars apply to the undersigned.

The highest or any tender not necessarily accepted.

By Order of the Council.

FRANK NESS,
Secretary-Treasurer.
Rural Municipality of Assiniboia.

Kirkfield Park P.O., Man., Sept. 18th. 238

DEBENTURES FOR SALE

DEBENTURES, TOWN OF KENTVILLE

Sealed tenders addressed to the undersigned and marked "Tenders for Debentures" will be received up to noon on October 18, 1920, for the purchase of the following debentures:—

$25,000.00 to pay Water Works Debentures maturing January 1, 1921, in denominations of $500.00 each, and dated January 1, 1921:

$2,500.00 to pay School Debentures maturing January 1, 1921, in denominations of $500.00 each, and dated January 1, 1921:

$1,300.00 to pay Exhibition Ground Debentures which matured on November 1, 1919, in denominations of $100.00 each, and dated November 1, 1920:

$2,300.00 for the purchase of a Chemical Engine for the Fire Department, in denominations of $100.00 each, and dated November 1, 1920.

All of the above debentures will bear interest at six per cent per annum, payable half-yearly, and said debentures are to be issued under the Authority of an Act of the Legislature of the Province of Nova Scotia passed at the last session.

The highest or any tender not necessarily accepted.

Dated at Kentville, Kings County, N.S., this 27th day of September, A.D., 1920. 246

J. CARROLL,
Town Clerk.

$3,000,000

PROVINCE OF ONTARIO

3-Year, 6 Per Cent., Gold Bonds

Sealed Tenders endorsed "Tenders for Province of Ontario Bonds" addressed to the undersigned, will be received for the purchase of $3,000,000 (Three Million Dollars) three year, gold bonds of the above Province, dated 1st October, 1920, due 1st October, 1923, bearing interest at the rate of six per centum per annum, payable half yearly on the 1st October and 1st April. Principal and interest payable in gold coin at the office of the Treasurer of Ontario, Toronto, or at the Bank of Montreal, Montreal, Canada, or at the Agency of the Bank of Montreal in the city of New York, U.S.A., at the option of the holder.

Bonds to be in denominations of $1,000 each with coupons attached and may be registered as to principal only.

Payment for bonds, and delivery thereof, to be made at the office of the Treasurer of Ontario at the Parliament Buildings, Toronto, on or before the 11th October, 1920, less the amount of the deposit. Interim debentures will be supplied on payment of the money, to be exchanged for the definitive bonds on completion by the engravers.

Tenders to be addressed to the Hon. P. Smith, Treasurer of Ontario, Parliament Buildings, Toronto, and delivered not later than 12 o'clock noon on Thursday, the 7th day of October, 1920.

Tenders must be for the whole amount offered and must be accompanied by marked cheque for $30,000 to be applied in the case of the successful tenderer in payment for bonds.

The highest or any bid not necessarily accepted.

P. SMITH,
Treasurer of Ontario.

Toronto, September 30, 1920 245

RECENT FIRES

Richards Lumber Mill, Charlo Station, N.B., $500,000—Galla Building, Brockville, $15,000—Doon Twines, Ltd., Doon, $30,000

Belmont, Ont.—September 25—Icehouse, owned by Harry [illegible], was destroyed. The loss is $4,000, and the fire is thought to be due from spontaneous combustion.

Billings' Bridge, Ont.—September 25—Barn of E. Sabourin was destroyed; several nearby buildings were also destroyed. The loss is $8,000.

Brandon, Man.—September 19—Home of Mike Shaddock, 9 Twenty first Street North, was destroyed. The building was of frame, and the loss is estimated at $800, with $400 insurance.

Brockville, Ont.—September 21—Galla Building, on King Street, was damaged by fire, also several adjoining buildings. The fire was caused by spontaneous combustion. The loss is estimated at $45,000.

Calgary, Alta.—September 23—Annette Ladies' Wear Store, corner of City Hall, was damaged to the extent of $5,000.

Charlo Station, N.B.—September 24—Richards' lumber mill, operated by the Continental Lumber Co., was destroyed. The loss, which is $500,000, was partly covered by insurance.

Chapleau, Ont.—September 17—Chapleau fire hall damaged by fire. The cause of the fire is unknown, but the loss is covered by insurance.

Cheltenham, Ont.—September 19—Elevator and granary damaged by fire. The fire is believed to have been caused by a spark from a passing train.

Church Point, N.S.—September 20—Presbytery in connection with St. Ann's College was destroyed, entailing a loss of over $20,000, of which there is insurance of $6,000.

Doon, Ont.—September 22—Warehouse of the Doon Twines, Ltd., was destroyed. The loss is estimated at $30,000.

Fallowfield, Ont.—September 27—Barns of Hugh Lytle were destroyed by fire, and the barn owned by William Tierney was also destroyed. The fire was caused by lightning. The total loss was $20,000.

Hamilton, Ont.—September 17—Residence of A. E. Vollick, 118 Bay Street, was damaged by fire. The fire was caused by a defective oil stove. The loss is estimated at $1,000.

September 19—Art and Gift Store, 759 King Street East, was damaged by fire. The loss is $1,500. Fire is believed to have been caused by spontaneous combustion.

Havelock, Ont.—September 23—Thompson Block, occupied by G. R. McGregor, was damaged by fire. The loss is $12,000, partly covered by insurance.

Herbert, Sask.—September 21—Plant of Saskatchewan Co-operative Elevator Co. was destroyed by fire.

Ingersoll, Ont.—September 20—Apple evaporating plant of O. E. Robinson and Co., Victoria Street, was damaged by fire. The loss is estimated at $[illegible],000.

Kingston, Ont.—September 22—Warehouse of McGowan's cigar factory, corner of Rideau and North Streets, was damaged by fire.

Kitchener, Ont.—September 28—Barn and adjoining buildings of Allen Bleubecher, on the Bridgeport and [illegible] Road were destroyed by fire, the fire being caused by a spark from an engine. The damage is estimated at $6,000.

London, Ont.—September 19—Factory of Everybody's Overall Co., 89-93 Talbot Street, was damaged by fire. The loss is estimated at $20,000.

Sardis, B.C.—September 18—Kilns of the British Columbia Hop Co. were destroyed by fire. The loss is covered by insurance.

Stratford, Ont.—September 28—Stables of Duncan and [illegible] were damaged, causing a loss of $2,500.

Tofield, Alta.—September 20—Store belonging to J. [illegible] was destroyed. The loss is $[illegible],000.

Toronto, Ont.—September 28—Building occupied by A. Gagnon at [illegible] King Street East was damaged by fire.

Watford, Ont.—September 18—Residence of T. Dodds, Erie Street, was damaged by fire. The fire is believed to have been caused by a spark from the stove.

Winnipeg, Man.—September 25—Buildings of D. Libman, thirteen miles north of Winnipeg, on the Selkirk Road, were destroyed by fire. The total loss is $34,885. The fire is believed to have been caused by incendiarism.

ADDITIONAL INFORMATION CONCERNING FIRES

Blaine Lake, Sask.—August 25—Garage and adjoining dwelling of Larsen Brothers was damaged by fire. The loss was $9,000, with insurance of $2,200 in the London and Lancashire, and Mount Royal.

Chilliwack, B.C.—August 18—J. P. Knight, fire chief of Chilliwack, B.C., has sent the following statement regarding the fire in that town on August 18th. The fire started in a small room behind a tobacco store belonging to Mr. Green.—

	Total loss.	Insurance.
Mr. Green, building	$ 5,700	$ 5,700
Mrs. Harrison, building	2,000	......
Mrs. J. Ward, building	4,800	4,000
Chilliwack Shoe Store, contents	17,150	16,500
Mrs. J. Ward, building	700	......
Chilliwack Electric, contents	7,426	2,000
Barret Banford, building	1,500	1,000
H. Huston, contents	700	700
Hentey and Yates, building	800	400
Mrs. Rorrison, plate glass	120	120
B. A. Irwin, plate glass	140	....
H. J. Barber, plate glass	378	378
F. Leary, signs on glass	42	42
	$41,451	$30,835

London, Ont.—September 8—C.P.R. warehouse destroyed by fire. The fire was caused by spontaneous combustion. The total loss to buildings and contents is $70,000 and the insurance is not yet known.

Montreal, Que.—September 9—Fire occurred on the premises of the Allen Glove Manufacturing Co., 333 Frontenac Street. Insurance as follows: Fidelity Phenix, $12,500; Home, $11,000; North America, $10,000; Employers, $10,000; Globe Indemnity, $7,000; National, of Hartford, $5,000; Canadian, $5,000; Rochester, $5,000; Girard, $5,000; Scottish Union, $5,000; Car and General, $5,000; Yorkshire, $5,000; Great American, $5,000; Fire Insurance Co. of Canada, $5,000; Century, $7,500; Royal Exchange, $5,500; Northern, $3,500; Ætna, $3,500; Liverpool and London and Globe, $3,000; New York Underwriters, $3,000; General, of Perth, $3,000; Providence Washington, $3,000; Hartford, $3,000; Globe and Rutgers, $2,500; Equitable, $2,500; Caledonian, $2,500; General Accident, $2,500; Westchester, $2,500; Niagara, $2,500; Glen Falls, $2,500; National Union, $2,500; Norwich Union, $2,500; British Crown, $2,500; Union of Canton, $2,500; British Dominions, $7,000; British General, $2,000; Imperial, $2,000; Canada Securities, $1,500. Total, $168,000. Loss, $150,000. On use and occupancy: Palatine, $2,500; Quebec, $2,500; London and Lancashire, $2,500; Union of Canton, $2,500; Girard, $2,500; British Empire, $2,500; Globe and Rutgers, $2,500, Hartford, $2,500; Queensland, $2,500; London Guarantee, $2,500. Total, $27,000.

Simcoe, Ont.—August 25—Building of Wm. Jacques and Son was damaged by fire. The fire was caused by spontaneous combustion. The total loss was $20,000, with insurance of $8,000 in the following companies: Alliance, Fidelity-Phenix, [illegible], [illegible], Union Casualty, Niagara, London and Lancashire, and Dominion.

Timmins, Ont.—September 18—Sawmill and three dwellings were damaged by fire. The loss was $20,000, with insurance of $8,000.

Tweed, Ont.—September 2—Residence of Guss Thompson destroyed by fire. The loss is $600, with insurance of $525 in [illegible] Insurance Co.

Solvency of Fraternal Benefit Associations*

Review of Legislation Affecting Fraternals—Canadian Provinces Have Been Negligent, but Dominion now has Good Law—Deficiency in Funds Must be Faced by Old Members, and New Members Must be Protected by Segregation of Funds

By FRANK SANDERSON, M.A., LL.D.
Consulting Actuary, Ontario Department of Insurance

THE vital importance of fraternal benefit societies to the home, to the community and to the state has for many years been generally recognized. The state sustains an important relation to these benefit-granting societies and that relation naturally expresses itself in legislation.

The question of legislation in reference to fraternal orders is both difficult and delicate. In dealing with this subject, much strong feeling has been engendered in years gone by in Great Britain, the United States and Canada. The problem is still with us and will not down until properly settled. Recent and prospective legislation in the United States and Canada touching the financial position of these societies is demanding attention on every side. The present magnitude and extent of the operation of fraternal societies in America is seen by these striking facts:—

Annual benefits paid (1919) .	$ 150,000,000
Number of members	10,000,000
Amount of insurance	$10,000,000,000

A New Method of Approach

It has been my privilege in recent years to devote some time in viewing the situation as to fraternal benefit societies from the inside as well as the outside. I have come into the closest contact with many officials and insured members in their chief legislative meetings when questions as to the solvency and readjustment of rates and benefits were under discussion. I have endeavored to study the human elements as well as the actuarial and financial factors that enter into the solution of the questions that are still live issues both for the societies themselves and for government officials.

May I, therefore, begin by stating a conviction arrived at by close touch with the main issues involved that the time has arrived when a better method of approach than has too often prevailed must be applied to the problem of bringing all such societies to a sound position. Until a comparatively recent time the method of approach to all studies of investigation was largely the dogmatic and [illegible]. That method is now largely set aside by the educated modern mind. The last quarter of the last century and the opening years of this century have made it manifest that the true way to approach the study of any subject, whether it be science, economics or religion, is the historical method. We have now come to realize that we can never understand anything until we find out how it came to be. "The history of a thing is the thing." To trace the growth of an institution is the only possible way to get at its meaning. So the historical approach is characteristic of all intelligent intellectual effort to-day. It traces effects to their causes, reconciles divergences and softens our asperities. Instead of fighting our opponent, we explain how he came to be. Thus tolerance and comprehension take the place of dogmatic argument, invective and denunciation.

Approached from the historical point of view, we enter upon the investigation of fraternal insurance and its problems with a comprehensive and sympathetic appreciation of how things came to be as they are. From an historical review of what has been done in different parts of the world to improve by legislation and otherwise the financial position of these societies, we are in a better position and attitude of mind to point the way for the better protection of both their present and prospective members.

Evolution of Fraternals

The late Sir George Hardy, ex-president of the Institute of Actuaries, has truly pointed out that friendly societies "were originally purely social in character, subsequently charitable and mutually protective, and only in recent times financial."

Here, then, we have in a sentence the genesis and evolution of friendly societies, or, as they are generally called in America, fraternal societies. Thus by seeing historically how the emphasis changes from the purely social, first to the charitable, then to the mutually protective and then to the financially developed insurance character, we are in a better position to apply appropriate methods and legal enactments to remedy any existing shortcomings in this institution which has its roots so deeply imbedded in the human family.

The foregoing states briefly and conveys a broad general principle—a method of approach, an attitude of mind, that everything turns on a right approach. My subject now requires me to narrow the application of this principle to the question of "Legislation as to the Solvency of Fraternal Societies." In the application of the historical method one naturally asks what steps have been taken in the past to correct by legislation defects in friendly society finance. From a comprehensive view of past successes and failures in these attempts and from an intelligent understanding of present requirements we may the more surely blaze out the safe legislative path for the days to come. I would ask, therefore, that instead of the microscope we use the telescope and take a rapid historical survey of legislation in Great Britain, United States and Canada, looking towards an improvement of the financial condition of these societies. I am convinced that such a survey will satisfy both fraternalist and legislator that on this side of the water, and on this side of the boundary line the sins of statutory omission will produce a chastened sense of humility and a true repentance which should lead to "acts" of righteousness "writ large on the statutes of provincial legislatures.

---

*An address before the conference of provincial superintendents of insurance, Winnipeg, October 7, 1920.

Provincial Legislation

Prior to the year 1916, no provision for regular valuations of the insurance certificates of fraternal societies existed in the laws of any province of Canada, nor in the Dominion Insurance Act. This was not due to the oversight or shortcoming of the superintendents of insurance, but to the fact that for years outside influences at work rendered it impossible for either insurance departments or members of parliament and legislature to carry out desirable legislation and needed reforms. It was not until the laws of nature and arithmetic, together with the general trend of public opinion both inside and outside fraternal ranks, had made such legislation possible of enactment that we find the first requirement for the valuation of the certificates of fraternal societies placed on the statutes of any province of Canada. The adoption in the United States of the Mobile Bill and the New York Conference Bill created the atmosphere and the occasion for the passing by the Ontario legislature of amendments to the Ontario Insurance Act embodying several of the valuation and other requirements of the United States Acts just mentioned.

The new Ontario Act passed in 1916 did not, fortunately, include the ineffective section of the New York Conference Bill known as section 23 (B) previously referred to. On the other hand, it did not provide for annual actuarial valuation reports to the insurance department as required by both the Mobile Bill and the New York Conference Bill, but only for a valuation every three years. Nor did it provide for any improvement in the degree of solvency of a society from triennium to triennium, no matter what the degree of actuarial insolvency, but was content with the condition of "not getting worse." It provided that if at any triennial valuation subsequent to 1917 the society had gone backward as to the solvency, then a restoration is supposed to be made up to the 1917 degree of solvency within two years, or thereafter the rates for new members are to be those known as the Hunter rates, and these contributions kept apart from other funds of the society, and further, if at next triennial valuation no improvement be shown, then the new members were supposed to be placed in a separate class and their certificates valued as an independent society in respect of contributions and funds.

Other provisions were incorporated, but the above are the vital parts of the 1916 Ontario amendments as to solvency.

Provisions Rendered Ineffective

Unfortunately, by some strange action or suggestion, an amendment [illegible] was added at the end absolutely nullifying the foregoing provisions as to a society maintaining its degree of solvency by the proviso that unless the governing body of the society at its annual meeting voted itself within the application of these new local provisions, the said provisions should not apply or have any effect. To the credit of the officers and executive of the Canadian Fraternal Association be it said that they made more than one effort to have this remarkable clause eliminated, but unfortunately without success.

No society having since voted itself within the operation of these special solvency clauses, they are therefore now actually "dead wood" in the Ontario law. It should be recorded that at the last session of the legislature the present superintendent of insurance recommended the elimination of the objectionable clause, but owing to certain representations it was allowed to stand until the next revision of all the provisions as to valuation and solvency. When we remember that in Great Britain compulsory actuarial valuations for friendly societies have now been required for about half a century, and various other allied returns for a much longer period, it cannot be admitted that our legislators in Canada have been guilty of breaking the speed limit in legislation touching the solvency of fraternal societies. The fact is adequate, and effective legislation on this vital question is long overdue on provincial statute books, and the Ontario law of 1916 is sadly in need of being replaced by a more worthy substitute.

"Mr. Sanderson here reviewed legislation in Great Britain, where compulsory actuarial valuation and publication of the actuarial balance sheets are required, and have helped to bring the leading British Friendly Societies to a high degree of solvency. Regarding the United States, the New York Conference Bill, which is in force in about [illegible] states, provides that a society is not to get into a worse condition [illegible] but does not compel solvency.

Deficit is Big Handicap

The hopelessness of a large society, say 50 per cent. solvent, with a deficiency say, of $10,000,000, ever overcoming this deficiency by any mere makeshift methods and without honestly facing a readjustment of rates or reduction of benefits is manifest by the annual loss from interest alone—a loss of 5 per cent. of $500,000 per annum on the deficiency. The increase in liability due to increase on age works much faster in such a case than any increase in assets from year to year.

There is still a field for the worthy friendly society, but the faithful and intelligent fraternal leader must have his hands upheld by sane and effective legislation which will make it easier for the sound and solvent society to succeed and more difficult for the unsound and unrepentant society to trade upon the credulity of the public. May our provincial superintendents be endowed with a high sense of official duty and a fine sense of appreciation of the needs of the fraternal society.

Dominion Legislation

Until the year 1919 no provisions appeared in the Dominion Insurance Act as to actuarial valuation and solvency requirements for fraternal societies, notwithstanding urgent representations of the insurance department on the subject. An interesting history of the rise and departure of the non-fraternal "assessment associations" could be told, but I must turn at once to the recent Dominion legislation of 1919 when the old "Assessment Life Insurance" portion of the act was at last wiped off the statutes of Canada, and a more worthy portion known as "Part II A Fraternal Benefit Insurance" took its place. This is the most advanced and worthy piece of legislation dealing with fraternal societies that has yet appeared on this side of the Atlantic, even though it bears evidences of compromise to meet untoward circumstances. It is a straightforward and honest attempt to deal with a perplexing subject in a way that reasonably satisfies public needs, and at the same time carries the judgment and tacit approval of the more reliable fraternal leaders. It avoids the marked weaknesses and the "put-off-till-to-morrow" policy so manifest in the American Mobile Bill and New York Conference Bill, which, it now appears, already need amendment.

Touching the Dominion Act let me quote the opinion o an outstanding leader of American fraternalists, himself th head of a large American society doing business in Canada which has not yet attained to full actuarial solvency. Ad dressing the Canadian Fraternal Association a few month ago, this prominent and honored fraternalist, Mr D F Markey, of Detroit, ex-President of the National Fraterna Congress, said:—

"The provisions of the (Dominion) Act referred to ar not only drastic and wholesome, but in our judgment shoul be generally welcomed by all fraternal benefit societies doin business in Canada. I [illegible] predicted that such actio would be taken [illegible] years ago or more, not only in Canad but in the United States as well."

Mr. Markey is broad-minded and honest enough to pu his finger on the cause of the present necessity when h added: "We have no one to blame for our troubles in connection with readjustment of rates but ourselves. We were shortsighted, perhaps cowardly in handling the situation. I think we are all satisfied now the laws of mortality are inexorable, and that any institution which attempts to defy them is only sowing the wind and will reap the whirlwind."

The Dominion enactment has this broad, general characteristic. It approaches the solution from a knowledge of the history and genius of the friendly society. It avoids the rigidity of old-line statutory valuation requirements. It is flexible in operation without being vague and loose in conception. It leaves a large degree of responsibility for the society's financial position to the society's actuary, who must, however, be qualified.

For provincial requirements this law would of course, have to be adapted to local requirements, and possibly provision made for embarrassing circumstances that are not provided for in 1925 when all societies licensed under the Dominion Act are expected to have been brought to 100 per cent. solvency.

There is one practical consideration that should commend itself to provincial legislators and superintendents of insurance. This is that the main principles and requirements of the Dominion Act have been the subject of much interchange of view between the Dominion officials and fraternal officials. The debatable ground has been gone over and a workable legislative program agreed upon. This is saying a great deal. As evidence, I have already quoted the head of a leading foreign society. I add an extract from the annual report a year ago of the counsellor of the Canadian Fraternal Association:—

"An agreement was arrived at as a compromise between the views of the committee (of the societies) and those of the superintendent. Representatives of the societies interested in the bill attended before the banking and commerce committee, when all of this amending bill was adopted by said committee without opposition." (The counsellor refers to one minor excepted point which, it is understood, was afterwards arranged.)

Another practical consideration is the fact that several societies which are under provincial jurisdiction have in recent years made readjustments which are claimed to be adequate. They would, therefore, not probably be affected. Others would, it is believed, welcome the advantages which a 100 per cent. solvent condition would open up to them. With the depressing effects of actuarial insolvency out of the way, a new era would open for friendly societies.

What Dominion Act Requires

What then are the broad principles and requirements of the recent Dominion Act? The following is a digest and analysis of the principal provisions of the Dominion Act, especially those dealing with solvency:—

1. Fraternal societies not required to comply with the same actuarial test, nor to make the same amount of deposit as regular insurance companies.

2. A large degree of responsibility and liberty is left to the society's own selected but qualified actuary.

3. A government deposit of $10,000 is required.

4. Before receiving Dominion license a fraternal society shall file, among other statements, an actuarial valuation by a qualified actuary appointed by the society, who shall certify as to the solvency of the society.

5. A foreign fraternal society hitherto transacting business in Canada, and at present unable to furnish an actuary's certificate of 100 per cent. solvency, may, if its present rates for new members be considered adequate and if otherwise eligible, receive a provisional license annually until 1st March, 1925, after which the society must comply with section (4) above (i.e., be 100 per cent. solvent), in order to renew its license.

6. A provisionally incorporated fraternal society desiring a Dominion license and unable to furnish an actuary's certificate of 100 per cent. solvency on an officially approved basis may, subject to the other provisions of the Act, obtain a license either by depositing with the government adequate reserves on new certificates after date of license, or, by placing new members on adequate rates, and in a separate class, with their funds held exclusively for such class. Such license may be renewed annually until 1st March, 1925, after which the society may comply with section (4) above (i.e., be 100 per cent. solvent), in order to renew license.

7. Special provision is made for dealing with a society falling below 100 per cent. solvency. On request (preceded by full investigation), the society must make good the ascertained deficiency within four years, otherwise its license may be withdrawn.

8. Every licensed society shall annually mail to each certificate holder in Canada a copy of the valuation balance sheet on the basis used in the filed annual statement and an explanation of the facts concerning the society's condition thereby disclosed. (The basis of valuing mortuary benefits is the National Fraternal Congress Table and interest at 4 per cent., subject to certain permissible variations.)

9. Copies of policy forms must be filed with the superintendent and shall contain certain standard provisions.

What of the Future?

In the evolution of the fraternal societies to their present position the duty of the legislature may be summed up in these broad but sane official words of an important Royal Commission:—

"The stability of these useful bodies ought to be legislatively assured, and the only method of securing and maintaining that stability known to the science of insurance is to forbid the making of contracts below the actual cost. With regard to their present members, it is not equitable that members hereafter joining and paying rates just equal to actual cost should have their rates affected and their protection imperilled by the needs of those whose provision (rates) may prove inadequate."

This statement recognizes the two sides of the problem requiring legislative solution—the adequate and inadequate rated members. The majority of Canadian fraternal societies being provincially incorporated and under provincial laws the provinces are now face to face with the imperative obligation to improve the law and not to fall behind the Dominion and the United States in the effort to protect the public and give permanent stability to these societies, which can fill many useful functions if assured of their future. Adequate rates and proper reserves are an absolute essential to stability. There is no excuse for a society not adopting adequate rates for new members at this late hour. The view of fraternal leaders may be stated in two sentences addressed to fraternal members:—

"It is a crime to issue certificates upon inadequate rates." (Executive Com. Report, Nat. Frat. Congress.)

"I declare that any person who issues a certificate on inadequate rates is committing a deliberate fraud. Ignorance is no excuse to-day." (The President of an American Fraternal Society.)

Thus adequate rates for new members is a first step.

Segregation of Funds

Another step is then necessary. The most reliable fraternal judgment has recently declared that "the laws should distinctly provide for the segregation of funds accumulated by the payment of those paying adequate rates." (Exec. Com. report, N.F.C.)

The crux of the fraternal problem is of course the readjustment of rates or benefits upon the present inadequate-rate membership, as to which I might say much from actual experience. The New York Conference Bill, now generally enacted in the United States and the Ontario Act both fail to properly protect the new adequate rate members. These laws leave the solution of the inadequate rate class to a slow dying [illegible] that [illegible] the future of a society that will not take effective action. This keeps the whole question of fraternal insurance in uncertainty. So much is this realized both by Insurance Commissioners and the most intelligent and far-sighted fraternal leaders in the United States that a new bill has, after consultation, been drafted this year, and has been approved by the Insurance Commissioners and by the Executive Committee of the National Fraternal Congress. The main purpose of the bill is to require:—

(1) Adequate rates for new members.

(2) Adequate Reserves for new members.

(3) Separation and segregation of reserves for new members.

The Dominion Act of last year largely anticipates this proposed American legislation, and moreover, it makes provision for bringing the whole society to a solvent position within a reasonable time. This Dominion law (9-10 Geo. V. chap. 57) met with the tacit approval of Canadian fraternal leaders when being finally passed.

Suggestions for Provincial Legislation

I do not think it prudent to set out at present detailed provisions for provincial enactment. That can only be done after mutual conference and careful discussion of local situations. But it may be possible to indicate in outline some things that recent legislation and actual experience have made essential for consideration in any effective legislation. I mention the following:—

1. An annual certified valuation of certificates upon an approved basis.

2. Preparation of a valuation balance sheet, and provision for bringing same to notice of each member. Separate valuation balance sheets where there is segregation of reserve as a means of education.

3. Adequate rates for new members, and maintenance of proper reserves therefore, where inadequate rates not readjusted.

4. Separation and segregation of funds of adequate-rate members, where inadequate-rate members not readjusted.

5. Provision for complete readjustment of inadequate-rate members within a reasonable period, with suitable action where the society does not carry out same in the time specified. Also provision for elimination of a future deficiency.

6. Reasonable liberty and responsibility to be left to the society's own selected actuarial adviser, who must be qualified.

I refrain from further comment, and in conclusion I submit again that, in any new endeavor mutual confidence and deference must go hand in hand with the adoption of sound insurance principles. The heart and the head must work together. I thus come back to where I began—a new and better method of approach.

I have purposely avoided actuarial technicalities and figures, but I trust the foregoing illustration of the historical method of approaching the subject may be of some assistance to those who may have anything to do in the future in legislation as to solvency of fraternal societies.

A new uniform provincial law on the subject is one of the needs of the day, and a real service to the public and to the future wellbeing of the societies would be rendered by the passage of such a law in provinces having societies under their jurisdiction.

SUN LIFE JOINS ASSOCIATION

At a meeting of the Association of Life Insurance Presidents, held on Friday, October 1st, the Sun Life Assurance Company of Canada, of Montreal, was unanimously elected to membership in the association, bringing the total of members up to forty-five companies. Of these, thirty-seven are domiciled in the United States and eight in Canada. The Sun Life was organized in 1865, and commenced business in May, 1871. The president and managing director is T. B. Macaulay. Its admitted assets as of December 31st, 1919, were $105,711,468, and its insurance in force on that date amounted to $417,872,[illegible]

RAILWAY QUESTION GOES BACK TO BOARD

Government Will Not Alter Decision—Inland Revenue Expands Rapidly—Two Millions Sent to Germany

(Special to *The Monetary Times.*)

Ottawa, Oct. 7th, 1920.

RAILWAY rates as fixed by the recent judgment of the Board of Railway Commissioners are to stand, at least as far as the government is concerned. The decision to refer the appeal back to the board was reached by the Cabinet on October 5th. An official statement will be made later, but it is learned that the outstanding decision is against disallowance, coupled with a number of suggestions to the Railway Commission to institute further inquiries into various phases of the question, notably the discrimination which, in his judgment, the chief commissioner affirms to exist as between the east and west, to the disadvantage of the latter.

Following a conference of representatives of the provincial governments, held in September, the government has resumed control of fuel through the system of provincial controllers previously used. This move was recommended also by the Board of Railway Commissioners.

The Department of the Secretary of State has despatched two million dollars of Canadian money to the clearing house overseas to be paid to German merchants and individuals in payment of debts owed by Canadians prior to the war and secured from them by the department. In the meantime the department is encountering certain difficulties with the clearing house, which difficulties an official will be despatched overseas to clear up. One difficulty lies in the fact that Great Britain desires that all communications to the clearing house be addressed through the colonial office. The department objects to this. A further difficulty arises from the fact that Canadian claims are being computed in pounds and not in dollars.

Property of alien enemies in Canada held by the department, amounting to a very substantial sum, is to be handed back to them soon. Some of it was in cash, some in jewellery etc. and, so far as possible, it will be handed back in the form in which it was seized. Moneys in the bank to the credit o the interned does not draw interest, however.

Increase in Inland Revenue

There was a net increase of $7,218,367 in the inlan revenue returns for the month of September, according t the statement for the month issued from the office of th deputy minister of the department. The total inland revenu collected for the month was $11,921,287, a gross increase o $7,455,481 over the revenue for the corresponding month o 1919. The chief increase came from war tax, which brough in $8,709,416, an increase of $7,455,298 over the war ta returns for the month of September, 1919. A comparativ statement of the returns from the months of Septembe 1919 and 1920, follows:—

Excise, 1919, $3,389,892; 1920, $3,180,216; decrease $209,676. Excise seizures, 1919, $19,568; 1920, $17,965; decrease, $1,603. War tax, 1919, $1,254,117; 1920, $8,709,41 increase, $7,455,298. War tax fines, 1919, $2,650; 1920, $1 285; decrease, $1,365. Methylated spirits, 1919, $36,141; 192 $12,009; decrease, $24,132. Law stamps, 1919, $559; 192 $311; decrease, $248. Totals, 1919, $4,702,919; 1920, $11 921,287.

Customs returns for the month of September, 192 showed a total of $[illegible],899 collected, an increase of $697 [illegible] over the corresponding month of last year.

A fortnightly freight and passenger service to Icelan from Montreal during the open season and Halifax in th winter will be put in effect if Arni Eggertson, real estat and financial agent of Winnipeg, is successful in the missio he has undertaken for the government of Iceland, from whic country he has just returned. To encourage trade betwee the two countries Mr. Eggertson has been commissioned b the Icelandic government to effect a loan either with th Dominion Government or the banks.

UNEMPLOYMENT AND PUBLIC WORKS

UNEMPLOYMENT has failed to provide the *raison d'etre* for extensive public works planned when the war ceased. In fact, the prolonging of the period of rising prices and labor scarcity has made it seem advisable for governments and municipalities to reduce their construction work to a minimum. This policy is unquestionably sound, and where not followed out dangerously heavy capital charges are being incurred.

But while the post-war reaction has not yet come, there are signs that it is at hand. Quite apart from the war and its reactions, however, regular business crises always produce unemployment. These crises are found to occur at intervals of from seven to sixteen years. The last one in England, the United States and in Canada was in 1914. A crisis follows a period of expansion, and is characterized by a fall in prices, lack of new enterprises, and unemployment. As the business growth of the past few years has been abnormally great, it may reasonably be expected that the next depression will be correspondingly severe.

What can and should the government do to mitigate such a condition? Apart altogether from its function in controlling industry as a whole, the state—and this means the provinces and municipalities as well as the Dominion—is itself an employer of labor. In fact, in Canada it is the largest employer of labor. The possibility and advisability of the state so planning its public works as to keep out of the market for labor and materials in times of expansion, and coming into the market at times of depression, were discussed by W. C. Clark, professor of political economy at Queen's University, in an address on the "Regular Ration of National Demand for Labor by Government Employment," read at the meeting of the American Association of Public Employment Offices held in Ottawa two weeks ago. Professor Clark took the view that the state could perform an effective service by so doing.

But such a question must be considered from the national point of view rather than from that of labor alone. Labor would probably benefit by such action, for the large works undertaken at the time of depression would sustain employment and wages, more than offsetting the adverse effect of the removal of the state from the market when business was good. But under this system public works would be carried on when private industry, the judgment of which may be taken as being generally right, considers new works inadvisable. The most acute stage of the crisis is when prices are still high, but unwillingness to risk the future so great that further expansion ceases and the volume of business contracts; in other words, when the momentum of the rising prices movement carries it beyond the period during which its causes are in play. This would be the logical time for the state to take action. When prices have reached the bottom, on the other hand, and even before they have reached the bottom, private business again plans new work, and its demand relieves the unemployment and lack of markets which was so acute when prices were higher. Recent tendencies have been in the direction of government industry adopting the methods which have proved successful in private industry. The adoption of the above-mentioned policy would be a move in the opposite direction, for it regards public works as a means of adjusting labor supply and demand, rather than something carried on for the welfare of the country as a whole. Should not public policy be to operate state industry for the welfare of the public rather than of a section of the community?

CONDITION OF AMERICAN INDUSTRY

BUSINESS in the United States is below normal, according to an inventory of conditions just prepared by the Liberty National Bank of New York. The information was secured from representative concerns in diversified lines. Forty-two per cent. of those interviewed report the volume of their sales as being above normal. Cancellations, inventories, accounts receivable and transportation difficulties are, generally speaking, excessive. Collections, coal supply and efficiency of labor are, on the other hand, lower than usual. It is the feeling of the majority that a normal situation exists as to accounts payable, availability of materials, and labor supply. It is also a notable fact that 65 per cent of those interviewed are of the opinion that merchandise prices will be lower. The following is a digest of the replies received:

Production.—60 per cent. report production above normal; 22 per cent. report production as normal; 18 per cent. report production below normal.

Sales.—42 per cent. say that sales are above normal; 25 per cent. say that sales are normal; 33 per cent. say that sales are below normal.

Cancellations.—52 per cent. report cancellations above normal; 33 per cent. report them as normal; 15 per cent. report less cancellations than usual.

Unfilled orders.—36 per cent. say that unfilled orders are above normal; 47 per cent. report them as normal; 17 per cent. report unfilled orders below normal.

Inventories.—68 per cent. report inventories in excess of normal figures; 20 per cent. report them as normal; 12 per cent. report inventories below normal.

Availability of materials.—17 per cent. describe conditions as above normal; 55 per cent. report them as normal; 28 per cent. report availability of materials below normal; 100 per cent. complain of a shortage of coal.

Labor.—9 per cent. report a present surplus of labor; 53 per cent. report the availability of labor as normal; 38 per cent. report a shortage of labor in their particular industry; 100 per cent. maintain that efficiency of labor is below normal.

Merchandise prices.—23 per cent. believe that prices will be higher; 65 per cent. that prices will be lower; 12 per cent. that present prices will continue.

Accounts payable.—19 per cent. say situation is above normal; 62 per cent. say situation is normal; 19 per cent. state that they are below normal in this item.

Accounts receivable.—48 per cent. report amount above normal; 40 per cent. report amount normal, 12 per cent. report amount below normal.

Collections.—48 per cent. say collections are running on a normal basis; 52 per cent. state that collections are slow, and in a few instances it is reported that notes are being given by houses which heretofore discounted their bills.

Transportation.—92 per cent. of those interviewed complain of difficulties experienced, only 8 per cent. reporting normal conditions prevailing; 94 per cent. express the opinion, based upon their experience, that transportation conditions are growing better.

THE SECRETS OF THE GREAT

THERE is a way to the top, so we are told. Charles M. Schwab, the American steel magnate, has defined the secrets of success as follows:—

"First. Unimpeachable integrity. This is the very foundation. With this as a starting point the rest will be relatively easy.

"Second. Loyalty. As a rule I find that the university men are loyal. Be loyal to the people with whom you are associated. Give credit always where credit is due, and remember always that it will attract credit to you to give credit to someone else. Make your employer believe that you are with him always, that you are proud to be part of [illegible] in his company.

"Third. A liberal education in the [illegible] of life, of art, of literature, will contribute toward a [illegible] life. Men need imagination, and [illegible] for it.

"Fourth. Make friends. [illegible] [illegible] at the [illegible] that will [illegible] after you have made friends instead of enemies. [illegible] comforts in life, [illegible].

"Fifth. Concentrate. Learn to concentrate and keep [illegible] the problem in your mind until you have reached a conclusion. Don't be afraid of mistakes. Don't [illegible] [illegible] [illegible] [illegible].

"Sixth. Go at your work. You may not find yourself the first year. Don't hesitate to change from distasteful work, but don't change because difficulties come up or trouble arises. Give the best that is in you. Let nothing stand in the way of your going on."

RAILROAD SITUATION STILL TANGLED

THE Canadian railroads are still on the mat. The advocates of railroad bankruptcy have again lined up their case in an appeal to the government, over the head of the Board of Railway Commissioners. Curiously enough, the opponents of higher rates are themselves the greatest users of the roads, and if their arguments are sufficiently insistent they may succeed in getting bad service at the old rates. Can they not be satisfied to pass the increased costs on to the shoulders of the consumer?

There seems to be doubt as to whether it is the surplus of the Canadian Pacific or the deficit of the Canadian National that is causing the difficulty. That a private corporation should make profits is one of the crying evils of the present day; that a public industry should even make ends meet is a slap in the face of its owners. Are not these essential industries to be operated in the public interest rather than for profit, and what limit is there to the bargain on which the public interest will insist? Surely the question of railroad rates is a technical one which the board is competent to decide? Leave the tariff, which is too big to be handled by any commission, for the decision of the political parties and their supporters at the polls.

Restriction of rents will scarcely be a solution of the housing problem.

A miss is as good as a mile, but remember that you are not always missed, says the Safety League.

Chapleau's fire hall has been damaged by fire. Even fire halls must seek the protection of insurance.

President Hanna persists in appealing to the public to support "our railway." It does not yet seem to be clear whether the Canadian National is to be operated as a private road, securing business on the basis of service rendered, or as a government department.

Protesting against rent increases is now the favorite pastime of the demagogue. Have the Toronto clergymen who have complained against high rents estimated to what extent they are due to the great areas occupied tax free by the sectarian institutions which they represent?

Short term bonds, such as Victory Loan due 1922 and 1924, now are obtainable to yield well over 6 per cent., while bonds running for a term of 20 years or over offer an exceptional opportunity for appreciation in market value. These two classes of securities are the most attractive on the market to-day.

"The [illegible] argument for protection in Canada may be illustrated in the rotation of the seasons," says the *Home* [illegible] *Monthly*, which then proceeds to show that now, since [illegible] any longer absorb our surplus [illegible] factories to provide employment [illegible] required to "do the chores" on the [illegible] *Monthly* really think this is why we have protection [illegible] show the prodigal city work[illegible]

DEPARTMENT OF CUSTOMS AND INLAND REVENUE

NOTICE

To Manufacturers, Wholesalers and Retailers

NOTICE is hereby given to all concerned that Returns, accompanied by remittance of Luxury and Excise Taxes, must be made as follows to the local Collector of Inland Revenue, from whom any information desired may be obtained.

Returns of Luxury Tax must be made on the first and fifteenth day of each month.

Returns of Jewellers' Tax, Manufacturers' Tax, and Sales Tax must be made not later than the last day of the month following the month covered by the return.

Returns for Taxes in Arrears must be made forthwith, otherwise the penalty provided by law will be enforced.

By Order of the
DEPARTMENT OF CUSTOMS AND INLAND REVENUE
GEO. E. DUNBAR,
Collector of Inland Revenue,
TORONTO

PERSONAL NOTES

Arthur B. Buckworth was recently appointed general manager of the Pacific Great Eastern Railway, succeeding George E. Macdonald. For the past two and one-half years he has been manager of the Spokane and British Columbia Railway. Born in Birmingham, England, Mr. Buckworth came to Canada with his parents at the age of twelve years and spent his early life in the city of Hamilton, leaving for the Kootenay district in British Columbia when nineteen years of age. After spending two years in Rossland, B.C., Mr. Buckworth resided at Ymir, B.C., a small mining town, for the succeeding fifteen years. Going to Vancouver twelve years ago as representative for E. R. C. Clarkson Company, liquidators, of Toronto, Mr. Buckworth has remained as their Vancouver representative since that time and during the last two years has officiated as manager of the Spokane and British Columbia Railway.

C. G. K. Nourse has been appointed to succeed C. W. Rowley, as manager of the main branch of the Canadian Bank of Commerce at Winnipeg, Man., Mr. Rowley having been appointed one of the superintendents for the central west. The banking career of Mr. Nourse includes service with the Bank of Commerce at Goderich, Ont., and Dawson, Y.T., in other capacities. From 1899 to 1901 he was manager of the bank's branch at Skagway, Alaska, and from there he went to White Horse, Y.T., as manager, which position he held until 1905, when he was appointed to manage the Prince Albert, Sask., branch. In 19[illegible] he became head of the bank's branch at Lethbridge, and [illegible] years later was appointed manager of the Calgary branch, which position he held until his recent appointment.

Walter L. Foster, secretary of the British Columbia Fire Underwriters' Association, Vancouver, B.C., for the past five years, has resigned owing to ill-health.

John O. Hastings, member of the Montreal stock brokerage house of Ryan, Grier and Hastings, has been elected a member of the Montreal Stock Exchange.

D. M. Roberts, who has been with the Toronto investment house of MacKay and MacKay for some time, has been appointed manager of that company. Previous to becoming associated with MacKay and MacKay, Mr. Roberts was with the Toronto office of the United Financial Corporation, Limited.

Fred W. Field, British government trade commissioner in the province of Ontario, left Toronto on October 7th for England, to confer with the Department of Overseas Trade in London and manufacturers and merchants throughout the British Isles. Mr. Field will be away for about three months or more.

Douglas S. McMaster, representative of the stock brokerage house of C. Meredith and Company, Montreal, on the local exchange, is joining O'Brien and Williams, another Montreal stock brokerage house, and will be the floor member for that company. D. E. Crutchlow, another partner of the Meredith company, will be the new representative of that house.

William E. Wilder, who will represent Wood, Gundy and Company, on the Toronto Stock Exchange, has been connected with that firm since leaving Toronto University in 1911. Last year he was made a member of the firm. He is well known among the bond dealers and investors of Toronto and of the Dominion as a whole because of the widespread connections of his company and also through his active participation in the war loan campaigns. In these campaigns he served on the special subscription committees which made such creditable records. Wood, Gundy and Company now have offices in Toronto, Montreal, New York, London, and Saskatoon, and recently were incorporated in Manitoba, with a view to opening a branch in Winnipeg.

OBITUARIES

A. C. McMicken, assistant receiver-general of the finance department of the federal government at Winnipeg, and manager of the Dominion Government Savings Bank, died on October 18, a victim of heart disease.

J. K. Cameron, for many years King's Printer for the province of [illegible], and who resigned that position six years ago owing to ill health, died at Santa Monica, Cal. on October 16, at the age of [illegible] years. Some 38 years ago Mr. Cameron founded the "Northwest Farmer," at Winnipeg.

J. H. Halpenny, of Westboro, Ont., an agent of the [illegible] Life Assurance Company, is dead as the result of an accident when the automobile in which he was riding was struck by a New York Central train near Theresa, N.Y., [illegible] Robertson, superintendent of [illegible] for the Dominion [illegible] who was with Mr. Halpenny, was injured.

THE STERLING BANK

THE
EXCHANGE RATE

II.—What Controls It?

THIS series, published each week, is intended to remove misunderstandings as to the cause of fluctuation in the exchange value of our dollar in other countries.

When the demand for any commodity is greater than the supply, the price of that article is sure to rise.

A foreign dollar is a commodity in Canada, that is something to be bought or sold and not current money, and similarly the Canadian dollar is a commodity in a foreign country and not current money there.

Their value (or rather their price in the local current money) is therefore governed by the law of supply and demand.

The reason foreign dollars are commodities is that they are not "legal tender" outside their own country.

You would not like a debt to you to be paid in German marks or French francs because of the difficulty you might have in converting them into your own currency. At border points in the United States, our immediate neighbors, where exchanging the two currencies is a simple matter, Canadian money is now generally accepted, but elsewhere in that country it is taken reluctantly.

To protect their peoples all Governments provide that creditors may refuse payment of amounts due them unless made in certain specified currencies and the currencies so authorized are called "legal tender."

The banker who receives "foreign dollars" cannot therefore pay them out over the counter so they are not money to him, but only securities, until he can exchange them for currency of his own country.

Next week in No. III. of this series we will explain the method of making this exchange.

THE CANADIAN BANK

SUGGESTS STRICTER LICENSING OF AGENTS

Provincial Insurance Superintendents Discuss Methods of Doing Business—Manitoba's Bank Has Raised Quarter Million

(Special to *The Monetary Times*.)

Winnipeg, October 7, 1920.

THE third conference of the provincial superintendents of insurance was held in Winnipeg from October 4 to 7, with a representative gathering of insurance men of all branches and from all parts of Canada in attendance. At the organization meeting held Monday the following officers were elected.—President, Arthur E. Fisher, Saskatchewan; vice-president, Charles Heath, Manitoba; secretary-treasurer, V. Evan Gray, Ontario.

A splendid address on the regulation of insurance agents, brokers and adjusters was given at the opening session by Mr. V. Evan Gray, superintendent of insurance for Ontario. The speaker said that he was an ardent defender of the agency system, but not in the form in which it was administered in Canada to-day, but in the form in which it might be and would be administered when more fully developed. Suggested remedies by the speaker included the appointment of a commission to enquire into and determine the proper and reasonable rates of commission to be allowed to agents on fire insurance. Mr. Gray also proposed a control and limiting of the persons who may act as insurance agents by an improved licensing system. Insurance adjusters should be licensed in a similar manner, he said.

Speaking upon fraternal societies, Dr. F. Sanderson, actuary of the Ontario Department, declared that there was the greatest need for a readjustment of the insurance rates offered by these societies. In addition to securing adequate rates there should also be adequate reserves, and all societies placed upon a solvent basis. A new uniform law was needed in all provinces having fraternal societies under their jurisdiction.

A splendid paper on hail insurance by W. M. Seller, deputy superintendent of insurance for Alberta, was read Tuesday afternoon. On Wednesday a valuable paper on the "Model Fire Policy Act" was read by Chas. Heath, superintendent of insurance for Manitoba, and one on "Reciprocal Insurance Exchanges," by Chas. M. Howell, of Kansas City, created a good deal of discussion.

Business Marking Time

Ideal weather conditions prevail in the west and thrashing is rapidly being completed. The ground also is in good shape for plowing, and good progress is being made. Business, as a rule, is somewhat quiet, due in part to the fact that farmers in all parts of the country were extremely busy. The outlook for fall business is excellent, and wholesale houses are sending forward large shipment.

The provincial savings organization has to date transferred to the government for the use of rural credit societies over a quarter of a million dollars, having bought treasury bills of the government for this amount. The fact that the organization after forty days' operation has a quarter of a million which it is able to transfer to the government gives promise of future success.

SEPTEMBER BORROWINGS REDUCED IN VOLUME

Total of Provincial Bond Sales Small—No Railway or Industrial Flotations—Amount of New Municipal Financing Increased

SEPTEMBER was a quiet month in the bond market, the total of new financing being $9,389,176 as compared with $16,804,644 in August and $1,494,038 in September a year ago. The low total in September, 1919, was due, of course, to the Victory loan, bond selling organizations devoting themselves almost entirely to that undertaking.

No corporation or railroad issues were floated last month, and the volume of provincial financing was very small as compared with previous months. The total of municipal bond sales was greater, being $5,639,176, compared with $3,404,644 in August and $744,038 in September, 1919, and was made up chiefly of two large issues, namely, Edmonton and Ottawa. Other issues were fewer in number than previously.

A summary of all bond sales last month, with comparisons, follows:—

	Sept., 1920.	Aug., 1920.	Sept., 1919.
Provincial .	$3,750,000	$10,000,000	$ 750,000
Municipal .	5,639,176	3,404,644	744,038
Corporation .	. . .	3,400,000	. . . .
	$9,389,176	$16,804,644	$1,494,038

A Weekly Meeting

THE Directors of this Corporation are men well-known in the commercial, financial and professional life of Canada. They meet weekly to transact business, when estates in the course of administration receive the benefit of their counsel and experience on all matters of importance. All investments of trust funds are made by the authority of the Directors, thus protecting estates, small as well as large, against the uncertainties of individual judgment.

Legislation Respecting Life Insurance Beneficiaries

English Common Law has Been Altered by Legislation in Canada—Statutes Differ in Various Provinces, However—Comparison of Law as Regards Beneficiaries, Division of Insurance, and Children's Insurance

By H. J. SIMS, L.L.B.

Sims, Bray & McIntosh, Head Office Solicitors of the Mutual Life Assurance Co. of Canada, Waterloo, Ont.

FOR a proper understanding of the various provincial enactments in respect to beneficiaries, it would be well for a moment to consider the status of beneficiaries at common law.

In the absence of any legislation the common law rule is that a policy and the money to become due under it belong, the moment it is issued, to the person named in it as the beneficiary, and there is no power in the person procuring the insurance, by any act of his, to transfer to any other person the interest of the beneficiary named in the policy. The interest of the beneficiary is a vested one, subject to be defeated in the event of the moneys never becoming payable within the terms of the contract. In the absence of any contrary arrangement between the company and the assured, an irrevocable trust is created.

Agreements in United States

In order to defeat the common law doctrine the invariable practice in the United States is for the insurance company, when effecting the contract, to permit the assured to change the beneficiary at any time, and most all policies issued in the United States contain provisions to that effect. It is simply a matter of agreement between the company and the assured. So far as I am aware, there is no legislation in any of the various states of the union dealing with this particular branch of the subject and to the best of my knowledge there is none in England.

In Canada, on the other hand, the vested right doctrine at common law has been greatly altered, if not altogether abrogated by virtue of legislative enactments permitting the assured to change the beneficiary, subject, however, to certain restrictions which will be dealt with later on. It has, therefore, not been the practice for Canadian companies to insert a change of beneficiary clause in their policies.

In passing it may be stated that it has been conceded that the rights and status of beneficiaries are matters within the purview of the provincial legislatures.

Advanced Legislation

It can safely be said that Canada has insurance legislation much in advance of most of the older countries and principally in respect to beneficiaries. Many years ago in Upper and Lower Canada the principle was adopted of freeing insurance moneys payable to wives and children from the claims of creditors. In fact, Canada was the first country in the British empire to enact such legislation. The principle has since been extended to [illegible] other beneficiaries and is now an integral part of the insurance acts of all the provinces. Insurance moneys are by statutory enactment in this country [illegible] impressed with a trust, and the contract [illegible] a trust settlement. The [illegible] in Canada [illegible] have been dictated by a recognition of the importance of life insurance [illegible] of the nation [illegible] of the [illegible]

The provinces of Ontario and Quebec have been the pioneers of [illegible] legislation in Canada. The Ontario Insurance Act deals in a most comprehensive way with the whole matter of insurance. Quebec, too, has very complete laws on the subject. The Saskatchewan Insurance Act is practically a counterpart of the Ontario Act. The maritime provinces have used the Ontario Act as a basis for their insurance laws. Much of the legislation in Manitoba, British Columbia and Alberta is similar to that of Ontario and Quebec.

Although there is considerable variation in the statutory enactments of the different provinces concerning life insurance, still the salient features of the various provincial acts are similar. This is particularly true in respect to the benefits conferred on wives and children. At the same time it is to be regretted that there are not uniform insurance laws throughout the various provinces. If there were, it would avoid much confusion, considerable inconvenience and more or less litigation.

It is my purpose now to point out some of the many differences in the various provincial statutes relating to beneficiaries. Before doing so it would be advisable to mention that the law of that province in which the assured resides when the insurance is effected and presumably where the policy is delivered to him, governs the construction of the contract, and some of the courts have also held that this rule applies as well to the rights and status of the beneficiaries, no matter to what province or country they may afterwards remove and notwithstanding any term or condition in the policy to the effect that the law of the province where the head office of the company is situate shall govern. The only possible exception is British Columbia.

Preferred Beneficiaries

Allow me to point out in the first place that the preferred class of beneficiaries differs in some of the provinces. In Ontario, Saskatchewan, Alberta, Nova Scotia and Prince Edward Island the class consists of the husband, wife, children, grandchildren and mother of the assured. In Quebec in the case of a man, it consists of his wife, his children and his wife's children. In the case of a woman it consists of her children. In Manitoba the class is the husband, wife, children and step children. In British Columbia the husband, wife and children are only preferred beneficiaries, while in New Brunswick, the class consists of husband, wife, children, grandchildren, mother, father, brothers and sisters of the assured.

In all the provinces, except Quebec, insurance moneys payable to preferred beneficiaries are not attachable by the creditors of the assured as well after as before payment by the company. In Quebec they are only exempt while in the hands of the company. In that province they are also exempt while in the hands of the company from the claims of the beneficiary's creditors, but not after payment. In Manitoba [illegible] to seizure by the creditors of the beneficiary [illegible] paid over by the company or [illegible]. There is no similar provision in the Insurance Acts of any of the other provinces.

Division Among Beneficiaries

Where the moneys are payable to wife and children, without any apportionment, the law in Manitoba is that the wife takes one-third and the children two-thirds. In Quebec the wife takes half and the children the other half. In all

JOHN R. LITTLE, Managing Director

of the other provinces the wife and children all share equally—i.e., per capita.

In the following instance there is even a greater variation. It is the case of the benefit being solely for a wife who is not designated by name. In the event of her death, there being no further appointment by the assured, the Insurance Acts of Quebec, Manitoba and British Columbia provide that the moneys revert to the assured's estate. In Alberta the moneys go in equal shares to the second wife and children, if there are any. Children of a deceased child take the parent's share. If there are no such beneficiaries the moneys revert to the assured's estate. In Ontario, Saskatchewan and the maritime provinces the second wife is entitled to the benefits. If there is no second wife living when the claim is payable, there is a reversion in favor of the assured's estate.

If the wife being a sole beneficiary is designated by name and she predeceases the assured, there being no further appointment, the statute law of Ontario, Saskatchewan and Alberta provides that the moneys are payable to the second wife and children in equal shares, the children of a deceased child taking by representation. In Quebec, Manitoba and British Columbia the moneys revert to the assured's estate. In New Brunswick and Prince Edward Island the children of the assured are entitled, while in Nova Scotia only the infant children take.

Then, again, in British Columbia and the maritime provinces children of a deceased child do not take the parent's share. In other words, the word "children" does not include grandchildren in these provinces. In all the other provinces grandchildren are included.

Children's Insurance

The laws respecting children's insurance are not uniform. There is legislation in five of the provinces permitting infant insurance to a limited extent. The legislatures of these provinces no doubt recognized the well known dangers arising from the unrestricted insurance of children. There is no legislation in Manitoba or the maritime provinces on the subject.

In Ontario and Saskatchewan a minor over fifteen years of age has an insurable interest in his own life and can take out a policy in favor of himself or for the benefit of a preferred beneficiary or of a father, brother or sister. In Alberta there is similar legislation and the class in whose favor the insurance can be placed is extended so as to include a grandparent. In British Columbia the age limit is sixteen years and there is no restriction as to the beneficiary. In the other provinces there is no legislation enabling infants of any age to insure their lives. If, however, policies are taken out by minors on their own lives in Quebec, Manitoba or the maritime provinces, or even by children under fifteen years of age in Ontario, Saskatchewan and Alberta, and under sixteen in British Columbia, such policies are not absolutely void. They are only voidable at the instance of the infant. In all cases they are binding on the company. It is, accordingly, quite apparent how very unsatisfactory the law is on this particular subject.

In the payment of insurance moneys to which infants are entitled, there is an absence of uniformity in the various provinces. In Ontario if there is no trustee appointed by the assured to receive the moneys, payment must be made into court. In Quebec, in such a case, payment may be made to the testamentary executor of the assured. If the assured dies intestate a tutor may be appointed who can give an effectual discharge on behalf of the infant. In Manitoba, if there is no trustee, the money can be paid to the executor. If there is no executor, payment can be made to the guardian of the infant. In Alberta, in the absence of a trustee, the moneys may be paid to a trust company [illegible] by the court. In certain cases the mother of the infant may be appointed guardian and receive the moneys. In British Columbia and the maritime provinces the moneys may be paid to the assured's executors, or to a guardian or trustee appointed by the court.

Changing Beneficiary

The law in the different provinces dealing with the method of changing beneficiaries is not the same. In Ontario, Saskatchewan and Alberta it has been held that if it appears from the words used by the assured in the declaration that he desires to change the beneficiary, effect must be given to it accordingly. Words of a general character are sufficient as long as the intent of the assured is reasonably plain. The Ontario courts have gone so far as to hold that a document signed in the form of a will by the assured, though not executed in accordance with the Wills Act, and, consequently, invalid as a testamentary document, is effectual as a declaration to vary the benefits of an insurance contract. In Quebec the change must be effected by a declaration in writing endorsed upon or referring and attached to the policy. In the other provinces the declaration to be effective, must refer to the policy by number or otherwise.

It is worthy of remark that in British Columbia there is no legislation enabling an assured to revoke a benefit conferred on an ordinary beneficiary without the latter's consent. It does seem rather anomalous that while the assured may deprive his wife of the benefit of a policy by giving it to his child, he cannot take it from a stranger unless the right to change the beneficiary is reserved in the policy.

Law Should be More Uniform

I think I have cited enough instances to show that in many respects life insurance legislation in respect to beneficiaries differs widely in the various provinces of the Dominion. There are many more. To my mind there is no good reason why such differences should exist. The common law of England prevails in all of the provinces, with the exception of Quebec and even in that province most of the life insurance legislation is similar to that in existence in the rest of the Dominion. Generally speaking, economic and social conditions are the same in Nova Scotia as they are in British Columbia. Furthermore, most of the life companies have agencies in all of the provinces and have policyholders from the Atlantic to the Pacific. Why, then, should there not be uniform legislation throughout the whole of the Dominion? Everyone must admit that it would be highly desirable.

In my humble opinion, it should not be difficult to attain this object. The same broad underlying principles are found in all of the provincial insurance acts. It is true they differ widely in some respects, but not to such an extent that it would be impossible for all of the provinces to get on common ground. The differences are mostly in details, but it is just these details that cause so much confusion, not only to the companies, but to the insuring public as well. A strong effort is being made to have a model fire insurance policy adopted by statute in the various provinces. An equally strong effort should be made to co-ordinate life insurance legislation.

Laws Should be Codified

For one thing, life insurance has become such a great factor in the business world of to-day that the laws relating to the subject should be codified. This course has been pursued to a considerable extent in Quebec as well as in Ontario and Saskatchewan. In Alberta and the maritime provinces the law has only been partly codified. On the other hand the legislation in Manitoba and British Columbia is quite meagre.

Another thing, too. It would seem advisable that all insurance legislation should be gathered together in one act. Ontario and Saskatchewan are the only provinces which have adopted this method. To find the insurance laws of Quebec you have to search through the Civil Code as well as various sections of the Consolidated Statutes. Each of the other provinces has at least two or three separate acts dealing with insurance. How much more handy it would be to have the [illegible] relating to insurance under one cover. The [illegible] available to every one.

It is to be regretted that more care is not taken in the drafting of legislation. In many cases bills are submitted in

YOUR REAL ESTATE

Whenever you feel the need of advice or co-operation about any real estate matter remember that our Real Estate Department is at your service.

We maintain a thoroughly equipped Real Estate Department, in charge of a qualified officer who has had long and successful experience in handling real estate matters of all kinds.

We will welcome the opportunity of discussing your real estate problems.

the dying hours of a session and are hurried through before they have been given proper consideration. After they are proclaimed a part of the law of the land, it is found that they are defective or unjust. They are subsequently amended or repealed. The result is that our statutes are cluttered with useless legislation.

Model Bill Suggested

In conclusion, I would suggest that a model bill be drawn up covering life insurance law and including that very important phase of the subject, the rights and status of beneficiaries. I do not contend that the provisions in the Ontario Insurance Act are perfect. They can be improved on in some respects. The meaning of some of the sections is not altogether clear. The language can often be simplified. On the other hand, most of the Quebec law is admirably clear and concise. It has been very largely codified in that province and the work has been carefully and intelligently done.

There is this to be said in favor of the statutory life insurance law of Ontario and Quebec, that it can readily be used as a frame work for a model act, for the reason that most of the other provinces have incorporated into their acts the main features of the law of the two older provinces. Where the legislation is scant, such as in Manitoba and British Columbia, the enactment of such a bill should be warmly welcomed.

The business of life insurance in Canada has assumed such vast proportions and the insuring public is so vitally concerned, that some concerted action should be taken along the lines above indicated. I understand that the revision of some of the provincial insurance acts are now under contemplation. I accordingly think that the present time is most opportune to bring about a co-ordination of the life insurance laws of Canada.

I desire to congratulate the superintendents on their conference and to express the hope that by reason of their joint deliberations a greater uniformity in all laws respecting insurance will result.

August Bank Statement Reflects Credit Restriction

Call Loans in Canada and Abroad Reduced—Increase in Current Loans Parallel to that in Savings Deposits—Municipal Loans Stand at High Figure—Provincial Borrowings Decrease—Dominion Government Rapidly Using up its Credit—Holdings of Gold and Dominion Notes Lower

	August, 1919.	July, 1920.	August, 1920.	Year's inc. or dec.	Month's inc. or dec.
Deposits on demand	$ 581,300,855	$639,115,025	$ 640,361,707	+ 9.6	+ .15
Deposits after notice	1,196,632,931	1,253,170,413	1,261,617,732	+ 5.4	+ .7
Current loans in Canada	1,011,785,121	1,377,276,853	1,385,170,163	+ 36.9	+ .6
Current loans elsewhere	146,961,315	190,914,052	200,915,211	+ 37.0	+ 5.0
Loans to municipalities	57,536,867	78,792,822	79,912,041	+ 38.6	+ 1.3
Call loans in Canada	95,899,836	115,360,894	113,598,923	+ 18.1	— 1.7
Call loans elsewhere	171,176,578	203,015,209	193,888,245	+ 10.9	— 4.9
Circulation	223,154,556	210,833,686	237,697,617	+ 6.3	— 1.3

Above are given the principal changes in the August bank statement, reflecting the business and financial position of the Dominion during that month. Restriction of credits is clearly seen, while increases in deposits were not very significant. Savings deposits increased about .7 per cent for the month, as compared with .8 per cent previously. The following table shows the trend of the deposit accounts during the past thirteen months:—

	Deposits payable on demand	Deposits payable after notice
1919—August	$581,300,855	$1,196,632,931
September	640,717,015	1,227,157,747
October	705,280,241	1,262,746,981
November	728,657,587	1,177,868,277
December	701,429,292	1,158,086,690
1920—January	621,108,021	1,160,297,0[illegible]
February	620,869,777	1,187,027,707
March	637,112,028	1,197,719,470
April	642,918,760	1,209,575,090
May	615,917,229	1,229,073,515
June	659,[illegible]	1,24[illegible]
July	639,115,025	1,253,170,413
August	640,361,707	1,261,617,732

The trend of deposits during the past six years is shown in the following table:—

August	On demand	After notice	Total
1915	$384,022,171	$ 62[illegible],026	$1,0[illegible]
1916	442,317,27[illegible]	80[illegible],087	1,2[illegible]
1917	[illegible]9,995,[illegible]	9[illegible]2,[illegible]91,82[illegible]	1,[illegible]
1918	[illegible]1,906,[illegible]17	[illegible]14,[illegible]11,867	1,[illegible]
1919	581,300,855	1,196,632,931	1,[illegible]
1920	640,361,707	1,261,617,732	1,[illegible]

Current Loans Increased

Current loans in Canada increased by about .6 per cent., or slightly less than the advance in savings deposits. The increase for the year is large, however, being nearly 37 per cent., as compared with about 5½ per cent., in notice deposits. It is a notable fact that current loans are in excess of savings deposits by about $124,000,000, while a year ago the position was vice versa. A reduction of about $2,000,000, or nearly 2 per cent., is shown in call loans in Canada. The following table shows the trend of the Canadian loan accounts since August, 1919:—

Loans.	Current in Canada.	Call in Canada.
1919—August	1,011,785,424	$ 95,899,836
September	1,058,572,202	96,912,709
October	1,104,910,160	100,549,290
November	1,183,408,423	121,754,469
December	1,207,109,040	125,888,760
1920—January	1,2[illegible]2,063	132,015,334
February	1,257,015,902	127,251,919
March	1,322,267,050	128,233,310
April	1,347,[illegible]8,230	125,644,859
May	1,349,079,981	119,114,493
June	1,365,151,083	115,272,587
July	1,377,276,853	115,360,894
August	1,385,170,153	113,598,923

J. C. SAUNDERS *Deputy Minister of Finance*

at the credit of the Dominion government decreased by about $17,000,000, while the amount due to provincial governments was also lower.

Cash Holdings Lower

Holdings of gold, subsidiary coin and Dominion notes, which have been steadily declining during the past few months, were still further reduced, the following figures showing the decrease for the month under review:—

Gold and sub-coin in Canada	—$1,081,231
Gold and sub-coin elsewhere .	24,451
Total	—$1,105,682
Dominion notes in Canada . . .	—$2,852,552
Dominion notes elsewhere	—30,844
Total	—$2,883,396

Balances due from banks and banking correspondents outside of Canada increased, while balances due to banks abroad also advanced.

Capitalization Changes

Increases in reserve and subscribed and paid-up capital during the month were as follows:—

Banks.	Capital subscribed.	Capital paid up.	Reserve
Merchants	$216,800	$115,450	..
Royal	330,300	254,920	$127,460
Hamilton	51,500	54,470	27,235

Sterling	.	1	.
Total change	$598,600	$171,477	$154,695

The Spanish River Pulp & Paper Mills, LIMITED

At the Annual Meeting of the Shareholders of The Spanish River Pulp & Paper Mills, Limited, held at Toronto on September 30th, 1920, the following Directors were re-elected:—

Geo. H. Mead. P. B. Wilson. Thomas Gibson. C. E. Read.
T. Watson Sime. G. R. Gray. T. H. Watson.

At a subsequent meeting of the Board the following officers were re-elected:—

President	Geo. H. Mead.
Vice-President	P. B. Wilson.
Vice-President	Thomas Gibson.
Secretary	J. G. Gibson.
Treasurer	A. H. Chitty.
Manager of Operations	C. H. L. Jones.
Woods Manager	G. R. Gray.

President Mead submitted the following report and balance sheet, and the same was unanimously adopted:—

Toronto, Ontario, August 27th, 1920.

To the Shareholders of The Spanish River Pulp & Paper Mills, Limited:—

Your Directors submit the following report of the operations of The Spanish River Pulp & Paper Mills, Limited, including the Lake Superior Paper Company, Limited, for the year ending June 30th, 1920:—

SUMMARY OF INCOME ACCOUNT

Net Earnings for the Year		$3,915,051
Less Reserved for Depreciation		594,620
		$3,320,431
Less Interest on Funded Debts and Other Loans		768,362
Net Surplus for the Year		$2,552,069
Less Appropriation for Contingencies and Government Taxes		350,000
		$2,202,069
Balance of the Consolidated Profit and Loss Account as at 30th June, 1919		2,368,222
		$4,570,291
Appropriated as Follows:		
Accumulated Preferred Dividends to 30th June, 1920, met by issue of Preferred Stock	$2,871,493	
Bond Sinking Fund Reserve	638,000	
		3,509,493
Leaving to be Carried Forward		$1,060,798

The reduced balance carried forward this year as compared with last year is due principally to the distribution of accumulated dividends to preferred stockholders, as indicated above.

After due notice and in accordance with the authority taken when they were issued in 1914, the Company called for payment on 1st February, 1920, the talons and promissory notes issued in respect of the deferred two years' bond and note interest, and also called for payment on the 1st March, 1920, the "A" Debentures issued at the same time. The above indebtedness has now been paid out of the funds raised by the sale of $3,500,000 (out of a total authorized issue of $5,000,000) ten-year serial mortgage lien 6% notes, which were issued in September, 1919. The Company was fortunate in raising these funds in the United States at very reasonable rates, and the expenses in connection with the issue have been largely met by the favorable exchange rates ruling on American Funds.

Under the agreement entered into in 1914, covering the Bond and Note Interest, it was required that the whole of the deferred interest should be paid before a dividend could be declared on the Company's Capital Stock. The payment of such obligations has rendered it possible for the Company to satisfy the dividends on the Preferred Stock accumulated to 30th June, 1920, by the issue of $2,871,493.41 Preferred Stock, representing the amount of such dividends and the proportion (10%) thereof payable to the Bondholders. The relative stock certificates have now been issued.

The production of all plants of the Company continued satisfactorily throughout the year, and with normal water supply and the completion of the two new paper-making units at Espanola, the Net Earnings for the year show a fair increase over the previous year. It is expected that the total output will be considerably greater during the ensuing year, as the Espanola extensions were only recently completed and all plants have now been advanced to a high state of efficiency.

At the last Annual Meeting, Mr. T. H. Watson, of Toronto, was elected by the stockholders a Director of the Company in place of Mr. J. G. Gibson, resigned. Mr. Watson is well versed in the affairs of the Company, and the Board feels that his counsel will be of great assistance.

Your Directors, at the conclusion of a successful year, desire to record their great appreciation of the good service and efficient work rendered by the Officers, Staff and Employees of all Departments, without which the above results could not have been obtained.

By order of the Board.

GEO. H. MEAD, President.

DEBENTURES FOR SALE

DEBENTURES, TOWN OF KENTVILLE

Sealed tenders addressed to the undersigned and marked "Tenders for Debentures" will be received up to noon on October 18, 1920, for the purchase of the following debentures:—

$25,000.00 to pay Water Works Debentures maturing January 1, 1921, in denominations of $500.00 each, and dated January 1, 1921:

$2,500.00 to pay School Debentures maturing January 1, 1921, in denominations of $500.00 each, and dated January 1, 1921:

$1,300.00 to pay Exhibition Ground Debentures which matured on November 1, 1919, in denominations of $100.00 each, and dated November 1, 1920:

$2,300.00 for the purchase of a Chemical Engine for the Fire Department, in denominations of $100.00 each, and dated November 1, 1920.

These debentures redeemable in 25 years.

All of the above debentures will bear interest at six per cent. per annum, payable half-yearly, and said debentures are to be issued under the Authority of an Act of the Legislature of the Province of Nova Scotia passed at the last session.

The highest or any tender not necessarily accepted.

Dated at Kentville, Kings County, N.S., this 27th day of September, A.D., 1920. 246

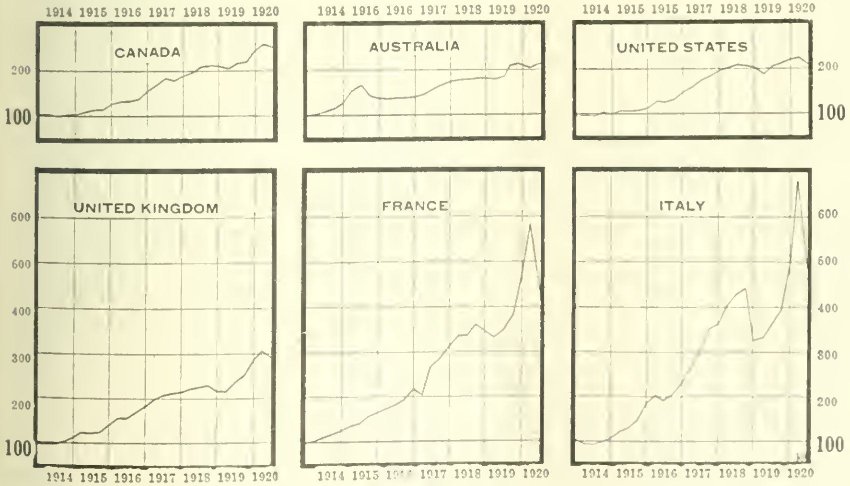
J. CARROLL,
Town Clerk.

MOVEMENT OF WHOLESALE PRICES

"Wholesale prices continue to decline," says the Bank of Commerce Letter for September, "but in Canada, the changes recorded are slight. Food prices remain firm, and those for manufactured necessities, such as clothing, while slightly lower, are not expected to recede to any great extent. Increasing labor, transportation and other costs largely offset the decrease in the price of wool, hides and other raw materials. At present, industry is more settled than has been the case for some time, and the labor supply has improved. These are conditions which conduce materially to efficiency, but as yet the volume of production is not such as to cause much change in the present scale of prices. Changes to conform with the general movement towards credit deflation are desirable, but precipitate declines would create business dislocation."

The accompanying graphs indicate wholesale price movements in various parts of the world during the last seven years.

WHOLESALE PRICES.



The base line (or 100) represents the index number of wholesale prices for the year 1913 in each country named. The quarterly index numbers for the period January 1914 to June 1920 are plotted as percentages of this base.

SEPTEMBER FIRE LOSS UNUSUALLY HEAVY

Large Number of Fires with Heavy Losses—Year's Total Will Probably Exceed Figure for 1919

SEVERAL fires causing damage of $100,000 and over brought the fire loss in Canada in September to the exceptionally high figure of $2,480,485, compared with $1,857,800 for August and $1,940,272 for September, 1919. The loss for the first nine months of 1920 is $18,747,398, and for the corresponding period in 1919 it was $17,757,093. The September loss, as estimated by *The Monetary Times*, was made up as follows:—

Fires exceeding $10,000	$1,897,885
Small fires reported	82,600
Estimate of unreported fires	500,000
	$2,480,485

The Monetary Times' record of the past four years shows the following monthly losses:—

Month.	1917.	1918.	1919.	1920.
January	$ 1,918,660	$ 2,688,556	$ 3,915,290	$ 2,637,850
February	2,009,953	2,243,762	1,091,834	1,895,575
March	2,050,650	1,682,286	2,154,095	1,793,200
April	1,317,714	3,240,187	1,080,070	3,229,500
May	1,163,110	3,570,014	1,785,130	2,001,819
June	1,184,627	3,080,982	3,337,530	1,424,319
July	1,101,734	3,369,684	1,118,377	1,426,850
August	1,230,183	3,110,445	1,374,495	1,857,800
September	1,301,700	917,286	1,940,272	2,480,485
October	704,605	5,119,145	1,023,288	....
November	959,049	1,059,580	2,339,870	....
December	5,144,100	1,733,917	2,047,496	....
Totals	$20,086,085	$31,815,844	$23,207,647	$18,747,398

List of Large Fires

The following are the September fires causing damage of $10,000 or over:—

Belleville, Ont., Sept. 1, residence, $12,000.
Capilano, B.C., Sept. 4, sawlogs, $50,000.
Gatineau Point, Que., Sept. 5, business section, $30,000.
Guelph, Ont., Sept. 1, store, $10,000.
New Westminster, B.C., Sept 2, plant, $70,000.
Ottawa, Ont., Sept 5, rink and dairy, $150,000.
Vancouver, B.C., Sept. 2, Tunstall Block, $30,000.
Cloverdale, B.C., Sept. 4, shingle mill, $40,000.
Limoilou, Que., Sept. 7, church, $20,000.
Montreal, Que., Sept. 9, plant, $200,000.
Powell River, B.C., Sept. 9, sawmill, $115,000.
Timmins, Ont., Sept. 11, planing mill, $10,000.
Toronto, Sept. 10, plant, $15,000.
Winnipeg, Man., Sept. 11, Forrester Block, $13,000.
Allanburg, Ont., Sept. 17, barn, $19,000.
Barriefield, Ont., Sept. 18, military huts, $100,000.
Brockville, Ont., Sept. 21, business section, $200,000.
Chester, N.S., Sept. 18, plant, $35,000.
Halifax, N.S., Sept. 14, store, $25,000.
Hillhurst, Que., Sept. 17, barns, $30,000.
Liverpool, N.S., Sept. 17, plant, $20,000.
Winnipeg, Man., Sept. 17, building, $12,000.
Brockville, Ont., Sept. 21, building, $45,000.
Charlo Station, N.B., Sept. 24, lumber mill, $500,000.
Church Point, N.S., Sept. 20, building, $20,000.
Doon, Ont., Sept. 22, warehouse, $30,000.
Fallowfield, Ont., Sept 27, barns, $20,000.
Havelock, Ont., Sept. 23, Thompson Block, $12,000.
London, Ont., Sept. 19, factory, $20,000.
Winnipeg, Man., Sept. 25, buildings, $34,885.

Analysis of Causes

Among the causes reported were: Sparks 3, oil lamp 1, electric storms 5, defective wiring 1, incendiarism 3, hot ashes 2, sportaneous combustion 5.

The following structures were destroyed or damaged: Plants 12, barns 19, huts 8, business sections 6, stores 5, churches 3, buildings 5, hotel 1, mills 3, residences 7, warehouses 2, garages 3, icehouse 1, fire hall 1, elevator 1, rink 1.

Comparison of Deaths

The record of deaths from fire has been as follows:—

Month.	1913.	1914.	1915.	1916.	1917.	1918.	1919.	1920.
January	14	26	3	10	21	28	13	22
February	21	18	11	23	19	87	26	30

MONTREAL AND QUEBEC SAVINGS INSTITUTIONS

From the figures given below, it will be seen that the position of the Montreal City and District Savings Bank and the Caisse d'Economie de Notre Dame, of Quebec, was not materially changed in August, 1920. Savings deposits increased, while the Dominior government reduced its deposits with those institutions. Holdings of Dominion, provincial and public securities were increased and Canadian municipal securities decreased. Cash in hand and on deposit with chartered banks was greater in amount Loans on securities, as in the case of other banks, were lower. The principal figures, with comparisons, are as follows:—

MONTREAL CITY AND DISTRICT SAVINGS BANK

	August, 1920.	July, 1920.
Dominion gov. demand deposits	$ 285,043	$ 335,043
Notice deposits	43,554,974	43,043,074
Total liabilities	44,241,990	43,859,230
Government and other securities	12,087,034	11,865,077
Cash in hand and on deposit	7,103,422	6,831,303
Canadian municipal securities	15,157,414	15,191,511
Loans on bank stocks	789,693	796,057
Loans on other securities	9,307,661	9,395,848
Total assets	47,323,665	46,962,161

CAISSE D'ECONOMIE DE NOTRE DAME

	August, 1920.	July, 1920.
Dominion government demand dep.	$ 43,628	$ 68,628
Notice deposits	10,729,619	10,292,696
Total liabilities	11,148,894	11,142,675
Government and other public securities	1,679,093	1,679,093
Cash in hand and on deposit	1,302,238	1,287,284
Canadian municipal securities	4,078,615	4,104,615
Loans on bank stocks	312,866	310,385
Loans on other securities	3,183,529	3,182,692
Total assets	13,045,404	13,039,184

Your Railways and the Cost of Living

BEFORE the Privy Council at Ottawa protest against the New Railway Rates has been made on the ground that the giving of the New Rates would raise the cost of living by a percentage many times higher than the percentage actually charged by the Canadian Railways.

It was pointed out that the numerous middlemen who act as the distributors of goods would each add his percentage of profit to the freight rate, so that although the railways might receive say only 10 cents additional freight charge on a shipment, the public would be forced, by the distributing middlemen, to pay many times that amount.

The managements of the various Canadian Railways desire, through this their association, to draw the attention of newspaper readers to the highly significant fact that the recent increase in United States Railway Rates—an increase similar to the increase in Canada—*has actually been followed by a decrease in the cost of living in that country.*

Furthermore,

A great Canadian manufacturer recently made public—without any solicitation and without the previous knowledge of the Railway managements—figures which proved that the retail selling price of a yard of plain white cloth in Winnipeg, after being hauled from Montreal to Toronto and Toronto to Winnipeg, would be increased only one-half a cent, *even after the wholesaler had added 20% profit to the new freight rate and the retailer another 50%.*

He showed that these distributors, whether rightly or wrongly, added 15 cents to his mill-price of 16 cents per yard.

Yet the railways carried the raw cotton for this yard of goods from Texas to Montreal, and the finished goods from the mill to Toronto and Toronto to Winnipeg for one-and-one-half cents.

One-and-one-half cents as against fifteen cents.

We venture to believe that whatever the explanation or the justification may be, the same serious additions to cost by the distributing trades will be found in relation to almost every article of common household use.

This is not to attack distributors. They may themselves be victims of a bad system or of an overcrowded trade. But it is to point out that if they add whatever percentages they, as a trade, find convenient *on top* of the freight rates the Railways cannot help either themselves or the public. The oppressive results of these practices should not be charged against the Railway managements, nor cited as reasons for holding freight rates down—merely because railway rates *can* be held down—while other prices soar as the various trades find necessary.

RAILWAY charges always must be a serious item in determining cost of production, but the management of your Railways urge upon your attention this fact: that antiquated, overloaded and wasteful systems of distributing goods are much more properly a subject for public anxiety.

Canada cannot prosper without prosperous railways. Canadian railways cannot prosper unless Canada prospers.

In all sincerity let us suggest that the people of Canada beware of those who would restrict and even strangle the railways, *simply because control exists there—and is not so convenient in other departments of commercial activity.*

The Railway Association of Canada

HALIFAX EXPLOSION CASE FINALLY SETTLED

Neither Vessel Responsible for Damages, Says Privy Council in Deciding Case on Which Opinions of Supreme Court Judges Were Divided

THE Privy Council of Great Britain has dismissed the appeals made by both parties from the decision of the Supreme Court of Canada in the case of *the Imo v. the Mont Blanc*. These were the two ships which collided in Halifax harbor on December 6, 1917. The Supreme Court's judgment of the case was announced on May 19, 1919. The owners of the "Mont Blanc" claimed $2,000,000 as damages and the owners of the "Imo" counter-claimed for a similar amount. In reporting the case, the "Law Times" says:—

Mr. Justice Drysdale, assisted by nautical assessors, tried the case at Halifax. The trial occupied 13 days. The judge pronounced the "Mont Blanc" solely to blame. The owners appealed to the Supreme Court of Canada, and the appeal was heard by the five judges, two of whom found the "Mont Blanc" wholly to blame, two found the "Imo" solely at fault, and the fifth judge was of opinion that both were equally responsible. In the result the Supreme Court allowed the appeal and held both ships equally liable. From that decision both sides appealed.

How Collision Occurred

At the time of the disaster the "Imo," belonging to the port of Christiania, was going in ballast to sea on a voyage to New York under a charter made between her owners and the Belgian Relief Commission. The "Mont Blanc" was the property of La Compagnie Generale Transatlantique, and was going from New York to Halifax with a full cargo of picric acid, T.N.T., benzol and guncotton, belonging to the French government. Each was in charge of a qualified pilot. The collision took place in about mid-channel while the "Imo" was steering down channel from the Narrows to sea, and the "Mont Blanc" was going up channel, intending to pass through the Narrows. There was, it was admitted, no wind and very little tide, and for all practical purposes there was sufficient visibility.

The "Imo" alleged against the "Mont Blanc" that she was travelling at excessive speed, and that she starboarded her helm and attempted to cross the bows of the "Imo"; that she waited to reverse engines until the instant of or only a few seconds before the collision; that she crossed to the Halifax side of the channel instead of keeping to the starboard side of mid-channel, and that she did not give the proper whistle signals or navigate in accordance with the whistle signals. Stress was also laid on the fact that she had no interpreter on the bridge through whom the Canadian pilot could give orders to the French officers.

The "Mont Blanc" submitted that the negligent navigation of the "Imo" was the sole cause of the collision. It was alleged that, while the "Mont Blanc" was keeping to her right side of the channel and giving appropriate signals, the "Imo" adhered to her wrong side, thus putting the "Mont Blanc" into a position of difficulty when it was necessary to take immediate action. The putting of her helm hard a-starboard was, it was submitted, the best course to have adopted to avoid a disaster.

Negligence on Both Sides

Lord Atkinson, whose judgment was read by the Lord Justice Clerk, went in great detail into the events and the evidence on both sides and, in conclusion, said: Their lordships have, upon the whole, come to the following conclusions: First, that the "Mont Blanc," from the time when she passed the "Highflyer" till she starboarded her helm in the agony of the collision, never left her own water, though she may no doubt before she was actually struck, have forged ahead so as to cross the middle line of the channel. Second, as she steamed up through her own waters her speed was not immoderate. Third, the "Imo," in order to inflict the injury to the "Mont Blanc" which it is proved she did inflict, must have struck that ship with more force and at a higher rate of speed than her witnesses admit. Fourth, the "Mont Blanc" must at the time of the collision have had little, if any, way on her, else the stern of the "Imo" would have been twisted to some extent, which it was not. Fifth, the inclination of their lordships' opinion is that the "Imo" could, when she first reversed her engines, have crossed into and remained in her own water, as she was bound to do, but never did.

It is not necessary, however, absolutely to decide the last point, because, in the case of both ships, it is clear that their navigators allowed them to approach within 400 feet of each other on practically opposite courses, thus incurring risk of collision, and, indeed, practically bringing about the collision, instead of reversing their engines and going astern, as our assessors advise us they, as a matter of good seamanship, could and should have done long before the ships came so close together. This actually led to the collision. The manœuvre of the "Mont Blanc" in the agony of the collision may not have been the best manœuvre to adopt, and yet be in the circumstances excusable. But their lordships are clearly of opinion that both ships are to blame for their reciprocal neglect to have reversed and gone astern earlier than they did. They are, therefore, of opinion that the appeal and cross-appeal both fail, that the judgment appealed from should be affirmed, and there will be no order as to the costs of the appeal and cross-appeal.

SUIT OVER REAL ESTATE DEAL

A suit to recover $198,000 was begun in Winnipeg on September 24 by the Albyn Trust Co., who cite the King's Park Co. as defendants. This action arises out of a real estate deal of years gone by in which the subdivision known as King's Park was the vended property. This property lies between the Agricultural College and St. Norbert and Pembina Highway and the Red River. The plaintiffs are suing on a mortgage, and the defence set up is that as the plaintiffs have failed to make payment on a prior mortgage the defendants are not liable until this obligation is discharged. A counter-claim has also been filed by the defendants for damages for breach of contract in connection with the mortgage sued upon. Argument was to be resumed this week.

VICTORY BOND CONTROL EXTENDED

At a meeting of members of the Montreal Stock Exchange this week it was agreed to extend further the time in which Victory bonds may not be dealt in on the floor of the exchange from October 1 to December 31 next. As generally anticipated, the wishes of the Minister of Finance in this connection were met. It is understood, however, that the resolution adopted expresses the view that the latest extension should be the last one, the majority of the members favoring open dealings in the securities. No action will be required on the part of members of the Toronto Stock Exchange, as the agreement with the local exchange does not expire until the end of the present year.

Notice is given by the Department of Finance that on account of the interest payments due first November the transfer books of the 1918 and 1919 Victory loans will be closed from the 30th September to the 31st October, inclusive. Bonds which are received at the department for transfer after the 30th September will not be transferred until after the reopening of the transfer books on the 1st November.

The city of Quebec may apply to the legislature at its next session for power to municipalize fire insurance, according to a statement made by Ald. P. Bertrand, chairman of the fire committee.

News of Industrial Development in Canada

Backus Interests Reach Agreement with Ontario Government—Publicly Owned Paper Plant Being Considered by "Farmer" Cabinet—Sockeye Salmon Pack will be Greater Next Year Potato Flour Industry Inaugerated in the West—Vancouver Island Suitable for Textile Manufacturing

AFTER weeks of negotiation, an agreement has been reached between the Ontario government and a syndicate represented by E. W. Backus, of Minneapolis, Minn., regarding pulpwood limits and water power in the Lake of the Woods district. The Backus interests asked for the English River limits, but in order to get this concession they must enter into public competition. According to the agreement the first step necessary for the Backus interests is to erect a mill at Kenora and develop the Lake of the Woods limits which they now hold. The only change in the old agreement concerning these limits is a clause where the government doubles the fees on pulpwood, and brings them up to the present standard. The government also grants a lease to the Backus people of the water power at White Dog Rapids on the Winnipeg River, subject to such "rentals, reservations and conditions," as the minister of lands and forests may deem in the public interest. Mr. Backus, who is the owner of the Norman dam at the outlet of the Lake of the Woods, which is an essential work for the regulation of the level of the Lake of the Woods, consents, as a further term of the agreement, to submit to such regulations as to this dam as may be imposed by the minister of lands and forests.

The government has made a stipulation with Mr. Backus that any portion of the newsprint product must be available for sale to Canadian publishers at the instruction of the government. The amount is left open, but it is said that the government could order 100 per cent. to Canadian publishers under the agreement.

Although nothing definite has been stated, a plan for operating a pulp and paper mill as a provincial enterprise is being seriously considered by the Ontario government. According to the plan under consideration, the mill would be established in the Nipigon district at some point to which power could be transmitted from the new Hydro-Electric power development plant at Nipigon Falls. The establishment of a publicly owned and operated plant, such as this, is considered by [illegible] [illegible]able.

An announcement has been made by the government of Ontario that the limits west of Hele township are to be cancelled. These limits are those over which the Provincial Paper Mills, Ltd., Port Arthur, has been cutting for the past few years. The company's cutting permit has expired and the limits are now up for sale. It is the intention of the government, wherever possible, to cancel any timber limit on which the tenderers have cut the amount originally contemplated, so as to do away with excess profiteering in the [illegible] of [illegible] [illegible] the amount to which the tenderers [illegible] entitled.

Sockeye Salmon Pack Large

The [illegible] [illegible] in the Fraser River, British Columbia, [illegible] will be the largest in four years, according to information received from that section. The sockeye salmon return to their spawning grounds in cycles of four years, and it has been stated by government observers that a big year was generally followed by [illegible], and the [illegible] [illegible] gradually [illegible]. [illegible] the [illegible] of the cycle, according to [illegible], [illegible], next year there should be a larger [illegible] than in [illegible] season.

Government returns for July show a considerable increase in the provincial fish catch as compared with the preceding June and with the corresponding period of a year ago. [illegible] the value of [illegible] [illegible] [illegible] [illegible] to Vancouver Island, and of this salmon contributed $397,452, being 36,132 cwts. June's figures were $267,102, and July, a year ago, $342,020. In the Fraser River and in the remainder of the first fishing district, including Howe Sound and Burrard Inlet, the catch aggregated $294,131, and in June the total was $171,284, while in July, 1919, the catch approximated $202,456.

G. L. Dodds, formerly reeve of Arthur, Man., is planning a series of potato flour mills for Manitoba and othe western provinces. Mr. Dodds is a farmer, and is wel known in his district as a practical agriculturist and farn scientist, and expresses confidence in the outlook for th success of the new industry. He stated that not only is the potato flour itself an economical and popular commercia product, but there are by-products, such as starch anc alcohol. Even the residue makes good stock food.

Mr. Dodds says he is now well on the way towards the establishment of the first unit in his series of mills. It wil be built at Melita, which is in the centre of a district know to have a soil particularly adapted to the production o mealy varieties of potatoes—those which make good potat flour. Asked as to the kind of potato which would be raise for the manufacture of potato flour, Mr. Dodds instance the "Bovee." This potato is described as being pink in skin white as the flesh, and markedly dry and mealy. It is sai to ripen early, yield abundantly, and, while it does not at tain to any phenomenal size, is perfect in shape and of fin quality.

Vancouver for Textile Manufacturing

Vancouver Island, British Columbia, according to [illegible] of the big textile manufacturers of Great Britain who hav been there during the past few years, is an ideal place fo the manufacture of textiles. Mr. Thompson, of the Islan Development League, sees other reasons than the climat for advancing the idea. The establishment of the Trans-Pacific service of the Canadian Mercantile Marine will giv service from the Pacific Coast of Canada to British-Ind ports; and with the C.P.R. freight service that is to b extended to the same part of the empire, Indian cotto could be set down on Vancouver Island, manufactured an marketed to points in the prairies and even as far east a Ontario, under conditions that should be more favorabl than can be found in the use of American cotton.

This last has to be imported into eastern Canada fo treatment at the Canadian cotton manufacturing centres fo distribution to the west, and it can be seen that the freight age by water and manufacture at the west coast could no only eliminate the heavier cost of freightage by rail, bu would also do much in the way of encouraging trade withi the nation and [illegible] development on a preferentia [illegible] [illegible] [illegible] universal throughout the empire

Ontario Manufacturing

Ratepayers of W[illegible] have approved of a by-law granting a loan of $10,000 and a fixed assessment of $10,00 for [illegible], to the W[illegible] Co., of Saginaw, Mich which [illegible] [illegible] factory in that munici pality.

A by-law granting a fixed assessment of $10,000 pe annum to the Q[illegible] Manufacturing Co., of Deser [illegible] has been approved by the ratepayers.

Negotiations for the location in Fort William of a larg [illegible] plant for the Four Drive Tractor Co., of Bi Rapids, Mich., were concluded by D. L. Bole, of the Bol [illegible] [illegible]. The manager of the company wa

recently [illegible] conference with Mr [illegible], with the result that the [illegible] company has secured the distributing rights for the company for the whole of Canada. If there is sufficient demand in Canada for the tractor built by the company, the assembling plant will be erected in Fort William, as machine parts can be shipped from Big Rapids and assembled in Fort William considerably cheaper than the complete machine can be put on the Canadian market.

The Bogart Carlough Corporation of Paterson, N.J., manufacturers of steel sash and allied products, have decided to open a Canadian branch at London, and have secured temporary quarters at the corner of Bathurst and Adelaide Streets. They will employ about 150 hands at the start.

The principle of engaging a paid publicity agent to set before the people of Ontario and Quebec the advantages of Timiskaming was adopted at the annual meeting of the Timiskaming and Northern Ontario Associated Boards of Trade at Timmins, Ont., last week. The question of ways and means was left to a committee, which will report at the next meeting of the board at Cobalt early in the new year.

Because of the unfavorable conditions of the market, the Electrical Steel and Metals Co., Welland, has ceased operations. This is the second large industry to close down within two weeks, the other being the British American Shipbuilding Co.

Extension of the present factory of the Steel Co. of Canada, Hamilton, to facilitate the manufacture of wire and wire products, will be undertaken.

Canadian Edison Phonographs, Ltd., have concluded the purchase of a large factory building at St. Thomas, now occupied by Lawson Jones, Ltd., lithographers, and the St. Thomas Cabinets, Ltd., manufacturers of cabinets. The new corporation, which is the Canadian branch of the Edison Co., of Orange, N.J., will engage in manufacturing phonograph cabinets and the assembling of cabinets and phonograph mechanism for the Canadian trade, and eventually for the export trade for all parts of the British Empire. The new corporation has purchased the entire equipment of the St. Thomas Cabinets, Ltd., and much more machinery will be installed in the plant in the near future, and it is hoped that everything will be in shape to turn out the first Canadian made Edison phonograph by June 1, 1921.

Wool Shipment Heavy

Three hundred thousand pounds of wool have so far been shipped from Alberta to the Co-operative Wool Growers' Association in Toronto for disposal, and there are still two carlots to ship, according to a statement from [illegible] L. Richardson, of Calgary. This is a record, as last year the total output was only 260,000 pounds. For some time, states Mr. Richardson, there was no market for wool, but it is now quoted at anywhere from 25c. to 60c. per pound. Mr. Richardson is of the opinion that if any average between these two prices is secured by the Co-operative Association in Toronto for this growth of Alberta wool, it will be most satisfactory. The association this year has handled about 2,000,000 pounds of wool from all parts of Canada.

From all the mines of the Dominion Coal Co., the total output was 261,7[illegible] tons, as against 260,[illegible] tons for the previous period, and 212,6[illegible] in the same month a year ago.

As a result of the report of the investigation committee sent to [illegible] by the British Columbia government to investigate the success of electric [illegible] furnaces, the establishment of the iron and steel industry in the province is expected shortly. An electric [illegible] mill will be [illegible] to handle the large quantity of scrap iron and steel now sent every month to Seattle mills. The committee will also urge the encouragement of the rubber and paper bag industries. It was brought out that [illegible] per cent. of the world's rubber comes from the British Empire and that the raw material can be landed cheaper at the Pacific ports of the province than at Chicago or Akron. They found the great paper bag manufacturers of Chicago using Canadian paper [illegible].

A new plant is being built for the Magnolia Metal Co. of Canada, Ltd., at 77 Sherman St., Montreal, Que. The company have been recently incorporated with a capital of [illegible]

One Hundred Per Cent. Increase in Five Years

The Mutual Life of Canada is celebrating its jubilee year by rounding the two hundred million dollar mark having doubled the amount of assurances in force since the year 1915. This 100% increase in five years is without doubt due to the unsullied record for fair, liberal and equitable dealing with its policyholders, and in the second place to the increasing popularity of the mutual principle in life insurance. The mutual is becoming generally recognized as the most economical, the most democratic and the most equitable system of life insurance. The greatest and most powerful life insurance organizations in the world are mutual and the Mutual of Canada, organized on that basis, is meeting with a similar success. The assets of the Mutual are a source of satisfaction, amounting at present to approximately $40,000,000, guaranteeing every contract and providing a substantial surplus

News of Municipal Finance

Financial Condition of Saskatchewan Municipalities Does not Constitute any Cause for Anxiety on Part of Bond Holders, States Hon. George Langley—Growth of Montreal's Debt—Ontario Municipalities Show Substantial Increases in Assessment

THAT there is nothing to be alarmed over in connection with the financial condition of certain towns in Saskatchewan, is the statement of Hon. George Langley, provincial minister of municipal affairs. This remark was made following publicity in the press of eastern Canada, regarding the affairs of Battleford, Canora and Humboldt. This minister stated that he does not consider that the financial condition of either of these municipalities constitutes any cause for anxiety on the part of the bondholders.

"It is inevitable in a developing province that centres of population should be affected by the location of the railway lines," said Mr Langley. "This has been particularly the case in connection with the town of Battleford. The establishment of North Battleford as a separate municipality on the opposite side of the Saskatchewan River has resulted not only in arresting the growth of the old town but has withdrawn a large amount of the patronage upon which the old town formerly depended. The bondholder, like other investors, has to hazard results under circumstances like these, which are more or less inevitable."

The financial condition of the town of Humboldt has been seriously affected by the fact that although a railway town, the railway itself has not been taxable. "Should the Dominion government, as holder of the majority of the stock of the Canadian Northern Railway, waive its right to immunity from taxation," said Mr Langley, "the town would in a very short time be financially on easy street."

The town of Canora is and will in all probability continue to be the centre of a prosperous farming district, according to Mr. Langley, so that no difficulty should be experienced by the Local Government Board in making an arrangement that will eventually give the holders of its bonds full protection and ensure a settlement that will not entail any loss upon them.

"The statement in the press that the bondholders of the towns mentioned are reported to have shown considerable reluctance to place themselves in the hands of the Local Government Board and thereby sign away their rights without having any intimation in advance of what the Local Government Board will do, surprised me not a little," continued Mr. Langley, "as the board's action has always been taken as much in the interest of the bondholders as in that of the municipalities themselves. The Local Government Board has at all times shown itself ready to allow bondholders to exercise their legal rights if they thought it in their interest to do so. As the towns mentioned form a very small exception to the good standing of the municipalities in Saskatchewan, I think that the general condition is one that merits congratulations rather than otherwise."

At a meeting of bondholders of the town of Melville, Sask., it was decided to recommend that the affairs of the town be placed in the hands of the Local Government Board of Saskatchewan. A communication was read from the secretary of the Local Government Board, conveying the information that the officials at Melville are confident that they will be able to pay up all arrears before the end of [illegible], and a full report by auditors will be placed in the hands of the bondholders in the course of about six weeks.

Woodstock, Ont.—Total general assessment now amounts to $[illegible], an increase of $[illegible] over 1919.

Barrie, Ont.—The assessment roll of the town shows a total valuation of $4,417,794, which is an increase of $[illegible] over last year.

Winnipeg, Man.—Total tax collections during September amounted to $2,[illegible], bringing the grand total to date from May 1 up to $[illegible].

Toronto, Ont.—Total receipts from the civic railway for September amounted to $[illegible], an increase of $[illegible] over the previous month, and $7,957 over the same month a year ago.

Sandwich, Ont.—The town's population has increased from [illegible],643 to 4,153 during the past year, according to figures prepared by the town assessors. Property valuation is placed at $7,716,835, and taxable property, after exemptions, at $6,159,625.

Brantford, Ont.—According to a recent statement made public, assessment figures of the city are as follows: Total taxable assessment, $25,178,505; total exempt assessment, $4,686,900; grand total of general assessment, $29,865,305; total increase in taxable property, $3,4[illegible],185; total increase in business, $321,705; total increase in income, $401,140; total increase in taxable assessment, $1,216,030.

Vancouver, B.C.—Comptroller Pilkington, at a recent meeting of the civic finance committee, urged economy in the various departments of the city during the remainder of the year. A net operating deficit of about $61,000 faces the city, unless certain measures are taken, according to the comptroller. The city is at present making arrangements to engage a tax expert to report and recommend on the best sources from which to obtain more revenue. Civic tax receipts to date this year, according to figures compiled up to the end of September, amount to about $5,000,000.

St. John, N.B.—At a recent meeting of the city council Mayor Scholfield reported that the city's bank overdraft at June 30th last was $102,441, of which amount $74,770 was arrears in taxes.

The city's proportion of tax arrears for the four years from 1916 to 1919 is as follows: 1916, $9,389, worthless; 1917, $11,529, 5 per cent. collectible; 1918, $24,186, 12 per cent. collectible; 1919, $12,578.40, 40 per cent. collectible. There are ninety-two taxpayers in arrears to the amount of $50 or over. One-half of this number are paying on account.

Montreal, Que.—According to civic statistics published recently in the city, fully a third of the annual income has to be set aside for interest charges. Six and a quarter millions are consumed in interest, while three quarters of a million must be deducted from revenue for the sinking fund. As the total revenue is twenty-one millions, there must be taken from it seven millions for interest charges and the sinking fund. The city has two "permanent loans, one amounting to half a million and bearing the rate of 7 per cent., and the other seven millions, but bearing the interest rate of [illegible] per cent." These two permanent loans were floated many years ago, when the city particularly needed money. From time to time efforts have been made to arrange so the loans would be taken up, but the holders showed no ardent desire to comply with the request.

Figures are given showing that the bonded debt goes back to 18[illegible]. In that year, by act of parliament, the city was authorized to issue bonds to the amount of $200,000 to purchase waterworks. A number of other loans quickly followed for [illegible], additions to the waterworks, etc., until in 18[illegible] the total debt amounted to five millions. In 1868 the [illegible]. Nine years later the debt [illegible]. In 1888 it was eleven and three-quarter millions, and ten years later again, in 1898, it had risen to twenty-[illegible] and a half millions. In 1906 it [illegible] millions. From there it increased as follows: [illegible]02,727; 1911, $63,352,900; 1912, [illegible]; 1914, $97,017,420; 1915, $98,-[illegible]; 1917, $102,000,000; 1918, $121,-[illegible]; 1919, [illegible]. The principal cause of the marked increase in [illegible] was the enforced annexation of [illegible].

Government and Municipal Bond Market

British Columbia Sells Securities at a Premium—Issue Disposed of Across the Line—Saskatchewan Will Conduct a Campaign to Sell Farm Loan Debentures Locally—Three and a Half Millions Wanted—Windsor May Test the Local Market

THERE is no visible broadening tendency in the bond market just yet, and bond dealers are of the opinion that no great change will take place this year. After the strain of the crop movement and the credit situation has been relieved, a better demand is expected, while prices will no doubt stiffen, but until Victory bonds are placed on the open market, which it is hoped will be at the end of the year, and prices are allowed to find their own level, it is recognized that there will be no marked improvement.

The market in the United States is in a very satisfactory condition. Demand is good, and prices, particularly of Liberty bonds, have had a marked advance. There is also a good demand for Canadian bonds in that market, as evidenced by the absorption of all of the British Columbia issue and practically all of the Ottawa bonds. The same syndicate which purchased the $1,000,000 of British Columbia's, are now offering to place double that amount of the same bonds on the same terms, which should be a good indication of the situation.

British Columbia May Borrow More

According to an announcement made in Vancouver recently, British Columbia has not yet finished borrowing this year. The province has under consideration a loan of about $5,000,000 for roads, this loan to be provided for out of increased motor fees. Should conditions warrant, a similar amount will be borrowed within the next three months. In addition, it is understood that the government has been sounding local bond houses with a view to having them subscribe to a loan to provide funds wherewith the $3,000,000 University of British Columbia project at Point Grey may be inaugurated under the provisions passed at the last session of the legislature.

Windsor, Ont., is now considering the advisability of selling somewhat over $400,000 debentures locally. It will be remembered that the city had some $376,518 debentures recently returned, owing to a legal difference. These securities, together with some housing bonds, are now ready for the market. Whether local or not it has not yet been decided.

Gloucester Township bonds, which are being offered locally are selling well, according to reports. City Treasurer Huber, of Kitchener, Ont., also advises *The Monetary Times* that about $80,000 of total of $152,300 debentures have been disposed of over the local counter.

City Treasurer Davis, of Hamilton, also advises that since May 1 last approximately $425,000 debentures have been sold to inhabitants of the community at a 6 per cent. rate.

Saskatchewan to Sell Locally

Saskatchewan has decided to conduct a campaign between October 26 and December 7 for the sale of $3,500,000 farm loan debentures within the province. According to Hon. C. A. Dunning, provincial treasurer, the campaign will be conducted on a miniature Victory loan scale. The executive of the Saskatchewan Press Association will take charge of the publicity side of the campaign, and the municipal officials throughout the province will have charge of the organization work and will arrange for canvassing committees. Mr. Dunning, speaking of the new plan, said in part:—

"The Saskatchewan Farm Loan Board has loaned over $5,250,000 since the first loan was made on September [illegible], 1917. In a new province like ours the lack of capital has always proved a heavy handicap to thousands of our best farmers. The need of adequate capital was never greater than it is at present, when so many of our farmers are changing over from straight grain growing to mixed farming. At the same time, financial conditions throughout the entire world have never been more unsettled.

"There is no way by which the government can secure sufficient funds at a reasonable rate of interest to meet the heavy demand from farmers in all parts of the province, except by guaranteeing to the home investor a safe and profitable investment, and borrowing from the people of Saskatchewan who have money the funds to loan farmers who desire to borrow on first mortgage, on longer terms and at a lower rate of interest than they can secure money from other sources. I feel quite confident that we can secure from our own citizens the money which is so urgently required for establishing our farming industry on a permanently profitable basis.

"In creating the Farm Loans Board our principal object was to reduce the cost of money to the farmer, not to do all the farm loan business. It was never the policy of the government and it is not the policy at the present time to attempt to take over the farm loan business, but rather to exert an influence on the cost of money to the farmer and to affect the terms and conditions upon which he secures mortgage loans, just as the Saskatchewan Co-operative Elevator Co. influences the grain business in Saskatchewan. There is every indication that our hopes are being realized, as there is ample evidence that we are affecting the farm loan business in the province to a very great extent.

"Saskatchewan farm loan debentures are an obligation of the whole province of Saskatchewan and therefore provide an absolutely secure as well as a patriotic investment for our citizens. As these bonds are redeemable at par at any time by giving the provincial treasurer three months' notice in writing, the bonds can never depreciate in value and are always worth 100 cents in the dollar. The interest yield of five per cent. per annum, payable semi-annually, gives a satisfactory return to the investor while providing the farmers of our province with capital at a reasonable rate of interest.

"Up to the present time, although there has been no active campaign put on to dispose of these bonds, a total of $2,082,000 worth of the debentures has been sold. We had just entered upon a campaign for the sale of these bonds in the fall of 1917, but at the request of the finance minister of Canada we laid our campaign aside so as not to interfere with the Victory loan campaign."

Bond dealers are rather doubtful as to the outcome of such a campaign, especially in view of the fact that Saskatchewan bonds are now selling to yield 6.30 per cent. There will be a number of purchasers, no doubt, who will be attracted by the 90-day retirement privilege, and a number more who will yield to the "call of patriotism," but wise investors will demand more than a 5 per cent. yield. To sell the entire $3,500,000 within the period desired is considered almost an impossibility, at least just now.

Coming Offerings

The following is a list of debentures offered for sale, particulars of which are given in this or previous issues:—

Borrower.	Amount.	Rate %.	Maturity.	Tenders close.
Ste. Anne de [illegible], Que.	$ 27,000	5½	10-years	Oct. 11
Three Rivers, Que.	700,000	6	10-years	Oct. 11
Kentville, N.S.	[illegible]0,700	6	25-years	Oct. 18

Kentville, N.S.—The $[illegible]0,700 6 per cent. debentures of the town, for which tenders are being called, are redeemable in [illegible] years. The latter remark was omitted from the advertisement which was published in *The Monetary Times* last week.

"Times are Changed"

This quotation is derived from an old Latin proverb, and applies to the investment situation to-day.

For many years it was necessary to sacrifice security to receive a high interest return, or vice versa. To-day, by purchasing 1934 Victory Bonds, it is possible to obtain both.

At 96½ and interest, the 1933 maturity assures the purchaser of a tax-free interest return of 5.87% for thirteen years.

Debenture Notes

Napanee, Ont.—A by-law has been passed authorizing the purchase of the local waterworks.

Wingham, Ont.—Ratepayers have passed a by-law granting a loan of $10,000 to the William Gunn and Co., who are locating a factory there.

Cochrane, Ont.—Ratepayers have voted to purchase the local power plant and telephone exchange.

Wardsville, Ont.—A by-law authorizing the raising of $8,000 for hydro purposes has been passed by ratepayers.

St. Mary's, Ont.—A money by-law authorizing the raising of $16,000 for various local improvements has been defeated.

Peterboro, Ont.—The city, which has $100,000 debentures for sale, recently received a local offer for them at the rate of 96.10. It was decided to hold the issue over, however, until a more favorable bid was received.

St. John, N.B.—At a meeting of the council last week it was announced that a motion would be submitted within the next month calling for the raising of $654,983 by way of 6 per cent. renewable bonds.

Essex Border Utilities, Ont.—On October 23rd ratepayers of the border municipalities, including Windsor, Walkerville, Sandwich, Ford, Sandwich East and Sandwich West, will vote on a by-law authorizing the expenditure of $250,000 for a park project.

Bond Sales

Township of Saugeen, Ont.—An issue of $8,000 6 per cent. 10-instalment debentures, for which tenders were called, have been sold locally at par.

Lincoln County, Ont.—A. Jarvis and Company have purchased $50,000 6 per cent. 10-instalment debentures at 96.50, which is on a basis of about 6.75 per cent.

Gananoque, Ont.—A. E. Ames and Company have purchased $35,000 bonds of the town and are offering them on a 6½ per cent. basis. The securities mature at different dates up to 1950.

Belleville, Ont.—The city has sold two blocks of 6 per cent. debentures to A. Jarvis and Company as follows: $38,000, maturing in 30 years, at 92.75; $3,000, maturing in 20 years, at 93.58. At these prices the city paid about 6.55 for its money.

Bexley Township, Ont.—Debentures to the amount of $7,000, bearing interest at the rate of 7 per cent. and maturing in 15 instalments, have been purchased privately by J. E. McKague, merchant, Bexley P.O. Two other offers were received from bond dealers as follows: Brent, Noxon and Company, who asked for an option at 98, and W. L. McKinnon and Company, who asked for an option at 99.25.

Saskatchewan.—The following is a list of sales reported by the Local Government Board from September 18th to 25th, 1920:—

Schools—Lawrence, $2,[illegible]00; K[illegible] Bligh, Clair; Lacombe, $[illegible],500; Strom, $16,000; Lampman, $15,000; Eskdale, $1,500; Waterman-Waterbury Manufacturing Co., Khedive, $2,000; D. Hardwork, Ogema; Marchwell, 600; F. J. Loo, Devil's Lake, $4,500; Waterman-Waterbury, Eastend, $2,500; T. R. Whaley, Alsask; Beaver, $3,000; J. Fleck, Yorkton.

Rural Telephones—Parkside, $16,000; Landshut, $[illegible],000; Hope Lodge, $19,600; W. L. McKinnon and Company.

Villages—Balyea, $800 and $400; Hewart, $800. All sold locally.

York Township, Ont.—A. E. Ames and Company have purchased $215,2[illegible] 6 per cent. 10 and 20-instalment debentures at 9[illegible].78, which is on about a 6.85 basis. The following bids were received:—

A. E. Ames and Co.	[illegible]
Wood, Gundy and Co.	[illegible]
United Financial Corporation, Ltd.	[illegible]
A. Jarvis and Co., C. H. Burgess and Co., and N. A. MacDonald and Co.	[illegible]
R. C. Matthews and Co.	[illegible]
Home Bank of Canada (for $50,000 only)	[illegible]

Sherbrooke, Que.—Three money by-laws were passed by ratepayers on October 4, as follows: $212,000 for sewers; $161,600 for payment of loan to Banque Nationale; water and electric, $110,000.

Sherbrooke, Que.—Versailles, Vidricaire and Boulais, Montreal, have purchased at a price of 91.71 $392,000 5 per cent. 7-year bonds. It was agreed by the purchasers, however, to let the aldermen of the city have $42,500 of the bonds at the price of 91.71, so in reality Versailles, Vidricaire and Boulais only bought $350,000. Tenders received were as follows:—

Versailles, Vidricaire and Boulais	91.71
A. E. Ames and Company and Hanson Bros.	91.26
Rene-T. Leclerc	91.23
Credit-Canadien, Inc.	90.76

At the price received for the bonds the city paid about 7 per cent. for its money.

British Columbia.—The province has sold another $1,000,000 bonds for Pacific Great Eastern Railway work. The securities, which bear interest at the rate of 6 per cent., and mature in five years, were purchased by a syndicate of American investment houses at a price of 100.73, which is on a basis of 5.83 per cent. Bidding was keen as will be seen from the following list:—

Carstens and Earles, Seattle; Girvin and Miller, Francisco; Lumberman's Trust Co.; Price and Co.; and Ferris and Hargrove, Spokane (accepted)	100.73
A. E. Ames and Co.	100.34
Wells Dickey Co., Minneapolis	100.22
Dominion Securities Corporation	100.17
Blythe, Witter and Co., San Francisco, and the Seattle National Bank	100.15
Wood, Gundy and Co.	99.89
Miller and Co., Brandon, Gordon and Weddell	99.547
Stephens and Co., Portland	99.07
Brake, Ballard and Co., Minneapolis Trust Co.	99.02
Freeman Bank of Italy and Ladd and Tilton	98.85
Cyrus Peirce and Co., San Francisco, E. H. Rollins and Sons, Boston, and Bond and Goodwin, New York	98.67
W. A. Mackenzie and Co., and R. A. Daly and Co.	98.54
Jarvis and Co., First National Co., Halsey, Stuart and Co.	98.36
National Bond Co., Vancouver	98.31
Canada Bond Corp.	97.68
Faulds and Co., Vancouver	96.50

Ontario.—The highest bid received by the province for its $3,000,000 6 per cent. bonds was 103.567, which is on a basis of about [illegible].70 per cent. (Canadian funds). The bonds were not awarded when tenders were opened, as the provincial treasurer was absent. Ultimately, however, in view of the fact that the bonds will be sold in the United States, the cost will be much greater. There is also a condition in the bid which will have to be approved by the province. Should the treasurer decline to accept this condition, he will receive a much lower price. The following bids were received:—

A. Jarvis and Co., Halsey, Stuart and Co. (Chicago) and the First National Bank (Detroit)	103.567
(This tender is contingent upon the province covering the $3,000,000 exchange at 8[illegible] per cent.)	
Dominion Securities Corp.	102.74
Wood, Gundy and Co. and A. E. Ames and Co.	102.697
Wells Dickey Co. (Minneapolis), Carstens and Earles (Seattle) and Girvin and Miller (San Francisco)	102.64
United Financial Corp., Ltd.	102.61
[illegible] Wood and Co., [illegible] and Co. (New York) and [illegible] (New York) (on $1,000,000 and option on balance)	101.57
National City Co.	101.519
Canada Bond Corp., [illegible] and Co., Inc. (New York) and [illegible] and Co. (New York)	100.89
[illegible] Burgess and Co.	100.12

Corporation Securities Market

Grand Trunk Railway Borrows Twenty-Five Millions in New York—Whole Issue Subscribed Within One Hour—Massey-Harris Company Also Sells Securities in the United States—Two Other Canadian Corporations Making Loans—Trend of Stock Prices Irregular—Some Issues Retrieve Losses

AN irregular stock market was in evidence at the close of the New York exchange on October 6. Industrial issues, which had previously shown a strengthening tendency, developed a reactionary movement, while railroad stocks were lower. Strength in some issues, however, prevented any serious development. While business is in the course of readjustment, it is only natural for the stock market to be irregular, such as it has been for the past few weeks. The decrease of 2 per cent. in the reserve ratio of the New York Reserve Bank last week is an indication of conditions prevailing. The decrease is accounted for by the needs and demands of interior banks and by October 1 settlements. Interior centres, as is quite natural at this time of the year, are drawing heavily on New York and other reserve centres for credits in connection with the crop financing. In addition, manufacturing centres are taxed to meet the needs of borrowers whose inventories are affected by the current price adjustments.

Canadian markets did not altogether follow Wall Street, although the reactionary movement was prominent at times. At the close, however, some good recoveries were made by many issues which had lost during the week, indicating their independence of New York. Temporarily, papers have ceased to be the market favorites, and consequently have been forced to lower levels. Spanish River was especially weak in that section. Merger issues, which gave such a remarkable exhibit of strength last week, failed to maintain that position. Atlantic Sugar was prominent among those stocks which retrieved their losses.

Money continues to be the principal factor, and until the situation changes, it is recognized that the stock markets will continue their irregular course.

Grand Trunk Borrows in New York

Offering of $25,000,000 7 per cent. 20-year sinking fund gold bonds of the Grand Trunk Railway was made this week in New York, by a syndicate of American investment houses, at par, and within one hour the whole issue was taken up. This is the largest piece of financing made by a Canadian corporation in the United States since June last, when the Canadian National Railways floated a loan of $15,000,000 there. Canadian railway borrowings to date this year total more than $70,000,000, and all of the securities have been disposed of across the line.

The bonds, which will be dated October 1, 1920, and will mature October 1, 1940, will be the direct obligation of the Grand Trunk Railway, which now is part of the Canadian National Railways System, and will be guaranteed as to principal, interest and sinking fund by the Dominion government. An annual sinking fund of $500,000 is to be provided to purchase bonds offered in the open market at prices up to par and interest.

The syndicate offering the issue is headed by Wm. A. Read and Co., and is comprised of the Guaranty Trust Co., the National City Co., the Bankers' Trust Co., Lee, Higginson and Co., and Blair and Co., all of New York, and the Continental and Commercial Trust and Savings Bank of Chicago.

Massey-Harris Offering

Another piece of financing of considerable importance is also being completed in New York. Wm. A. Read and Co. announce the offering of $4,000,000 8 per cent. sinking fund gold debenture bonds, dated October 15, 1920, and maturing October 15, 1930, of the Massey-Harris Co., at par and interest. The bonds are a joint obligation of the Massey-Harris Co., Ltd., Canada, and the Massey Harris Harvester Co. Inc., of the United States.

The business carried on by the Massey-Harris Co., Ltd., was established in 1847 and the company is now the largest manufacturer of agricultural implements in the British empire. The company operates throughout Canada, and has large business in Great Britain, Australia and other parts of the British empire, and in Europe, South America and Africa. The business of the Massey-Harris Harvester Co., the United States subsidiary, was established in 1850.

It is understood that the whole amount raised by the sale of the bond issue will be required for extension of the American subsidiary at Batavia, N.Y.

Ottawa Power Bonds

One of the largest recent pieces of Canadian public utility financing, and one that is believed to be the forerunner of important hydro-electric development in and about the city of Ottawa, is the purchase by Royal Securities Corporation and Harris, Forbes and Co., for issue in the United States, of $1,200,000 first mortgage and collateral trust bonds of the Ottawa Light, Heat and Power Co.

There are upwards of 1,000,000 h.p. of water power available in the Ottawa district, and it is understood that the proceeds of the new issue will be largely utilized to acquire additional developed water power, the purchase of which is rendered necessary by the rapid growth of the Ottawa Light, Heat and Power Co. It will be recalled that the last public financing effected by the company was the issue in March, 1919, by Royal Securities Corporation of $850,000 of Ottawa Gas Co. refunding mortgage bonds.

The new bonds will be almost wholly distributed in the United States, principal and interest being payable in New

CO-OPERATION SECURITIES MARKET

(Continued from page 46)

York funds. The issue is in line with a distinct revival of public interest in securities of public utility enterprises.

Provincial Paper Bonds

The Provincial Paper Mills, Ltd., have been authorized to issue $3,000,000 bonds, but only $1,000,000 will be sold at present. The bonds to be disposed of now bear interest at 6 per cent., are dated May 1, 1920, mature in twenty years, and are payable both in Canada and the United States. I. H. Weldon, president of the company, makes the following comment:—

"This course was taken because of the substantial profit which the company would receive in selling bonds in American funds and converting the proceeds into Canadian funds. The above amount is offered to shareholders in the company for subscription on or before November 1, 1920, at par in American funds. For the convenience of all Canadian shareholders, the price to them is fixed at $1,100 in Canadian funds for each $1,000 bond, payment in full to be made on or before November 1, 1920. Each bond will be accompanied by a stock purchase warrant, which will enable the holder thereof to purchase eight shares of stock upon the terms and conditions therein named."

The stock purchase warrant entitles the holder to buy eight common shares of the par value of $100 each before November 1, 1925, at the following prices: $125 per share up to November 1, 1921; $140 between that date and November 1, 1923; and $150 if purchased between the latter date and November 1, 1925.

Capitalization Increases

R. J. Whitla and Co., Ltd., incorporated under the laws of Saskatchewan with a capital of $2,000,000, have been authorized to increase their capital stock to $4,000,000.

The N. Bawlf Grain Co., Ltd., has been authorized by the Saskatchewan government to increase its capitalization from $1,000,000 to $2,000,000, by the issue of 10,000 shares of $100 each.

Stock of the Magnolia Metal Co. of Canada, Ltd., will be absorbed privately. The company was recently incorporated with a capital of $100,000 and head office at Montreal, Que.

Burdick Bros., Ltd., investment bankers, Vancouver and Victoria, B.C., are offering $300,000 8 per cent. first mortgage gold bonds of the Paramount Victoria Theatres, Ltd., in denominations of $100, $500 and $1,000, at par and interest, with a bonus of 50 per cent., common stock. The bonds are secured by building, property and other assets to the total value of the issue, and are redeemable at the option of the company at 105 and accrued interest. Redemption of the bonds at maturity is provided for by sinking fund, to be commenced in January, 1923.

The Pyke Yacht Motor Co., Ltd., recently incorporated with a capital of $200,000, and with head office in Montreal, are selling stock privately to customers and motor boat owners throughout Canada. Already half of the issue has been subscribed for.

The Robert McDonald, Ltd., diamond merchants, etc., recently incorporated at Vancouver with a capital of $100,000, will make no public offering of stock. All shares are being absorbed privately. Such is the case of the Giant Motor Truck Co., Ltd., also incorporated at Vancouver recently with a capital of $100,000.

Option for Western Power Stock

A recent issue of the "Wall Street Journal" contains the following announcement:—

"A committee composed of M. H. Coggeshall and Bayard Dominick has addressed a letter to the stockholders of the Western Power Co. of Canada, Ltd., advising them that interests are seeking an option on the preferred and common stocks of the company. Option price is stated to be $70 a share for the preferred and $35.10 for the common stock, payable in Canadian currency.

"The committee advises shareholders that at the request of several large holders of stock it has entered into agreement with the Chartered Trust & Executor Co. of Toronto, whereby the latter is given an option until November 1, 1920, on all stock which may be deposited. Shareholders wishing to take adavntage of the option agreement are asked to deposit their stock with the Canadian Bank of Commerce. Upon deposit of at least 56.27% of the common and 51.99% of the preferred the option will be exercised.

"The letter states that inability of the company to do new financing on favorable terms which is necessary to provide funds for additions and extensions, makes the entry of new interests into the affairs of the company desirable."

Supplementary letters have been issued to the Canadian Fairbanks-Morse Co., Ltd., subdividing the 16,000 shares of the common stock of the company now of the par value of $100 each, into 80,000 common shares of no nominal or par value, and also increasing the capital stock of the company by the addition of 45,000 common shares of no nominal or par value, making the common stock of the company 125,000 shares of no nominal or par value, provided, however, that the company shall carry on its business with a capital stock of $2,125,000.

The new stock of the Burlington Steel Co., Ltd., of which particulars were given in these columns last week, will not be available to the public. The Imperial Varnish and Color Co., Ltd., Toronto, also makes a similar announcement.

A stock selling campaign will be put on in October by the Alberta Flour Mills, Ltd., according to an announcement made by J. A. Burgess, financial agent of the company. The company hopes to dispose of $1,500,000 of stock to provide the funds necessary for the large new mill at Calgary.

Lake of the Woods Milling Profits Lower, but Position is Strengthened—Spanish River Common Placed on Seven Per Cent. Dividend Basis—Ford Motor of Canada Earns Sixty-Seven Per Cent. on Capital—Lower Tonnage but Higher Profits for Hollinger

Porto Rico Railways Co., Ltd. The following is a comparative statement of earnings of the company for the month of August, 1920:—

	1919.	1920.	Increase.
Gross	$ 95,861	$119,232	$ 23,370
Net	41,335	48,668	7,333
For eight months.			
Gross	750,327	906,257	153,929
Net	285,424	350,285	64,860

Ottawa Electric Railway.—The Board of Control of the city of Ottawa has recommended to the city council that a plebiscite be held in January next, at which property holders will vote whether or not to acquire the railway at a price to be fixed by arbitration. If the recommendation is approved the board will obtain a valuation of the property and assets of the railway before the vote is taken. Finally, if the ratepayers approve, the city will go to the legislature for power to borrow the necessary amount of money to be involved in the undertaking.

Ford Motor Co. of Canada.—George M. McGregor, vice president and general manager of the company, reports that net profits for the year were $4,696,243, after deduction of $968,590 in business profits, taxes and all other expenses. Dividends paid amounted to $1,750,000, leaving surplus on July 31 last at $8,216,505, as compared with $5,270,061 at July 31, 1919. The showing is made on a production of 55,616 cars, exclusive of tractors, and compared with 39,112 manufactured the previous year, and 75,000 to be produced the current fiscal year.

The profits earned were equivalent to 67 per cent. on the outstanding capital stock of $7,000,000.

Laurentide Co., Ltd. At the annual meeting of the company in Montreal last week, replying to a shareholder, who referred to the item of $2,812,854 in bank loans, contained in the statement submitted, Geo. Chahoon, president, said that the extensions, acquisition of new limits and the retiring of the company's entire bond issue outstanding at the beginning of the year were all factors reflected in the position referred to. As to whether such loans would be liquidated out of earnings, he stated that, as had been the case in previous Laurentide statements, the item would probably "melt away" within a reasonable time.

Barcelona Traction, Light and Power Co. The increase in the net earnings of the company in August was the second lowest monthly increase registered this year, owing to the continuance of the labor trouble in Barcelona, Spain. A record of gross and net earnings since the beginning of the fiscal year, together with the increase of net over last year, follows:—

	Gross (pesetas)	Net (pesetas)	Net inc. (pesetas)
March	[illegible]	1,095,111	[illegible]
April	2,876,118	[illegible]	[illegible]
May	[illegible]	1,067,711	[illegible]
June	[illegible]	1,018,187	[illegible]
July	[illegible]	[illegible]	[illegible]
August	2,715,059	[illegible]	[illegible]

Spanish River Pulp and Paper Co.—At the annual meeting of the company in September 30 last the common stock was placed on a 7 per cent. dividend basis by the declaration of a quarterly rate of 1¾ per cent., payable to shareholders of record September 30 on October 15. The meeting was of a routine character, about 90 per cent. of the outstanding common and preferred stock being represented, mostly by proxy. The former directors were re-elected and subsequently the following officers were elected: President, G. H. Mead; vice-presidents, P. B. Wilson and Thos. Gibson; secretary, J. G. Gibson; and treasurer, A. H. Chitty. Following the meeting President Mead, discussing the possibilities of supply catching up on demand, said that none could tell when that would take place, or what further falling off in general business was likely. If anything like the normal demand continued, it would be some time before the demand for paper products was equalled by the supply. The company's entire output is now being marketed at one price.

Replying to a vote of thanks, President Mead said: "The company has been conservatively dealt with at all times and rather with the thought in mind of permanency than of any temporary value which might accrue to the benefit of the security holders, and we hope we have built firmly enough to make the company a lasting property."

Lake of the Woods Milling Co. Total profits earned by the company, according to the financial statement for the year ended August 31, 1920, which was made public to-day, amounted to $772,232, compared with $756,616 a year ago, and $877,914 in the 1917-18 period. After the payment of the bond interest and dividend disbursements among preferred shareholders, which showed no variation from the previous year, there remained a balance applicable to the junior securities of the company, before the writing off of the usual $100,000 from property and goodwill accounts, of $573,232, against $597,616 a year ago, and $698,914 in the preceding period. Allowing for the increase in the common stock capitalization effected during the year, the year's results were equivalent to approximately 23.4 per cent. on the shares, compared to 28.5 per cent. last year, and 33.3 per cent. in 1918. After all deductions, which included payments to common shareholders of $294,000 unchanged from the previous year, there remained a surplus of $179,232 to carry into the accounts of the current year, bringing the balance remaining at the credit of profit and loss account up to $1,161,647.

While profits were lower, the balance sheet of the company showed a decided strengthening in the position of the company. As will be seen from the following figures, the working capital was greatly increased:—

	1920.	1919.	1918.
Current assets	$4,659,624	$3,530,385	$2,618,645
Current liabilities	1,177,540	1,293,530	921,938
Working capital	3,481,084	2,236,855	1,696,707

Other principal changes in the balance sheet, are as follows:—

	1920.	1919.
Plant, etc.	$3,130,558	$3,145,558
Less depreciation	50,000	50,000
	$3,080,558	$3,095,558
Goodwill	400,000	450,000
Investments	75,979	81,665
Wheat, flour, etc.	1,052,567	1,032,687
Total assets	8,179,187	7,375,944

Hollinger Consolidated Gold Mines, Ltd.—Notwithstanding lower recovery and lower tonnage per day, the company has made greater profits so far this year, according to the latest four-weekly report. The improved position is chiefly to be attributed to the premium on New York funds for gold sold to the Ottawa mint, the premium being higher this year than in 1919. The present statement covers the period from

Yarker, Ont.—September 27—Barn of Alfred [illegible] was damaged by fire. The fire was caused by lightning and the insurance was $[illegible].

ADDITIONAL INFORMATION CONCERNING FIRES

Beaverton, Ont.—[illegible] of [illegible] was damaged by fire. The fire [illegible] from the [illegible]. The total loss was $[illegible], with insurance of $[illegible] in the [illegible].

Milford, Ont.—September [illegible]—St. Philip's [illegible] Church was destroyed by fire. The fire was caused by [illegible]. The loss is $[illegible], with $1,250 insurance [illegible].

Manitoba.—During the month of [illegible] there were [illegible] fires reported, with a loss of $[illegible]. There [illegible] three [illegible]. There were two [illegible] [illegible] dwellings 2, farm buildings [illegible] 4, [illegible] stores 2, stables 1, and hospitals 1. The following were the causes: Lightning [illegible], smoking [illegible], [illegible], spontaneous combustion [illegible], explosions 4 and [illegible] known [illegible].

Ontario.—During the month of August there were 592 fires, with losses of $17[illegible],592. Lightning caused 139 fires. There were 101 farm barns destroyed.

Toronto, Ont.—Fire Department records for the month of September show that there were 149 alarms. Estimated total damage, $39,527; loss to contents, $24,910. There were thirteen fires caused from dumps and grass and twelve from children playing with matches.

Vancouver, B.C.—September 2—Three suites, owned by T. A. Lineslev. The loss was $[illegible],800, with insurance of $100,000 in the following companies: Union Assurance, Canada Accident, Car and General, Palatine, New York Underwriters, Providence, California, London Underwriters, Niagara, Mercantile, National Union and Hartford.

Vancouver, B.C.—September [illegible]—The fire chief of Vancouver has sent the following information regarding the fire in the Empire Building on September 5th:—

"The value of the building is given as $70,000, with insurance to the amount of $56,000 carried on same in the following companies: Norwich Union, Agricultural, Vulcan, Fidelity-Phenix and Continental. The loss is estimated at around $1,500 to $2,000 (building only). Damage to contents is set at $130 (no insurance carried covering same). The total value of contents is given as $72,050, with insurance on same to the amount of $45,600.

"The cause of the fire is undoubtedly 'incendiary,' the fire having been started in some old paper in the hallway (corner), second floor, north side of the building. I would add that a number of fires, all of incendiary origin, occurred within a few days only of the above, and all about the same hour, as follows: Fairfield Block, September 1st, 9.58 p.m.; loss about $9,700. Tunstall Block, September 2nd, 12.42 a.m.; loss about $15,000. 609 Pender Street West, September 2nd, 2.14 a.m. (rooming house); loss about $65. Park Rooms (rooming house), September 2nd, 1.30 a.m.; loss estimated at $250. Moore printing establishment, 319 Pender Street West, September 3rd, 11.52 p.m.; estimated loss, $250.

ONTARIO FIRE PREVENTION LEAGUE

The annual meeting of the Ontario Fire Prevention League was held in Toronto on October 5th. The following officers for 1920-21 were elected: Honorary president, Hon. E. C. Drury; president, Arthur Hewitt; first vice-president, J. M. Watt, Lemon; second vice-president, G. C. Martin, Hamilton; secretary-treasurer, George F. Lewis, Toronto.

Prohibition of wooden shingle roofs on dwellings not situated more than [illegible] feet from adjacent structures was advocated by J. B. Laidlaw, manager of the Norwich Union Fire Insurance Society, in an address before the meeting. After brief discussion of his resolution to seek legislation along these lines the convention endorsed his views.

In the report of secretary-treasurer, George Lewis said that during the [illegible] months of 1920 there were 626 fires in Ontario with losses of $7,561,380, and insurance, $[illegible]. For the first [illegible] months of 1919 the figures were: Fires, [illegible]; [illegible], $[illegible],561; and in 1918, fires, 1,484 [illegible]. The losses in the United States and Canada [illegible] of European countries.

Two [illegible] to have introduced at the next session of the Ontario Legislature were discussed. One [illegible] installation. The other [illegible] construction and operation of dry [illegible].

[illegible] of Ontario, in a short address, [illegible] per cent. of the fires in the province are [illegible] were Franklin H. Wentworth, [illegible] Fire Protection Association, [illegible] of the Norwich Union Fire Insurance Society, Toronto; W. H. Shapley, president of the Dominion Fire Prevention Association; and Arthur [illegible].

Debt Repayment by Equal Annual Instalments

Instalment Debentures Make Sinking Fund Unnecessary—Advantages to Municipality More Than Compensate for Any Difference in Price Obtained—Mathematical Difficulties Sometimes Prevent Use of This Form — A Simple Method of Calculating Amount of Instalments

By J. G. Sullivan,
Consulting Engineer, Winnipeg, Man.

WITH the exception of cases where very long term bonds are issued on securities that have more or less unchangeable value and where it is contemplated that new bonds will be issued to take care of the old ones when they fall due, two general methods of financing are usually followed. First, the individual usually gives a mortgage on some security, under an agreement that he will pay a certain amount of the liability each year with interest at the agreed rate and make final settlement at the end of the term of the mortgage; the second method followed by municipalities, cities and small corporations is to sell bonds bearing an agreed rate of interest payable annually, the amount of the bond becoming due at the end of a limited number of years, usually varying between 15 and 30. The municipality, city or corporation prepare themselves to meet the obligation by creating a sinking fund, that is, levying an amount of tax or setting aside an amount out of the business as the case may be, which, put out at interest (usually at a rate considerably lower than the rate of interest they are compelled to pay on the bond), so that at the end of the given period the fund thus created will be sufficient to meet the obligation.

The writer believes that a third method—namely, of liquidating the debt by equal annual payments, would in general be more satisfactory and better adapted to rural municipalities and small business concerns, who, in a great many cases, do not have the facilities or the knowledge to properly handle a sinking fund. This latter method would have the advantage that the taxpayer or small business man would not in general be penalized on account of the different rate of interest they would have to pay and what they would receive on a sinking fund, and the writer believes further that such bonds would in general command about as high a price as the bond requiring a single payment at the end of the term of the life of bond, for the reason that the liability would be constantly decreasing, therefore the security of the bondholder would always be getting safer and it would be only carrying out a principle that is usually insisted on by trust and mortgage companies when making loans to individuals.

Calculating Amount of Payments

In discussing this matter with the officials of a rural municipality, the writer was told by the officials that they would like to issue such debentures, but they did not know how to figure out the amount of the annual payments. This may be the reason why this form of debenture is not more popular. The problem, however, is not a very difficult one, for the reason that the percentage of the debt to be paid each year is equal to the amount of $1 for the given number of years, at the agreed rate of interest compounded, divided by the amount of $1 per year for the given number of years, at the agreed rate of interest compounded, that is, if we let "R" equal the rate of interest and "N" the number of annual payments, then "P" the percentage of the debt to be paid each year, will equal

$$P = \frac{(1+R)^N}{\frac{(1+R)^N - 1}{R}} \qquad \text{.......... ....} \qquad (1)$$

this can be reduced to

$$P = \frac{R}{1 - \frac{1}{(1+R)^N}} \qquad \text{.......... ......} \qquad (2)$$

The terms of the numerator and the denominator of equasion (1) can be taken from compound interest tables and dividing the numerator by the denominator, "P" can be found to a value extending to the fifth or sixth decimal place. The converse of this problem is not such an easy one. That is, if you had given a number of equal annual payments to liquidate a debt of a given sum, you could find the value of "P" by dividing an annual payment by the total sum but having given "P," it is not so easy to find out the value of "R," that is, the rate of interest that you are actually paying.

Illustration of Method

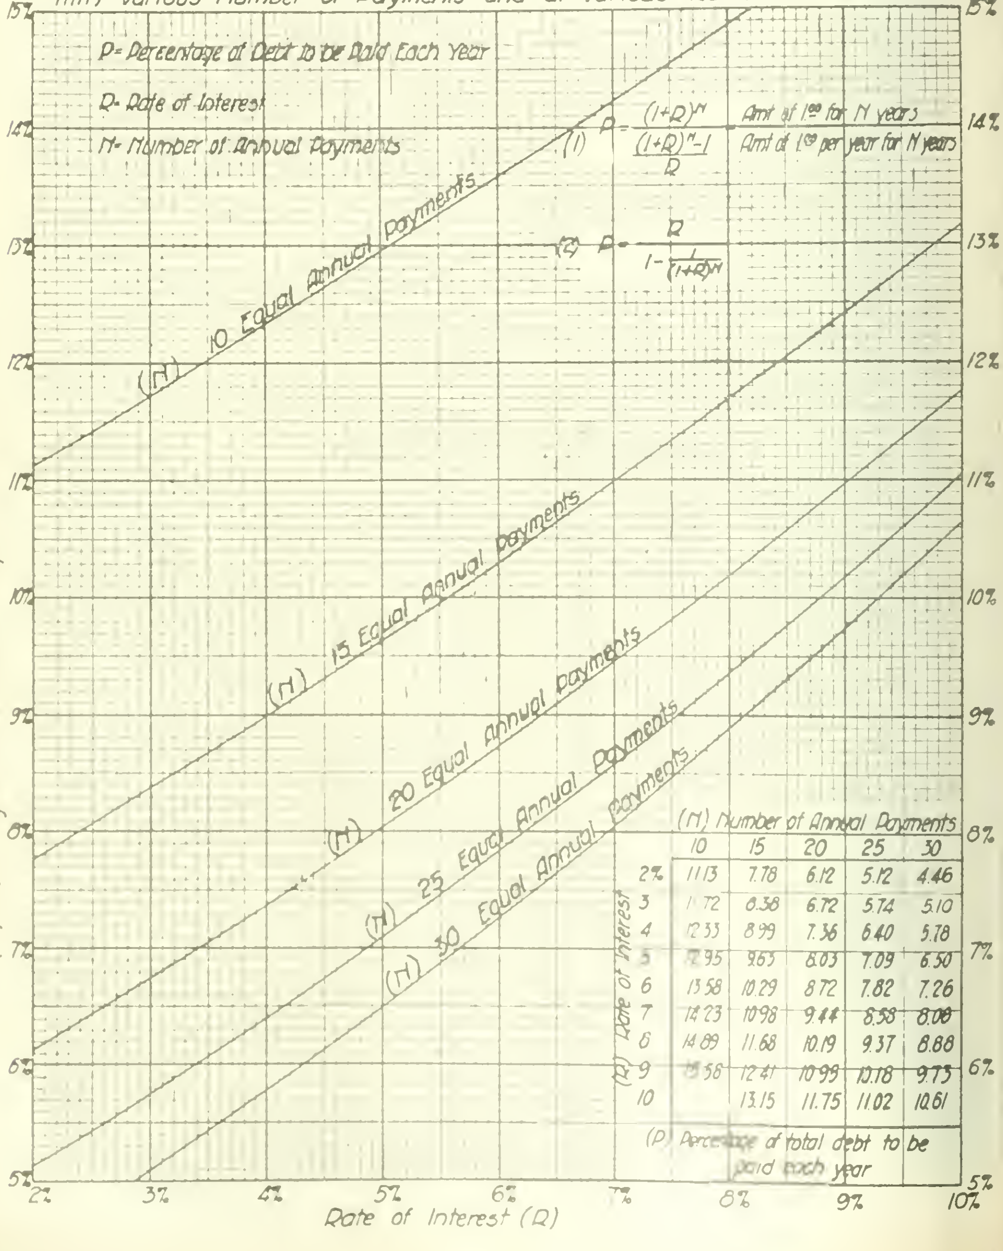
To facilitate and explain this matter in general the writer has prepared a chart, which gives in the table the percentage of the total debt to be paid each year in 10, 15, 20, 25 and 30 annual payments, at rates of interest varying in even percentages from 2 per cent. to 10 per cent. By plotting this table as shown in the chart, we have a means of determining "R." Having given "P," and the number of equal annual payments, it is very easy to determine within a very small fraction, the rate of interest that is being paid.

For instance, if you are paying $1,600 per year to liquidate a debt of $20,000, the percentage paid each year would be 8 per cent. of the total debt. If the agreement called for 15 equal annual payments, you would be paying interest, approximately, at the rate of 2.4 per cent. If it was 20 equal annual payments, you would be paying interest at the rate of 4.91 per cent., 25 equal annual payments, interest would be 6.23 per cent., and if it was 30 equal annual payments the interest would be 6.91 per cent.

Take another example. Suppose a municipality sells a 20-year 5 per cent. bond at par and arranges to take care of the debt by a sinking fund estimated on a basis of 3 per cent. compound interest. For every dollar sold the taxpayer will have to pay each year for 20 years, 5 cents as interest and 3.72 cents to sinking fund, or a total of 8.72 cents, which is the equivalent of paying about 6 per cent. for money, while if equal payment method was used, only 8.03 cents per dollar would have to be collected. On a basis of the above assumptions, the municipality could afford to sell such bonds at 92.1, a difference that the writer does not believe any bond broker would make in a tender for the two kinds of bond at same rate of interest.

Some cities will point with pride to their surplus on account of the rate of interest they have been able to get for the past few years being greater than the calculated rate when determining the levy for sinking fund, but this fact does not alter general conditions that usually the rate you receive is less than the interest you have to pay. The most important reason why rural municipalities should adopt the equal payment plan is their lack of facilities and knowledge to properly handle a sinking fund

Diagram for Computing Amount of Equal Annual Payments to Liquidate a Debt with Various Number of Payments and at Various Rates of Interest



(N) Number of Annual Payments

(R) Rate of Interest	10	15	20	25	30
2%	11.13	7.78	6.12	5.12	4.46
3	11.72	8.38	6.72	5.74	5.10
4	12.33	8.99	7.36	6.40	5.78
5	12.95	9.65	8.03	7.09	6.50

EUROPEAN EMIGRANTS LOOKING TO CANADA

Transportation Holds Back Flow, However—Fuel Control Resumed—Government Revenue Grows

(Special to *The Monetary Times*.)

Ottawa, October 14, 1920.

SHORTAGE of ship accommodation and a discouraging attitude on the part of the Canadian immigration officials overseas are to some extent restricting emigration to this country from the United Kingdom, says Hon. J. A. Calder, who recently returned from an official trip abroad. The agents overseas, are, he said, taking every precaution to see that no more people came to Canada than can be absorbed. They advise persons not likely to find employment within a reasonable time of their arrival in Canada, to defer their departure from England. Shipping agents, too, in view of the penalties to which they are liable for bringing unsuitable persons to the Dominion, are careful to scrutinize applicants for passages. In consequence, Mr. Calder asserts that Canada is securing a better and more suitable class of new citizens than ever before.

The shipping situation, however, prevents any immediate increase in the volume of immigration. Mr. Calder interviewed officials of the North Atlantic shipping conference, and was informed that accommodation on vessels coming to Canada was booked for about a year. In so far as the outlook for immigration in the future is concerned, it will depend a good deal upon economic conditions in Great Britain. For instance, Mr. Calder states that there is at present almost as great a shortage of domestic servants in England as in Canada. Women who were trained for domestic service found employment in industry during the war. They are only gradually leaving that field and returning to domestic service. The minister of immigration, however, found in Great Britain a feeling that a fairly serious unemployment situation might develop there in the near future. Such a condition would tend to drive people to seek homes and livelihoods in other countries. It has been variously estimated, moreover, Mr. Calder points out, that Great Britain has a surplus population over pre-war days of from 600,000 to 1,200,000. Before the war 250,000 people left Britain every year. At the same time, having regard to the shipping situation, Mr. Calder was inclined to the view that immigration would not reach really large numbers for probably a year, or until the spring of 1922.

Revenue is Buoyant

A large increase in revenue is shown by the September statement issued by the finance department. During the seven months of the fiscal year ending on September 30, inland revenue collections totalled $29,451,813. In the corresponding months of last year, inland revenue collections were only $7,065,238. During the same periods also, income tax receipts showed a similarly heavy increase. During the seven months of this year they were $6,585,418; during the seven months of last year they were $1,673,628. Revenue from business profits tax shows a slight incline. For the two seven-month periods, it was: 1919, $15,881,293; 1920, $15,189,479.

Total ordinary revenue during the month of September was $37,170,789, as compared with $26,698,840, the total ordinary revenue in September, 1919. During the seven-month periods, ending September 30, total ordinary revenue was: 1919, $159,085,559; 1920, $219,965,911. Total ordinary expenditure was: September, 1919, $25,146,277. September, 1920, $16,940,075; seven-month period, 1919, $122,722,617; seven months of 1920, $152,624,397.

Capital expenditure in September of last year was $66,405,631, as compared with $6,881,577 last month. The reduction has been almost entirely due to lessened war expenditure. Public debt increased by $22,032,728 last month. The total net debt, no credit being taken for non-active assets, now stands at $2,276,516,163.

The tax collection system is growing stronger daily. More income tax returns are received this year, and audits are in some cases made to verify the returns. The same system of checking up is to be followed by the Customs and Inland Revenue Departments in regard to the new luxury taxes. The corps of auditors recently appointed in co-operation with special inland revenue officers is taking steps to see that the taxes are collected by the merchant where the article is taxable and that subsequently the public treasury receives what is due it.

Fuel Control Again in Force

Fuel control has been resumed, under a plan similar to that used in 1918. The policy set forth dealing with the provincial organization and licensing of dealers is that the government of each of the provinces of Canada may appoint a provincial fuel administrator or board of administrators. It may also create such central provincial organization as it may deem necessary. Any expense so incurred shall be borne by each province. The duties of the fuel administrators, subject to the orders of the board, is to supervise the distribution of all coal and other fuel imported into or made available within such province; to develop the demand for and supply of wood and other coal substitutes to the greatest possible extent, also to promote within the province the greatest development of any coal areas available. To issue orders to dealers, consumers and others within the province regarding the distribution and use of coal, and to license brokers and others desirous of engaging in the business of selling coal, are other powers conferred by the board.

Municipally, the board deals with the situation in a manner similar to that drawn up for the provincial administrators. The duties of the municipal fuel commissioner are chiefly to co-ordinate the work of delivering coal during any period of fuel scarcity within such municipality, and to institute, when necessary, a system of controlling retail coal deliveries through orders on dealers within the municipality issued by the fuel commissioner.

Calculation of Customs

The meaning of the new customs order providing for the collection of duties at the current rate of exchange has not yet been cleared up. The following statement was issued by the department on October 7:—

"Notwithstanding the instructions issued from time to time by the Department of Customs and Inland Revenue on the question of values for duty of currency of invoice, there still appears to exist in the minds of some importers a doubt as to just in what manner a British exporter to Canada, or an exporter in any foreign country where the paper currency has become of lower value than the standard gold currency, will be able to arrive at the relationship existing in the country of export between the paper and the standard gold currency.

"It is quite expected this relationship would be reflected by the rate of exchange between that country and Canada existing in such country at date of shipment."

The importance of Canadian manufacturers realizing the great industrial development now taking place in India is emphasized in a special report on trade with India, which has been prepared by P. F. Scharsmidt for the Department of Trade and Commerce, after visiting all the big trade centres there. The report notes that the Indian government has adopted an energetic policy to increase industrialism and that the spending power of the four hundred million people who inhabit India and Ceylon is rapidly increasing. The commissioner states that in discussing trade matters with various commercial bodies and firms in India he was assured of an earnest desire on the part of the importers to confine their orders to the empire. He expressed the view that Canadian manufacturers should take advantage of this favorable attitude and urges the need of direct steamship connection between Canada and India.

WORKMEN'S COMPENSATION BOARDS OF CANADA

Annual Meeting Held Last Week in Toronto—E. S. H. Winn Elected President

TWENTY questions relating to workmen's compensation law and administration in Canada were on the program for consideration at the annual meeting of the Association of Workmen's Compensation Boards of Canada, held in Toronto, October 4 to 6, 1920. Several other points were also brought up in the discussions, which were of an informal nature.

The following officers were elected for the ensuing year: President, E. S. H. Winn, chairman of the British Columbia Board; vice-president, John A. Sinclair, chairman of the New Brunswick Board; member of the executive, F. W. Armstrong, vice-chairman of the Nova Scotia Board; secretary-treasurer, F. P. Archibald, chief accountant of British Columbia Board.

Those in attendance at the convention were:—

Alberta.—J. A. Kinney, commissioner; Dr. A. Form, medical officer. British Columbia.—E. S. H. Winn, chairman; Dr. G. A. B. Hall, medical referee; F. P. Archibald, chief accountant. Manitoba.—H. G. Wilson, chairman; N. Fletcher, secretary; Dr. A. J. Fraser, medical officer. New Brunswick.—John A. Sinclair, chairman; Dr. G. G. Corbet, medical officer. Nova Scotia.—F. W. Armstrong, vice-chairman; Dr. M. D. Morrison, medical officer.

Subjects Discussed

The main points discussed by the delegates were as follows:—

(1) Permanent partial disability rating schedules, and uniformity therein. (2) Handling of medical aid, first aid, and ambulance matters; schedules of medical, hospital and nursing fees, and question of uniformity therein. (3) Providing artificial limbs and appliances. (4) Rehabilitation of injured workmen. (5) Relation of Workmen's Compensation Boards to accident prevention. (6) Merit rating. (7) Attitude of boards as to legislation; extension of act to all workmen; covering occupational diseases. (8) Relation of sub-contractor and principal. (9) Filing system and numbering. (10) Minimum premiums. (11) Expense ratios—methods of computing. (12) Expenses—method of figuring Dominion government share. (13) Dominion tax on compensation cheques. (14) Standardization of actuarial principles and tables and industry and accident classifications. (15) Co-operation among Canadian boards in administrative work. (16) Rulings and decisions of special interest—e.g., accidents and assessments in other provinces; dependants in or dependants or workmen removing to, other provinces or foreign countries; hernia and strained back cases; accidents to artificial teeth; average earnings of minors; innocent victims of others' misconduct or horseplay; pranks or misconduct of minors. (17) Methods of determination of controversies. (18) Securing prompt returns and particulars from employers. (19) Disposal of returned or uncashed cheques. (20) Board's preference for assessments where employer is insolvent.

ONTARIO EQUITABLE TO WRITE NON PARTICIPATING

In a letter to [illegible], S. C. [illegible], manager of the Ontario Equitable Life and Accident Insurance Co., the newly organized company with a capital of [illegible], states that it is his intention to write non-participating insurance only, because he believes there is [illegible] demand for that class of insurance at the present time.

The company expects to be ready to commence business on January 1 next. Up to the present time subscriptions for over [illegible] of stock have been received, and [illegible] all [illegible] have been [illegible]. The [illegible] is [illegible] at a premium with [illegible] per share paid.

CROPS NEARLY A FAILURE IN BRANDON DISTRICT

Average Yield Eight to Ten Bushels—Business Keeps Fairly Good—Loaning Conditions Quiet and Repayments are Slow

(Staff Correspondence.)

Brandon, Man., October 13, 1920.

ALL threshing is practically completed in the Brandon district and the actual result is not as good as was expected. This district scarcely ever had a crop failure, but this year it is even below normal, and will not average more than eight and ten bushels per acre. In the southern part of the province, where the crop has been very poor for a number of years, this year it is fairly good. Weather at present is ideal and everywhere the farmers are busy plowing. With a large amount of breaking and fall plowing done and with large acreage under summer fallow, there should be a considerable increase in acreage in Manitoba next year.

Business generally in Brandon is good. There has been very little new building done, but wholesale and retail trade is brisk, and collections reported improving. The Imperial Oil Co. are to establish a large plant at Brandon, involving an investment of a quarter of a million dollars and the maintaining of a staff of about sixty. Nation and Shewan, one of the large retail stores, are extending their premises on Rosser Ave., which will give them, when completed, one of the finest stores in Manitoba.

City Taxes in Good Condition

Brandon civic affairs are quite satisfactory. The waterworks system, which has shown a loss in recent years, is being thoroughly investigated and will be remedied. W. M. Scott, consulting engineer of Winnipeg, has recommended certain changes, and J. M. Begg has been appointed city engineer. Brandon holds an annual tax sale, and City Clerk Harry Brown reports the tax outlook much improved, a healthy sign being the way city property is being redeemed. The loan situation in the Brandon district is fair, with not a great demand for money. One company, who have two and a quarter million loaned in Manitoba and Saskatchewan, reports money somewhat slow in starting to come in this fall.

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station for the week ended October 1st:—

Nipissing Mine, 86,911; O'Brien Mine, 80,000; Temiskaming Mining Co., 61,968; Mining Corp. of Canada, 215,522; total, 444,401.

The following are the shipments of ore, in pounds, from Cobalt Station for the week ended October 9th:—

McKinley Darragh, [illegible]; Temiskaming Mine, 84,737; Dom. Reduction Co., 88,000; Mining Corporation of Canada, [illegible]; Nipissing Mining Co., 240,660; Coniagas Mine, [illegible]; total, [illegible]. The total since January 1st is 20,786,450 pounds, or 10,[illegible].2 tons.

BOND FOR MUNICIPAL TREASURERS

The question of securing a schedule bond covering all [illegible] treasurers of municipalities in Saskatchewan will be considered by the legislature at its approaching session. Considerable difficulty has been experienced in the past by [illegible] have attempted to realize on the [illegible] of their [illegible] treasurers, and the Department of [illegible] has decided to recommend legislation providing for the bonding of all such officials by the [illegible]. It is the Department's intention to recommend a "[illegible]," which would cover the office and not the official [illegible] bond.

THE FRUITS OF CONFEDERATION

THE fathers of confederation were optimists. They hoped to erect a Dominion which would some day be more than a federation. They were prevented from forming a complete union by geographical, racial and economic difficulties which made it impossible to give the field of government to the central power. It was this seeming defect that has saved the day for the Dominion; the constitutional compromise has made possible the multitude of compromises that have enabled Canadians to enjoy the benefit of a single administration on questions of national import. There is no reason why the people which have the same tariff, the same post office, the same army and navy should also have the same schools or the same civil law. The measure of national unity is the number of subjects on which a working agreement can be reached.

At this year's meeting of the Maritime Board of Trade, reported elsewhere in *The Monetary Times*, H. J. Logan outlined how the growth of the central and western provinces had resulted in the neglect of the east. It is a difficult thing for parliament to be nationally minded, when the people themselves are not. If the fathers of confederation could have foreseen the Canadian provinces linked together by triple bands of steel they would have supposed their hope achieved. Could they see the disintegrating forces which are continually at work they would realize how far that is from being the case. The Dominion is not by any means in danger of disruption. National sentiment is strong, and there is unanimity on most national questions. But there are several which illustrate the danger of any further attempt to gather the reigns of power into the hands of the federal government. It is bad enough to have a fiscal, a tariff and a railway problem, without advancing into fields in which success would be still more difficult.

There is a movement on foot which professes Canadian unity as its object. It is not a new movement, nor, is it an organized one. It is rather a viewpoint which is intolerant of differences of opinion and af the rights of minorities. Why should not the public domain, originally the property of the separate colonies, still be administered by the provinces? What excuse have the promoters of national education for their propaganda, when the present system means a safer development and a broader culture? It is better that industrial, insurance and loan companies operating under provincial charter should continue to play an important part in the world of business than that they should become, like the national banks, another avenue for attack on the central government which stands for maintenance of law and order. Nationality is safe only insofar as it springs from national sentiment, which cannot be ingrained from above.

A TOP-HEAVY CONTINENT

SINCE the United States, and later Canada, passed the early stages of development the tendency of population has been to drift from country to city. A new country prospers by the utilization of natural resources which are rich and easily accessible. The marketing of these resources in the form of raw material is so profitable that nearly all the population is engaged in it The United States grew grain and other crops, cut its timber and opened up its mines, and Canada has done the same. It was the settlement of upper Canada by the United Empire Loyalists in the early nineteenth century, and the settlement of the west in the early twentieth century, which made this a great country. Manufacturing could very well be left to the countries best suited to it.

Soon there comes a time, however, when the richest resources are already acquired, and a surplus population is created which looks to manufactures and trade for its living This population expressed its political will in Canada in the 70's through the national policy of protection. As a result of this policy a tariff wall was erected about Canada to keep out goods from abroad and enable goods manufactured at higher cost in Canada to be sold here. Life in the towns and cities became more attractive and population drifted towards them This movement has been accentuated by the revolution which has taken place in agriculture, for by the use of new machinery the productive power of the individual has been multiplied. Canada has been transformed from a nation of farmers to one in which the urban population seemingly holds the balance of power. From 1901 to 1911 the rural population grew from 3,349,516 to 3,925,679, an increase of 576,163; during the same period the urban population increased by 1,259,165, from 2,021,799 to 3,280,964.

The 1921 census will, it is agreed, show a similar tendency. A more definite indication is given in the 1920 census of the United States, which country has been under the same influences as Canada during the past decade. The report of the United States Census Bureau, just published, shows the population of continental United States as 105,683,108, an increase of 14.9 per cent. since 1910. The trend of population in the decade has been from the farm to the city, and that while there was in the period a very slight increase in the total number of farms in the United States, there were unusually large decreases in tenanted farms in the agricultural states of the west and middle west. From the standpoint of its bearing on the high cost of living, the report of the census contains significant facts. Among them the following:—

Trend of population from the farm to the city, figures showing that 51,816,209, or 51.9 per cent. of the total population now living in incorporated towns and cities, a loss of 4.6 per cent. since 1910 in the proportion of population living in rural United States. Big decreases in the number of tenanted farms in such States as Illinois, Ohio, Indiana, Iowa, Pennsylvania, Michigan, Missouri, Kansas, New York, West Virginia and others. While the total number of farms in the United States increased since 1910 from 6,361,502 to 6,459,998, or 1.5 per cent., the increase was negligible compared with an increase of 10.9 per cent. in the previous ten years' period.

In some of the best agricultural states there were actual decreases in tenanted farms as follows: Indiana, farms in 1920—205,121; decrease since 1910—10,361. Michigan, 196,617; decrease, 10,313. Pennsylvania, 202,253, decrease, 17,896.

THE PUBLIC WILL BE AMUSED

If about ten million dollars of new capital will do it, the people of Canada will be well supplied with theatres. That is the total of new stock issues of theatre enterprises underwritten and placed on the market since January 1. Leaving aside the issue of $5,000,000 of stock of the [illegible] Corporation, the total of theatre issues offered in Canada for the first nine months of the year is $9,[illegible] [illegible] of the [illegible]. The larger issues of [illegible] have been the following:—

[illegible] Theatres, Ltd. (pref.) [illegible]
Allen Kingston Theatre, Ltd. (pref.) [illegible]
Allen [illegible] Theatre, Ltd. (pref.) [illegible]
Allen [illegible] Theatre, Ltd. (pref.) [illegible]
Allen [illegible] Theatre, Ltd. (pref.) [illegible]
[illegible] Theatres, Ltd. [illegible]
[illegible] Theatres, Ltd. [illegible]
[illegible] Canadian Corp. (pref.) [illegible]
[illegible] Theatres, Ltd. [illegible]
[illegible]
Allen's [illegible] Theatre, Ltd. [illegible]
Allen Theatre, Ltd. [illegible]

[illegible]

[illegible]

or erected at the inflated values now prevailing. Estimates of profits are based on the returns experienced when the business is at its zenith. In almost every case the stock, itself made as attractive as possible by being cumulative and bearing a high rate of interest, has been sold with a substantial bonus of common. What equity the common stock represents is very doubtful at the present time, and both common and preferred are highly speculative securities. These theatres may of course become virtually public utilities. On the other hand, they may pass out of favor as quickly as they gained it. The sale of the stock has been widespread and there are no doubt by this time many thousands of holders in Canada. A slump in the business would be a tragedy comparable only to those which the concerns themselves reproduce.

THE MAKING OF A WILL

Making a will is a sensitive subject—one which the average solicitor is loath to broach to his client. Nevertheless, it is important that the will be made, and made properly. "Deceive not thy physician, confessor nor lawyer"—thus runs the old proverb which reminds us that if we desire to receive the treatment necessary for our physical and spiritual well-being, or to know our true legal position in any matter from these advisers, we must hide nothing. In the October *Executor and Trustee*, the Toronto General Trusts Corporation points out that there is a corresponding duty on the part of the lawyer to bring before his client the obligation he owes to his family, and to society in general, in the making of his will. "Most lawyers," says the article, "are reluctant to raise this question, and perhaps the reason for their reluctance is not very far to seek; the making of a will being the final act of a person's life, as far as disposing of his property is concerned, and being in most cases purely a family affair, they feel that it would be better form for the client to introduce the subject. When a client has given him an opening, he can feel free to advise on the terms and conditions which should be incorporated in the document, and to discuss generally the terms of the same."

When the matter is more fully considered, however, and in view of the unfortunate experiences of many people, a [illegible] about introducing this subject to his client. It is a duty which everyone who possesses property, in fairness to his successors, ought to discharge. No one knows better than the lawyer, unless it be the trust company, [illegible] of the results of intestacy with the [illegible] of property in many instances, family [illegible] estate, the difficulty [illegible] courts, etc. Nor [illegible] resources in the making of his will [illegible] "He who is his own [illegible] a fool for his client." Much litigation is caused by [illegible] wills and putting into [illegible] one can understand. [illegible] written on home-made wills [illegible] humor of the [illegible] in a most unfortunate [illegible] from these mis[illegible] the privilege of every [illegible] a will made [illegible] to approach this question [illegible] developed in the [illegible]

[illegible] October 9th, resulted [illegible] Conservatives, 13; United [illegible] provincial government [illegible] held since the [illegible] the New Brunswick government will [illegible] of one of the smaller groups.

PERSONAL NOTES

John A. Fraser, treasurer of the Dominion Securities Corporation, Toronto, was elected a member of the board of governors of the Investment Bankers' Association of America, at their 1920 convention held in Boston, October 4 to 6. Mr. Fraser was born in Toronto and has been with the Dominion Securities Corporation all his business life. For the past fifteen years he has held the office of treasurer. He is chairman of the committee on provincial legislation of the Canadian Bond Dealers' Association. Seven Canadian firms, A. E. Ames and Company, Canada Bond Corporation, Dominion Securities Corporation, R. A. Daly and Company, and Wood Gundy and Company, of Toronto, and Aldred and Company, and the Royal Securities Corporation of Montreal are now members of the Investment Bankers' Association. Most of them were represented at the Boston convention.

T. W. McGarry, formerly provincial treasurer of Ontario, under the Hearst administration, recently joined the stock brokerage house of A. E. Osler and Company, Toronto, as vice-president and managing director. Mr. McGarry was born in the Township of Drummond, Ont., in August, 1871. He was educated at the Almonte Collegiate Institute and Osgoode Hall. In 1892 he was called to the Ontario Bar and in 1907 was created a K.C. For some time he was solicitor for the town of Renfrew, Ont. He was an unsuccessful candidate to the Ontario legislature in 1898, but was elected for Renfrew South in 1905, 1908, 1911 and 1914. Mr. McGarry is a director of the Whalen Pulp and Paper Mills, Ltd., and was elected president last Monday. He succeeds Sir George Bury, who was managing director as well as president.

L. C. Evans, London and Lancashire Guarantee and Accident Company of Canada, has received the appointment of assistant manager to Mr. MacLean, manager and secretary, as from the 1st instant.

H. H. Furness, manager and director of Johnston and Paine, Ltd., of Bradford, England, one of the largest firms of spinners and merchants of worsted yarns in the British Isles, who has been in Canada some time, has sailed for home.

Sir Lomer Gouin, K.C.M.G., has been elected to the directorate of the Cockshutt Plow Company, Limited. Sir Lomer is joining the board at the request of large British and French shareholders.

H. R. Tudhope, a partner in A. E. Ames and Company, Toronto, investment bankers, has been posted for membership on the Montreal Stock Exchange, his company having purchased a seat on that institution some time ago.

C. H. Easson, general manager of the Standard Bank of Canada, is at present touring the west, inspecting branches of the institution there, in company with Robert Gray, of Chatham, Ont., one of the directors of the bank.

Dr. A. B. Macallum, who has been head of the advisory council on industrial research for Canada, since that body was organized three or four years ago, has resigned, and goes to McGill University to the chair of biochemistry.

Sir Thomas White, K.C., has been elected to the directorate of the Canada Life Assurance Company. The company feels that Sir Thomas will bring invaluable counsel to the management of its affairs, and that the board is much strengthened by the appointment.

Major John Barnett has been appointed chairman of the Soldiers' Settlement Board for Canada, in succession to W. J. Black. Major Barnett served overseas and after returning to Canada, in June, 1918, he became assistant judge advocate general of the 13th district at Calgary. In March, 1919, he joined the staff of the Soldier's Settlement Board as superintendent of the Calgary office, later becoming provincial solicitor of the board for Alberta, and in October last he was appointed general counsel of the board for the western provinces with headquarters at Calgary.

OBITUARIES

F. G. Henderson, president and general manager of the Canadian Salt Company, Windsor, Ont., died at Montreal on October 13th, at the age of 62 years, following an attack of pneumonia, which was preceded by other ailments.

J. M. Courtney, who was at one time deputy minister of finance and secretary of the finance board of Canada, died at Ottawa on October 8th. Mr. Courtney was born in Penzance, England, in 1838, and held the position of deputy minister of finance from 1878 to 1906, when he retired.

Thomas Long died in Toronto on October 15th, at the age of [illegible] years. He was also one of the founders of the Northern Navigation and Collingwood Shipbuilding Companies. He was M.P.P. for North Simcoe, 1875-1883. Removing to Toronto [illegible] years ago, he was a director in the Toronto General Trusts Corporation, Consumers' Gas Company, Merchants Bank of Canada, Excelsior Life Insurance Company, East and West Land Company and London and Canadian Loan and Agency Company.

THE EXCHANGE RATE

III.—What Controls It?

IN No. II. of this series we explained why foreign dollars in a banker's hands are merely an evidence of indebtedness, a commodity to be bought or sold.

In order to make use of the credit these represent, he must first exchange them for the currency of his own country and this he does by sending them to a bank in the country in which they were issued. This means not only the labor of counting and sealing the parcel, but the cost of postage and the premium for insuring it against loss on the way.

The Bank to which he sends it must either remit payment for the foreign dollars in gold (the intrinsic value of pure gold being equal in all countries), paying express charges and insurance on the parcel, or if the bank has a credit balance in the country from which the foreign dollars came, it may give a cheque against that balance to the sending banker.

It was to avoid this cumbersome, risky and unsatisfactory way of settling international debts by the transfer of gold that the system of Bills of Exchange was brought into use, and we will try to explain that system next week.

THE CANADIAN BANK OF COMMERCE

638R

PRACTICE IN AUTOMOBILE INSURANCE*

Growth of Business Has Carried it into Hands of Fire Companies—Form of Policy Has Changed

By John B. Laidlaw

President, Canadian Automobile Underwriters' Association

THE insurance of automobiles is necessarily of very recent origin, and was at first written as regards the hazards of fire, transportation and theft by marine insurance companies, while the insurance of the owners' liability for damages for injuries to other persons arising out of the use of the automobile was undertaken by casualty companies. The hazards of property damage, that is, damage to the property of others injured by the automobile, and collision insurance to reimburse the owner for damages to his own car by collision were covered by both the marine companies and the casualty companies. In a short time fire insurance companies commenced to write automobile insurance as to fire, transportation, theft and also property damage and collision.

The business having been first undertaken by marine companies, the form of policy and its conditions were naturally along the line of a marine policy, and the practice of issuing a valued policy also followed marine custom. Gradually, and as automobiles became used everywhere, the fire companies, with their extensive system of agencies, wrote an ever-increasing proportion of the business as compared to the marine companies with their agencies only in the more important cities, and following upon that, the form of policy has gradually changed until the form now generally used in Canada and the United States has become more like the regular fire policy than a marine policy. The form now used generally in Canada was prepared by a conference of the companies writing automobile insurance, and it has recently been approved with some few amendments by the insurance commissioners in the United States, but we understand has not yet been adopted by any state.

Standard Policy and Conditions

A form of policy and conditions has been prepared by the president of your association, which the underwriters will be glad to discuss with you. It deals with insurance against fire, transportation and theft, and it should be made clear that property damage and collision can also be covered by endorsements added thereto.

The insurance of liability to the public is now written in Canada by a number of companies under contracts of which hardly two are alike in wording, although all alike or practically so in effect. No effort to prepare a uniform contract or uniform conditions for this class of insurance has so far as we can learn been made in the United States or Great Britain, and we are unable to suggest any uniform form to you at this meeting. If you think such should be prepared we suggest you appoint a committee to consider the matter with whom we can confer, and report to your next annual meeting.

Two Classes Differ Greatly

The nature of the two main classes of automobile insurance, that is, fire, transportation and theft on the one hand and liability on the other, are so radically different, that quite different conditions would seem to be required for each. There is also the further consideration that by the insurance laws, a number of companies writing the one are prevented from writing the other, and so that separate contracts and policy forms are required.

It is perhaps carrying coals to Newcastle to quote statistics to insurance commissioners, but it may not be out of place to point out that the automobile fire premiums, which include some collision and property damage premiums, have increased from $[illegible] in 1916 to $1,521,27[illegible] in 1919, while the liability premiums, which also include some collision and property damage premiums, have increased from $567,559 in 1916 to $1,901,704 in 1919. We believe that only a small proportion of automobiles are insured against fire, and even less against liability. So that there will probably be a steady development of the business.

He is surely a reckless individual who in these days of crowded traffic and careless pedestrians will operate an automobile without protection against his liability to the public, no matter how careful or experienced he may be. I have not attempted to deal in detail with the proposed conditions in these opening remarks, and would suggest either their reference to a committee or their consideration, clause by clause, in open meeting.

BRITISH INDUSTRIES FAIR, 1921

The three Fairs, although held in different towns (London, Glasgow and Birmingham), are, in reality, only sections of one Fair, and together constitute the greatest Trade Fair in the world.

The London Fair is directly organised by the Imperial Department of Overseas Trade on behalf of the British Board of Trade, while the Fairs in Birmingham and Glasgow are organised by the municipalities of the respective cities under the auspices and with the support of the British Board of Trade. An important point in the organisation of the three Fairs is that they are held practically concurrently, and that each Fair represents a specified group of industries. No industry is permitted to exhibit at two Fairs, and consequently the buyer knows that at whichever Fair he may be visiting he will find the whole range of exhibitors in any particular trade or trades. Further, by careful arrangement of the dates of the sections, it is made easy for him to visit all three should he wish to do so, for while the London and Birmingham Fairs run concurrently from the 21st February to the 4th March, the Glasgow exhibit opens a week later on the 28th February.

TORONTO REAL ESTATE BOARD

A Real Estate Board for the city of Toronto was organized at a meeting of real estate men in that city on October 4th. A board of nine directors was elected. It is the intention to operate along the same lines as the Real Estate Boards in the American cities, more particularly Detroit, where the brokers have advanced their profession to keep pace with the very rapid growth of that city in recent years. Practically every city of 50,000 population or more in the United States have a Real Estate Board, which are all affiliated with the National Association of Real Estate Boards, at the annual meeting of which all the prominent real estate brokers in the United States are gathered together, and in the interchange of views a great deal of good is accomplished for the community at large.

The chief purpose for which the board was formed was to raise the standard of ethics and efficiency in the real estate business, to protect the interests of all owners of property in the city and environs as well as the interests of real estate men and to bring the real estate men together and promote goodwill so that they shall act in harmony with each other instead of independently as in the past, and to take effective and organized action when necessary to combat unfair legislation and measures detrimental to the interests of the citizens in general and the real estate interests in particular.

[illegible] are also planning to follow the example of the Toronto realty men, and will form a real estate board. [illegible] board would afford protection to the property [illegible] to raising the standard of [illegible] Any person who had a grievance against a [illegible] redress from an arbitration [illegible]

AN ALLIANCE FOR LIFE

Many of the large Corporations and Business Houses who bank exclusively with this institution have done so since their beginning.

Their banking connection is for life—yet the only bonds that bind them to this bank are the ties of service, progressiveness, promptness and sound advice.

395 Branches in Canada, extending from the Atlantic to the Pacific
New York Agency: 63 and 65 Wall Street: W. M. Ramsay and C. J. Crookall, Agents
London, England, Office, 53 Cornhill: J. B. Donnelly, D.S.O., Manager.
Bankers in Great Britain: The London Joint City & Midland Bank, Limited, The Royal Bank of Scotland

BANK BRANCH NOTES

The Bank of Nova Scotia has opened a branch at San Pedro de Marcoris, Dominican Republic.

W. C. Sinclair, who has been assistant manager of the Prince William Street branch of the Bank of Nova Scotia at St. John, N.B., has been appointed manager of the branch at Amherst, N.S.

The Merchants Bank announces the opening of a branch at Alert Bay, B.C. The new branch will be under the charge of A. N. McMillan from the Vancouver office. The Merchants Bank of Canada is now represented in British Columbia by fourteen branches and agencies.

CANADIAN BUSINESS FAILURES

The number of failures in the Dominion, as reported by R. G. Dun and Co. during the week ended October 8, 1920, in provinces, as compared with those of previous weeks and corresponding weeks of last year, are as follows:—

Date.	Ont.	Que.	Man.	Alta.	Sask.	B. C.	N. S.	N. B.	P.E.I.	Total.	1919.
Oct. 8	5	10	2	0	2	2	0	0	0	21	10
Oct. 1	3	4	0	1	3	4	0	2	0	17	11
Sept. 24	2	3	1	0	2	4	0	1	0	13	22
Sept. 17	5	8	2	0	2	2	0	5	0	24	..

Bradstreet's, for the week ended October 7th, 1920, report the number of failures in the Dominion as 17, compared with 12 in the previous week, 11 in 1919, 24 in 1918, 14 in 1917 and 36 in 1916.

RAILROAD EARNINGS

The following are the approximate gross earnings of Canada's transcontinental railways for the first week in October.—

Canadian Pacific Railway.

	1920.	1919.	Inc. or dec.
October 7th	$5,356,000	$3,965,000	+ $1,391,000

Canadian National Railway.

October 7th	$2,657,913	$2,140,414	+ $ 517,499

Grand Trunk Railway.

October 7th	$2,737,818	$2,115,530	+ $ 622,288

EXCHANGE QUOTATIONS

Glazebrook and Cronyn, exchange and bond brokers, Toronto, report local exchange rates as follows:

	Buyer	Seller	Counter
N.Y. funds	10 pm	10½ pm	
Mont. funds	Par	Par	⅛ to ¼
Sterling—			
Demand	$3.84	$3.85	
Cable transfers	3.85	3.86	

Bank of England rate, 7 per cent.

New York quotations of exchange on European countries, as supplied by the National City Co., Ltd., Toronto, are at October 14, 1920, follow: London, cable, 3.49; cheque, 3.48⅝; Paris, cable, 6.58; cheque, 6.57; Italy, cable, [illegible]; cheque, 3.94; Belgium, cheque, 6.92; Swiss, cheque, [illegible]; Spain, cheque, 14.44; Holland, cheque, 30.80; Denmark, cheque, 14.00; Norway, cheque, 13.80; Sweden, cheque, [illegible]; Berlin, cheque, 1.37; Greece, cheque, 10.00; Finland, cheque, 2.85; Roumania, cheque, 1.80.

RAILROAD EARNINGS

The following are the approximate gross earnings of Canada's transcontinental railways for the month of September:—

Canadian Pacific Railway.

	1920.	1919.	Inc. or dec.
Sept. 7	$3,991,000	$3,599,000	+ $ 392,000
Sept. 14	4,258,000	3,763,000	+ 495,000
Sept. 21	4,605,000	3,893,000	+ 712,000
Sept. 30	6,849,000	5,963,000	+ 886,000
Total	$19,703,000	$17,218,000	+ $2,485,000

A Weekly Meeting

THE Directors of this Corporation are men well-known in the commercial, financial and professional life of Canada. They meet weekly to transact business, when estates in the course of administration receive the benefit of their counsel and experience on all matters of importance. All investments of trust funds are made by the authority of the Directors, thus protecting estates, small as well as large, against the uncertainties of individual judgment.

MARITIME BOARD OF TRADE MEETING

Western Provinces Have Expensive Railways, for Which all Canada Must Pay, Says President—New Secretary Appointed

PARLIAMENT often forgets that there is in this country an east as well as a west and a centre, said H. J. Logan, K.C., president of the Maritime Board of Trade, at its 22nd annual meeting held in Amherst, N.S., September 29 and 30. The dream of a united Canada has not come true, he continued, and one thing which had not been foreseen was the growth of the western provinces to their present extent. Mr. Logan said in part:

"As it was considered wise to make the canals of Ontario free, it was also thought right in carrying out the terms of Confederation and in cementing the different provinces together that the rates and charges of the Intercolonial Railway should be such as would encourage interprovincial trade. Up until a few years ago the old Intercolonial, under maritime province management, did a great work in building up trade between east and west. Then came a change. Railroads, costing in the last twenty years over a billion dollars, have been constructed, particularly for the benefit of western Canada. These roads were not paying, in fact, were rapidly becoming bankrupt. A merger was made between these roads and the old Intercolonial, and in order to pay for the long, lean section, the promises of Confederation have been forgotten and the rates on the Intercolonial Railway, which carries 85 per cent. of the passengers, and 50 per cent. of the freight of the whole Canadian system, have been increased to such an extent that trade between the maritime provinces and the upper provinces is liable to be paralyzed.

"We have been able to ship a large part of the product of maritime manufactories to markets outside of these provinces. I am told to-day by manufacturers that if the present freight rates are maintained, we must depend almost entirely upon the markets in the maritime provinces, and as we are not large consumers of a number of the manufactured products in the maritime provinces, the future of these manufactories is nothing less than alarming.

Eastern Provinces Neglected

"A united demand of the west has caused the government to construct a very expensive railway to the north. It is estimated that the total cost of this railway and the equipping of a great national port on the Hudson Bay will cost this country not less than fifty millions of dollars, in spite of the fact that this port can only be open to navigation about two months in the year, and yet we do not seem to be able, in the maritime provinces, to secure the nationalization of our great winter ports and the equipment thereof to handle traffic which comes to our shores.

"I submit what we require in the maritime provinces is less party politics and more maritime politics. I know we are open to the accusation of being grouchers, but as eternal vigilance is the price of liberty, so must the building up of a maritime policy be the means of securing the amelioration of existing conditions and the securing of national justice to these provinces. We are divided into three camps. Personally I believe in maritime union, but if that cannot be secured, let us at least be united upon matters which are of vital importance to our welfare. The Maritime Board of Trade is the only institution in existence which can speak for all maritime interests. It is therefore imperative that instead of demobilizing we should secure new recruits in every city and town in these provinces and march forward."

The board went on record in favor of a united office for the maritime provinces in London, changing the rule of the road, the reduction of harvest excursions to the west, the standardizing of the narrow-gauge section of the P.E.I. line, and closer relationship with the West Indies.

The following officers were elected for the ensuing year: president, H. J. Logan, K.C.; vice-president, J. LeRoy Holman, Summerside; second vice-president, Capt. J. E. Marsters Moneton; secretary-treasurer pro tem., H. R. Thompson, Amherst. Council: Wallace L. Higgins, Charlottetown; R. E. Emerson, St. John; A. N. McLellan, Sydney; C. C. Avard Sackville; George E. Graham, Kentville; J. B. Snowball, Chatham; John Kirk, Yarmouth; A. H. Whitman, Halifax.

Robert Armstrong, secretary of the St. John Board of Trade, was appointed secretary of the Maritime Boards, succeeding T. Williams, of Amherst. Mr. Williams resigned because of ill-health.

ALBERTA ASSOCIATED BOARDS OF TRADE

Provincial Organization Formed in Alberta—J. A. Valiquette, President, Outlines Work for New Body

AT a meeting of representatives of boards of trade in Alberta, held in Edmonton, September 29-30, the "Alberta Associated Boards of Trade and Chambers of Commerce" was organized. J. A. Valiquette, Calgary, is president, and the vice-presidents are J. E. Brown, Edmonton, G. R. Marnock, Lethbridge, and Wm. Cousins, Medicine Hat. An executive was elected as follows: R. B. Welliver, Red Deer; F. P. Layton, Camrose, and Angus Campbell, Grande Prairie. J. H. Hanna, secretary of the Edmonton Board, will act as secretary of the Associated Boards for the time being.

It was decided to appoint representatives from the associated boards of trade in Alberta to meet representatives of a similar association in Saskatchewan with a view to securing the services and advice of an expert upon freight matters requiring adjustment within the two provinces.

Will Take Action

Speaking of the new organization Mr. Valiquette said: "There was a spontaneous movement on the part of all the delegates from every board of trade seeking the development of commerce in Alberta and the furtherance of all interests contributary to its development, but the idea in the formation of the Associated Boards of Trade goes further than this. It seeks for the development of opportunities in the province, and it aims at a united effort so that the problems of interest to one locality may, through this new organization, receive the support of all boards of trade.

"The work of this organization is not for the purpose of passing resolutions only, but rather for pushing these resolutions to a practical conclusion when they are of such a nature to warrant consideration on the part of those who are in authority to deal with the questions they entail. These resolutions must be of such nature that practical work can follow, and also such that they may be intelligently dealt with.

"In proof of this a resolution bearing on the cattle embargo which was presented to the convention at Edmonton did not get through, but was, instead, held up to gather further information so that the organization may be in a position to make an honest effort to remedy the state of affairs now existing.

"Another resolution which did not get through was that of the development of power in the province. It was the opinion that there was not sufficient information at hand on that subject to deal with it intelligently, and the Associated Boards of Trade wish to be in a position to handle all such questions advisedly and intelligently before they are taken in hand."

The association went on record in favor of: Asking the Dominion government to order the railways to provide more cars for grain shipments and development of water power by the provincial government.

Wood, Gundy and Co. have secured an office in the Lindsay Building, Winnipeg, Man., and will shortly operate an extensive western business under the management of A. H. Williamson.

FIRE AND ACCIDENT PREVENTION MEASURES

Fire Prevention Day Now Observed in Nearly Every Province —Ontario Safety League Holds "Safety Week"

SATURDAY, Oct. 9, was observed as fire prevention day in Canada, and the present week, ending October 16, has been proclaimed a "Safety Week" by the Ontario Safety League. A proclamation issued by the governor-general in connection with the observance of fire prevention day recites that during the past decade in Canada more than 2,600 persons have lost their lives, and property valued at approximately $200,000,000 has been destroyed by fire, and that the annual loss from this source continues practically unabated. Many millions of dollars' worth of standing timber are also destroyed annually, and new growth is injured. This loss is absolute. Seventy-five per cent. of the fires are preventable, and care should be taken to prevent them. The following measures were suggested:—

"1. All dwellings and their surroundings be carefully inspected by their occupants and all conditions likely to cause or promote the spread of fires removed.

"2. All public buildings, stores, warehouses and factories be inspected and cleared of rubbish in order to reduce fire hazards and maintain health and safety.

"3. All hotels, theatres, asylums, hospitals and other institutional buildings be inspected and provision made for all changes necessary to protect the occupants from danger in the event of fire.

"4. Fire drills be held for the children in all schools, for the inmates of all institutions and for the employees in all large stores and factories in order that a greater degree of safety may be ensured by acquainting the occupants with the best and most expeditious mode of exit in time of danger.

"5. Special instruction on the subject of fire prevention be given by the teachers and by municipal officials in the schools and that such appropriate literature as may be made available be distributed to the pupils.

"6. Boy Scout leaders give instructions to the troops under their control as to the best means of co-operating with municipal fire departments in the prevention and extinguishment of fires, and especially as to the desirability of qualifying for the Fireman's badge.

"7. Operators of lumber camps, settlers, campers, hunters, and others who may from time to time enter our national parks and forest areas, acquaint themselves with all laws, regulations and precautionary rules devised and established for the safeguarding of the woods against fire.

"8. All legislation and regulations enacted or issued by Dominion, provincial or municipal authorities dealing with fire prevention be given publicity by the municipal officials and that by public meetings or otherwise as may to them seem most fit, they endeavor to impress upon the citizens the national importance of safeguarding life and property from loss by fire."

Ontario, as usual, made a vigorous effort to improve conditions, and a large amount of literature was distributed and arrangements made, through the Ontario Fire Prevention League, for removal of fire hazards. Nearly every other province made a similar effort.

Prevention Week in Manitoba

Manitoba observed the whole week, commencing October [illegible] as fire prevention week, and suggested the following program:—Appointment of a fire prevention committee in each city, town and municipality to take charge of the work; proclamation by mayors of cities and towns, and reeves of each municipality, and setting forth a general clean up day; showing of suitable fire prevention phrases in moving picture theatres; self-inspection of every home and farm to prevent fire; inspection of business premises by owners and occupants with the view of removing and properly disposing of useless and combustible rubbish and waste, and immediately arranging for the correction of fire hazards; brief talks by employers to employees on fire prevention; fire drills in schools, factories and other establishments; reading of governor-general's proclamation in schools and colleges; brief lessons on fire prevention in schools; enrolling of boy scouts as fire preventionists; fire department inspection; fire prevention by fire insurance interests; special inspection of livery barns and stables by Winnipeg Humane Society; fire prevention committees to be made permanent for fire prevention work.

Model By-Law in Quebec

Outlining the work in the Province of Quebec, P. J. Jobin, provincial fire commissioner, says: "This office has forwarded the Governor-General's proclamation to all the city, town, village and parish municipalities. Leading articles for newspapers were written and published. So much for the 9th of October. During the other 364 days of the year we are busily recommending to the aforementioned municipalities the adoption and enforcement of fire prevention by-laws. We are also helping where necessary with advice and financial assistance to those municipalities that require efficient and satisfactory fire protection appliances." The province has drafted and distributed model fire prevention by-laws in French and English.

The Alberta fire commissioner's office distributed reading notices to the principal papers of the province. Copies of the governor-general's proclamation were also forwarded, as posters, to the secretary-treasurers of towns, with a request for their co-operation in arranging to assemble the school children and invite someone, such as the fire chief, to give a talk on fire prevention-day and its causes. This year a very extensive campaign is being conducted through the medium of the schools, moving picture theatres, press and private mailing lists of large companies, to place before the public some truths in regard to methods of fire prevention

THE GOLD SITUATION

Discussing the currency problem in Canada, the August issue of the Sterling Bank "Teller" says:—

"The road to sound currency is the straight and narrow path of strict observance of contracts. As a nation, we must make good on our pledges. It would, of course, be comparatively simple to announce a return to redemption in gold on demand, but under present conditions difficulty would arise in maintaining such redemption. If exportation of gold were free, shipments in payment of our cash obligations abroad would quickly deplete this country's stocks of the yellow metal. On the other hand, it is questionable in how far any effective restraint could be maintained on the exportation of gold, if gold were available within this country in exchange for Dominion notes. Hoarding probably would have to be expected; smuggling of gold out of the country could not well be avoided. Moreover, there would be no value in restoring demand redemption of our currency in gold unless the recipients were allowed to use such gold freely in international commerce. The situation would be serious if exportation of gold were permitted freely and if the yellow metal were obtainable on demand in redemption of our paper currency. Indeed, our entire gold holdings would be gone in a year's time.

"In December, 1913, Canada's visible gold stock—i.e., holdings by the government and the banks, amounted to about $112,000,000. At the end of 1919, it was higher by $50,000,000. With a population of less than ten millions, or about one half of one per cent. of the population of the world, the Dominion holds approximately 2 per cent. of the world's gold. Moreover, gold mining in this country would augment our holdings of the precious metal by $15,000,000 annually if the leak resulting from the unfavorable condition of our international cash account could be stopped. We have our fair share of gold probably, if we can hold it and pay our obligations abroad with other goods.

"The real problem is so to order our trade relations that undue drainage of gold will not take place and to make sure that in our foreign relations we do not have aggregate cash obligations exceeding current cash receipts."

A LIVING TRUST

A Living Trust Agreement with the UNION TRUST COMPANY is appropriate to the elderly whose declining energies should be free from the burdens of property management, and also to the active person who wishes to develop and build up his business without losing valuable time over routine details.

Successful men endorse without qualification the efficiency and economy of Living Trust Agreements.

TRADE FIGURES SHOW NO NEW DEVELOPMENT

Imports Still Continue to Increase, While Exports are Reduced—Business with France Falling Away—Exchange and Customs Regulations Responsible

No departure from previous tendencies is shown in the trade statement for the twelve months ended August, 1920, issued by the Dominion Bureau of Statistics. The report is liable to prove misleading, that is, as far as this year's trade is concerned. During July and August, according to figures issued by the Department of Customs, there was a slight improvement in the trade situation. This is not discernible in the table below, however, inasmuch as the improvement in the months mentioned was not great enough to affect the yearly total to a noticeable extent.

It will be noticed that our foreign trade continues along favorable lines, with the exception of France. Hon. Dr. P. Roy, Canadian High Commissioner to France, while in Ottawa recently, explained this. He stated that France was in need of many products from the Dominion, but the exchange situation and unfavorable customs regulations prevent that country buying large amounts of materials here just now.

Regarding our trade within the empire, it is apparent that there is room for some adjustment, particularly in the case of the United Kingdom and the East and West Indies. Imports from the United States are nearly double exports to that country, indicating that drastic measures will have to be taken if the exchange rate is to be restored to par in the near future.

	Twelve Months ending August

WHOLESALE PRICES CONTINUED DOWNWARD

Index Number Reduced from 346.8 to 330.2—Decline Due Chiefly to Lower Levels in Potatoes and Other Fruits and Vegetables

In August, 1920, the prices movement was marked by a steep decline in potatoes, and there were also a number of decreases in other lines, particularly in grain, live stock, fish, textiles, hides and leather. There were increases in dairy products, iron goods, and in coal and petroleum products. In building materials some lines of lumber were lower, and there were large decreases in linseed oil, turpentine and putty and shellac.

The index number of wholesale prices fell to 330.2 for the month as compared with 346.8 for July, 349.3 for June, 356.6 for May, 301.1 for August, 1919, and 136.3 for August, 1914. The decrease was due chiefly to the decline in potatoes, but there were lower levels in other fruits and vegetables, and also in the lines mentioned above.

The following table, compiled by the Department of Labor, shows index numbers of wholesale prices by groups and commodities for August, 1920, as compared with previous periods:—

Department of Labour Figures	No. of Commodities	Index Numbers			
		*Aug. 1920	*July 1920	*Aug. 1919	Aug. 1914

PREFERRED STOCK ISSUES APPROXIMATE THIRTY SEVEN MILLIONS

Underwriting of British Empire Steel Shares Responsible for Large Figure—Total to Date This Year Nearly Seventy-seven Millions

WITHIN the past three months new offerings of preferred stock were not as numerous as in the early part of the year. There were some important changes in the capital of several Canadian corporations, however, which are interesting to review.

The Canadian General Electric Co. issued $1,000,000 additional common stock, bringing the total capitalization of that company to $8,000,000 common, paid up, and $2,000,000 preferred.

A special dividend of 25 per cent., available to shareholders in the form of new stock at the rate of one new share for each four held, was declared by the Lake of the Woods Milling Company. As a result of this 7,000 shares of a par value of $100 are now listed on the Toronto Stock Exchange.

Shareholders of the Wabasso Cotton Company converted 17,500 shares of $100 par value into 35,000 shares of no par value, holders of the old shares receiving two for one.

Under the new Riordon merger plans, shareholders of the Kipawa Co., Ltd., expanded their holdings of stock into new Riordon Co., Ltd., common shares, the basis of exchange being 1½ shares of new for one of old.

The bond issue of the St. Maurice Paper Co. was converted into common stock, bringing the common capitalization up to $7,899,000. This amount is the sole outstanding liability to shareholders of the company.

The Dryden Pulp and Paper Co., Ltd., whose bonds are held by English interests, sold 100,000 shares of common stock (no par value) in Canada, at a price of $35 per share.

Capitalization of the Brompton Pulp and Paper Co. was increased from 70,000 shares of a par value of $100 each, to 210,000 shares of no par value. Shareholders received two new shares for one of old and the remaining 70,000 is kept in the treasury.

Up to the present time this year a large number of newly incorporated companies have been issuing stock, while many other companies have increased their capital. *The Monetary Times* has been unable to make an estimate of the new stock issued, owing to the fact that the shares of the majority of these organizations have been absorbed privately.

The following table gives the details of preferred stock offerings which have been placed on the public market during the last three months. Total offerings of this nature to date this year approximate $77,000,000. It will be noticed that in most cases inducements were offered in the way of substantial common stock bonuses. The shares of the British Empire Steel Corporation were placed privately in Great Britain, chiefly with large steel concerns there, by Col. Grant Morden, one of the chief executives of the consolidation:—

PUBLICATIONS RECEIVED

Concordance of the Companies Act.—By Leslie G. Bell, of the Montreal Bar. Carswell Co., Ltd., Toronto. 181 pp.; with index; $5. This book covers the Dominion Companies Act, the Business Profits War Tax Act, the Income War Tax Act, and provincial legislation applicable to Dominion companies. The increasing number of incorporations and the growth and importance of legislation governing such bodies make it a very useful work. The "Office Consolidation of the Companies Act," which comprises 88 pages of the book, is a thorough index to all subjects dealt with by the act.

Canadian Customs and Excise Tariffs.—Compiled by M. P. McGoldrick, of His Majesty's Customs, Montreal. Published by Chas. S. J. Phillips, 20 St. Nicholas St., Montreal. 504 pp., $2.50. This handbook shows the tariff on all classes of goods alphabetically arranged, and includes the Revenue Act of 1920. It also shows the articles subject to luxury tax and those exempt from sales tax, and the stamp tax legislation. Other features are a list of warehousing ports, outports, etc., in the Dominion, the trade conventions with Belgium, Netherlands, Japan, Italy and British West Indies, extracts from the Customs Act, [illegible] customs, decimal [illegible], foreign weights and measures with their Canadian equivalents, tables showing Canadian customs value of foreign currencies, conversion tables of sterling [illegible] into Canadian money, Montreal wharfage tariff and [illegible] chartered banks in Canada.

Daylight on the Money and Banking Questions.—By [illegible] Owen. Western Veteran Publishing Co., [illegible], Man. 47 pp., [illegible]. The author of this pamphlet believes that wealth is produced by labor alone. "It is a [illegible] fundamental fact of political economy that labor produces all wealth," he says. He accordingly deplores the accumulation of wealth through interest, and urges radical changes in the money and banking system. His chief proposals are: That the government issue sufficient legal tender money for all needs, thereby abolishing credit and interest, and that banking be conducted by the government at cost; that a tax on land values be imposed; that the tariff be abolished; that natural resources be the property of the people; that public utilities be operated at cost; that six hours be a legal day's work; that each person over [illegible] years of age receive a pension; and that an income tax of from 50 per cent. to 100 per cent. be levied on all incomes from $2,000 to $1,000,000, until the public debt is paid.

Canadian Bankruptcy Reports.—General interest in the application of the Bankruptcy Act has led to the commencement of a special publication, to deal carefully and exhaustively with the development of the law under the act. The work is known as the Canadian Bankruptcy Reports, Annotated, published by [illegible] Co., Ltd., of Calgary, Alta., and marketed in eastern Canada by their eastern office, [illegible] Ltd., Witness Building, Montreal, Que. The first part has appeared and contains a complete [illegible] with [illegible] carefully prepared index and [illegible]. There are also several [illegible] England and Canada of value [illegible] of the act. The text of the [illegible] gives the original [illegible] form amendments. DIVIDEND NOTICES

THE CONSUMERS' GAS COMPANY
OF TORONTO

Notice of Annual Meeting

The Annual General Meeting of the Shareholders of the Consumers' Gas Company of Toronto, to receive the report of the Directors, and for the election of the Directors for the ensuing year, will be held in the Company's Boardroom, 17 Toronto Street, Monday, the 25th day of October, 1920, at 12 o'clock, noon.

ARTHUR HEWITT,
General Manager. 249

THE MERCHANTS BANK OF CANADA

QUARTERLY DIVIDEND

A Dividend of Three Per Cent. for the Current Quarter, being at the rate of Twelve Per Cent. per annum upon the Paid-up Capital Stock of the Bank, was declared payable on 1st November next to Shareholders of record on the evening of 15th October, stock not fully paid up on 31st July to participate in the dividend on the amounts paid up on that date and upon later payments from the date thereof.

By Order of the Board.

D. C. MACAROW,
General Manager.

Montreal, 30th September, 1920. 247

DEBENTURES FOR SALE

DEBENTURES, TOWN OF KENTVILLE

Sealed tenders addressed to the undersigned and marked "Tenders for Debentures" will be received up to noon on October 25, 1920, for the purchase of the following debentures:—

$25,000.00 to pay Water Works Debentures maturing January 1, 1921, in denominations of $500.00 each, and dated November 1, 1920.

$2,500.00 to pay School Debentures maturing January 1, 1921, in denominations of $500.00 each, and dated November 1, 1920.

$1,300.00 to pay Exhibition Ground Debentures which matured on November 1, 1919, in denominations of $100.00 each, and dated November 1, 1920:

$2,300.00 for the purchase of a Chemical Engine for the Fire Department, in denominations of $100.00 each, and dated November 1, 1920.

All of the above debentures will bear interest at six per cent. per annum, payable half-yearly, and said debentures are to be issued under the Authority of an Act of the Legislature of the Province of Nova Scotia passed at the last session.

These debentures redeemable in 2[illegible] years.

The highest or any tender not necessarily accepted.

Dated at Kentville, Kings County, N.S., this [illegible] day of October, A.D., 1920. 254

J. CARROLL,
Town Clerk.

LAKE OF THE WOODS MILLING COMPANY STATEMENT

VARIOUS ACTIVITIES INDICATED

Many people have been watching with interest for the statements of the milling companies covering the period during which they labored under Government restrictions, and the statement issued by the Lake of the Woods Milling Co. to their Shareholders is of interest to all.

Despite the hindrance of the regulations, the statement is highly satisfactory, although the profits have been made not so much by milling operations as by the Company's various activities in other fields.

The total profits for the year were $732,232, against $756,616 of a year ago. The net earnings were equal to 23.4 per cent. on the increased stock, against 28.5 per cent. on last year's lower capitalization. The slight decrease is due to the war-time regulation which made it necessary for the Lake of the Woods Milling Co. to depart from their standard of excellence for their brands and to make use of certain substitutes designated by the Government.

The balance sheet indicated a strong fiscal position. The Company's net working capital at the end of the year amounted to $3,481,089, compared with $2,236,855.

The statement shows the total revenue for the year to be derived from the following:—

Milling profits (after deduction of operating expenses and providing reserves for doubtful accounts, war taxes, etc.)	$410,521.49
Profits from sources other than milling proper (including dividend from Sunset Manufacturing Co., Limited, the subsidiary company)	321,711.36
	$732,232.85

This amount has been apportioned as follows:—

Interest on Company's Bonds	[illegible]
Dividend of 7% on Preferred Shares	[illegible]
Dividend of 12% on Common Stock . . .	[illegible]
Written off on Property and Good-will Account.	100,000.00
Carried to Surplus Account . . .	[illegible]
	$732,232.85

Tariff Opinions of The West Are Conflicting

Farmers Still Want Substantial Reductions, But Are Not Free Traders—Local Manufacturers Voice Protectionist Sentiment—Alberta Coal Dealers Want Protection—Saskatchewan Grain Growers Advocate Direct Rather Than Indirect Assistance to Industry

DURING the past two weeks the Tariff Commission has held sessions in several western cities, as follows: September 30, Nelson, B.C.; October 1, Trail, B.C.; October 4 and 5, Calgary; October 6 and 7, Edmonton; October 8, Saskatoon; October 11 and 12, Edmonton; October 13, Brandon, and October 14, Winnipeg. To-day the Commission is in Fort William and Port Arthur, and next week will be spent in Ontario.

At Nelson, evidence was given by the Associated Boards of Trade of Eastern British Columbia, the Nelson Board of Trade, the Central Farmers' Institute for West Kootenay, and other organizations and individuals. The boards of trade desired reduction or removal of the duties on those classes of mining and milling machinery and on those tools and supplies used in connection with the mining industry that are not manufactured in Canada. It is pointed out that many of these types of machinery, indispensable in the mining industry, are not represented in home manufactures and have to be imported.

The Mountain Lumber Manufacturers' Association, representing 450 miles with 10,000 employees, urged that lack of some protection on lumber is a far more serious thing for interior mills than for those on the coast, which benefit by having other markets and a larger proportion of high-grade product.

The Central Farmers' Institute for West Kootenay asked for detention of the duties on fruit for protection of the British Columbia growers against dumping of United States fruit in Canada. In regard to the tariff generally, the principle of protection was favored where necessary for encouragement of young industries, provided that undue burdens are not laid on other industries that have to import machinery or raw material, or on the consumer at large.

Protection on Mining Products

At Trail, J. J. Warren, general manager of the Canadian Consolidated Mining and Smelting Co., asked that they should be given protection on zinc sheets and copper rods now free of duty, and on pig lead, on which the protection is insufficient against Spanish, German and Belgian lead now coming to Canada after some further manufacture in Great Britain under the British preference. The removal of the 7½ per cent war tax on copper rods and fluorspar affected them, as they had banked on its continuance to the extent of a quarter of a million dollars' investment in a fluorspar plant and a similar amount in a rod mill, and also $250,000 on the copper refinery. On fluorspar they want a duty of $1.50 a ton, the same as United States duty against the Canadian product. A partial embargo on zinc sheets, except from Great Britain and the United States, was also asked, as well as a bounty on all foreign business, to enable them to supply the British market. He asked that a duty of 1½ cents on copper wire and rods, the same as on ingot copper, should be levied, as the greatest part of Canadian consumption was in this way. Mr Warren said the increase in freight rates had increased the difficulty of competing with New York and St. Louis plants. The handicap of one-third of a cent now existing had already increased to one-half cent a pound.

A business man of the city and workers from the plant also spoke, emphasizing the importance of the industry to southern British Columbia, as well as to the 2,500 men employed and the mines served by it. They supported Mr. Warren's proposals. As to lead Mr. Warren wants a conference with all lead factory heads before making a suggestion, but he wants the duty at least even with United States duties of two cents a pound.

In Calgary, James Weir, member for Nanton in the provincial house, stated that while the farmers do not look for free trade they want a revision to lighten the burden on farm implements. He told the commissioners that Alberta farmers were willing to see the tariff revised to allow a measure of protection being granted eastern manufacturers and that never in his wide experience with them had he heard them ask for absolute free trade.

Views of Coal Operators

Coal operators in the province wish the present moderate tariff maintained on imports of coal, according to a statement presented on behalf of the mine operators by W. F. McNeill. This tariff, it was stated, was necessary to ensure the expansion of Alberta mines and to assure a domestic market for the products. The coal market in the province at the present time, he said, is now on a profitable basis.

Jesse E. Gouge, Drumheller, mine operator, presented a minority report from the Mine Operators' Association, in which he claimed that protection is not essential to the mining industry and that the document presented by Mr. McNeill was inspired by a friendly feeling toward the Manufacturers' Association on the part of mine operators. He declared the tariff could be called a protection as it now stands.

W. F. McNeill, on behalf of Alberta coal operators, opposed any reduction of the tariff on imported coal. The present duty on bituminous coal for railroad and industrial use was held essential by the operators because of the following reasons: It has enabled the development of Alberta mines; reduction of duty would allow imported coal to replace Alberta coal in Manitoba markets; curtailing of this market would lead to heavy increases in prices; reduction would retard development of Alberta mines; the installation of modern machinery would be stopped by the loss of the market; hope of competing with the imported coal in the northwest of Ontario would be impossible following a reduction in tariff; an assured emergency supply of coal for western Canada would be lost by the retarding of mine development in Alberta; other industries would be adversely affected; Alberta as a province would lose revenue; further investment would be curtailed following a reduction.

In a lengthy document, Mr McNeill outlined the development of the Alberta coal field. There are now, he said, 276 coal mines in operation in Alberta, employing 12,207 men, with an invested capital of more than $37,000,000. Colliery workers and their dependents in Alberta number 50,000. The value of products in 1918 from the mines was more than $420,500,000, and whole communities depended on their continuance. The mines are capable of producing 12,000,000 tons with the present equipment.

Competition from United States

Manitoba was shown to be a heavy customer of the Alberta mines, having imported during the first seven months of the calendar year nearly three hundred thousand tons. This coal, he said, had to compete with the western states' products. With assured markets, Mr. McNeill told the commission, and the continuation of the tariff, Alberta mines would be able to displace the two million tons of United States coal which at present enters the Manitoba market. In conclusion, Mr. McNeill told the commissioners that the operation of Alberta mines has not been profitable, owing to the limited market and seasonal conditions. He asked on behalf of the operators a continuance of the present moderate protection in order that further markets may be opened and inducement to further investment furnished.

Jesse Gouge, of Drumheller, coal operator, presented a minority report which objected to Mr. McNeill's statement. The presentation of the statement, he said, was as a result of the friendly feeling of the coal dealers towards the Manu-

Subscription Lists will close on or before October 25th

New Issue **$4,000,000** MONTREAL, *October 15th, 19*

Abitibi Power and Paper
Company Limited
6% General Mortgage Sinking Fund Gold Bonds

Dated January 2nd, 1920 **Due January 2nd, 1940** **Denominations: $1,000 and $500**

Interest ($30 every six months on each $1,000 of Bonds) payable on January 2nd and July 2nd.
Principal and interest payable at par of exchange at Montreal, Toronto, New York, or London, England.

CAPITALIZATION

	Authorized.	Outstanding.
Common Shares, no par value (paying $6 per share)	250,000 shares	250,000 shares
7% Cumulative Preferred Shares	$1,000,000	$1,000,000
6% First Mortgage Bonds, maturing serially 1921-1934		4,107,500
6% General Mortgage Sinking Fund Bonds	5,000,000	4,000,000

SECURITY FOR BONDS

Bonds are secured by a specific mortgage on all the Company's present and future fixed assets and a floating charge upon all other assets subject only to $4,107,500 of First Mortgage Bonds redeemable serially 1921-1934.

From $292,000 to $325,000 of First Mortgage Bonds mature each year, 1921 to 1934 inclusive. These annual reductions in amount of First Mortgage Bonds outstanding, coupled with heavy Sinking Fund of 3% per annum on General Mortgage Bond issue, rapidly increases the equity behind General Mortgage Bonds.

At current market prices on Montreal Stock Exchange, Preferred and Common Shares have a market value of approximately $20,000,000, ranking junior to these Bonds.

Complete prospectus, copies of which will be [illegible] on request, contains a letter from the President of the Company, from which we summarize as follows:—

1. Abitibi Power and Paper Company, Limited, is one of the largest Canadian producers of newsprint paper. It operates at Iroquois Falls in the District of Temiskaming, Ontario, a modern newsprint paper mill designed for an ultimate annual capacity of 145,000 tons.

2. Present Annual Output is as follows:

	Tons.
Newsprint Paper	70,000
News Sulphite Pulp (surplus)	20,000
Groundwood Pulp (surplus)	35,000

Production by May, 1921, will be increased to 145,000 tons newsprint paper annually.

3. Timber Areas—over 1,000,000 acres pulpwood lands, estimated to contain over 5,000,000 cords of spruce pulpwood. Total supply of about 15,000,000 cords of pulpwood is available from the Abitibi district.

4. Water Powers—53,000 horse power, of which 25,000 horse power is developed and in operation and 28,000 horse power now being developed.

5. Plant and Property Valuation—$21,000,000, exclusive of timber holdings, as against $8,107,500 of Bonds, including this issue.

6. Net Liquid Assets (working capital) after deducting all current liabilities, but without including proceeds of this issue, as at December 31st, 1919, were $1,594,986.

7. Net Earnings available for interest, depreciation, etc., for year ended December 31st, 1919, were $2,125,717—over four times amount required to pay interest on all Bonds outstanding.

Estimated Net Earnings for current year available for interest, depreciation, etc., $2,500,000, against annual Bond Interest of $486,450 (reduced annually by serial maturities).

The larger portion of this issue having been sold in Canada and the United States, we offer the unsold balance at the price of—

89.44 and Interest, Yielding 7%

Payable: 20% of the par value on application.
40% of the par value on November 15th, 1920
Balance, December 15th, 1920.

Interest will be allowed on payments at the rate of 6% per annum. Payments may be anticipated in whole or in part at any time. Accrued interest will be adjusted upon final payment

Application may be made on the accompanying form.

NAME (In full) Mr. Mrs. or Miss

ADDRESS (In full)

DATE

facturers' Association. He objected to the statement as a protective measure. It was, he continued, a purely revenue-raising tariff and not designed to protect the coal operators. There is, he said, no need for a protective tariff.

R. A. Pringle, K.C., representing certain textile industries, filed figures to refute statements made by L. M. Gates, at the Monday session, to the effect that during the war the prices of textiles in Canada were not, as claimed, lower than the prices of imported material.

In Edmonton, reduction of the tariff to give the farmers opportunities to buy in the open market was requested by Hon. Duncan Marshall, provincial minister of agriculture. "Alberta farmers have to compete in the open market for the sale of their goods. All that they ask is that they have the privilege of buying implements of production in the same manner. The reduction of the tariff burden will enable them to prosper," he said. "The increase of exports will bring revenue to the Dominion treasury and the best means of securing this increase will be to remove the tariff on farm implements." He concluded by asking that the tariff be put on a purely revenue basis, and the elements of protection deducted.

Western Farmers' Views

Local farmers gave evidence of conditions in the Edmonton farming district. Harry Bell, from Namayo, a veteran farmer, thought that the tariff on farm implements could be fairly cut in half, and so relieve the farmers of some of the burden.

Rice Shepherd, for fifteen years an official of the United Farmers of Alberta Association, charged that Canadian manufacturers took advantage of the tariff to raise prices, that farm implements of Canadian manufacture are of a cheap grade and the price maintained to meet that of American production with the tariff added. "I can prove this, too," he said, but failed to produce any up-to-date figures when requested by Sir Henry Drayton. He suggested that a land tax be levied by the Dominion government to replace the protective tariff.

W. T. Lucas told the commission that agriculture is a basic industry, that the risk is great and returns are not proportional. Many Alberta farmers had failed in the last three years, he said.

Philip Baker, of Ponoka district, said that farm children were leaving the farms when they reached a thinking age because of the poor returns from agriculture.

In Saskatoon, manufacturers endorsed the stand taken by the Canadian Manufacturers' Association and asked the retention of the protective tariff. Representative farmers appeared under the auspices of the Joint Council of Agriculture and urged the reduction of the tariff on farm implements and necessities of life.

Grain Growers' Recommendations

Recommendations advocating the alteration of the present tariff system were made by the Saskatchewan Grain Growers' Association as follows: (1) The placing of all foodstuffs on the free list and the removing of the import duty from lumber, cement, gasoline and kerosene, agricultural implements, farm machinery, vehicles and fertilizer. (2) A general reduction of the import tariff with a view to making all industries self-supporting and competent to produce at world values. (3) Tariff artificial assistance, if to be continued, that it be by open and direct methods, making its cost fully evident. (4) That as rapidly as feasible direct methods of taxation be substituted for indirect. (5) That above all the need for national revenue should not be allowed to be exploited for private gain.

J. B. Musselman, central secretary of the association, presented the statement. It began by assuring the commission of the loyalty of the Saskatchewan farmers to Canada and to what they believe to be in the true national interest. Their requests for a change in the tariff are not [illegible], it continued, by a desire to further their vocational class interests at the cost of others but for what they believe will be fairer to all legitimate industries in Canada. "Every threat to the nation's fundamental democratic institutions have come from the industrial centres and not from the farm. We are not wreckers," it was stated.

The association further informed the commission that it believed that an informed agricultural population fully conscious of its responsibility of citizenship, and persuaded that it is suffering no legalized injustice from other classes, offers the only permanent foundation for the Canadian nation and that any abnormally rapid development of the manufacturing industry under protection affords no such basis. Grain-raising was stated as the chief industry of the province and the major source of her buying power and prosperity of the province depends on its development. After declaring that the association is not antagonistic to the manufacturers, the statement continued: "We believe that it is economically unsound and unfair to raise national revenue by a method which affords the opportunity to enhance private profits and that to make the need for raising national revenue the excuse for subsidizing industries is wasteful and immoral."

AGRICULTURAL INSURANCE CO.'S INVESTMENTS

Over $52,000 has been invested in Saskatchewan provincial and local securities by the Agricultural Insurance Company since it was organized in April last, according to a statement of J. H. Mitchell, secretary of the company. The division of its investments at the present time is as follows: Saskatchewan Farm Loan debentures, $20,000; Brooklyn S.D. debentures, $13,500; Thatch Creek S.D. debentures, $5,600; South Cupar R.T. Company debentures, $5,450; Donwell-Canora R.T. Company debentures, $5,000; Elmdale R.T. Company debentures, $3,300.

"The Agricultural Insurance Company is composed entirely of Saskatchewan farmer shareholders," said Mr. Mitchell, "and the purpose is to provide a means for the farmers of this province to do their own business with their own money. It handles both fire and hail insurance, and this season did a very good hail business. We find that the farmers are just as ready to place their insurance with us as with companies capitalized at $1,000,000 or more. They appreciate the fact that they have got to control things financial in this province as well as things otherwise. The company already has over 1,000 shareholders. Although not yet a year old, it has shown that it fills a need in the economy of Saskatchewan, and that the financing of Saskatchewan with Saskatchewan money is not entirely an impossible thing."

MOTOR UNION INSURANCE COMPANY, LIMITED

In the comments in our issue of 1st October on the operations of the Motor Union Insurance Company for 1919, we quoted the chairman, Chas. H. Dodd, as stating that the premium income had risen from £134,847 in 1918 to £[illegible]. Unfortunately, we omitted to make it clear that these were merely the figures of the fire department. The premium income in all departments amounted to no less than $[illegible], and in addition there was the sum of $453,754 derived from interest on investments, etc. The amount remaining at credit of profit and loss was $711,772. The total assets at the end of 1919 amounted to $11,947,358, which amount has since been increased by the issue of the balance of the ordinary shares (100,000) at a premium of $24.30 per share, making an addition of $486,000 to the capital account and another $[illegible] to the general reserve. All departments showed a very gratifying increase in premium income with the exception of the marine department, in which the [illegible] somewhat owing to the cessation of [illegible] with this there was a profit in the [illegible] over $257,58[illegible], so that the results [illegible].

The general [illegible] the year's working and the excellent financial [illegible] of the company speak for the [illegible] management.

BOARD'S JURISDICTION OVER EXPRESS SERVICE

Controls Tolls, Contracts and Amount of Liability—New Railway Act Also Gives it Power to State What Goods are to be Carried by Express

RATES charged by express companies in Canada are subject to the control of the Board of Railway Commissioners for Canada, but outside of this the jurisdiction of the Board over express matters is more limited than is its control over the railways. This is emphasized in an informal ruling of the board, dated March 24. Referring to the new Railway Act, the ruling says:—

"The powers of the board in regard to express business are set out in sections 360-366, inclusive. The jurisdiction is concerned with tolls. The group of sections 360-363 is concerned with the formalities as to preparation, filing, etc., of tariffs. Section 365 requires that contracts, conditions, etc., limiting the liability of the express companies are to be approved by the board. Sub-section 2 (b) of the same section provides that the board may prescribe the terms and conditions under which 'goods may be collected, received, cared for or handled.' This is a power in regard to the liability, not in regard to requiring the establishment of facilities. See in this connection 'Canadian and Dominion Express Cos. vs. Commercial Acetylene Co.,' 9 Can. Ry. Cas., 172, at p. 174. The only other section in the group referred to, section 366, is concerned with returns by companies charging express tolls.

"Section 364 gives the board power to define carriage by express. This was formerly section 352 of the Railway Act, and it was decided in 'Canadian and Dominion Express Cos. vs. Commercial Acetylene Co.' (May 20, 1909), 9 Can. Ry. Cas., 172, that express companies were at liberty to exercise their own discretion in refusing to carry by express any particular commodity.

Company May Not Discriminate

"Section 364 of the present act differs from section 352 of the former act by the addition of the words 'and may order that all such goods as the board may think proper shall be carried by express.' The effect of this is to remove the discretion which the express companies formerly had. The express company may not discriminate between goods as to carriage, but this does not give power to direct the installation of facilities at stations. It may further be noted that in the group of sections already referred to there is no section which gives the board power to direct that facilities shall be afforded.

"Subject to the change in section 364 as above referred to, the group of sections covering express business are, with minor exceptions as to amendments, the same as in the first express judgment given. In that judgment, the following position was laid down:—

"'No applications have ever been made to the board to require railway companies in Canada to furnish either an express service or any facilities connected with such a service. All applications have been made against the express companies. It is apparent that as the act now stands, orders for improved facilities for handling the express traffic can only be made against the railway company. By improved facilities is meant car service, shelters and the like; and if express companies do not provide for these matters with the railway companies over whose lines they operate, and remove all proper causes of complaint, then it will be the duty of the board to deal directly with the railway companies as to these matters, and complaints from the public must be made against them.'

Cannot Control Service Direct

"At a later date, the board had before it an application of the village of Cumberland, Ont., for the reinstatement of the express service which had for some time been rendered by the Canadian Northern and then taken off. In reply the board stated on July 14, 1911 (Board's file [illegible]):—

"'Dear Sir,—Referring to the above matter, I am directed to inform you that the jurisdiction of the board in the matter of express service is much more limited than it is in the matter of freight and passenger rates; that under the act the board has no jurisdiction to compel the Canadian Northern Express Co. to reinstall the express service which the board has been advised is withdrawn between Hawkesbury and Ottawa. I am further directed to state that if the freight department of the railway refuses to give proper facilities for the handling of traffic, complaint as to this should be put in form and submitted to the board, when the matter will be taken up with the railway company.'

"In dealing with an application of the town of Sudbury for a direction that the Dominion Express Co. should establish an up-town office to receive and deliver express parcels (Board's file 4211.141), it was pointed out that a direction, if any, as to the installation of an up-town express office must be a direction to the railway, not to the express company.

Tolls, Contracts and Limiting Liability

"In summary form, the board's jurisdiction is as to tolls and contracts, etc., limiting liability, with the additional power, conferred by section 364 amended as already noted, of saying what may be carried by express. The board is given no power to direct an express company *qua* express company to install facilities or to arrange that specific services shall be given at specific stations. It follows from this that so far as jurisdiction is concerned, the board has no power to direct an express company to reinstate at a station or stations express facilities which it has removed, nor has the board power, as a matter of jurisdiction, in the first instance to direct the installation of facilities at a station or stations.

"Its jurisdiction over telegraph, telephone and express companies is essentially a rate jurisdiction, and much more limited than in the case of railways."

A CASE ON EMPLOYERS' LIABILITY

A case before the Superior Court of Quebec province a few days ago called for a ruling which may uphold a distinction between a policy of insurance "against liability" and one "against loss from liability." L. Omer Fredette met with an accident in which he suffered injuries whilst in the employ of the John MacDougal Caledonian Ironworks, now in liquidation, and judgment was rendered in his favor for $5,000. The money was not paid, and Fredette issued an attachment after judgment in the hands of the Employers' Liability Assurance Corporation, Limited, with the object of obtaining payment of the $5,000 under a policy insuring the John MacDougall Caledonian Ironworks against loss from liability for accidents to its workmen.

The insurance corporation, as garnishee, whilst admitting that at the time of Fredette's injury he was one of the workmen included in the schedule and cover of the policy, declared it owed nothing, and based this contention on the terms of condition (1) of its policy, which specified that: "No action shall lie against the corporation to recover for any loss under this policy unless it shall be brought by the assured for loss actually sustained and paid in money by the assured in satisfaction of the judgment after trial of the issue."

At the time of the seizure by garnishment, the John MacDougall Caledonian Ironworks, it was said, had paid nothing, and the policy as a contract of indemnity being the law between the parties—making payment "in money" by the ironworks company a condition precedent to any right of recovery against the insurance corporation—therefore nothing could be held to be owing to the ironworks company by the insurance corporation. The question so submitted to the court is one purely of law. Where the insurance is one against loss from liability, can a third party obtain the benefit of the policy by garnishment proceedings or otherwise?

News of Industrial Development in Canada

President of Dominion Steel Not Enthusiastic Over Outlook—Two Large Pulp and Paper Projects for Quebec Province—International Company Expanding Here—Ontario Companies Purchase Alberta Coal Mines—British Motor Manufacturers to Open in Toronto

IN AN interview at Sydney, N.S., recently, Roy M. Wolvin, president of the Dominion Steel Corporation, did not appear to be very optimistic over the export trade prospects of Canadian steel, and particularly in regard to his own company. He pointed out that most of the corporation's steel products during the past year had been marketed in Great Britain, where until quite recently no serious competition was encountered. Of late, however, the very remarkable progress in reconstruction made by Belgium is manifesting itself, and that country is keenly competing in the markets of Great Britain for many lines of steel products. As a result of this competition the demand for Sydney steel products has decreased, and prices have very materially softened.

A vital factor in this connection, he said, was the cost of production in several countries, and he was quite apprehensive that any advance in costs here would result in excluding Sydney steel from the British market, instancing as one of the reasons for his apprehension the fact that for several weeks past no sales of steel products have been made. Mr. Wolvin also made the remark that any increase in the cost of coal production would very seriously affect the steel industry, observing in that connection that one dollar a ton increase in coal cost would mean four dollars increase in the cost per ton of the finished steel product.

Mr. Wolvin did not explain to what extent the coal situation had affected the steel industry, but intimated that it has been and will continue to be a serious problem. Alex. Johnston, another official of the company, who was accompanying Mr. Wolvin, stated that "a three-thousand-ton deficit in the coal output for the year has affected the production of the company."

Pulp and Paper

That the pulp and paper industry of British Columbia is soon to be augmented by additional plants is the statement given in a San Francisco paper recently. A New York company, it is stated, will build a mill at Kitimat Arm, some miles north of Prince Rupert, and a Japanese firm has acquired a tract of timber on Louise Island, in the Queen Charlotte group, with the intention of erecting a plant as soon as the financial situation in Japan clears up. A pulp and paper mill is also being erected in Alaska. The following plants are in operation at the present time: Powell River Pulp and Paper Co., Powell River, B.C.; Whalen Pulp and Paper Co., with plants at Quatsino and Swanson Bay; Pacific Mills, Ocean Falls; Beaver Cove Pulp and Sawmills, Beaver Cove.

The Japanese market has in the past been handled chiefly by the Ocean Falls plant, the largest on the coast. The Powell River Company also does a large export trade, but in the main with the antipodes. The latter firm, which is said to be the oldest established in British Columbia, also deals extensively in the home market, supplying newsprint needs from the coast to Saskatoon, and south along the coast as far as San Diego.

That the mill of the Western Canada Pulp and Paper Co. at Port Mellon, B.C., would be turning out [illegible] of pulp per day by the end of the year is the statement of [illegible] Paterson of the Canada Lumber and Timber Company, Ltd. "The people of the province have little idea of the [illegible] developments taking place at Port Mellon," said he. "Additions are being made to the plant originally erected by the British Columbia Wood Pulp and Paper Co., which has passed through many hands. The present company has sufficient backing to make the plant a success. New machinery is being installed that will raise the capacity from [illegible] tons per day by [illegible], and this will mean [illegible] of [illegible] cords of wood per day."

According to a statement from Quebec city, [illegible] large pulp and paper project, which will concentrate largely upon the region surrounding the Saguenay River, and that the two principal figures in the enterprise are Lord Burnham and Lord Desborough, the former having left for England, after attending the Imperial Press Conference here as chairman while the latter is still in Canada, with headquarters at Quebec. Both of these gentlemen have large newspaper interests in England.

As outlined, the plans of these interests include the construction of a railway from Hudson Bay to the Seven Islands passing by Lake Mistassini, Lake St. John and Chicoutimi, to enter Quebec by the Montmorency Valley, which will shorten the route from Chicoutimi to Quebec by one hundred miles. The group will also establish pulp and paper mills at Seven Islands and at all places where there are important water powers along the line of the railway.

It is stated that the port of Seven Islands will be developed and devoted solely to the export of pulp and paper to Europe, where the need for the material is increasingly great. Definite announcement of the full details of the project are said to be ready and will be given out in a short time. Work will be commenced in the near future. It is understood that no subsidies will be asked by the enterprise.

Three Rivers Organization

Elsewhere in this issue is an announcement of the offering of the securities of the Three Rivers Pulp and Paper Co., Ltd., a recently-formed organization. The company's property comprises 787 square miles situated on the rivers St. John, Magpie, Chambers, Salmon, and other tributary streams and lakes in the province of Quebec. It is estimated that four million cords of black spruce and balsam pulpwood are contained in these limits.

A mill is to be erected at Three Rivers, with an initial capacity of 100 tons of pulpwood per day. A suitable site has been secured, with good rail and water shipping facilities, and an ample area for further extensions of the plant for the manufacture of paper and other pulp products if deemed advisable. It is planned to have the mill in operation in November, 1921.

International Paper Expanding Here

P. T. Dodge, president of the International Paper Co., while inspecting the plant of the Riordon Co., Ltd., at Kipawa, Ont., in company with other pulp and paper manufacturers, intimated that his company would shortly undertake the construction of another mill in Canada, although he did not give any details of the undertaking. The International company is now building a pulp and paper plant at Three Rivers, Que., and Mr. Dodge stated that in sixty days it will be turning out pulp. The paper mill will not be ready to operate for some months yet. It is designed to turn out 200 tons of newsprint a day.

Work of constructing the plant of the Kaministiquia Pulp and Paper Co. at Port Arthur, Ont., is progressing at a satisfactory pace and it is expected to be ready for operation by November 1. The wood-room is almost ready, and the construction of the mill building is proceeding smoothly with the installation of machinery keeping pace.

The Pigeon River Lumber Co., supported by Port Arthur citizens, are endeavoring to induce the Ontario government to [illegible] timber limits close to the city, to them; providing they can secure the limits, they are prepared to erect a large pulp mill.

given their approval of the plans of the directors of the two corporations to purchase the Blue Diamond Coal Mines, and secure an option on Canadian Coalfields, two properties located about two hundred miles from Edmonton, Alta.

Details of the coal deal, as explained by President Bickell, showed that the purchase was originally planned by the directors of Temiskaming, but it appeared too large an undertaking, and the board of McIntyre were agreeable to sharing the venture on a fifty-fifty basis. The purchase price of the Blue Diamond is $150,000, and $150,000 is being paid for the option on the Canadian Coalfields. The balance of $1,000,000 to be paid for the latter property is to come out of earnings within the next fifteen years. Eminent engineers, including H. J. Lewis of Pittsburg, have recommended the purchase of the coal properties.

"The Blue Diamond is estimated to contain 6,000,000 tons of good marketable coal, with the possibility of that being very largely increased," said Mr. Bickell. "Coalfields is estimated to contain 18,000,000 tons. Figuring on the tonnage basis, the investment is very small per ton. Our engineers estimate profit from the Blue Diamond of upward of $500,000 a year with the production we have in view."

Manufacture Woollens in Calgary

Investigation is now taking place in regard to the establishment of a woollen goods manufacturing concern in Calgary, Alta.

Plans are being made for the establishment of a tannery on a site near McKay Creek, North Vancouver, B.C., by the Canadian Electro Leather Industries, at a cost of approximately $30,000.

According to W. J. Thorold, of London, Eng., who was a visitor in Toronto this week, it is the intention of Leyland Motors, Ltd., of London, to start an assembling plant in Toronto, which will eventually develop into a plant for the manufacture of the complete car.

The Dominion Envelope and Carton Co., of Toronto, Ont., has purchased from the Harbour Commission seven acres near the Eastern Gap, and will build a one-storey manufactory on that property next spring. The company has at present two five-storey structures on Duchess street, but these do not meet the needs of the company's business.

Two tons of skins, a portion of the season's fur catch, have arrived at Victoria, B.C., from the Arctic posts of the Hudson's Bay Company at Herschell and Bailey Islands.

Four trading posts on Hudson's Bay have been established by the Lamson & Hubbard Canadian Company, Ltd., of Montreal.

EMPLOYMENT CONDITIONS IN CANADA

The Employment Service of the Department of Labor reports that returns from the Dominion and Provincial offices of the Employment Service of Canada for week ending September 11th, 1920, show a decrease in placements as compared with the returns for the preceding week. The offices reported that they had made 9,412 references to regular positions, and that 8,523 placements were effected. This is a decrease of 1,076 when compared with the returns for the previous week, when 9,599 placements were reported. On the other hand, an increase of 363 is shown when compared with the returns for the corresponding week of last year, when 8,160 placements were reported. In addition, 1,641 casual jobs were supplied as compared with 1,795 during the week ended September 4th.

During the week 9,579 applicants were registered, of whom 8,673 were men and 906 were women. This represents a decrease of 1,425 in registration when compared with the returns for the preceding week, when 11,004 applicants were registered. The number of vacancies notified by employers to the Service during the week totalled 15,126, of which 14,000 were for men and 1,126 were for women. When compared with the 14,314 vacancies of the preceding week, there is an increase of 1,812. Of the placements in regular employment, 7,879 were of men and 644 were of women.

1870 —— OUR GOLDEN JUBILEE —— 1920
One Hundred Per Cent. Increase in Five Years

The Mutual Life of Canada is celebrating its jubilee year by rounding the two hundred million dollar mark having doubled the amount of assurances in force since the year 1915. This 100% increase in five years is without doubt due to the unsullied record for fair, liberal and equitable dealing with its policyholders, and in the second place to the increasing popularity of the mutual principle in life insurance. The mutual is becoming generally recognized as the most economical, the most democratic and the most equitable system of life insurance. The greatest and most powerful life insurance organizations in the world are mutual and the Mutual of Canada, organized on that basis, is meeting with a similar success. The assets of the Mutual are a source of satisfaction, amounting at present to approximately $40,000,000 guaranteeing every contract and providing a substantial surplus.

BE A MUTUALIST!

LIFE INSURANCE SERVICE

THE ultimate success of a Life Insurance Company depends largely upon what its policyholders think of the service they receive. The Continental Life has long since passed this test and earned a high reputation for paying claims promptly. 1920 will likely prove the best year in the Company's history. Write for booklet. **"Our Best Advertisers."** For Manager's positions in Ontario, apply with references, stating experience, etc., to **S. S. WEAVER, Eastern Superintendent, at Head Office**

News of Municipal Finance

Moose Jaw Net Debt is Lower and Sinking Fund Shows Surplus—Large Increases in Assessed Valuation of Ontario Municipalities—Adjustment of Affairs of Alberta Delinquents Will Soon be Completed Regina Increases Light and Power Rates in Order to Meet Utilities Deficit

FINAL recommendations in respect to several of the Alberta towns whose affairs were investigated last spring by the Municipal Finances Commission are now being drawn up for the approval of the governor-in-council. Tofield, Macleod, Bassano and Redcliffe are the towns thus pending the completion of the necessary documents, in all of which cases a basis of adjustment has been agreed upon.

A report on Athabasca is also being prepared by the commission and will shortly be ready. Nothing has yet been done in regard to the northern town's financial difficulties, and the recommendations soon to be made will comprise the only solution thus far suggested. In the cases of Macleod and Redcliffe the commission's recommendations have already been acted upon to the extent of setting new tax rates. Macleod has levied a rate of 66 mills and Redcliffe 55. Wainwright and Wetaskiwin have entirely completed their new financial policies, which are now in force. Tofield is practically completed, but still awaits the execution of the documents.

H. M. E. Evans as a member of the commission, took up with the solicitors of the bondholders' association, when in the East recently, a number of details in connection with the recommendations, which are now smoothly on the way to a good finish.

Assessment Valuations Increased

Owing to the great increase in the value of buildings and property, several Canadian municipalities have found it necessary to increase their assessment valuations. Providing these cities and towns do not undertake exceedingly heavy expenditures, there should be some reductions in the 1921 tax rates. The following figures of assessment valuations in Ontario municipalities have been made public so far, and may be considered fairly representative of the province and the Dominion as a whole:

	1921 Assess.m't	Inc. over 1920
Toronto	$703,351,351	$61,897,195
Ottawa	131,415,700	11,000,000
*Hamilton	127,612,060	31,149,240
Brantford	25,178,505	1,216,030
St. Catharines	18,625,000	2,500,000
Sault Ste. Marie	16,000,000	1,000,000
Stratford	12,829,300	2,137,345
Woodstock	6,369,558	931,117
Paris	1,115,794	120,275
Cobourg	2,533,258	172,731

The above figures, of course, are subject to some revision, and there will probably be reductions in all of the above cases. It is not expected, however, that the increases will be affected to any great extent.

---

*Not including Homeside, recently annexed, which has an assessment of $2,509,980.

Brampton, Ont.—The town council has struck a tax rate of 12 mills, an increase of 8 mills over last year.

Calgary, Alta.—Up to September 30, this year $[illegible] has been collected in taxes, as compared with $5,299,000 for the whole of 1919.

Cobourg, Ont.—Total assessment of the town, according to figures just prepared by the assessors, is $2,533,258, an increase of $172,731 over last year.

Sault Ste. Marie, Ont.—Assessment in the city, according to F. L. Crawford, assessment commissioner, who has just completed the figures for 1921, amounts to $16,000,000, an increase of about $1,000,000.

Lethbridge, Alta.—Tax collections up to the end of September amounted to $355,795, or 62.73 of the taxes due. In the same period last year the sum of $301,406 was received, representing 62.35 of taxes due.

Vancouver, B. C.—The city council is under the impression that Vancouver is not getting all the revenue it should, and so they have voted to procure a tax expert, at a cost of not more than $2,000, to suggest the ways and means of enlarging their funds.

Edmonton, Alta.—After suffering deficits in the early part of 1920, the waterworks department, at the end of August, showed a surplus of about $2,000. The electric, which had also been operating at a loss, came through August with a small surplus of $200.

Ottawa, Ont.—Assessment of Ottawa for taxes to be collected in 1921 totals $131,415,700, as compared with $120,463,606 last year, an increase of nearly $11,000,000. The figures are as follows:

	1921	1920	Increase
Real property	$108,533,292	$100,495,360	$8,037,932
Business	11,418,982	10,381,276	1,037,706
Income	11,463,426	9,586,970	1,876,456

Ottawa, Ont.—On October 1, a deputation of representatives from the western suburbs approached the city council for the purpose of discussing annexation. The various representatives explained that they came, not as supplicants, but proposing partnership with the city, a partnership which they could qualify for. There were 1,500 acres of land, 6,000 people and an assessment of nearly $4,000,000, wishing to join Ottawa, and there was not debt for the city to assume, but rather an asset.

"We are not bankrupt," said Geo. Spencer, spokesman for the deputation. "We are not coming here because we are in debt, but we think that our area should be of considerable importance to the city. We offer you a territory which will be a valuable addition to Ottawa and in which you are vitally interested—for one thing, in the matter of good roads." After considerable discussion, it was decided to leave the matter over until the council could investigate the matter thoroughly.

Regina, Sask.—A permanent scale of electric light and power rates with an additional advance of 20 per cent., is being enforced. The city was compelled to increase the rates owing to the advancing loss in these two departments. If the deficit is wiped out by the end of the year, the rates will be lowered again.

The total amount due the city from cyclone loan borrowers at the beginning of October was $277,076, representing [illegible] loans outstanding.

St. Catharines, Ont.—James W. Young, assessment commissioner, points out that the total assessment of the city is $18,625,000, an increase of $2,500,000 over last year. "Real estate has been very active and prices have gone sky-high," he says. "We find there are 4,412 dwellings in St. Catharines, of which over 2,400 are occupied by the owners, hence 55 per cent. of the dwellings of St. Catharines are owned by the occupants. During the past thirty years St. Catharines' assessment has increased by $[illegible],295,785, and the population by 10,166."

South Vancouver, B.C.—Commissioner Gillespie is making an effort to relieve the municipality of tax sale property of which there is [illegible] title. "The tax office is not equipped with the proper machinery to handle sales of property," said the commissioner, "and it will, therefore, be necessary either to sell the [illegible] outright to real estate firms or to open a real estate office as a department of the municipal hall. I am determined to relieve South Vancouver of this burden of un[illegible] tax sale property," continued Mr. Gillespie, "and

to clear up the whole situation. About $2,000,000 worth of property has reverted to the municipality, which comprises some 10,000 lots, and the yearly loss in taxes is approximately $83,000."

That the municipality would be clear of debt in two years was the statement made by Commissioner Gillespie last week before the board of trade. Taxes were coming in well, he said, the principal delinquents being non-residents. At the present time the municipality owes the provincial government about $1,500,000.

Moose Jaw, Sask.—Some interesting statistics of the city's finances for many years back are given in the annual report for the year ended December 31, 1919. A comparison of the net debt with the assessed valuation gives the following results.

	Assessed Net Val.	Net Debt	of Increase Debt	Valuat'n
			33.6	107.0
1912	43,664,198	3,648,609	56.1	111.9
1913	51,997,286	4,579,535	25.5	19.1
1914	43,112,260	5,144,571	12.3	*17.9
1915	35,086,121	5,395,156	4.8	*18.7
1916	31,871,192	5,297,466	*1.8	*9.2
1917	26,311,351	5,231,890	*1.2	*17.3
1918	21,159,930	5,057,146	*3.5	*7.7
1919	21,395,77[illegible]	5,092,567	0.7	1.1

From the above table it will be seen that the assessed valuation has been decreasing at a much more rapid rate than net debt.

The gross bonded debt at December 31 last was $5,957,250, while sinking fund investments, etc., totalled $864,683, or about $13,000 above requirements.

The balance sheet shows a surplus of $2,344,912, made up of "capital, including local improvements—deferred assessments per contra," $1,946,749, and revenue, available as a reserve for possible uncollected taxes, $398,163. Current liabilities at the end of the year totalled $896,924, as compared with $781,485 at the end of the previous period.

Tax collections have been improving, the percentage of current taxes paid to levy last year being 70.76, compared with 65.98 in the previous year and 60.20 in 1913.

The revenue account shows excess revenue over expenditure of $18,436. Electric light and power department showed a deficit of $17,876, while the waterworks department also lost $1[illegible],277.

Tax rates show big increases. In 1905 the rate for public school supporters was 13 mills, while in 1919 the rate was [illegible].70 mills. The rate for separate school supporters in 1912 was 11.20, while last year it was 47.45. The declining assessed valuation was a large influence in these increases.

---

* Decrease.

Government and Municipal Bond Market

Ontario Bonds Sold in the United States—Three Rivers Borrows on Six and a Half Per Cent. Basis—French Securities to be Offered Here—Voting on Irrigation Loan to Take Place Next Week—Nearly Five and a Half Millions to be Involved in the Undertaking

SEVERAL municipal bond [illegible] were made during the past week at slightly better rates than previously. Three Rivers sold on a basis of a little less than 6½ per cent. and East Angus, Que., on a basis of about 6.60 per cent., compared with Sherbrooke, which just recently paid approximately 7 per cent. for its loan.

Western municipalities are not faring so well, however. [illegible], Man., has just turned down bids which were considered too low. What rate was offered was not made public by the treasurer, but it is understood to have been nearly 8 per cent. Western municipalities, such as Assiniboia, cannot expect to borrow at a much lower rate than 7½ per cent. just now, according to western brokers. Medicine Hat just recently paid 7.70 per cent. for its money.

The default of some municipalities has left an impression which causes investors to look on nearly all western municipal issues with some suspicion, and consequently borrowing rates are higher than they would have been ordinarily. The delinquents are getting back on their feet again, it is true, but nevertheless an impression has been created which will be hard to remove, and [illegible] [illegible] [illegible] [illegible] [illegible] [illegible].

Voting on Irrigation Bonds

On October [illegible] voting will take place by ratepayers [illegible] of the [illegible]. [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] Northern irrigation project.

The debentures are payable both as to principal and interest in Canada and the United States and [illegible] [illegible] payable in gold. [illegible] [illegible] [illegible] [illegible] will be [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible].

[illegible] [illegible].

French Securities Offered Here

Canadian investors are asked to subscribe to the new French national loan, which will be made here between the dates of October 20 and November 30. The securities are in the form of perpetual "rentes," or stocks, which cannot be converted until January, 1931. They are free from all present and future French taxes, and bear interest at the rate of 6 per cent. Proceeds of the loan will be accumulated here on behalf of the French Government, and will be applied to any purchases made in this country.

The price of the issue is 100 francs (at par) per 100 francs of nominal capital, cash on subscription, benefit of interest payments to start from December 16, 1920. Interest will be paid semi-annually on June 16 and December 16 of each year. The first coupon becomes due on June 16, 1921. Provisional certificates with [illegible] coupons will be delivered immediately upon subscription. These provisional certificates will be exchanged for permanent certificates through the French Consulate-General. Subscription price is to be paid in Canadian money at the current rate of exchange of the [illegible] day.

Coming Offerings

The following is a list of debentures offered for sale, particulars of which have been given in this or previous issues:—

Borrower.	Amount.	Rate %.	Maturity.	Tenders close.
[illegible], N.S.	[illegible]	[illegible]	25-years	Oct. 25
[illegible], Man.	[illegible]	[illegible]	30-years	Oct. 26
[illegible], Ont.	[illegible]	[illegible]	30-years	Oct. 30
[illegible] Falls, Ont.	[illegible]	6	20-instal.	Oct. 18
[illegible], Ont.	[illegible]	[illegible]	10-instal.	Oct. 29

Hillsdale, Ont.—[illegible] [illegible] [illegible] [illegible] for tenders until [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] per cent. 10-instalment debentures. [illegible] [illegible] [illegible].

6.30%
Until October 1st, 1940

Markets may come and markets may go, but purchasers of Province of Saskatchewan 6% Gold Bonds to-day at 96.62 and interest are assured of 6.30% for twenty years.

These bonds afford an excellent opportunity to dispense with the necessity for frequent reinvestment. They also guard against any changes in the money market that may occur in years to come.

Government and Municipal Bonds
42 King St. West
TORONTO -:- CANADA

Powassan, Ont.—Tenders will be received until November 1, 1920, for the purchase of $8,000 6½ per cent. 20-instalment debentures. L. G. Phillips, clerk.

Niagara Falls, Ont.—Tenders will be received until October 18, 1920, for the purchase of $33,000 6 per cent. 20-instalment debentures. W. J. McMurray, treasurer.

Woodworth R.M., Man.—Tenders will be received until Saturday night, October 16, 1920, for the purchase of $100,000 [illegible] per cent. 30-year debentures. W. V. Stevenson, Harding, Man.

Thorold, Ont.—Tenders will be received until October [illegible], 1920, for the purchase of $15,000 6 per cent. 10-year debentures for fire purposes, and $5,000 6 per cent. 10-year debentures for public park. D. J. C. Munroe, treasurer.

Kentville, N.S.—The town has extended the date for which tenders are to be received for $30,300 6 per cent. 25-years' debentures, until October 25, 1920. The securities will be dated November 1, 1920, instead of January 1, 1921, as originally stated. (See advertisement elsewhere in this issue.)

Debenture Notes

Assiniboia R.M., Man.—All tenders which were received for the $277,925 6 per cent. 20-instalment debentures were rejected. The money was to have been used for water mains and sewers, but the municipality will probably have to wait until the spring until it can proceed with these improvements.

Windsor, Ont.—The council has under consideration the issue of $571,500 for school purposes. A vote was taken on the matter October 12, but no definite conclusion was reached.

Quebec, Que.—The Roman Catholic School Commission will apply to the legislature at the next session for authorization to borrow $1,000,000, of which $300,000 is required to redeem a loan which will mature on March 1, 1921, and the remainder will be expended to provide new schools.

Saskatchewan.—The following is a list of authorizations granted by the Local Government Board, from September 27 to October 2, 1920:—

Schools.—10-years 8 per cent. annuity: Kelowna, $1,300; Pleasant Grove, $1,100; Tribune, $6,500; Flaxcombe, $1,300; Touchwood, $3,900. 10-years 8 per cent. instalment: [illegible], $700; [illegible], $1,500. 15-years 8 per cent. annuity: Weed Creek, $4,000; [illegible], $1,400. 15-years 8 per cent. instalment: Iris, 6,011; Versailles, $5,911.

Rural Telephones.—15-years 8 per cent. annuity: Long Creek, $3,700; Vimy Ridge, $6,100; Yeomans, $700; New North Aberdeen, $2,700; Yarbo, $4,350; Tullis, $2,000; Beaver, $13,800; Dunblane, $900; Spruce Home, $31,900; Donwell [illegible], $31,800; Stoney Coulee, $3,090; Sunderland, $1,600; St. Brieux, $21,000.

Rural Municipalities.—Star City, $12,000 10-years 8 per cent. instalments for roads; Lake View, $1,830 20-years 8 per cent. instalment, for contribution to Wadena Union Hospital.

Village.—Buchanan, $2,500 10 years 8 per cent. instalment, for municipal office.

Saskatchewan.—The following is a list of authorizations granted by the Local Government Board from September 18th to 25th, 1920.—

Schools.—15-years 8 per cent annuity: Foam Lake, $12,000; Englefeld, $5,000; Mulhurst, $[illegible],000. 5 years 8 per cent. annuity: Silberfeld, $800; West Otthon, $850. 10 years 8 per cent. instalment: Roadside, $4,000; Happyland, $2,000; Eaton, $13,800, 8 per cent. 20 years annuity; Jarsolaw, $1,[illegible] 8 per cent. 7-instalments; Stratton, $500, 8 per cent. 5-instalments; Kylemore, $[illegible],700, 8 per cent. 15-instalments.

Village of Pelly, $2,000, 8 per cent. 7-instalments.

Rural Telephones.—15-years 8 per cent. annuity: Keddleston, $750; Montmartre, $2,900; Floral, $5,500; [illegible] Corner, $3,300; South Melfort, $21,000; [illegible] Hill, $[illegible]; Hope [illegible], $19,600; Marquis, $1,800; Hyas, $12,000; [illegible], $1,800; Parkside, $15,000; Spy Hill, $1,700; [illegible], $[illegible]; Harder, $1,200.

Bond Sales

Guelph, Ont.—The city's $16,000 6 per cent. 20-year bridge debentures have all been disposed to local investors at par.

Lachine, Que.—Versailles, Vidricaire and Boulais have purchased $140,000 6 per cent. serial bonds of the city, and $175,000 6 per cent. 10-year bonds of the Catholic School Board.

Medicine Hat, Alta.—A. Jarvis and Co. have purchased from the city $50,000 6 per cent. 10-year bonds at a price of 88.25, which means that the city pays about 7.70 for its money.

Ontario.—A. Jarvis and Co., and syndicate, the highest bidders on the $3,000,000 6 per cent. 3-year bonds of the province, as announced in these columns last week, have been awarded that issue. The securities are being sold to American investors to yield 7 per cent.

East Angus, Que.—The town has sold $50,000 6 per cent. 20 instalment debentures to the Canadian Bond Corporation, Montreal, Que., at 95.25, which means the town paid about 6.60 for its money. Tenders received were:—

Canadian Bond Corporation	95.25
A. E. Ames and Co.	93.33
Credit Canadien, Inc.	92.06
Versailles, Vidricaire and Boulais	91.00

Waterloo, Ont.—The United Financial Corporation, Ltd., have been awarded $95,000 6 per cent. 20-instalment debentures at 94.33, which is on about a 6.72 per cent. basis. Other bids were:—

Wood, Gundy and Co.	93.67
Harris, Forbes and Co.	93.487
A. E. Ames and Co.	93.33
C. H. Burgess and Co.	93.37
R. C. Matthews and Co.	93.06
Dominion Securities Corporation	92.599

Three Rivers, Que.—Beaubien and Co., have purchased $700,000 6 per cent. 10-year debentures at a price of 96.86, which is on a basis of slightly less than 6½ per cent. Tenders received were as follows:—

Beaubien and Co.	96.80
Beausoliel and Co., Rene T. Leclerc, Versailles, Vidricaire and Boulais, Municipal Debenture Corporation, and Credit Canadien, Inc.	95.86
Provincial Securities Co. (for $200,000 only)	94.85
A. E. Ames and Co., Dominion Securities Corporation, and Hanson Bros.	93.69
United Financial Corporation, Ltd.	93.579

Manitoba.—The province has just disposed of $1,250,000 debentures, according to a wire from Hon. Edward Brown, provincial treasurer, to *The Monetary Times*. This amount is made up of two issues, one of $750,000 for telephone and hydro extensions, which bears interest at the rate of 6 per cent., and matures in five years, and the other of $500,000 for farm loans, which bears interest at the rate of 5 per cent. and matures in three years.

The price received by the province for the first issue was 93.78 (American funds). The successful bid, which was made by the Minnesota Trust and Loan Co., and Wells-Dickey Co., at the rate of exchange on the day which it was [illegible], works out at 104.15 in Canadian funds, or an interest cost to the province of 5.05 per cent. The farm loan debentures were disposed of to Wood, Gundy & Co. at par and accrued interest. Tenders received for the telephone and hydro bonds were as follows (in American funds):—

Minnesota Trust and Loan Co., and Wells-Dickey Co.	93.78
A. E. Ames and Co.	93.233
Wood, Gundy and Co.	93.10
Halsey, Stuart and Co., and First National Co.	92.959
W. A. Mackenzie and Co., and R. A. Daly and Co.	92.78
Harris, Forbes and Co.	91.84

Canadian Stocks Continue Irregular Trend—Abitibi Bonds Now Offered to the Public—Another Pulp and Paper Stock Offering—Readjustment of Capital of Price Brothers Will Take Place Shortly — Ford Motor Company Listed on Toronto Exchange

CANADIAN stock markets, for the week ended October 13, manifested no departure from previous exhibits and security prices continued their irregular trend. The chief influence was from Wall St., where stocks moved with uncertainty.

The two most interesting issues were Atlantic Sugar and C.P.R. The former, which was influenced by the contemplated adjustments in the sugar refining industry and a fall in prices, showed a great weakening tendency, dropping as low as 113. Upon the announcement by the Board of Commerce of the protection to the sugar industry, however, there was a rally, which left that stock several points higher. Strength in New York funds gave an apparently increased value to C.P.R. here, and traders across the line were quick to take advantage of the fact, with a resulting boost in the price.

The rest of the market was uninteresting. Papers were weak, with the exception of Price Bros., which issue responded favorably to the announcement of the plans for capital readjustment. Steel stocks were lower, while rails and utilities were firm, with a tendency to become stronger. Bank issues were notably strong in a weak market.

With the stock market in an unsettled condition, the public is inclined to turn its attention to more stable investments, and a reflection of this movement is seen in the bond section. Issues, which for some time past have been almost stagnant, became active, but there were no notable price fluctuations.

Abitibi Bonds on the Market

An offering of $1,000,000 6 per cent. general mortgage sinking fund gold bonds, dated January 2, 1920, and due January 2, 1940, of the Abitibi Power and Paper Co., Ltd., is now being made by the Royal Securities Corporation at a price of 89.44 and interest, yielding 7 per cent.

This issue was purchased by the Royal Securities Co. last June, but this is the first public offering. Details will be found advertised elsewhere in this issue.

Three Rivers Paper Stock Offering

Offering is now being made of $4,000,000 8 per cent. cumulative participating preferred shares of the Three Rivers Pulp and Paper Co., Ltd., by the Guaranty Investment Corp., Ltd., which was formed to handle the securities of the organization.

Directors of the Three Rivers Co. include the following: N. A. Timmins, president, Hollinger Gold Mines; D. A. Dunlap, vice-president of the Hollinger Gold Mines; D. Breakey, president, John Breakey, Ltd.; C. Breakey, vice-president, John Breakey, Ltd.; R. J. Whyte, former general manager, Frost and Wood Co., Ltd.; J. W. Smith, director Smith and McLaurin, Ltd., paper mills; W. L. McDougald, director, Dominion Steel-Corporation; W. P. Kearney, Dominion Chain Co., Ltd.

The above directors have subscribed for about $2,000,000 of the preferred shares, and shareholders of Hollinger Gold Mines, Ltd., will get second preference to subscribe. The balance will then be offered to the public at par, with a bonus of one share of common. There are 80,000 shares of common stock (no par value).

Price Bros.' Capital Readjustment

Shareholders of Price Bros. and Co., Ltd., were in receipt of a circular this week calling a meeting for October 25 next, to approve of the turning over of the present company's assets and business to a new company of the same name, and thereby effecting a capital readjustment. According to the circular the business will be turned over to the new organization on November 1, the new company assuming the assets and liabilities of the old company, including the bonded debt $5,172,098 at 5 per cent., as of November 1, the present Price Bros. company receiving in consideration therefore 426,710 shares of a par value of $100 each in the new company.

The present outstanding common capitalization of the company is 85,342 shares. This would indicate that shareholders in the present company would be given stock in the company in lieu of their holdings turned in, in ratio of five new shares for each one share now held. The new company will have a capital outstanding, therefore, of $42,671,000 as compared with $8,534,000, the present capital outstanding.

The board of directors of the company has already approved the plan and it now remains for shareholders to ratify the deal and they will be afforded this opportunity at a special general meeting which has been called for October 25 next, at the head office at Quebec at 3 p.m.

Western Power Securities

A meeting of bondholders of the Western Power Co. of Canada has been called by the president for November 1, to approve of a resolution to amend the trust deed securing the bonds whereby in return for the British Columbia Electric Railway Co. guaranteeing payment of principal and interest of the bonds, the bondholders will waive certain possible defaults in the company's covenants to maintain certain municipal franchises.

CORPORATION SECURITIES MARKET

(Continued from page [illegible])

It was announced recently that the majority shareholders of the Western Power Co. of Canada had given an option till November 1 to representatives of the British Columbia Electric Railway Co. on the Western Power Co. of Canada's preferred and common shares at $70 per share for the preferred and $35.10 for the common shares, $1 per share being paid for the option privilege. This option on the shares of the Western Power Co. of Canada, will, of course, be exercised if the proposed amendments and guarantees with regard to the bonds are carried into effect at the meeting called for November 1.

New Stock Listings

The stock of the Ford Motor Co. of Canada has been listed on the Toronto Stock Exchange. The outstanding stock is $7,000,000, and up to the present the market has been exclusively in Detroit.

Application to list the new shares of the Dryden Pulp and Paper Co. on the Montreal Stock Exchange will shortly be made, it is understood. The definitive securities are now in the process of distribution, and it is expected that this will be completed in the near future, and then the listing will take place. There are 100,000 common shares outstanding.

Other Capitalization Changes

Niagara Hats, Ltd., was recently incorporated with a capital of $500,000 to absorb the Mayhew Hats, Ltd., and the Niagara Panama and Straw Hat Co., Ltd. All of the stock, with the exception of an issue of $100,000 preference shares, will be absorbed privately, and the preference issue will not be offered to the public just yet.

Davis Bros., Ltd., Hamilton, who were recently incorporated with a capital of $200,000, announce that preference stock may be issued at a later date to the public to take care of increasing business.

Alberta Dairy Supplies, Ltd., have been authorized to increase the capital stock from $50,000 to $300,000, by the creation of 20,000 new shares of a par value of $10, and 5,000 new preferred shares of a par value of $10.

The Warren Bituminous Paving Co. of Ontario, Ltd., Toronto, Ont., has been authorized to increase the capital stock from $200,000 to $400,000, by the creation of 2,000 common shares of a par value of $100.

Hunter Rose Co., Ltd., Toronto, under supplementary letters patent issued by the province of Ontario, have been authorized to increase the capital stock from $50,000 to $100,000, by the creation of 500 shares of stock of $100 each.

The $25,000,000 Grand Trunk Railway loan made last week in New York is for the purpose of retiring maturing indebtedness.

Western Homes Extending Operations

Western Homes, Ltd., Winnipeg, Man., have been authorized to increase the capital stock from $1,000,000 to $5,000,000. The company received in the first place a charter for only half a million dollars. At that time the idea of the shareholders was to do a good deal in the way of building. Later, the mortgage company idea became more prominent, and it was seen that it was desirable to increase the capital very greatly. An increase was made at that time to one million dollars. In the course of ten months an additional half million dollars of stock was subscribed, and the application is now made to increase further to $5,000,000.

With reference to the future of the company, the directors state that this will depend to some extent on conditions. A mortgage business will, of course, be carried on, and building will be done as conditions warrant. This year few houses are being built, and the company has been keeping in close touch with building conditions.

FIRE INSURANCE METHODS CRITICIZED

Fire losses and how they may be reduced was the subject of an address by J. Grove Smith, Dominion Fire Commissioner, before a meeting of the Montreal Fire Insurance Brokers' Association on October 7, presided over by R. J. Wickham. After quoting figures showing the enormous annual loss in Canada through fire, Mr. Smith referred to the three main ways of dealing with the problem. People had been preached to for years in regard to precautions to be taken to prevent fires, and not with much result, and there was need of sterner measures to deal with the adult population. Education should be directed towards the children in the schools, and this had been done, but the plan had not been successful because the children had been taught in the negative manner, told they must not do this or that. This year, however, the pamphlets to be distributed next week to 30,000 schools in Canada will contain positive teaching for the children, something more suited to meet the psychology of the child mind. In this way a million and three-quarters of children will be reached.

A second means of improvement was in the insurance business itself. He believed that the theory of paying agents for their work according to the profits they brought their companies should be accepted, and he, for one, believed that it was possible to put that principle into practice. This would work out better than a flat rate on the amount of business obtained, the agents being paid, as it were, a premium for reducing fire hazard. He believed in this system of contingent commission for agents, and recommended it to the study of companies.

Another point for insurance companies which the speaker stressed, was the doing away with agents who make of insurance a side line, and keeping the work to men who are qualified and give the work all their time and interest. Mr. Smith said he would like to see legislation along this line, but first believed it would be better for the companies themselves to take the necessary action. He would like to see the insurance companies have the moral force to refuse business from any agents but those legitimately in the business. Mr. Smith referred to the fire marshal laws, which all provinces, except New Brunswick, have on their statute books. In Quebec the law was not so effective as it could be made, and he suggested that the insurance men here approach the legislature towards securing amendments to make the Quebec law more in line with those of Ontario and Saskatchewan. The speaker said he did not believe much in enquiries after fires. No new information was obtained by these post mortems. The companies knew all the facts, but the trouble was that there is not sufficient authority to rectify matters previous to fires.

Condensed Advertisements

Positions Wanted [illegible] per word; all other condensed advertisements 5c. per word. Minimum charge for any condensed advertisement, 65c per insertion. All condensed advertisements must conform to usual style. Condensed advertisements, on account of the very low rate charged for them, are payable in advance. 50 per cent. extra if charged.

ACCOUNTANT. Man thirty-five years of age. Thoroughly familiar with Costs, Credits, and Financial Work. For past five years in charge of Accounting Department large Western Corporation. Open for engagement October 1st. Box 345, *Monetary Times*, Toronto.

CHIEF CLERK required by fire insurance company. Must have good knowledge of underwriting, also routine correspondence. Apply, stating age, qualifications, salary, to Box 351, *Monetary Times*, Toronto.

GENERAL MANAGER and organizer of successful mortgage company with over $7,000,000 invested in Western Canada seeks opening, owing to amalgamation. Wide experience and excellent business connections. If necessary, can invest some capital. Apply Box [illegible], *Monetary Times*, Toronto.

Demerara Electric Co., Ltd.—Earnings of the company for August, 1920, were as follows:—

	Gross.	Net.
Railroad	$10,619.12	$1,273.71
Light and power	9,351.10	3,569.29
Miscellaneous		398.05
		$5,241.05

Trinidad Electric Co., Ltd.—The following is the earnings statement of the company for August, 1920:—

	Gross.	Net.
Railroad	$18,190.74	$ 6,003.73
Light and power	14,630.78	2,707.68
Ice and refrigeration	8,888.65	4,093.54
Miscellaneous		1.20
		$12,806.15

Whalen Pulp and Paper Mills, Ltd.—T. W. McGarry, K.C., formerly provincial treasurer for Ontario, was elected to succeed Sir Geo. Bury as president, at a meeting in Toronto this week. The following executive was also appointed:—Hon. T. W. McGarry, Toronto; I. W. Killam, Montreal; Alexander Smith, Chicago; James Whalen, Port Arthur; M. J. Haney and W. G. Ross, Toronto, and M. R. Higgins, San Francisco.

The executive have under consideration several names for the position of general manager, but it was stated that that appointment will not be finally made until President McGarry makes his recommendations, after visiting Vancouver, for which place he leaves in the immediate future. In the meantime, it is intended to push operations vigorously, and to name a competent general manager at an early date. Sir George Bury was managing director as well as president, but it is apparent that under the new arrangement the two positions will be divided.

Algoma Steel Corporation.—At the annual meeting of the company at Camden, N.J., last week, only routine business was transacted and the old board of directors was reelected. Since the last annual report was submitted, the company, which is a subsidiary of the Lake Superior Corporation, and which operates at Sault Ste. Marie, Ont., has been operating very favorably, and according to statements made at the annual meeting, expects to continue so for some time. Production for the three months ended September 30 last, as compared with the same period in 1919, was as follows:—

	1920.	1919.
Coke	$142,593	[illegible]
Pig iron	116,362	[illegible]
Steel ingots	92,360	[illegible]
Rails	52,540	[illegible]
Structural steel	4,107	
18" merchant mill products	9,068	[illegible]
12" merchant mill products	5,046	1,842

St. Lawrence Flour Mills Co.—A statement of the company's finances for the year ended August 31 last reveals a showing somewhat similar to that of the Lake of the Woods Company, that is, in regard to earnings. The results of the year's operations amounted to $215,077, as compared with $245,491 a year ago and 268,7[illegible] in the preceding twelve months. After the payment of bond interest and dividends on the preferred stock standing, there remained available for application to the junior securities of the company the sum of $161,482, as against $191,109 in the previous statement and $214,038 in 1918. The 1920 showing was, therefore, equivalent to 13.5 per cent. on the common shares, as compared with approximately 16 per cent. last year, and about 18 per cent. in 1918.

Out of the surplus available for distribution among the holders of the common stock there was paid during the year the usual 6 per cent. dividends and bonuses amounting to 4 per cent., taking $120,000. This, together with fixed charges and preferred dividend payments, plus excess profits tax, accounted for $202,078 of the year's profits of $215,077. During the year a special bonus of 10 per cent. was distributed among the common shareholders, this being taken out of a new general reserve created for the purpose, amounting to $182,566. No corresponding item appears in the company's accounts for previous years, and, with definite information on the subject lacking, the amount presumably was taken out of the 1919 "sundry credits" total shown in the balance sheet for the 1920 period at some 170,000 less than a year ago.

With the balance carried forward from the previous statement and after allowing for all additions and deductions, there remained a surplus of $397,829 to carry forward into the current year, as against $322,263 last year and $251,154 in 1918.

The balance sheet discloses that the net change in the margin between current liabilities and current assets effected during the year was slight, although the position in this respect showed considerable improvement over 1918. Accounts receivable at $132,291, compared with $166,606 last year, but inventories of grain, flour and other milling essentials at $396,306 are higher by almost $300,000, with investments up $50,000 at $362,100. Cash on hand was reduced from $151,119 to $176 in the twelve months. The increase in mill inventories, however, was more than offset by an item of $309,339, representing advances from the company's bankers.

Real estate buildings and machinery, $601,977, is higher, while special accounts, property, good-will, etc., are carried at the unchanged figure of $1,200,000 sundry credits, as previously mentioned, show a decline of in excess of $173,000 to $70,000. Elsewhere the two years' figures show no outstanding changes.

RURAL CREDITS IN ALBERTA

Relations between the banks and the rural credit societies in Alberta was the subject of a conference held at the beginning of this month between Hon. C. R. Mitchell, treasurer of the province, and representatives of the western section of the Canadian Bankers' Association. The question of improving the relations between co-operative rural credit societies in Alberta, of which there are now ten in operation, and the banks with which they do business was discussed with the bank officials, one of the special points talked about being the rate to be charged for money and the measure of guarantee to be given by the province and the municipalities.

Objection having previously been taken by the banks that the amount of the guarantee is not large enough to give them what they consider sufficient security in case of any special consideration in regard to rates, the possibility of some readjustment on this point was discussed, and a subcommittee of the bankers' association was appointed to look into the matter and to consult with the provincial treasurer. Mr. Mitchell says that if the province and the banks conclude satisfactory arrangements, legislation necessary to make them effective, thereby overcoming certain difficulties now involved in the working of the rural credits scheme, will be introduced at the next session of the legislature.

RECENT FIRES

Dickie's Lumber Mill at Stewiacke, N.S., $150,000—Two Barns in Ayr were Destroyed with a loss of $20,000, and Two Barns in Mount Forest were Destroyed, Suffering a Loss of $15,000

Ayr, Ont.—October 9—Barns of J. J. Brown in South Dumfries were damaged by fire. The fire was caused by a spark from the threshing engine. The loss is estimated at $20,000.

Bloomfield, Ont.—October 13—Pearsoll's garage and Gibson's barn were damaged by fire. The loss is $5,000.

Bridgeburg, Ont.—October 13—The Bridgeburg Railroad Y.M.C.A. was damaged by fire. The loss is partly covered by insurance.

Bridgewater, N.S.—October 6—Barn owned by Mr. Heckman was damaged by fire, the fire spreading to the Union Church, which was badly damaged.

Colonsay, Sask.—October 3—Colonsay Hotel was destroyed by fire. The loss is estimated at $12,000 and is covered by insurance.

Elcan, Alta.—October 5—The tipple of the Rock Springs Coal and Brick Company's mine was damaged by fire. The loss is estimated at $12,000, and the fire is believed to have been caused by spontaneous combustion.

Fredericton, N.B.—October 7—Barn owned by James Kelly, on Saunders Street, was damaged by fire. The loss is estimated at $500, and the fire is believed to have been caused by incendiarism.

Mount Forest, Ont.—October 6—Two large barns on the farm of John N. Brown, Owen Sound Road, were entirely destroyed by fire. The loss is estimated at $15,000, with insurance of $5,000.

Orangeville, Ont.—October 10—The carding mill of Irving Stephenson was destroyed by fire.

Oxbow, Sask.—October 5—Oil tanks of the Farmers' Elevator and Trading Co. were destroyed. The loss is estimated at $8,000.

St. Thomas, Ont.—October 11—Barn of Daniel Coughlin was damaged by fire. The fire was caused by an electric storm. The loss is estimated at $6,000.

Stewiacke, N.S.—October 11—Dickie's lumber mill was damaged by fire. The total estimated loss is $150,000 with insurance of $30,000.

Toronto, Ont.—October [illegible]—Factory of James Brown, [illegible] King Street West, was damaged by fire.

October 10—A shoddy mill at 610 Eastern Avenue was damaged by fire. The fire was caused by children playing with matches. The total loss is $2,300.

Trenton, N.S.—October 7—"Riggers'" shack at the plant of the Nova Scotia Steel and Coal Co. was damaged by fire.

ADDITIONAL INFORMATION CONCERNING FIRES

Allanburg, Ont.—September 1—Barn belonging to [illegible] Egerter was damaged to the extent of $16,000, with insurance of $3,100 in the Dominion.

Brockville, Ont.—September 29—[illegible] dwellings were damaged by fire. The fire was caused by [illegible]. The total loss on buildings and contents was [illegible], with [illegible] insurance in the following companies: Dominion, [illegible]. R. H. [illegible], G. L. Stayton, W. and I. Sheridan and Miss [illegible] were the owners of the buildings damaged.

Cloverdale, B.C.—September [illegible]—Shingle mill belonging to [illegible] Shingle Co., was destroyed. The total loss was [illegible], with [illegible] insurance in the following companies: [illegible] Underwriters, [illegible] Insurance Co. of North America.

Hamilton, Ont.—September [illegible]—Residence of [illegible], [illegible] Street North, was damaged. The fire is said to have been caused by children playing with matches. The total loss is [illegible], with insurance of [illegible].

September 19—Art and Gift Store, belonging to Farewell and Guest was damaged by fire, the fire being caused by spontaneous combustion. The total loss is $4,214, with insurance of $14,000.

Quebec, Que.—August 3—The damage resulting from fire [illegible] in the garage of P. T. Legare, Ltd., was $1,633, not $10,000 as previously stated in these columns.

Stratford, Ont.—September 15—Barn belonging to Gir[illegible] Brothers was destroyed by lightning. The total loss was $1,200, with insurance of $2,050 in the Downie Mutual.

Watford, Ont.—September 25—Residence of Thos. Dodds was damaged by fire. The loss was $87, with insurance of $2,500 on the buildings in the Phœnix and Queen Insurance Company.

VANCOUVER TO INSURE ALL ITS EMPLOYEES

Legislative Authority Necessary, However—Fire Agents to Have Provincial Association—State Insurance Proposal Sidetracked

(Special to *The Monetary Times*.)

Vancouver, B.C., October 9, 1920.

THE city council of Vancouver have been of late giving special attention to civic insurance., After putting a blanket accident and sickness policy on the police force, they duplicated the policy for the fire brigade. This caused a certain amount of jealousy among other city employees who were not so favored, with the result that the city council will now insure, under a similar policy, the city hall staff and outside workers. Over a thousand men will be covered by this form of insurance. The civic worker's health is insured for $100 a month and his life for $500, the taxpayer paying the premiums. The city is said to have taken this course on account of the large sums of money expended through sympathy for sick employees and those who had met with accident. The whole of this blanket insurance scheme, however, will have to receive legislative sanction.

The city council are said to be dissatisfied with the existing method of handling the insurance on public buildings. Mayor Gale claims to have had visits from insurance experts, informing him of the great improvement that could be made. As a result, a special committee has been appointed to attempt a revision of the system. It is said that a few insurance firms were getting all the business, and there seemed to be a great deal of heart-burning and bitterness caused by the alleged unfair treatment of firms who could not get a "look in" on civic insurance. City Comptroller [illegible] has been instructed by the council to arrange a schedule providing for a fair distribution of the business among companies, while the committee appointed to look into the whole question of insurance are to have the insurance experts [illegible] by Mayor Gale before them to hear their proposal of their alleged technical experts by which the municipality, they say, will get the best classification and [illegible] all properly insured.

A movement is on foot to form a British Columbia fire insurance agents' association with associations in each of the larger towns and a central executive in Vancouver, the [illegible] governed by the same set of by-laws and regulations. At present there are agents' associations in Vancouver, Victoria, New Westminster, Nelson and Kamloops. [illegible] are now being visited [illegible] the welfare of the agents in [illegible] in the province.

The [illegible] to the Municipal [illegible] that the government be asked to [illegible] insurance business of the province, [illegible] by the convention which has [illegible]. A resolution was passed, however, that the [illegible] in B.C. were excessive, and suggesting that the [illegible] department in B.C. make inquiries [illegible].

Regulation of Agents, Brokers and Adjustors*

Agency System is More Suitable for Canada Than the Branch Office System of the United Kingdom Would Be—Several Defects, However, in the System Itself—Some Abuses in Its Practice—Proposed Legislation and Regulations for Control by License

By V. EVAN GRAY
Superintendent of Insurance for Ontario

If any part of insurance business could be simply and easily explained in operation, one would naturally expect the relation of the agent to the company and to the public to be that part; and if supervision and regulation of any part of the insurance business were easy, surely the regulation of the agent should rest on principles easily explicable.

I must, therefore, express in advance my opinion that the interrelation of agent, company and public is one of the most intricate problems to which I have ever given consideration, and the principles and application of governmental supervision are most difficult to explain. To others than insurance men I find it almost impossible to make clear the final incidence of any factor of influence applied at any point of this triangle. Therefore I offer the conclusions indicated in this paper with a good deal of hesitation and reserve. I submit them rather as an argument for analysis than as the final dictum of authority.

In the preparation of this paper I have not found it possible to deal with the relation of the agent to the company in the various classes of insurance, including life, fire, and the various forms of casualty and guarantee insurance. It was apparent that to attempt to do so will lead to confusion and prevent the logical development of conclusions. I have undertaken, therefore, to consider only the fire agent in detail, and there will be much of what I say that is not applicable in any degree or only in a modified form to the case of the life insurance agent or of the agent for a casualty or guarantee company. I will ask you, therefore, in the application of the principles to which I refer to consider only the fire insurance agent.

The Branch Office System

The agency system of representation of insurance companies occupies a very different status in Canada and the United States than it does in Great Britain. In each case this is due to the natural development of the business. In England it was formerly the rule that every contract of insurance required to be erected under the seal and signed by the hand of the chief executive officers of the company. The company was not bound and the risk was not covered until the application for insurance had been received and passed on by the head office of the company and the contract actually executed and delivered. The agent of the company, therefore, was a mere solicitor of business and had no authority to bind his company. A later [illegible] was that contracts were signed and executed in advance and placed in the hands of the clerks at the counters of the [illegible] company's offices, and it became a [illegible] custom for the advertisement and recommendation of an insurance company that it was able to issue a policy of insurance "while you wait."

The next step was the institution of branch offices of the companies in large centres of population, and the delegation of similar authority to these branch offices to issue policies which bound the company without the necessity of reference to head office. The position of the agent of the company, however, remained the same—that of a mere solicitor of business. The general system in vogue in Great Britain may, therefore, be characterized as the branch office system, as distinct from the agency system, as we find it in Canada. These branch offices provide in every part of the United Kingdom reasonably accessible service stations for insurance.

There are, of course, large firms of insurance brokers in England which do not represent any individual company. The business of these brokers is confined almost exclusively to large lines of insurance, and they do not endeavor to secure the ordinary risk.

Rebating is Not Prevented

The amount of the commission which is paid to an agent in Great Britain is effectively regulated by the rules of the associated tariff companies. 15% is the standard rate of commission on ordinary risks and the rate is less on large lines.

Any person, whatever, may be appointed an agent and receive the commission on insurance brought to the company's office. The rule of the tariff companies is that all agents must be appointed by minute of the board of directors of the companies, but this has become a mere formality, and I am informed that the practice is to submit at each meeting of the board a long list of agents for authorization, which in the ordinary case are not even read, but are inserted formally on the minutes of the board. By this practice any person who can bring a risk to the office of the company is permitted to collect the commission on that risk, whether he is an ordinary agent, a clerk or officer in the employ of the assured, or the assured himself.

There is no antirebate law which effectively prevents the payment of commission to the assured, or to someone on his behalf. The result is, that the rate of premium in respect of a risk, may be said to be the rate net to the company. The [illegible] rate is, in fact, available only to the assured or his agent on application. The assured whose insurance is placed through the agent or broker pays the insurance company's net rate plus the broker's commission. The broker's commission, therefore, represents in effect a bargain between himself and the assured, and not between the company and the broker.

---

*An address before the [illegible] of provincial insurance superintendents, Winnipeg, [illegible]

I am not prepared to express an opinion as to the value or relative cost of the system thus established. My information is, however, that the rate of commission to agents is so effectively controlled by the regulations of the tariff companies that this element in the expense of insurance business has not proved to be a burden upon the insuring public.

I have stated the practice in England with such particularity because the English example is so often quoted in this country as an argument for giving further rein to competition and as a precedent for absence of governmental supervision or regulation in any manner of the insurance agent's business.

Agency System on This Continent

In Canada and the United States there has been a very different course of development. Here the agent acts as intermediary between the company and the assured in nearly every contract. The general agent, and in some cases the ordinary agent, is given large powers to bind the company. He is supplied with blank policy forms or interim receipts which he is authorized to issue to the assured, thereby binding the company upon the risk, and the company protects its own interest by reserving the right of cancellation of the policy provided for in statutory conditions.

The amount of business received by a company, either at its head office or branch offices, directly from the assured, in respect of which no commission is paid, is very small. There is no flat rate available to the assured, either directly or indirectly, by the allowance of the commission to some other person on his behalf. The gross rate of premium is protected by strict anti-rebating laws of the Dominion.

The rate of commission to be paid becomes a matter of bargaining between the company and the agent, to which the assured is not a party. Even when a broker purports to act for the assured as distinguished from the company, the company determines his rate of commission and pays his fee.

Services of the Agent

It is of great importance to distinguish the duties of the agent and the services which he renders to the company and to the public under the agency system in vogue in Canada and the United States, from the services which I have mentioned as his responsibility in Great Britain.

In Canada the extent and quality of this service varies according to the limits of his authority and his equipment to perform the work. He may be merely a solicitor of insurance comparable to the English agent who establishes contact between an agency firm and the prospective insurer. If so, the remainder of the services of the agent is rendered by a second, or even a second and third agent. But if you isolate the efforts of all agents who intervene in a single transaction, whether it be one, two or more, the total service rendered might be described as follows:—(a) Soliciting the risk; (b) inspecting the risk; (c) determining and arranging the covering required; (d) examining the rate fixed by the company or the board of underwriters, and negotiating for a better rate; (e) signing and delivering the interim receipt; (f) collecting the premium and remitting the amount less his commission; (g) recording the issue and the expiry; (h) inspecting the risk during its currency; (i) [illegible] renewal.

Misconception Regarding Agents

Of course there are some classes of risk in which some of these functions need not be performed. The insurance of a dwelling house, for example, does not particularly require either the inspection of the risk or any special negotiation in regard to the rate of premium. In most other lines, however, the above is a fair presentation of the agent's duties and responsibilities. My experience is that the general public has no conception of the nature of these services. The average business man believes that the sum of an insurance agent's business is the soliciting of the risk.

It is this conception which is responsible for the [illegible] held opinion that the agent's services might with advantage be dispensed with and the assured allowed to deal direct with the company. They do not realize, and sometimes cannot be persuaded that the other duties may be the more important part of the agent's services, and the part which requires the greater skill and the greater expenditure of time and money to render.

It is most difficult to convince the public that if this work is not done by the agent, the company must establish a service to perform it or prejudice the interests of the public or the assured by its omission. For this conception the agents themselves are largely responsible. The opinion itself is greatly fortified by the existence of certain unfortunate conditions in the insurance agency business, to which I shall refer a little later.

Comparison of Systems

The comparison of the British and the American systems reveals, then, two alternative methods of conducting the insurance business; in each case the system represents the natural and free development of the business in its long history. I am not able to pass upon the relative virtues of the systems for Great Britain; and I am not an advocate, therefore, for a reformation of their system, but I do not hesitate to state that for Canada there can be no doubt that the agency principle of company representation is the more efficient and economical. My reasons for this statement are as follows:—

I regard the agency system in principle as a method of piece-work payment for a necessary and valuable service, and therefore fair in principle.

We have an immense country to serve. Its population is widely scattered and in many districts is very sparse when compared with the distribution of population in Great Britain. The number of branch offices which would require to be established to give reasonable service to the public on the English system is far too great to furnish any possible economy.

The establishment of branch offices and an efficient service organization is a most expensive proceeding, and for a new company entering a field without a ready-made connection it is almost impracticable. The adoption of that system, therefore, would most unduly restrict competition in the insurance business.

Service could not be extended to these small centres of population which the casual agent now serves so efficiently and economically. There would necessarily be a wasteful duplication in the establishment of more than one branch office on behalf of the several companies which require representation where a single agent who might serve all companies will meet the present requirements.

Finally, the very fact that the system is as it is suggests to me that the agency system best serves the requirements of the business. It should be the policy of all supervision and regulation to resist all forcing of business of any kind into unnatural channels. The free and unimpeded process and development of a business best serves the interests of all.

Branch Offices Might be Increased

I cannot, however, leave this conclusion without one constructive suggestion. I believe that in large centres of population, such as the cities of Toronto, Montreal and Winnipeg, branch offices might well be developed by these companies whose business warrants it as a useful regulator, if [illegible] of the agency business. I confidently believe that if a programme of regulation, such as I shall suggest a little later, were adopted, it would make the establishment of such offices much easier.

It must not, however, be expected, or indeed permitted for such branch offices to accept business free of any charge for the service rendered. It would be manifestly unfair to require the service rendered by the branch office, in lieu of the service of the agent, to become a charge upon the whole premium income of the company, instead of upon the [illegible] of that income collected by the branch office.

I am, therefore, an ardent defender of the agency system—not, please note, in the form in which it is administered in Canada to-day—but in the form in which it may be and will be administered when the requirements of efficiency and economy bring it to its best development.

Some Weaknesses of Agency System

Let me now point out some of the inherent anomalies and weaknesses of the present agency system:—

1. There is at present a great confusion in the relative responsibilities and duties of an insurance agent and an insurance broker. Every agent wishes to be the sole and exclusive agent of his company. Every agent also wishes to hold himself out as a broker representing the interests of the assured and interested in securing for him the best possible treatment. This is particularly so in the case of the non-resident company, represented by a general agent. The general agent is authorized to represent and bind his company, but considers it his duty at all times to secure for the assured the lowest possible rate of premium, and in any dispute which arises between the company and the assured, he expects the privilege of presenting the case for the assured in its strongest possible light.

Method of Remuneration

2. The very form of remuneration paid has added to this confusion. To quote from a paper written by the Honorable John S. Patterson, Texas State Commissioner of Insurance and Banking, speaking of agents' commissions, he says:—"Most vital of all is the method adopted by the company in compensating the agent. If you are faithful you are penalized; if you are unfaithful you are rewarded; I assert there is not one act you can do for the protection of your company which does not diminish your compensation. If you refuse to accept a hazardous risk, you get nothing; if you seek to eliminate the moral hazard by reducing the insurance, you reduce your commission. If you aid your company in resisting a fraudulent claim, you lose your customer. If you over-insure, you get your share of the profit. If you refuse or cancel a hazardous risk, you lose the business and the commission to your less scrupulous competitor. Under these conditions, what chance has the faithful agent when in competition with an unfaithful one?"

I think it is agreed that the very form of remuneration paid has put a premium on inefficiency and been a temptation to prostitute the business.

3. The fact that the assured is not a party to the commission bargain enables the competition of companies for the services of an agent to force up the rate of commission at the expense of the assured and without permitting the assured an opportunity to protect himself.

4. The fact that business is largely controlled by the agent through his personal connection rather than by the company has, under the stress of competition, required the surrender of the control of the policy of the company to the agents themselves.

Abuses in Agency Practice

These peculiar features of the insurance agency system have rendered it particularly open to abuse by unfaithful agents and by the natural operation of unlimited competition. Let me proceed now with a statement of some of the abuses of the agency system which are not necessarily inherent in the system but have become concomitants of it.

I must say in the beginning that the conditions I am going to describe exist only in certain localities. I must, of course, limit my statements to Ontario, where conditions I know at first-hand, and I will hear from you whether or not you find similar situations in your province.

In Ontario, outside the city of Toronto, conditions are not unsatisfactory. The service rendered by the agents is good, and the expense is not unreasonable. Being comparatively isolated, the company delegates to the agent considerable authority so that the service he renders is very real. There is a fixed rate of commission payable by the tariff companies by agreement on the various classes of risk. The chief danger is revealed by the complaint of the local agent that all the big business of his district is handled through some Toronto or Montreal office. I am informed on reliable authority that 40% or more of the business written in Toronto is written on property situated outside of Toronto. The public is vitally concerned in this circumstance, because, the rates of agency commission being unlimited in Toronto, the business which, if written by local agents, would have cost only 15 or 20%, according to the tariff, may cost 20, 25 or 30% by passing through the hands of Toronto or Montreal brokers. When you calculate the amount of that expense in the aggregate you will find it a very considerable sum.

It is the free or open cities that bedevil the agency system. Halifax, St. John, Toronto, Winnipeg, Vancouver and Victoria are still free cities. Montreal, and I believe a number of your western cities, are free cities for general or special agents. I assume that the same reason is responsible for the other cities being open, as in the case of Toronto, namely, the absolute impossibility of securing any agreement among the companies. Even in cases where agreements have been made, a way out has been found by some ingenious companies through the creation of underwriters' agencies which are mere fictions for the evasion of troublesome obligations.

I know of a very recent example in which this insurgency among the companies displayed itself. A very old English company that had been in Toronto for about ten years employed an aggressive agent. He circularized every barrister and solicitor in Toronto, asking them to send him all the business they could control, and offering to pay them 30% commission. When he was remonstrated with his excuse was that all the usual and legitimate channels for securing business had been taken by older established agencies, and he had to get business somehow.

How Costs Pile Up

You know of other methods by which commission costs are pyramided. New companies are constantly seeking an entrance to the Canadian business. They prospect the city for a suitable man to act as general agent. If difficulty is encountered in securing a connection with one of the large firms at a reasonable rate they seek out the branch manager of a well-established company. The transaction is too familiar to you all to need description. The man who was receiving 20 per cent. on an insurance connection of $40,000 premium income now receives 25 or 27½ per cent. on the same from the new company or his old company advances his rates to hold the agent. In either case the cost of insurance to the insuring public is increased and the service rendered remains the same.

Consider another peculiar development of this situation. Let us suppose that John Smith is a general agent for three companies A., B. and C., from whom he is entitled to a rate of commission of 25 per cent. He is also an ordinary agent for three companies D., E., F., from whom he is entitled to receive 15 per cent. But George Brown next door is general agent for D., E., F. and receives 25 per cent. on their business and ordinary agent for A., B., C. John Smith receives a line of insurance of $100,000 to place. Naturally he places as much as possible of his line with the companies A., B. and C., from whom he gets the high rate of commission. But they can only take $60,000. One would ordinarily expect him to place the balance with D., E., F. at 15 per cent. But no; he calls up Brown and says, Have you $40,000 of insurance for exchange? If it isn't immediately available Brown promises to return it at as early a date as possible, so the free exchange is made and the $40,000 is placed with D., E. and F. by Brown instead of Smith and Brown collected 25 per cent. In return Smith gets $10,000 of another line from Brown which he places with A., B. and C., and also gets his 25 per cent. By this ingenious arrangement both Brown and Smith have profited to the extent of

10 per cent. of the premium and the companies have paid the commission at the maximum rate.

This is not an imaginary case. It is the regular practice. By this means all business reaches the companies at the maximum rate of commission, and any special increase in rate of commission to one agent means an increase on the whole business of the company, because all their business [illegible] comes in through that door.

As in the former instance in the final result the public pays.

Too Many Agents in Business

Then there is a somewhat different circumstance which is particularly acute in our local situation. In addition to producing excessive rates of commission the system has attracted too many agents. These two go hand in hand and I am of opinion that the remedy of the excessive commission would speedily correct the other fault.

At present, however, the business is loaded with a great weight of illegal and unearned commissions. In addition to the general or special agent and the soliciting agent there are many others who render no useful service for the commission they receive. Some are merely feeders whose service consists not in urging or soliciting insurance, not in keeping records or inspecting and supervising risks and covering, but merely in directing business to a particular company that would otherwise have gone to another company just as good. Some are merely beneficiaries of favor to whom the payment of a commission is made a condition of obtaining the business. Some are merely straw men set up for the purpose of collecting an illegal and forbidden commission.

Let me give you a few examples to show exactly the kind of transaction I have in mind. A certain manufacturing concern in Toronto employs a clerk whom they call their insurance manager. He has charge of the placing of the whole line of insurance on a very large plant. His employer pays him a salary of $3,000 per annum. He applied for and obtained a certificate of authority as an insurance agent. He notified his broker that as an insurance agent he would expect to receive the regular rate of commission. His broker said, "Have you a license?" "Oh, yes, indeed—an Ontario government license." "Well, then," said the broker, "I suppose we shall have to allow you the usual rate." The broker knew very well that if he refused he would lose the account and some less scrupulous competitor would accept the proffered terms. So the pseudo-agent collected his commissions and returned them to his employer who made a handsome saving on his insurance premium account.

Now, Who paid that rebate? Not the company. They would have had to pay the same rate of commission anyway; not the agent, for to him half a loaf was better than no bread. It was the insuring public who do not get rebates who paid that rebate in a resulting higher premium rate.

Employees Secure Commissions

The secretary of a wholesale house in Toronto [illegible] to a few small lines of insurance and carried an account with a firm of general agents. Of course he controls the placing of his firm's business and what more natural then that he should [illegible] the same account and collect a very substantial sum by way of commissions. He holds a license from my department, whether his employer knows of this source of revenue of his secretary or not I cannot say.

There is a trust company in Ontario which has established what purports to be an insurance department in [illegible]. I endeavored to learn whether or not this was [illegible] a general insurance business, but my conclusion was that the business handled was [illegible] the placing of insurance for [illegible] for which it acted as general agent. I am advised that it is a breach of [illegible] for [illegible] penalty for the benefit of [illegible]. Yet this [illegible] company is prepared to defend its right to fire insurance commissions.

It is a common practice for life insurance companies in our province to take a license as an insurance agent on behalf of an officer or clerk in the mortgage department and collect insurance commissions on insurance placed in connection with its mortgage loans. Like everything else in life insurance it is all for the benefit of the poor policyholders and their widows and orphans. What right a life insurance company has in the fire insurance agency business I never could understand. I never saw any such authority in a charter of incorporation. It scarcely befits the dignity of our life companies to grasp at this trifle.

And then there is the solicitor. Well, I leave it to your individual experience as to the value of his services as an insurance agent. Of course most of the risks he brings in are residences and perhaps, all told, it does not amount to a great deal.

But all of these unnecessary commissions add to the cost of insurance to the public and are a factor in the fixing of the prevailing insurance rates which all agree are excessively high.

Ten Thousand Agents in Ontario

I can indicate the extent of the practice in Ontario by telling you that last year more than ten thousand licenses were issued to insurance agents in the province and I have good reason to believe that more than 15 per cent. of this number were not bona fide insurance men holding themselves out in good faith as insurance agents.

The Hon. Mr. Justice Masten in his report as Insurance Commissioner, printed in 1919, records the following conclusion: "The result is that owing to the competition between the companies, and the control which agents have over the business, the expense of insurance is increased to the public, without any chance of its being lowered by competition or other ordinary means, and the public, who have to pay in the end, are unable to lower the expense in any way unless by legislation. The companies themselves are powerless to completely deal with the difficulty."

Mr. Justice Masten records that during the year 1917, out of $100 of premium collected by the agent for insurance companies, approximately $33 was absorbed in expenses. Of this $33, $18.60 was paid in agents' commissions, but he adds that he is of opinion that at the present time the expense is higher than 33 per cent. and in the city of Toronto the evidence indicates that it may run as high as 45 per cent.

Provinces Should Regulate

It is on the basis of the foregoing that I formed my thesis that it is the duty of the provincial insurance department in the interests of the public to assume the duty and responsibility of regulation of insurance agents and insurance commissioners; not to turn the conduct of the business into unnatural [illegible], but to permit the agency system to function normally and efficiently; not for the protection of a [illegible] class of licensed agents, but for the [illegible] of the insuring public by way of lower [illegible] purpose of imposing a [illegible] but for the removal of existing [illegible] and the improvement of the service [illegible].

But in most of [illegible] we have already a regulation of [illegible] system. The question is [illegible] for Ontario: It does not. In Ontario [illegible] has been, as stated in Judge Masten's report, [illegible] payment of a $3 fee [illegible] general agent [illegible]. No examination, scrutiny or [illegible] applicant's fitness has been [illegible] was that the applicant [illegible] company, should be a [illegible] fee of $3. I have [illegible] that the existing [illegible] a blessing to the

BANK CAPITAL IN RELATION TO DEPOSITS

GREAT expansion in banking business during the past few years has not been accompanied by a corresponding increase in the paid-up capital or in the capital funds, which include reserves and undivided profits as well. These funds are the margin of security provided by the shareholders, and are in Canada supplemented by the double liability provision. Banking business is, therefore, now being conducted on a relatively smaller margin of shareholders' assets, a greater volume of business being swung by each dollar of capital funds. In August, 1914, the paid-up capital and surplus of the Canadian banks totalled about $226,000,000, and the deposits were $1,094,000,000, the ratio of the former to the latter being 20.8 per cent. The bank statement for August last shows the combined capital and surplus to be $256,705,000, and the deposits were $2,258,000,000, a ratio of only 11.4 per cent. These deposits do not include the balances owing to the Dominion and provincial governments. When these are considered as deposits the ratio is reduced to 10.5 per cent.

The provision of an ample margin of security in the form of capital funds is essential to sound banking. Several of the banks have during the past two years recognized the necessity for catching up to the changed conditions by issuing new stock. As the above figures show, however, there is still a need for more capital in the banking business, and the financial returns are such as to make new issues attractive and easily marketed. It must be kept in mind, however, that the present level of deposits will probably not be maintained, and to attempt to bring the ratio of capital funds to deposits up to the old figure is not necessary.

The decline in this ratio is, of course, not peculiar to Canada, but has been experienced in all countries, the great increase in the volume of money and credits in circulation swelling bank deposits to inflated levels. A study of this question in the United States by E. W. Kemmerer, professor of economics and finance in Princeton University, and published by the Bankers' Statistics Corporation, New York, shows that the ratio of capital funds to bank deposits increased during the first ten years of the national banking system in that country until it reached its maximum of 106 per cent. in 1871. From 1877 to 1881 it dropped from 101 per cent. to 61 per cent. From 1881 to 1895 the ratio fluctuated, with a slight downward tendency, reaching 56 per cent. in the latter year. Then came another pronounced drop in the ratio, this time from 58 per cent. in 1896 to 36 per cent. in 1899. In 1912 it had reached 34 per cent., and the war practically cut the figure in half, the ratio in November, 1919, being 18 per cent.

Just how far the downward movement of prices and the contraction of business now being experienced, coupled with a deflation of money and credit, will reduce bank deposits cannot now be estimated. It is certainly not expected that they will come down to the level of 1914, however, and should that extraordinary phenomenon take place, the fact still remains that Canada is a rapidly-growing country, and the increase in population is bound to increase the volume of banking business from year to year. The security market is not at the present time in a favorable condition for new issues, but just as soon as interest rates relax there is ample grounds for the issue of new bank stock.

GOVERNMENT ASSISTANCE IN FOREIGN TRADE

CANADIAN government policy in extending foreign trade has been marked by indecision. In establishing too many organizations the government has gone too far, while in the provision of effective help they have fallen short. The War Trade Board at Ottawa, the Canadian Trade Mission in London and the Canadian Trade Commission in Washington are three examples of the creation of bodies to do work which could better be carried on by the existing organization of the Department of Trade and Commerce. Some real assistance to prospective exporters can be given by the state. On the other hand, there must be no building up of a bureaucratic organization for the direction and control of commerce. Germany's organization of this kind produced results. Similar results may be obtained by other countries if they pursue the same methods, and there is a danger that

Great Britain, after defeating Germany in the field, may replace the German system by a British one.

In a report on "Great Britain's Plans to Extend Foreign Trade," E. Harvey Middleton, assistant manager of the Foreign Trade Bureau of the Guaranty Trust Co., describes the network of associations, combinations, monopolies, banks and governmental departments so ingeniously constructed for the capture of trade in every part of the world, civilized and savage. The British business man is to-day determined to recapture the trade won from him in pre-war days by the Germans. Great Britain to-day has enormous resources to draw upon. Mesopotamia is certain to become one of the great granaries of the world as a result of the irrigation system planned by British interests. The absorption of German East Africa will enable the British railroad builder to realize his dream of a line from the Cape to Cairo. German Southwest Africa and other German colonies will yield rich returns to the British miner and agriculturist. The new treaty with Persia—frequently described as the greatest diplomatic stroke since the acquisition of the Suez Canal shares by Disraeli—will give the British government a controlling interest in the Persian oilfields which may well be one of the big factors in paying off the British war debt.

A typical example of the method by which the British plan to recapture their overseas trade is the organization known as the British Trade Corporation, incorporated in 1917, with an authorized capital of £10,000,000, of which £2,000,000 is fully paid up. One of its subsidiaries is the Trade Indemnity Co., which insures foreign credits. Since its incorporation this company has facilitated the export of goods of many millions of pounds value. Although it was anticipated that it would be beneficial chiefly to the small merchant, its policies have been freely availed of by some of the largest British manufacturers. In conjunction with the London and Westminster, Lloyd's and the National Provincial Banks, the British Trade Corporation formed the South Russia Banking Agency. The British Trade Corporation also has an investment in the Portuguese Trade Corporation, which was specially started to compete with German interests. Another subsidiary is the Anglo-Brazilian Commercial and Agency Co., which has opened branch houses in Brazil, particularly at places where German influence in the past was strongest. Although they had experienced difficulty in getting delivery of goods ordered by manufacturers, satisfactory progress is now being made.

SELECTING A PAPER SECURITY

ORDERS for newsprint have been placed in Germany by United States paper men. While, as the *Wall Street Journal* points out, it is scarcely possible for Germany to become a large exporter of this product, yet it is well to remember that the immense exports of newsprint made by Canada to the United States have been built up under war conditions. Other countries, especially Norway, are in a position to export wood products, and, with ocean transport made safe and shipping rates coming down, these countries must again be met in competition on this continent. In the possession of unexcelled forest resources, and in proximity to the largest markets, Canada has an undoubted advantage, which will always give the securities of a company with ample resources, suitably placed, a high value. There is a danger, however, lest future earning power be estimated by the exceptional conditions of the past few years. The brilliant record of earnings shown by many of the old established and well-managed pulp and paper companies has, as might well have been expected, induced an increasing number of new promotions. The promoters of some of these companies, lacking both a proper appreciation of the essentials of a sound pulp and paper enterprise and a sense of their responsibility to investors, are offering for public participation the bonds and stocks of corporations possessing few, if any, of the elements requisite to sustained success. As an inducement to part with their money, investors are reminded of the large profits realized by early buyers of the securities of some of the now highly successful Canadian pulp and paper companies; but little or nothing is said about the factors which were necessary to produce success, and which, in not a few cases, are conspicuously lacking.

In *Investment Items* for October the Royal Securities Corporation, which has financed several pulp and paper enterprises in Canada, specifies four main factors essential to success in this industry. The first is an adequate and accessible pulpwood supply. The second is the combination in close proximity with it of an easily developed water power of a sufficient capacity to operate the mill construction necessary for the conversion of the wood. It is well for the investor to remember that timber areas which are possessed of this combination, and which at the same time have easy access to the markets for their products, are becoming extremely scarce and of corresponding high value. In the third place, there must be constructed efficient mills with up-to-date equipment, involving in most cases the eventual investment of many millions of dollars. The fourth, and not the least, essential is the technical staff of experts necessary for the efficient prosecution of the numerous and high scientific processes involved in pulp and paper production. To be successful, the manufacturing organization in its entirety must be operated by a competent staff of experts, which can develop efficiency only through years of experience. The organization of such a staff for an entirely new company is about as difficult as the securing of a wood supply sufficient both in quality and quantity.

SOME SUGGESTIONS ON DEMURRAGE

OVER 71,000 days of demurrage were charged on freight cars in Canada during the month of June this year. This means 71,000 car-days wasted over and above the usual three days free time allowance for loading, unloading and clearing the customs. The sum paid by shippers for this demurrage was $186,791—or say $2,000,000 a year! There are in Canada about 200,000 freight cars available for 30 days per month, or, in railway parlance, 6,000,000 car-days. Approximately 71,000 of these are accounted for by the above-mentioned delays or say 1.1 % of the month's freight carrying capacity of the Canadian railways. While these delays do not occur simultaneously, the effect in the end is as expensive as would be the total cessation of freight loading in Canada for a period of, say, four days each year. Conversely, if such delays did not occur (and most of them need not occur), the railways would be in a position to move theoretically about 1,[illegible]00,000 additional tons during the year.

In a bulletin issued a few days ago the Railway Association recommends shippers to watch their demurrage bills, so that they are trimmed to the lowest point, and, if possible, release cars even a whole day before the margin of free time has expired. It is suggested that the chief executive's shrewdest assistant, not the head shipper, should scrutinize the demurrage bills regularly.

PERSONAL NOTES

R. M. Pearson has been appointed deputy provincial treasurer of Manitoba, to succeed the late W. J. Ptolemy.

W. P. Morse, who has been with the Globe Printing Company, Toronto, since June, 18[illegible]1, and for some time past in the capacity of treasurer, has resigned.

T. H. Purdom, K.C., a prominent barrister, of London, Ont., and president of the Northern Life Assurance Company, has returned from Winnipeg, where he was recently in conference with officers of the company.

E. V. Barthe has been appointed manager of the Toronto branch of the Prudential Trust Company, of Montreal. Mr. Barthe has been with the Bank of Toronto for the past fourteen years, latterly as inspector.

H. F. Gurney, recently appointed assistant British trade commissioner for Ontario, has arrived from Britain and has taken charge of the office in Toronto in the absence of F. W. Field, who has left on an official visit to the United Kingdom.

Col. A. E. Gooderham, who for several years has been a member of the directorate of the Confederation Life Association, Toronto, has been appointed vice-president of the company. Col. Gooderham is vice-president and managing director of Gooderham and Worts, distillers, Toronto. He is also associated with the following institutions: Director, Bank of Toronto; director, Canada Permanent Mortgage Corporation; president, the Dominion of Canada Guarantee and Accident Company; director, Clifton Hotel Co., Ltd.; director, General Distilling Company, Limited. E. B. Cronyn, vice-president and managing director of W. R. Brock Company, Limited, wholesale dry goods, Toronto, has been elected to the directorate of the Confederation Life. Mr. Cronyn is also a director of the Union Bank of Canada.

D. E. Critchlow, of the Montreal stock brokerage house of C. Meredith and Company, has been elected a member of the Montreal Stock Exchange. Mr. Critchlow succeeds Douglas S. McMaster, who is now [illegible] representative of O'Brien and Williams.

H. S. Murray, who for the past eight years was supervisor of Northern Saskatchewan branches of the Royal Bank of Canada, with office in the western superintendent's department at Winnipeg, has been transferred to the New York branch of that institution, where he will occupy an important position in the supervisor's department.

Charles Ruby, general manager of the Mutual Life Assurance Company of Canada, who has just returned from a tour of the western provinces and a careful survey of business conditions on behalf of his company, reports general evidences of both thrift and prosperity. Indebtedness has been reduced, and splendid crops are seen in practically every section of the prairie provinces.

W. P. Kirkpatrick, who was recently appointed manager of the Edmonton, Alta., branch of the Canadian Bank of Commerce, has resigned the position to go into business on his own account as [illegible] financial agent at Saskatoon, Sask. Mr. Kirkpatrick was manager of the Canadian Bank of Commerce for fourteen years previous to last fall, when he went to Havana to open a branch of the bank there.

Alexander G. MacKenzie, who has been elected to represent W. A. MacKenzie and Company on the Toronto Stock Exchange, has been connected with that firm for the past ten years. Mr. MacKenzie was born at Petrolia, Ontario, about 35 years ago and has spent most of his business career with the present firm. Mr. MacKenzie became a partner some six years ago and is considered one of the most capable of the younger men in financial circles. The firm have developed an extensive business in high class investment securities, both in Canada and the United States, their business having grown to such proportion that it was considered necessary to have a seat on the Toronto Stock Exchange in order to further provide efficient service for their many clients.

R. A. Darker, who for eighteen years has been branch manager of the Canada Life Assurance Company for Southern Alberta, with office at Calgary, has decided to retire from that position. H. D. Ferguson, who has been for fifteen years a resident of Calgary, and who for the past five years has been inspector of the company for Southern Alberta, will succeed Mr. Darker. Mr. Darker will remain in the city as consulting manager.

W. J. Cluff, of Toronto, has been appointed a director of the King Edward Construction Company. Mr. Cluff is already associated with the United Hotels Company of America and of the new Mount Royal Hotel Company. He is also president of the Galt Brass Company, a director of the Port Hope Sanitary Company, and a member of the firm of Cluff Bros., Toronto, large handlers of plumbers' supplies.

Mr. J. A. M. De la Giclais, a director of the Trustee Company of Winnipeg, Limited, has just returned from a trip to Europe, where he has been touring for the past few months. Mr. De la Giclais, in an interview with *The Monetary Times*, states that things were far better than he expected. He does not think that the crop in western Europe, [illegible], is as good as it is represented to be. There is bound to be a heavy loss on account of the wet weather during the harvest. "There is absolutely no doubt," he continued, "as far as Belgium and France are concerned, the position is better than it has been for the last eighteen months. The successes of the Russian armies in Poland had no [illegible] effect on the stock exchange business."

OBITUARY

E. F. Warwick, [illegible] of the firm of Warwick Bros. and Rutter, Limited, [illegible] stationers, Toronto, died at his home, [illegible] Walmer Road, this week, after an illness of about two years.

THE EXCHANGE RATE

IV.—What Controls It?

IN No. II. of this series, we explained why the foreign dollar is a commodity and not money, and in No. III. the inconvenience of settling international debts in gold, which led to the system of Bills of Exchange described below.

Sales of exported goods are usually settled for by the vendor drawing a draft on the purchaser for the sum due, which draft the vendor deposits in his bank.

His banker forwards the draft (in such a transaction called a Bill of Exchange) to the nearest money market, probably, in the case of an American, to New York, Chicago or San Francisco, and in the case of a Canadian to Toronto or Montreal. To do this it is not necessary for him to insure his letter or even to register it, for if the bill were lost, he could get a duplicate.

For instance, if the vendor lives in the United States, he will offer the Bill of Exchange for sale, say, in New York, as Canadian funds, because the draft is payable in Canada.

There may be several persons at the market who want to buy Canadian money to pay for goods bought from us. If there are many such persons and only a few drafts on Canada are being offered the bidding is keen and the price obtainable for the draft goes up.

If, however, there are few bidders and many drafts, the holders of the drafts may be willing to lower the price they ask in order to obtain their money at once

This brings us to the influence of the balance of trade on the rate of exchange. We will deal with this aspect of the subject next week in No. V of the series.

REGULATION OF AGENTS, BROKERS AND ADJUSTORS

(Continued from page 8)

insurance business because it has provided a warrant under which an unqualified and improper person might demand and collect, from the company and the public an unearned toll on the insurance business.

Suggested Methods

The means of regulation of the insurance agency system for the purposes we have in mind are two: First, the control of the rates of agents' commissions; second, limiting the class of persons who may act as insurance agents.

These two are, as I have already suggested, closely related. I believe that the two go hand in hand. I cannot devise a program for either which does not require the other as its complement.

The first is, however, the more difficult. I must say that the definite suggestions I have to make are not the product of my own imagination. They embody the conclusions reached after earnest study and the discussion of the matter with a number of well-informed insurance men. Neither should you attempt to fix responsibility for the suggestions on any person in particular, for the ideas are a synthesis of the suggestions of several.

The regulation of insurance agents' commissions is not new. Some 15 years ago New York state undertook to limit by statute the amount of life insurance commissions, and that regulation is effective to this date. It was the result of the recommendations of the State Committee of Investigation of the life insurance companies. If I properly understand the history of that time, the statutory limitation of expense was the remedy—or one of the remedies—adopted to curb a condition of wild competition for business, a condition which had many points of similarity with conditions in the fire insurance business of to-day. You will find the provision to which I refer in the famous section 97 of the New York law under a general heading of "Limitation of Expenses." The provision has exercised a very salutory influence on the life insurance agency business. We need not, therefore, hold up our hands in holy horror at the very idea of governmental regulation of commissions.

Commission of Inquiry

Now let me put my suggestions very briefly.—

Provincial legislation should be enacted to provide—

(1) For the appointment of a commission to enquire into and determine the proper and reasonable maximum rates of commission to be allowed to agents on fire insurance written. The rates fixed would be graded according to the class of business written. If the commission thought it wise and found it practicable they might also be differentiated on a scale proportional to the total premium paid by the assured on his whole covering, the assured to warrant the amount of his covering.

(2) The rates so fixed should be effective for a certain minimum period to be fixed by the commission, with maximum not to exceed five years.

(3) The rates fixed should apply to all companies doing business in the province and evenly over all sections of the province.

(4) The rate fixed should be the same for general, special or local agent.

(5) Agents should be paid either by salary or commission. The payment of salary to a commission agent to be prohibited. All salaries should be required to be definitely fixed by a binding agreement, the amount to be determined in advance.

A variation of this last provision has been suggested. I do not favor it, but I add it for consideration. If a non-resident company requires the services of a supervisor of agents in the province they might be permitted to pay to one man only who might be a commission agent a salary for actual bona fide services rendered and which should be fair and reasonable in the circumstances. I do not favor this suggestion because it is unnecessary and might open the door to evasion. Any company would of course be at liberty to employ as many purely salaried supervisors as it required, and a salary seems the proper form of remuneration for a supervisor.

On the second subject I propose a control and limiting of the persons who may act as insurance agents by an improved licensing system to eliminate the illegal and unearned commissions that are at present a charge upon the business.

It is repeatedly urged that if the right to collect a commission is refused to many persons who now receive it the result will be merely to concentrate in the hands of a smaller and privileged class the earnings that are now distributed over a larger field. I do not think this is sound.

There are two alternative channels into which these prohibited commissions would turn under such regulations as I propose—either to the companies directly or to the earnings of established agencies. If the first of these is the result I have no doubt that there will be a quick readjustment of the premium rate which will translate the benefit to the insuring public under the pressure of competition among the companies' tariff and non-tariff. If the second is the result and the earnings of the licensed agents are substantially increased, I am sure that is a factor which the proposed commission would take cognizance of, and the advantage would be secured to the public in reduced rates of commission. In either case, therefore, the advantage will be reflected in cheaper insurance rates to the public.

More Power for Superintendents

Some further legislation would be necessary to strengthen the hands of the administering officers of the present licensing system. But in general I believe that the chief requirement is a stricter administration of the authority of the department in the matter of the issue of licenses to insurance agents, and the judicious exercise of a wide discretion in that connection.

Superintendents must, for the present at least, undertake the responsibility of saying who should and who should not be in the insurance agents' business. The decision should be made on this test: Is the applicant a bona fide insurance agent, holding himself out as such, who will render in an efficient and economical manner a real and valuable service to the insuring public? I do not suggest that it should be made difficult for any person to enter the insurance business who has an honest intention of rendering service in exchange for his earnings. Quite the contrary should be the case. Competition should be invited and welcomed but the hangers-on, the grafters and the rebaters must in the public interest be eliminated from the business.

To make this program effective I suggest the following means:—

First—the adoption of a form of application and investigation of the circumstances of every applicant for a license which will enable an intelligent judgment to be formed.

Second—careful scrutiny of this information and refusal of licenses to improper persons.

Third—the securing of lists of agents from all companies and agencies and the occasional checking of commission records of the companies and agencies to ensure compliance with the law.

Fourth—the careful investigation of complaints of illegal practice.

Fifth—the enforcement of penalties prescribed by law.

Reforms in Ontario

The Ontario Department has already made an important move along these lines. First, we obtained from the companies a complete list of their agents in the province. We discovered about [illegible] agents nominally authorized who had no license. These are being rapidly brought into the fold. Then we revised our form of application for certificate to be signed by both the companies and the agents, and I [illegible] pleasure in submitting to you samples

of the forms now in use. We are finding them very satisfactory and effective in disclosing the real bona fides of the applicant. I will also show you some of the other forms we use in the same connection.

Suggested Powers for Control

Some legislation would, as I have said, be necessary in each province to reinforce and support the program I have in mind. I have undertaken to draft some proposals which I think might serve the purpose and I hope to have the opportunity of discussing them with the superintendents. I do not, however, think it prudent to make them the subject in detail of this discussion, but I will mention their general content:—

(1) The vesting in the superintendent of wide discretionary powers, subject always to an appeal of a judge in court.

(2) The prohibition of payment of commission to unlicensed persons.

(3) The division of the licenses into classes which will distinguish life insurance from other classes; a fire and casualty class to include all classes but life and a casualty class to include all classes but life and fire.

(4) The imposition of a higher fee for a fire and casualty license.

(5) The extention of the grounds upon which an agent's license may be revoked or cancelled.

(6) The limiting of a corporation or partnership license to duly qualified persons named in the license.

I have left myself very little time for comment on the subjects of brokers and adjusters. I shall try to indicate the line of treatment of these subjects very briefly.

I have already referred to the confusion in responsibility and duty between the agent and the broker. This is due to the fact that our licensing system has failed to distinguish them and our statutes have required the broker to use an agent of some insurance company. I think the situation could be greatly clarified by distinguishing the two classes and holding the agent strictly accountable to his company and the company responsible for the acts of its agent within the limits of his authority. The company could then deal with the broker as a broker on behalf of the assured, and some embarrassing anomalies could be removed. Although a different form of certificate or license would issue, the general legislation, regulations and fees for the two classes would be very similar. This is provided for in the provisions I have drafted.

Insurance adjusters should be licensed in a manner similar to agents and brokers. There is a good deal of abuse of insurance adjusting in Ontario. Some points which need to be provided for are these:—

1. An insurance agent should be prohibited from accepting a fee from the assured for settlement of a loss in which his own company is an interested party.

2. The payment of insurance adjusters by commission on the amount of the settlement obtained should be prohibited.

3. The occasional adjuster who assists the assured in rural districts or the smaller towns and who acts in perhaps only an occasional small loss should be exempted from the licensing requirement.

I ask your careful consideration of these suggestions. They are not put forward like dummies for a class in bayonet instruction. They are soberly advanced as a possible remedy for present evils of the insurance agency system, having chiefly in mind the securing of cheaper fire insurance rates to the whole insuring public. I ask likewise that they should be closely examined and keenly criticized, but I also hope that the criticisms will be constructive, looking toward a real solution of the problems with which we are confronted, and not a mere negation of any possible remedy.

T. S. G. Pepler and Co., bond dealers, Toronto, have moved from the Royal Bank Building to new offices at 100 Bay St.

BANK BRANCH NOTES

Harry S. Ritchie, manager of the Bank of Nova Scotia at Charlottetown, P.E.I., has been transferred to the Barrington St. branch in Halifax, N.S.

The following is a list of branches of Canadian hanks which have been opened recently:—

Barrie, Ont.	Sterling Bank of Canada
Toronto (Spadina & Harbord)	Royal Bank of Canada
Vancouver, B.C. (Victoria Rd.)	Canadian Bank of Commerce

The Merchants Bank of Canada are planning to erect a new building on St. James St., Montreal.

The Standard Bank are building a new branch at Coalhurst, Alta.

A new building is being erected by the Canadian Bank of Commerce on Charlotte St., Sydney, N.S.

An extension is being made to the Canadian Bank of Commerce at Fort and Government Streets, Victoria, B.C.

CANADIAN BUSINESS FAILURES

The number of failures in the Dominion, as reported by R. G. Dun and Co. during the week ended October 15, 1920, in provinces, as compared with those of previous weeks and corresponding weeks of last year, are as follows:—

UNION OF BRITISH COLUMBIA MUNICIPALITIES

Urge Province to Establish Hydro Commission and Operate Technical Schools and Hospitals—Oppose Tax Exemption of Government Property

THE 17th annual convention of the Union of British Columbia Municipalities was held in Nelson, B.C., October 6-8, 1920. The president, J. Loutet, of North Vancouver, in his opening address enumerated as among the problems pressing for solution the matter of the provincial government's proposed local government board. Quoting the attorney-general's intimation that "the government could not forego its right to select the board, which it would be responsible for creating," President Loutet suggested that the government permit the union to select two out of the three members, and that a deputation present the matter to the government. Abolition of the immunity of the crown from taxation in incorporated areas was urged as an ideal to be striven for, and in this connection the case was cited of the Soldier Settlement Board declining to pay taxes for lands that had come into its hands by soldier settlers allowing them to lapse.

President Loutet stated that the problem of increased revenue for municipalities was so far from a satisfactory solution as ever, and he endorsed the proposal for a conference with the federal and provincial governments on the question. The present duplication of taxes and the encroachment of governments on munipical revenues ought to be done away with, he said. In connection with the Hospitals Act, the president represented it as a danger to the small municipalities, particularly those maintaining hospitals of their own, which found they also had to pay for patients going to the larger hospitals. He also said new legislation would be required to prevent unnecessary difficulties over assessments.

The union voted down various proposals for further governmental investigations into the high cost of living. Among others of its acts, expressed through resolutions, it urged the provincial government to take over all high schools and technical schools, and also to take over and operate the hospitals; dissented from both Dominion and provincial governments holding their lands within municipalities free from taxation; asked for a conference of federal and provincial, civic and municipal officials, to co-ordinate the income taxes and to correct overlapping; recommended that the municipalities be given control over clubs, the same as over hotels; authorized the appointment of a committee to study the whole question of municipal taxation; asked the provincial government to inquire into fire insurance rates; asked the Dominion government to let land once held by soldiers and abandoned remain under taxation; and approved the extension of consolidated arrears privileges to returned men who arrived too late to take advantage of the act.

Want Provincial Hydro Commission

The provincial government was asked to constitute a hydro-electric commission. In supporting the proposal Mayor Acres, of Grand Forks, stated that when the Granby property was operating, Grand Forks purchased its power at 1½ cents per kilowatt hour, but now it was charged 3 cents on the ground that the power company had to keep up extensive maintenance on a large system. The company could go as far as it liked, and make new rates any time it liked, he said, without being required to justify them.

The executive was instructed to appoint a committee to watch the proceedings of the Vancouver tax inquiry, to be conducted by Dr. Brittain, of Toronto, under the bureau of municipal research.

It was also decided that the connection of J. A. McDiarmid with the union should be defined in the constitution as that of a "parliamentary agent" rather than "solicitor." Efforts are to be made to bring Victoria and South Vancouver into the membership. A resolution was adopted, abolishing the union's advisory board, which in the past has assisted the executive in the capacity of a conference body.

Provincial Board not Favored

By a vote of 53 to 14, the Union of British Columbia municipalities refused to express approval of the proposed local government board. With the change of one vote, the same division went on a proposal to enlarge the powers of the inspector of municipalities, this being defeated by 54 to 13.

The convention opposed the exemption of church property from taxation; endorsed the government's superannuation scheme for firemen and policemen, and asked its extension to other municipal servants; asked the exemption of motor fire apparatus from provincial license, the elimination of the speed limit when answering fire calls, and the relief of drivers in such cases from personal responsibility for accidents; and asked power to construct roads through soldier settlements now enjoying the immunity of Crown lands.

Election of Officers

Port Alberni was selected as the meeting place next year. The annual election resulted in the choice of the following officers for the ensuing year: President, J. Loutet, North Vancouver, re-elected; vice-president, Ald. C. F. McHardy, Nelson; secretary-treasurer, A. W. Gray, New Westminster, re-elected; executive committee, A. Lockley, Esquimalt; T. W. Vance, North Vancouver; L. E. Marmont, Coquitlam, J. J. Johnston, New Westminster; E. J. Chambers, Penticton; J. R. Colley, Kamloops; W. Bews, Revelstoke. Instructions were given to the executive to re-engage Mr. McDiarmid as "parliamentary agent" if he were available.

The Municipal Officers' Association of British Columbia, with 26 municipalities represented at its first annual meeting, elected the following officers: President, J. G. Farmer, North Vancouver district, re-elected; vice-president, B. C. Bracewell, Penticton; secretary-treasurer, R. F. Archibald, North Vancouver city. Executive, O. W. Ross, Oak Bay; R. F. Blandy, Port Alberni; C. W. Webb, Chilliwack district; Wm. T. Riley, South Vancouver; H. S. Cowper, Saanich.

GUARANTY TRUST BOND DEPARTMENT

The business heretofore conducted by the bond department of the Guaranty Trust Co. of New York has been taken over by the Guaranty Co. of New York. This change has been effected because the growth of the trust company's business in securities has made necessary a type of organization that will be free to give the fullest possible service through the medium of its own branch offices throughout the country. This change is one of corporate organization only, and in management and policy the new company will be the same as its predecessor, the bond department of the Guaranty Trust Co.

ASSOCIATION OF LIFE INSURANCE PRESIDENTS

"Seventy-five Years of American Life Insurance: A History and Prophecy of the Nation's Growth," will be the theme of the fourteenth annual convention of the Association of Life Insurance Presidents, to be held in New York on December 9th and 10th. Original statistics are now being contributed by the companies as a basis for showing definitely the present ramifications and extent of life insurance's relations to policyholders and to the nation as a whole. It is expected the two days' discussions will develop enlarged and additional fields of service through the projection of this data upon the rapidly growing background of the business.

The National Convention of Insurance Commissioners will meet in New York the same week as the life presidents, the dates of the commissioners' sessions being December 6th, 7th and 8th. The Association of Life Insurance Counsel will also meet that week in New York, its dates being December 7th and 8th.

THE

EXCHANGE WITHIN THE EMPIRE

Suggestion to Centralize Finance Not Likely to Produce Any Result—Trade Cannot be Forced in This Way

By A. B. Barker

ONE of the interesting suggestions at the recent conference of the Chambers of Commerce of the Empire was that of a London, England, banker, N. W. Darling, in connection with his plan to stabilize exchange by a concerted movement within the Empire. His suggestions included an increase of the capital stock of the Bank of England from £15,000,000 to £20,000,000, the new capital to be provided by the colonies in varying proportions. The weak point in his exchange proposals, however, was promptly pointed out by Sir Edmund Walker, who stated, that so far as Canada was concerned the geographical position of the country made us financially dependent on New York in the matter of foreign exchange.

The inherent defect of Mr. Darling's scheme, however, was not mentioned, and that is that such action on the part of the colonies would be in direct opposition to their declared policy of managing their own financial affairs. As minority shareholders, their task would simply be to provide the money, and have it managed for them by those over whom they would have no adequate control. What real influence has the minority in any business, except of course the right to criticize, usually without effect? This feature would remain, even if the act of 1844, under which the Bank of England is now working, were adequate, and we have Bagehot's word that the act referred to is so badly conceived that in time of stress it is workable only because it is suspended.

Centralization Not a Success

The main point of Mr. Darling's plan is to centralize the financial authority in London. This plan in politics proved a lamentable failure, and when applied to business has never been a marked success—in Canada, at any rate—as the controlling authorities were too far away to realize local conditions, and would not delegate sufficient powers to any local body to act freely.

Such a plan might be worked in the case of a country not so highly developed industrially—China, for example—as in this case London supplies all the capital; but for countries like Canada, and the other self-governing colonies, the less the outside authority is in evidence the less the chance of friction. London's pre-eminent financial position was gained by service, and in proportion as she is able to continue to render service her position is secure. It must, however, rest on that foundation, and not on defined authority.

Finance Must Result From Trade

Canada will gladly co-operate in any movement to stabilize exchange. She must, if her foreign trade with Great Britain is to continue as in the past, but it must be because the trade connection is mutually profitable, not because she is forced to do so by reason of a long-term contract, interpreted by a body the interests of the majority of which might conflict with hers.

These discussions, however, serve the useful purpose of defining the objective arrived at. In the movement towards that objective, however, Canada's right to decide on the plan of action must be uncontrolled by any organization outside her boundaries.

In commenting on the [illegible] of their [illegible] in the late war, a prominent Australian is reported to have said that in the next war in which the Empire is engaged Australia would come in as an ally of Great Britain, not as a colony, and this is a fair illustration of the terms on which any co-operation of Canada in this movement can be considered.

It is possible to restrict trade in commodities by import and export duties, but experience has shown the utter futility of trying to restrict the international movement of money when there is a profit in prospect.

TORONTO LIFE UNDERWRITERS' ASSOCIATION

A meeting of the Toronto Life Underwriters' Association was held on October 7th, the feature being an address on "Income Insurance" by E. J. L'Esperance, manager of the Imperial Life Assurance Company in Montreal. A suggestion made by O. B. Shortly, president, that an educational conference be held in November was unanimously approved, and plans are being made accordingly.

"Unless you are prepared to see that the widow receives an income from her life insurance, or unless there are good reasons why other forms of insurance should be sold, you should sell the prospect income insurance," said Mr. L'Esperance. Only by so doing, he pointed out, can the agent render the utmost service to the policyholder. The speaker also dealt with other sales points, urging that life insurance was such a desirable commodity that it had only to be shown in order to be sold, provided that the prospect needed insurance and was in a position to buy it.

COMMUNITY LOAN AND INVESTMENT CO.

"Intensive colonization of a practical nature" will be the principal activity of the Community Loan and Investment Co. which was recently incorporated in Winnipeg, with a capital of $3,000,000 7 per cent. preferred stock and $1,500,000 non-par stock. The president is Geo. W. Prout, who played an important part in the inauguration of the Manitoba Rural Credits scheme. In a statement to *The Monetary Times* Mr. Prout expressed the opinion that "intelligent and well-directed financial assistance is necessary to successful colonization. He continues:—

"The company is empowered to establish local boards of directors which will look over new business, advise with borrowers and give them, as well as our central board, practical advice. Our local board members will all be shareholders of the company. The company intends to get away from the well beaten path of the mortgage company, in that it intends to do business with the beginner as well as the man now on the land who is under-functioning, so to speak. Its customers will be got through three channels: (1) The local boards; (2) British agencies; (3) United States channels.

"Its loans to farmers will be on the amortization system at twenty years. It will in most cases purchase the land outright and sell outright to the settler at a reasonable profit, taking a small cash payment down. It will through its local board maintain a very close relation to the borrower, help him whenever help is needed, advise him when such is required. It will market his produce, if he so desires, and take care of his purchases, if he so wills it, at a minimum of cost. It will in each case make a survey through its local board of a settler's needs and in conjunction with it assist the settler to function at full capacity. Presently we expect 100 such local boards consisting of ten directors each to be established in Manitoba.

"After making some progress here it is our intention to reach out to Ontario and the maritime provinces and duplicate our work there. We want to be able to settle an incomer in any province in the Dominion.

"The powers of the company are wide. It includes the issuing of bonds. We hope to be able to impress capital that we have got the real solution of the colonization problem and to interest it in the purchase of the company's securities. Already we have a waiting list of over two hundred reliable farmers, now on the land, who need our assistance. We are now investigating these farmers through our local organizations.

"While the company's work will savor of the helping hand, yet no loans will be taken on where the borrower's character and capacity is not proved. The preferred stock is issued at par and pays 7 per cent. The non-par stock is given with the preferred stock by way of bonus, and each shareholder comes in on the same basis."

Premises in Merchants Bank Building in each city

BUILDING PERMITS AGAIN DECLINE IN AUGUST

Decrease More Pronounced Than Previously—Only Provinces to Show Increases Were Prince Edward Island and Quebec

BUILDING permits issues in fifty-six cities showed a decline during August, 1920, falling from $13,025,560 in July to $9,439,807, or a decrease of not quite 28 per cent. Prince Edward Island and Quebec were the only provinces to register increases in this comparison, while of the reductions reported in the remaining provinces that of $1,226,768 in Alberta was the most pronounced.

As compared with the figures for the corresponding month in 1919, there was a decrease of $2,476,238, or nearly 21 per cent. in the building permits issued, the value for August, 1919, having been $11,916,045. In this comparison, British Columbia alone reported an increase, declines being registered in the remaining provinces.

Imports Show Further Falling Away in September

Value of Exports is Also Considerably Lower—Principal Decline was in Agricultural and Vegetable Product—Wood and Paper Sent out of the Country Also Reduced

A FURTHER falling away in imports is shown in the September trade statement of the Department of Customs, the figures being $115,121,588, as compared with $124,318,014 in August. The trade showing, however, was less favorable than in August, inasmuch as the decline in imports was accompanied by a great decline in exports from $112,278,064 to $94,389,685.

For the six months of the fiscal year, merchandise entered for consumption totalled $713,012,191, while domestic merchandise exported amounted to $548,780,172, making an unfavorable balance for the first half of the year of $164,232,019, as compared with a favorable balance last year of $127,682,685.

The value of agricultural and vegetable products imported during September was lower than in August, while fibres and textiles also showed a decline. There were slight increases in wood and paper, etc., chemicals and chemical products and miscellaneous products, but all other classes of imports showed decreases.

Under exports the principal decline was in agricultural and vegetable products, the figure being $20,606,790, compared with $28,065,382 in August. There was a slight increase in chemical products, and miscellaneous products were considerably higher, but all other classes showed reductions, including wood, paper, and wood products, etc.

The following table gives the details:—

IMPORTS ENTERED FOR HOME CONSUMPTION

	Month of September				Six months ending September			
	1919		1920		1919		1920

Notice is hereby given that a dividend of Three per cent. upon the capital stock of this Bank, being at the rate of twelve per cent. per annum, has been declared for the quarter ending 30th November next, together with a bonus of one per cent., and that the same will be payable at the Bank and its Branches on and after Wednesday, 1st December, 1920. The Transfer Books of the Bank will be closed from the 16th November to 30th November next, both days inclusive.

By Order of the Board,

JOHN AIRD,
General Manager.

Toronto, 15th October, 1920. 260

DIVIDEND NOTICE

MURRAY-KAY COMPANY, LIMITED

Notice is hereby given that a Dividend of one and three-quarters per cent. for the three months ending October 31st, 1920 (being at the rate of seven per cent. per annum), has been declared on the Preference Shares of the Company, and will be payable on November 1st, 1920, to Shareholders of record at the close of business on October [illegible], 1920.

The Transfer Books of the Company will be closed from October 21st to 30th, 1920 (both days inclusive).

By order of the Board

FRANK [illegible]
Secretary.

Toronto, October 19th, 1920 258

DEBENTURES FOR SALE

DEBENTURES, TOWN OF KENTVILLE

Sealed tenders addressed to the undersigned and marked "Tenders for Debentures" will be received up to noon on October 25, 1920, for the purchase of the following debentures:—

$25,000.00 to pay Water Works Debentures maturing January 1, 1921, in denominations of $500.00 each, and dated November 1, 1920.

$2,500.00 to pay School Debentures maturing January 1, 1921, in denominations of $500.00 each, and dated November 1, 1920.

$1,300.00 to pay Exhibition Ground Debentures which matured on November 1, 1919, in denominations of $100.00 each, and dated November 1, 1920:

$2,300.00 for the purchase of a Chemical Engine for the Fire Department, in denominations of $100.00 each, and dated November 1, 1920.

All of the above debentures will bear interest at six per cent. per annum, payable half-yearly, and said debentures are to be issued under the Authority of an Act of the Legislature of the Province of Nova Scotia passed at the last session.

These debentures redeemable in 25 years.

The highest or any tender not necessarily accepted.

Dated at Kentville, Kings County, N.S., this 8th day of October, A.D., 1920. 254

J. CARROLL,
Town Clerk.

ACCOUNTANT.—Man thirty five years of age. Thoroughly familiar with Costs, Credits, and Financial Work. For past five years in charge of Accounting Department large Western Corporation. Open for engagement October 1st. Box 345, *Monetary Times*, Toronto.

WANTED.—A strong British Company for Hail Insurance in Western Canada, either General Agency or management. Several years' experience with one of the most successful companies now operating. My experience in both management and field work together with several years' connection will assure good income. All correspondence confidential. Apply Box 555, *Monetary Times*, Toronto.

THE DEBENTURE COMPANY
OF CANADA, LIMITED
AUTHORIZED CAPITAL, $500,000
Head Office - - Regina, Saskatchewan
[illegible]

Griffith R. Hughes, a British Columbia chartered accountant, is charged with embezzling a large sum from David Spencer Ltd., of which he was confidential adviser for several years.

Tariff Commission Now in Protectionist Centres

Remainder of Hearings Will be in East—Summary of Evidence in Regina, Brandon, Winnipeg, Fort William, Port Arthur and Sault Ste. Marie—Strong Tarriff Reduction Sentiment in Middle West—Iron and Steel Bounty Urged

NOW that the tariff commission has reached the [illegible] provinces, the weight of the evidence received will be on the side of protection. During the past ten days the sessions have been as follows: October 11 and 12, Regina; October 13, Brandon; October 14, Winnipeg; October 15, Fort William and Port Arthur; October 18, Sault Ste. Marie; October 21, Windsor. The itinerary for the coming week has not at the time of writing been announced.

The evidence in Regina was colored by local politics, as the federal tariff has played an important part in recent provincial elections. Hon. W. F. A. Turgeon, attorney-general, and Hon. George Langley, Minister of Municipal Affairs, denounced the policy of protection, and advocated the adoption of the farmers' platform. Hon. Mr. Turgeon is the most prominent member of the Martin government. Twice has the Saskatchewan legislature adopted unanimously what is practically a free trade resolution. In 1911, after the reciprocity pact was announced, the two parties joined hands in its endorsation, and also demanding that the freedom of trade be further extended. Again last session the Tory remnant in the legislature supported a government resolution of endorsation of the farmers' free trade policy.

Hon. M. Turgeon quoted these as evidence of the unanimous demand in Saskatchewan for fiscal reform. After the report of the House of Commons cost of living commission on the textile trade was published, and a further investigation ordered by the court of commerce, the Saskatchewan government appointed J. F. Frame, K.C., to review the evidence. Mr. Turgeon quoted from the interim report of the ill-starred court of commerce to substantiate his contention that the duty enhanced the price. This report was made just previous to the resignations of Messrs. O'Connor and Murdock, and it states that the abnormal profits were due in a considerable degree to the high protection given the textile trade. Hon. Mr. Turgeon wished to know when the inquiry would be continued and completed. Sir Henry Drayton said until the authority of the court of commerce was established by the privy council it would not continue that inquiry, but that the tariff commission would do so, and he would arrange for a special session at which the Saskatchewan government could be represented.

In Brandon, representatives of the farmers urged that the tariff was a burden on the farm. Farmers of Manitoba are demanding a reduction of the tariff rates on farm necessities, J. L. Brown, president of the United Farmers of Manitoba, told the commission. Mrs. J. H. Wood, of Oakville, Man., president of the United Farm Women of Manitoba, in a statement read, outlined the privations suffered by the farm women. In a survey made recently she said that the 18 farm homes visited are existing on necessities, without luxuries in any shape or form.

Evidence Reviewed in Winnipeg

In Winnipeg the farmers and manufacturers [illegible] their arguments already presented. Both Norman Lambert, secretary of the Canadian Council of Agriculture, and [illegible] Bristol, manager of the Tariff Department of the Canadian Manufacturers' Association, made strong presentations of the arguments already made respectively by farmers and low tariff men on the one side and by manufacturers and protectionists on the other. The case of Mr. Norman Lambert before the country was strengthened by the [illegible] of Premier Norris to tell the commission how the Manitoba Legislature had passed unanimously, on two different occasions, resolutions calling for an immediate all-round reduction of the customs tariff, the establishment of a 50 per cent. preference to Great Britain, as well as the extension to the Mother Country of all tariff concessions given other countries, and the gradual reduction of the duties against her until they disappeared in five years, or as quickly as possible; unrestricted reciprocal trade in natural products with the United States along the lines of the 1911 reciprocity agreement; the placing on the free list of all foodstuffs and agricultural implements; the obliging of all protected corporations to publish annually a statement of their turnovers and earnings, and a public hearing before a special parliamentary committee of every claim for tariff protection.

To bolster Mr. Bristol's case came also T. R. Deacon, president of the Manitoba Bridge and Iron Works, who said he would "quit while the going was good" if protection were taken off his products, and F. A. Gemmel, mayor of Selkirk, who wanted industries in his municipality, especially one insulation company, which might give a partial market to western wheat straw. Edward Parnell, chairman of the prairie branch of the Canadian Manufacturers' Association, also rendered aid with a long and exhaustive consideration of the income tax collections in various countries to show that in Canada all direct taxes on income in the aggregate were obtaining as much as they reasonably could.

Iron and Steel Bounty

At Fort William, the boards of trade of this city and of Port Arthur urged a bounty on all Canadian iron ores mined and marketed. The Port Arthur Board of Trade said that at least 50 cents a ton would be necessary to secure this desirable result; the representative of the various owners of iron mines wanted seventy-five cents, and the Fort William Board of Trade representatives say that anything less than one dollar a ton would be of little use in inducing proprietors of iron mines to work their properties. All agreed that the bounty should be paid to the producer of the iron ores, and not to the smelters, pointing to the failure of former attempts to get the iron mining industry on its feet by such means. At present the iron industries of Canada import annually two and a half million tons of raw ore from the United States, or 96 per cent. of the iron ore utilized in the Dominion to-day. Production of the iron ore in the United States is cheaper than in Canada because all the ores being utilized there are what is known as "merchantable" ores, while the low-grade iron ores of Canada need "beneficiation." A duty on the imported raw material is inadvisable because it would work a hardship on the smelters, which use several grades for mixing purposes to get the best results and which would, therefore, have occasionally to get American ores in any case.

Sir Henry Drayton was evidently not convinced of the advisability of giving at present the bounties asked for. Canadian industries can get cheap supplies of the American ores, and in view of the fact that former iron bounty schemes had failed to establish the industry, he questioned every witness closely as to the cost of production in Canada, [illegible] and the values of the ores [illegible]

How Steel City Has Grown

[illegible] the iron and steel industry was [illegible] A memorandum presented [illegible] Trade by J. Hussey was largely a [illegible] the Port Arthur Board of [illegible] bility, from a national [illegible] the Canadian low-grade [illegible] It differed mainly, however, [illegible] feel, as the Fort Wil- [illegible] cents a ton is not enough, [illegible] ton bounty would be of [illegible]

H. S. HOLT,
Directors

To the Shareholders:

We have audited the books of the Ogilvie Flour Mills Company, Limited, at Montreal, Fort William, Winnipeg and Medicine Hat, for the year ending 31st August, 1920, and have obtained all the information and explanations we have required; and we certify that, in our opinion, the above Balance Sheet is properly drawn up so as to exhibit a true and correct view of the state of the Company's affairs according to the best of our information and the explanations given to us and as shown by the books of the Company.

CREAK, CUSHING & HODGSON,
Chartered Accountants.

260

W. C. Franz, president of the Algoma Steel Corporation, when appealed to, advanced the opinion that considerable development would take place with such a bounty paid to the miners. There is another interesting possibility which has been advanced as an article of faith by steel men in Port Arthur, Fort William and Sault Ste. Marie, to which Mr. Franz also gave his adherence, and that is that further prospecting of the iron ranges in Canada would bring to light other deposits of merchantable free-milling iron ore that can go to the blast furnaces directly without previous treatment. He did not believe that the Helen Mine, now worked out so far as the merchantable ores were concerned, was the only deposit in this region. The great steel plant here had been started on that reasonable expectation.

Mr. Franz gave comparative statistics of population and value of property in Sault Ste. Marie over a period of twenty years, to show how the steel business had developed it from a few thousands in population, with a total valuation of property under $1,000,000, to a city of 21,000, with a valuation exceeding $23,000,000. The plant rolled the first rail rolled in Canada in 1902, the plant being built in 1901. It now employed 8,600 men. It was a large contributor to the customs revenue, as much of its machinery and raw product could not be obtained in Canada.

OIL STRIKE AT FORT NORMAN

The following statement regarding the recent discovery of oil at Fort Norman, on the Mackenzie River, was made on October 18th by C. O. Stillman, president of the Imperial Oil Co., Ltd.: "With reference to our well on the Mackenzie River, the drilling machinery was moved in in 1919 and erected in the fall. The drilling crew remained in camp there all winter for the purpose of beginning work early in the spring, and drilling operations have proceeded all this season. On the 25th of August, at a depth of 783 feet, oil was encountered which flowed out of the 6-inch pipe for thirty minutes, when the well was capped and shut in. Any estimate as to the amount of oil this well would produce is only a guess, as there was no tankage available and an accurate test could not be made.

"We consider this an important strike, and, scientifically, of much value. From a commercial point of view, however, it is not of immediate value, as it will probably be years before it can be made available in quantities for the use of the Canadian market on account of its remoteness from any refinery outlet. This well is situated 45 miles below Fort Norman, 900 miles from the nearest calling point of a river boat, 1,200 miles from the nearest railroad and 1,500 miles north of Edmonton, the nearest city, via the present route. The only means of access to the location at the present time is down the northern rivers, which will only float boats of four to five-foot draught, and several rapids necessitate the unloading and transportation of the cargoes overland and reloading on barges again. This precludes bringing oil up the river in any quantities until more adequate transportation facilities are provided.

"The modern scientific method of transporting oil from remote oilfields to the nearest railroad points is by pipe-line. It would be necessary to demonstrate by actual drilling and production that there was a sufficient quantity of oil to justify the laying of a pipe-line, which, in itself, would probably cost fifty million dollars. There is another important element which militates very much against the commercializing of any oil found in this territory; that is, the extreme cold which makes the rivers navigable for only three or four months of the year. The extreme cold in this Arctic region would also militate very largely against the handling of the oil in the winter time. With these facts in mind, it must be realized that to render the oil from this Arctic region commercially accessible would prove very costly, and the problem will require great study before any means can be devised of getting the oil out to compete with crudes from other centres of production."

NEW MONTREAL FINANCIAL HOUSE

Eastern Canada Securities, Ltd., is the name of a new firm organized in Montreal to carry on business as real estate and business brokers, specializing in pulp and paper bonds. C. F. Graham is president and J. Churchill secretary-treasurer. A "Financial and Investment Review" is being published, the first number, for September, being a special pulp edition.

INSTITUTE OF COMPANY SECRETARIES

At the first open meeting of the Canadian branch of the Chartered Institute of Secretaries of Joint Stock Companies and other Public Bodies, held in Montreal on October 11, an address on "The Aims and Objects of the Chartered Institute of Secretaries" was delivered by Mr. William Watkins, J.P., F.C.I.S., of London, England, past president of the institute. Mr. Watkins was introduced to the audience by Mr. William MacInnes, A.C.I.I., A.C.I.S., chairman of the newly formed Montreal branch, who stated that Sir Arthur Currie had been pleased to accept the presidency of the branch and that Dr. J. A. Nicholson, B.A., registrar of McGill, and Mr. Watkins, the lecturer, had been elected vice-presidents.

Mr. Watkins, after giving an account of the inception and progress of the institute in England and its branches in the British Isles, said that the great increase in the number of joint stock enterprises in recent years necessitated the training of secretaries to undertake professional secretarial duties in connection with these companies. When the institute was started in Great Britain men were found in secretarial positions who were not qualified in company law, etc., to render efficient service to the directors and shareholders whose interests they were there to guard. In Great Britain one found to-day that no self-respecting company was without a member of the Institute of Secretaries as its secretary and a chartered accountant as its auditor. The public now demanded that the affairs of companies in which its money was invested must be in the hands of trained professional men. Mr. Watkins instanced the work of the institute in England in promoting uniformity in the transfer of shares in joint stock companies. He explained that some years ago each secretary had his own ideas in this regard, and that stockbrokers and others were much perplexed in complying with each individual secretary's requirements, but by the compilation and issue of a standard text-book entitled "Secretarial Practice," published by the institute, uniformity had been attained, and that this text-book had since become the standard authority on the subject. The speaker pointed out that with the co-operation of prominent secretaries in Canada the work of the institute would be beneficial to the profession at large, and that within a few years the institute would become established as a useful body of expert opinion as had the parent organization in Britain, many of whose members had been called upon from time to time to give expert evidence before Royal Commissions in matters affecting secretarial practice. Mr. Watkins expressed his satisfaction that Sir Arthur Currie had seen fit to accept the presidency of the Canadian branch, remarking that his great services to his country and the Empire had won the admiration of all members of the institute in Britain.

At the conclusion of Mr. Watkins' address the meeting was thrown open for discussion, and Mr. MacInnes, the chairman, explained in answer to questions that it was the intention of the local branch to form a students' society, as the institute had provision for registered students, and also to arrange with certain educational authorities for courses to be held to enable students to study for the professional examinations of the institute, which will be held from time to time at McGill University. Enquiry forms would be issued to all those who wished to ascertain their eligibility for membership.

EFFECT OF INCORPORATION ON CONTRACT

When Party Knew Partnership was to be Incorporated, Contract Cannot be Enforced Unless Ratified by Company

WHERE an agent enters into a contract with one of the members of a partnership for the sale of goods on a commission basis with full knowledge of the fact that the partnership is shortly to be incorporated as a limited company, and continues under the contract after the formation of the company without the contract being ratified by the company, the members of the partnership are only liable for commissions earned before such company is incorporated. This is the substance of the Alberta Supreme Court's recent judgment in the case of Power v. Edmonton Lumber Exchange.

The facts of the case were that the defendants Cavanaugh and Nierengarten carried on business in partnership as lumber merchants under the name of the Edmonton Lumber Exchange, from the 22nd to the 26th of August, 1919, on which latter date one Shore was admitted as a member. The partnership agreement which was entered into when Shore came in recites that the original members, Cavanaugh and Nierengarten were at its date taking out letters of incorporation and intended to carry on the business as a limited company as soon as the same could be incorporated, and it expressly limited the term of the partnership until the incorporation could be effected. On September 6, 1919, while this partnership was still subsisting, and before the company was incorporated, Cavanaugh entered into an agreement with Power in the name of the partnership under which Power undertook the sale of coal, lumber and other products in Manitoba and Saskatchewan on a commission basis. He earned commissions under this agreement in respect of which a balance of $685.55 remained owing to him. He alleged that it was the partnership that owes him this money, and he, therefore, sued it and its two original members for the same.

Agreement Bound Partners

Justice Walsh in his judgment says:
